Bibliographie der Filmmusik: Ergänzungen II (2014–2020)

Zusammengestellt von Hans J. Wulff und Ludger Kaczmarek

Mit der folgenden Bibliographie stellen wir unseren Leser_innen die zweite Fortschreibung der „Bibliographie der Filmmusik“ vor, die wir 2008 in *Medienwissenschaft: Berichte und Papiere* (87, 2008; Ergänzung I: 157, 2014) begründet haben. Sowohl dieser synoptische Überblick wie auch diverse Bibliographien und Filmographien zu Spezialproblemen der Filmmusikforschung zeigen, wie zentral das Feld inzwischen als Teildisziplin der Musikwissenschaft, am Rande der Medienwissenschaft, mit Übergängen in ein eigenes Feld der *Sound Studies* geworden ist. Eine ganze Reihe themenbezogener wissenschaftlicher Zeitschriften erscheint inzwischen weltweit, Tagungen und Themenbände zur Film- und weiter zur „Medienmusik“ haben geradezu exponentiell zugenommen. Es deutet sich an, dass die in der Praxis von Kunst, Unterhaltung und Spiel längst zusammengewachsenen Sinnesmodalitäten auch in der akademischen Reflexion endlich die Beachtung als multimodale und synthetische Kunstform finden, die sie verdienen – in der Aufnahme eines Disziplinenübergreifenden Projekts.

Die Menge der Untersuchungen nachzuhalten, ist aufwendig und erfordert enormen Recherche-Aufwand. Wir bitten darum alle Nutzer_innen, uns auf Übersehenes hinzuweisen, uns auf je eigene Beiträge aufmerksam zu machen und uns spezielle bibliographische Sammlungen zur Verfügung zu stellen. Es ist geplant, das bibliographische Projekt der „Bibliographie der Filmmusik“ fortzuschreiben, weil es – auch aufgrund der multidisziplinären Beiträge – zunehmend schwieriger wird, das Feld in seiner ganzer Breite zu dokumentieren.

In das Verzeichnis sind Hinweise von Franz Obermeier, Jürg Stenzl, Wolfgang Thiel und Peter Wegele eingegangen.

Abend, Janine: *Rezeption von Filmmusik: Eine empirische Untersuchung anhand der Filme „Der Pianist“ und „Vitus“ unter besonderer Berücksichtigung der musikalischen Symbolik*. Diss. Hamburg: Universität Hamburg 2015, VIII, 426, (1) S.; [[URL](#)].

Zusammenfassung: Innerhalb der bisherigen Filmmusikforschung liegt der Fokus allzu oft allein auf der Filmmusik selbst. Das Erfassen einer filmischen Aussage sowie von Bedeutungsgehalten und Wirkungen der eingesetzten Musik erfolgt dabei aber immer durch den Rezipienten, der das Wahrgenommene in Beziehung zu eigenen Erfahrungen und Erwartungen setzt. Ziel der vorliegenden Untersuchung war es deshalb, tatsächliche Wahrnehmungsweisen der Zuschauer in einem möglichst natürlichen Rezeptionskontext zu erforschen. Anhand der Filmbeispiele *Der Pianist* (2002) von Roman Polański und *Vitus* (2006) von Fredi M. Murer wurde in einer qualitativen Studie ermittelt, inwiefern der Zuschauer insbesondere für den Handlungsverlauf besonders bedeutsame Filmmusik wahrnimmt sowie die darin zu verortenden Bedeutungszusammenhänge erkennt und mit dem Geschehen im Bild verknüpft. Dazu wurden zwei Stichproben von Zuschauern in verschiedenen Altersgruppen (jüngere und ältere Erwachsene) sowie eine kleine Expertengruppe herangezogen, um zudem zu untersuchen, in welchem Maße sich durch unterschiedliche spezifische Eigenschaften, Erfahrungen und Vorwissen Auswirkungen auf das Erkennen musikalischer Bedeutungen ergeben. Die Expertenbefragungen dienten dabei einerseits dazu, die Ergebnisse einer filmischen und musikalischen Filmanalyse hinsichtlich der Frage zu validieren, was bzw. wie rezipiert werden könnte. Andererseits lieferten sie einen ergänzenden Vergleich mit den zwei Zuschauergruppen bei der Beantwortung der Frage, was bzw. wie tatsächlich rezipiert wird. Alle Probanden wurden direkt nach der jeweiligen Filmrezeption mittels Leitfadeninterviews zu ihrer filmmusikalischen Wahrnehmung befragt. Ihre Aussagen wurden sodann mittels

qualitativer Inhaltsanalyse untersucht und verglichen. Betrachtet man die Erkenntnisse, welche sich aus den Vergleichen der Rezeptionsanalysen ergeben, so wird deutlich, dass bei der Rezeption dieser beiden Filme die extradiegetische Musik im Allgemeinen von Personen ohne ausgeprägte filmische oder musikalische Vorbildung recht unbewusst wahrgenommen wird. Je mehr die musikalische Ebene aber ihre Entsprechung auch in der Handlung selbst wiederfindet, desto eher ist auch bei ihnen ein Bewusstsein über die mittels Musik transportierten Bedeutungsgehalte gegeben. Grundsätzlich sind alle Befragten dazu in der Lage, sich weitergehende Gedanken darüber zu machen, welche wesentlichen Botschaften durch die diegetisch eingesetzte Musik zum Ausdruck kommen oder auch, wie diese Musik im Film eingesetzt ist. Für ein tiefgreifenderes Verständnis ist es allerdings von entscheidender Bedeutung, ob ein Zuschauer nachhaltige filmische oder musikalische Prägungen in den Rezeptionsprozess einbringt, um somit über eine Charakterisierung der Musik hinaus auch in der Musik liegende Symbolik und Bedeutungszusammenhänge aufzugreifen. Die mit steigendem Lebensalter gesammelten Kenntnisse und Erfahrungen führen dabei nicht durchgängig zu Unterschieden im Erkennen musikalischer Bedeutungen, dürften aber einen nicht zu unterschätzenden Einfluss besitzen. Weiterhin zeigt sich unabhängig von den durch die Rezipienten eingebrachten Erfahrungen, dass auch die Struktur und Verwendung der musikalischen Ebene im Film selbst dafür verantwortlich ist, in welcher Weise die Bedeutungen wahrgenommen werden: Transportiert der Film seine Botschaften, wie es bei *Vitus* der Fall ist, eher im gesamtfilmischen Kontext und setzt die verwendete Musik in Beziehung zu einer über den gesamten Film verlaufenden Entwicklung, so haben die überaus Film- oder Musikerfahrenen nicht unbedingt einen Vorsprung, wenn es um die angemessene Interpretation der filmmusikalischen Bedeutung eines eingesetzten Musikstücks geht. *Der Pianist* stellt hingegen ein Beispiel für einen Film dar, in dem sich die Bedeutung der Filmmusik oftmals aus ihrer Verwendung in der jeweiligen Szene ergibt; gerade bei solcher filmmusikalischer Verwendung sind bestehende filmische oder musikalische Erfahrungen überaus nützlich, um tiefergehende Einsichten zu erlangen.

gen. Je eher die Bedeutsamkeit eines eingesetzten Musikstücks durch ihre Verbindung zum gesamten Handlungsverlauf geprägt ist, desto eher ist auch die entsprechende Interpretation ohne direktes Erkennen des Werks, d. h. rein über dessen Charakter und somit im Sinne eines Anklangs, möglich.

Abhervé, Séverine / Binh, N[guyen] T[rong] / Moure, José (sous la dir. de): *Musiques de films: nouveaux enjeux. Rencontre sensible entre deux arts*. Bruxelles: Les Impressions Nouvelles 2014, 203 S. (Caméras subjectives.)

La musique au cinéma semble en pleine phase de mutation, et les questions qu'elle soulève passionnent autant les cinéphiles que les mélomanes: doit-on préférer les partitions originales ou les musiques préexistantes ? des chansons pour commenter l'action ou des scores pour se fondre dans les images ? comment a évolué la musique filmée, qu'en est-il de ses succès et de ses impasses, de ses conventions et de ses audaces ? Pour y répondre, cet ouvrage a convoqué des spécialistes internationaux. Chercheurs infatigables, mais aussi amateurs passionnés, ils ouvrent de nouvelles perspectives en interrogeant les œuvres elles-mêmes, anciennes ou récentes, pour qu'elles révèlent leurs secrets et leurs trésors. Du cinéma populaire américain et de l'industrie bollywoodienne, jusqu'aux exemples plus cinéphiliques de Leos Carax ou de Pedro Almodóvar, du rock à la musique dite minimaliste, en passant par les œuvres fondatrices de Nino Rota ou d'Elvis Presley, ce panorama se veut à la fois éclectique et subjectif, tout en faisant profondément avancer la réflexion sur le sujet. Ces recherches sont complétées par une fructueuse discussion où interviennent des professionnels français, sur l'évolution actuelle de la musique pour l'écran.

„Musikalischer Minimalismus in der zeitgenössischen amerikanischen Independent-Kinematographie.“

In kyrill. Schrift. – The dissertation explores the manifestations of minimalism in music in several examples of independent American films (*A Serious Man* [USA 2009, Directors: Ethan Coen, Joel Coen] and *The Ward* [USA 2010, John Carpenter]). The dissertation shows the ways of usage of the music in the film and the problem of correspondence of minimalist aesthetics to the basic concepts of the films in question.

Ackermann, Zeno: Rocking the culture industry/performing breakdown. Pink Floyd's *The Wall* and the termination of the postwar era. In: *Popular Music and Society* 35,1, 2012, S. 1–23.

The article offers a contextual interpretation of Pink Floyd's *The Wall*. It proceeds from the hypothesis that, as a multi-media artifice consisting of album, live shows, and music film, *The Wall* constitutes a significant monument situated at the historical turning-point when the postwar era dissolved into a new ideological alignment. Blending the two themes of rock history and remembrance of the Second World War, *The Wall* proposes an interpretation of mass/popular culture which is surprisingly close to Adorno's and Horkheimer's theses on the "culture industry." The article explores this remarkable – and (determinedly?) self-defeating – conceptual concurrence of a mass-cultural product with the tenets of critical theory.

Aguilera, Christian: *John Williams: sinfonías de un nuevo mundo*. Madrid: T&B Editores, 2018, 325 S.

Considerado de manera unánime uno de los más importantes compositores de la Historia del cine, John Towner Williams se mantiene en activo cuando cumple en 2018 su 60 an-

versario en el mundo del Séptimo Arte. Asociado a algunas de las películas más populares del cine contemporáneo (la saga de *Star Wars*, las tres primeras producciones de la saga *Harry Potter*, *El coloso en llamas*, *Tiburón*, *Superman*, *Encuentros en la Tercera Fase* y un largo etcétera), Williams representa con 51 nominaciones al Oscar (5 de los cuales ha resultado vencedor) la persona viva que ostenta semejante récord y el segundo de toda la Historia de los premios otorgados por la Academia de las Artes y de las Ciencias Cinematográficas de los Estados Unidos. Christian Aguilera, autor de monografías sobre las obras de Jerry Goldsmith y Bernard Herrmann completa su particular trilogía sobre los Grandes Compositores de Música de Cine con la escritura de un libro, el más completo en lengua castellana, llamado a ser de referencia para todos aquellos entusiastas del músico neoyorquino adscrito, de manera especial, al cine de Steven Spielberg en casi una treintena de largometrajes.

Álamo [Caballero], Lamberto del: *El cine y su música: secretos y claves*. Madrid: Ediciones Rialp 2020, 234 S.

Cualquier escena romántica parece incompleta sin una tierna melodía de violín. La amenazadora presencia de unos indios no resulta tan peligrosa sin la percusión de unos inquietantes tambores. Los metales hablarán de sentimientos heroicos, y el saxofón, tal vez, de sensualidad. Crear un ambiente a partir de la música no siempre resulta fácil. Pero quien lo logre será capaz de acompañar a la imagen de una manera sublime y estremecer al espectador en su butaca, hasta hacerle temblar, reír o llorar. Valorar una partitura cinematográfica exige unos conocimientos mínimos de música y de cine, que permitan relacionar con acierto imagen y sonido.

Alfieri, Gabe C.: From "Trivial Little Comedy" to "legitimate Magic": Music and the Making of *The Glass Menagerie*. In: *American Music: A Quarterly Journal Devoted to All Aspects of American Music and Music in America* 35,2, 2017, S. 143–171.

The Glass Menagerie was Tennessee Williams's first success, both commercial and critical, and remains one of the most frequently revived of all American plays. For its original production, Williams himself recruited master theater composer Paul Bowles to write an original score that helped turn "a trivial little comedy of domestic tribulation" into the "legitimate magic" that earned it a Drama Critics' Circle Award and established it firmly among the great plays of the postwar period. An examination of Bowles's *Menagerie* score adds new depth to our understanding of one of the most storied premieres in American theater history, of the play itself, and of the extent to which music aided Williams's progressive vision for "a new, plastic theater" influenced by techniques and aesthetics of the cinema.

Alhuter, Barbara: *Narration durch Filmmusik im Mainstream-Film*. Diss. Wien: Universität Wien 2012, 193 S..

Die vorliegende Arbeit widmet sich der Thematik der Narration durch Musik im Mainstream-Film, wobei die Fähigkeiten von Musik im Zusammenhang mit der Dramaturgie anhand von acht Analysen exemplarisch dargelegt werden. Ziel ist es zu zeigen, wie manigfach nicht nur die Kompositionstypen und -mittel der Scores sein können – und wie groß parallel dazu der Pluralismus an Möglichkeiten der Filmkomponisten ist –, sondern auch die Funktionen der Musik im Film sind. Ihrer gern als passiv oder auch als rein illustrierend bezeichneten Manier wird eine aktive, das Geschehen beeinflussende Rolle gegenübergestellt. Filmmusik ist keine homogene Gattung und hängt von vielerlei Faktoren ab, die weit über die filmwirtschaftlichen Entwicklungen hinausgehen. Da sie auch an soziokulturelle und politische Veränderungen gekoppelt ist, werden zum einen die historischen Wurzeln

von Filmkompositionen erörtert und die Werke zum anderen in ihrem Kontext präsentiert. Durch diese Einbettung und durch die Chronologie der Filmbeispiele – jeder Film steht als die erfolgreichste oder eine der erfolgreichsten Mainstream-Literaturverfilmungen exemplarisch für ein Jahrzehnt des Tonfilms – wird ersichtlich, weshalb sich die Komponisten für die jeweilige Kompositions-techniken entschieden haben, inwiefern sie beispielsweise hinsichtlich der Narration auf die filmische Dramaturgie einwirken mussten und welche Lösungen sie für etwaige fehlerhafte Stellen fanden, um die filmische Logik aufrecht zu erhalten.

Alunno, Marco: The discourse about film music in Colombia: A bibliographical approach. In: *Revista Musical Chilena* 70,225, 2016, S. 73–95.

The motivation to explore the hidden heritage of literature on film music in Colombia, originated from the absence of literature on Latin American film music written by scholars from Europe and the United States, who have traditionally dealt with film music. Since an early period attempts to speak discursively about film music in Colombia appear in articles published in magazines and journals dedicated to cinema, music, art and cultural topics in general. These writings are often addressed to general audiences. Nevertheless there are also a few writings intended for specialized readers. The present article is based on archival research and presents a snapshot of the existing literature about film music in Colombia as a starting point for future studies. (Vorlage)

Alvim, Luíza Beatriz Amorim Melo: Análise schenkeriana de ornamentações de trechos de Beethoven em dois filmes de Jean-Luc Godard. In: *Anais do SIMPOM* 3,3, 2015, S. 682–694.

Neste trabalho, fazemos uma análise schenkeriana de trechos de música de Ludwig van Beethoven presentes em dois filmes de Jean-Luc Godard: *Made in USA* (1966) e *Uma mulher casada* (1964). Godard se vale da repetição de trechos da Sonata op.14 n.1 e do Quarteto de cordas op.59 n.3 do compositor em cada um dos filmes respectivamente e essa característica pode ser observada também nos

níveis mais superficiais da redução schenkeriana desses trechos. Pankhurst (2008) e Salzer (1952), em suas análises a partir de Schenker, já ressaltavam o papel da „repetição escondida” para a unidade de uma determinada obra. Observamos que, em ambos os filmes, a música transmite significações que não estão explícitas e que podem ser reveladas pela análise schenkeriana. Em *Made in USA*, observa-se a presença fundamental da repetição, não tão evidente num filme com tantas reviravoltas, enquanto, em *Uma mulher casada*, é a música que mais imprime a fatalidade e o caráter trágico no filme.

Anderson, Lauren: Beyond Figures of the Audience: Towards a Cultural Understanding of the Film Music Audience. In: *Music, Sound, and the Moving Image* 10,1, 2016, S. 25–51.

Jeff Smith's and Anahid Kassabian's models of film music perception and comprehension are the two most detailed accounts (1998 and 2001, respectively). Since publication well over a decade ago, their frameworks have been widely cited but rarely interrogated. Both models hinge on the idea that 'knowing' music can determine an audience member's response (to both music and film). This article critiques Smith's and Kassabian's theories: my exploratory audience research suggests that audiences' modes of relating to film soundtracks are much more complex than simply 'knowing' or 'not knowing' the music (Anderson, 2011; 2012). A fuller understanding of the role of popular music in film for audiences needs to take into account tastes, vernacular categorisations, senses of identity, and memory (both related to the self, and to the text at hand).

Ashby, Arved: *Popular Music and the New Auteur: Visionary Filmmakers After MTV*. New York: Oxford University Press 2013, 217 S.

MTV utterly changed the movies. Since music

television arrived some 30 years ago, music videos have introduced filmmakers to a new creative vocabulary: speeds of events changed, and performance and mood came to dominate over traditional narrative storytelling. Popular Music and the New Auteur charts the impact of music videos on seven visionary directors: Martin Scorsese, Sofia Coppola, David Lynch, Wong Kar-Wai, the Coen brothers, Quentin Tarantino, and Wes Anderson. These filmmakers demonstrate a fresh kind of cinematic musicality by writing against pop songs rather than against script, and allowing popular music a determining role in narrative, imagery, and style. Featuring important new theoretical work by some of the most provocative writers in the area today, Popular Music and the New Auteur will be required reading for all who study film music and sound. It will be particularly relevant for readers in popular music studies, and its intervention in the ongoing debate on auteurism will make it necessary reading in film studies.

Askerfjord, Christer: *The American Film Musical Genre Today: A New Breed or Just More of the Same? The Development of the American Film Musical 2000–2013*. BA Thesis, Kalmars/Växjö: Linnéuniversitetet, Institutionen för film och litteratur (IFL) 2014, 31 S.; [[URL](#)].

Abstract: Since the introduction of synchronized sound at the end of the 1920s the film musical has had a special place in American film. But even with that special place the interest in the film musical has varied a lot during the 20th century. From the high interest during the “Golden Age” in the 1930s, 1940s, and 1950s, through low interest in the following decades and then renewed interest in musicals with the animated film musicals from Disney in the 1990s. But what has happened after the millennium? Has there been any development in the American film musical genre or is it just more of the same? This thesis tries to answer the question by analyzing three successful film musicals from the period 2001–2013, *Moulin Rouge!* (Baz Luhrmann, 2001), *The Phantom of the Opera* (Joel Schumacher, 2004), and *Les Misérables* (Tom Hooper, 2012) and comparing them to classical traditional musicals. According to this thesis there is a split answer, some areas of the

classical American film musical have developed while other areas still remains the same.

Multimedia events are part of contemporary society. Music, theatre, and visual arts have been increasingly collaborating with each other to offer aesthetic experiences that are as

immersive and multisensorial as possible. Film music has also entered the multimedia arena. Indeed, a very successful type of concert presentation of the film-music repertoire is the multimedia form: a live orchestra plays to projected film clips. This multimedia presentations of film music should be of interest not only to music scholars – film music has undeniably become a favourite repertoire to fuel concert programmes, and multimedia presentations are the most fitting form to present film music. Multimedia presentations should also be of interest to film scholars, as multimedia presentations are a revival of past film-viewing experiences that can be traced back to the silent era. The case study here is John Williams's conductorship of the Boston Pops Orchestra, which has been seminal not only because it brought more film music into concert programmes, but also highly influential for its experiments with the multimedia presentations.

Audissino, Emilio: Golden Age 2.0: John Williams and the Revival of the Symphonic Film Score. In: Sebastian Stoppe (ed.): *Film in Concert, Film Scores and their Relation to Classical Concert Music*. Glücksstadt: VWH Verlag 2014, S. 109–124.

Audissino, Emilio: *John Williams's Film Music: "Jaws," "Star Wars," "Raiders of the Lost Ark," and the Return of the Classical Hollywood Music Style*. Madison, Wisc.: University of Wisconsin Press 2014, xxvi, 317 S. (Wisconsin Film Studies.).

Beginning with an overview of music from Hollywood's Golden Age (1933–58), Emilio Audissino traces the turning points of Williams's career and articulates how he revived the classical Hollywood musical style. This book charts each landmark of this musical restoration, with special attention to the scores for *Jaws* and *Star Wars*, Williams's work as conductor of the Boston Pops Orchestra, and a full film/music analysis of *Raiders of the Lost Ark*. The result is a precise, enlightening definition of Williams's "neoclassicism" and a grounded demonstration of his lasting importance, for both his compositions and his historical role in restoring part of the Hollywood tradition. Audissino, Emilio (ed.): *John Williams: Music for Films, Television, and the Concert Stage*. Turnhout: Brepols 2018, xxiv, 440 S. (Contemporary Composers. 1.).

This volume is a large exploration of the many sides of Williams's output. Once mostly considered a commercial composer and a mere rewriter of previous composers' styles, only recently Williams' music has begun to be taken seriously, and scholars from the music and the film departments have begun to produce research. The present volume seeks to build upon, complement and review what has been written so far on Williams. It is a large exploration of the many sides of Williams's output, aimed at showing the range of his production (not merely focussing on film music) and at analysing the depth of his dramaturgic and compositional skills with selected case studies. To accomplish this exploration, a large team of international scholars has been assembled from all around the world. The contributors come from film, media and music departments – to provide a variety of disciplinary perspectives on Williams's work.

Darin: Introduction: John Williams, composer / Emilio Audissino – John Williams and the musical landscapes: film, television, jazz, and concert halls. Bakels, Jan-Hendrik: *Audiovisuelle Rhythmen: Filmmusik, Bewegungskomposition und die dynamische Affizierung des Zuschauers*. Berlin/Boston: de Gruyter 2016 [2017], viii, 291 S. (Cinepoetics, 3.).

The book explores the relationship of movement and music in film to study the aesthetic principles of audience affect. It begins by a reconstructive analysis and theoretical reflection on the rhythmicity of films – and goes on to show the extent to which the rhythmic dimension of audiovisual images offers access to intersubjective strategies to induce affect in the movie theater.

Bandur, Markus: Mit Weber im Kino. 1: Begleitmusik zum Stummfilm. In: *Weberiana: Mitteilungen der Internationalen Carl-Maria-von-Weber-Gesellschaft* 25, 2015, S. 33–48.

Die Opern Webers und insbesondere die Ou-

vertüren gehörten mit zum Kernbestand der Musikbegleitung beim Stummfilm, sei es in Europa, sei es in den USA. Zwar lässt sich über die usuelle Praxis der Stummfilmbegleitung kaum eine Aussage hinsichtlich der Verwendung von Kompositionen Webers treffen; die Handbücher und Arbeitsmaterialien der Kinomusiker belegen allerdings die feste Verankerung insbesondere der dramatischen Werke im Rahmen der Musikbegleitung, so dass Gleicher auch für die alltäglichen und weniger durchorganisierten Verfahren der spontanen Begleitung von Stummfilmen anzunehmen ist. Inwieweit nun wiederum diese Neukontextualisierung der Werke Webers auf die Rezeption der Musik in Konzert und Oper im Verlauf des 20. Jahrhunderts zurückwirkt(e), kann nur vermutet werden, es steht jedoch außer Frage, dass in der Frühzeit des Kinos breite Schichten der Gesellschaft das Opern- und Konzertrepertoire (und damit auch Webers Musik) erstmals in Verbindung mit dem Stummfilm kennenlernten. (Autor)

Bandur, Markus: Mit Weber im Kino. 2: Der Soundtrack des Tonfilms. In: *Weberiana: Mitteilungen der Internationalen Carl-Maria-von-Weber-Gesellschaft* 26, 2016, S. 51–56.

Die Verwendung präexistenter Musik findet mehrheitlich in der filmischen Realität Anwendung, während die umfangreichere Musik zum Film überwiegend neu komponiert ist. Auch Werke Webers sind in dieser Art in Soundtracks von Spielfilmen seit Beginn der Tonfilmära bis in die Gegenwart verwendet worden. Zieht man von den etwa 50 nachgewiesenen Tonfilmen, in denen Kompositionen von Weber verwendet werden, die Opernverfilmungen und sogenannte Biopics, d.h. Filme zum Leben des Komponisten, sowie die Musikdokumentarfilme und TV-Serien ab, so bleiben ca. 20 Filme übrig, in denen Werke Webers entweder als *On screen music* oder *Off screen music* fungieren. Ein kurзорischer und chronologischer Durchgang durch diese Filme aus der Zeit von 1931 bis 2015 zeigt, dass sich diese „Zweckentfremdung“ zugleich als Rezeptionsgeschichte lesen lässt, als eine Spiegelung des Stellenwerts, den bestimmte Werke Webers in der breiten Öffentlichkeit hatten und haben. Dies gilt insbesondere für ihren Einsatz als *On screen music*, da hier die Erkennbarkeit der jeweiligen Werke voraus-

gesetzt werden muss, damit ihre Verwendung den intendierten Zweck der Personen- und Situationscharakterisierung erfüllen kann. (Autor)

Bang, Derrick: *Crime and Spy Jazz on Screen since 1971: A History and Discography*. Foreword by Pat Irwin. Jefferson, NC: McFarland 2020, ix, 263 S.

Abstract: Henry Mancini's *Peter Gunn* theme. Lalo Schifrin's *Mission: Impossible* theme. Isaac Hayes' theme from *Shaft*. These iconic melodies have remained a part of the pop culture landscape since their debuts during an era when movie studios and TV production companies employed full orchestral ensembles to provide a jazz backdrop for the suspenseful adventures of secret agents, private detectives, cops, spies and heist-minded criminals. Hundreds of additional films and television shows made from the mid-1950s and beyond have been propelled by similarly swinging title themes and underscores, many of which have (undeservedly) faded into obscurity. This meticulously researched book begins with Hayes' game-changing music for *Shaft*, and honors the careers of traditional jazz composers who-as the 1970s gave way to the '80s and beyond-resolutely battled against the pernicious influx of synth, jukebox scores and a growing corporate disinterest in lavish ensembles. Fans frustrated by the lack of attention paid to jazz soundtrack composers-including Mort Stevens, Laurie Johnson, Mike Post, Earle Hagen, David Shire, Elmer Bernstein and many, many others-will find solace in these pages (along with all the information needed to enhance one's music library). But this is only half the story; the saga's origins are discussed in this book's companion volume, *Crime and Action Jazz on Screen: 1950–1970*.

Inhalt: Foreword: Where does this Book Belong?; – Preface: Arriving at the Scene; – Introduction: Two Pictures of a Rose in the Dark. – Part I: *Modes of Perception and Modes of Expression*: – 1. First ideas in a new medium: the cinematic suspension of disbelief; – 2. One description of how the mind may move toward understandings; – 3. New paradigms and new expressions; – 4. Theories of meaning-media, messages, and how the mind moves; – 5. The relevance of the mechanism-lessons to carry forward from an already obsolete medium; – 6. Frames versus shots, surface versus window; – 7. What the surface of the screen can tell us about language; – 8. Language integrates our perceptions as surely as the nervous system integrates our sense data–hallucination or metadata?; – 9. Letting the mind surround an idea: an introduction to Wittgenstein; – 10. Ascertaining understanding: what one language must evoke, another may stipulate (and vice versa); 11. – Dynamic and static theories of meaning; 12. Color, types of reference, and the inveterate narrative; – 13. The polyvalence of the picture; – 14. Meaning and mutual experience-kinds of reference re-described; – 15. What has art got to do with it?; – 16. A whole new way of reading—the surface of the screen and the modulation of self-consciousness; – 17. The anteroom of meaning and our conception of space; – 18. Meaning and mental habits; – 19. Assumed and earned meaning; – 20. The spectrum of

shared reference; – 21. The story sequence and the montage-prologue; – 22. When the editor learns about meaning; – 23. Montage and metaphor; – 24. The imitation of perception. – Part II: *Dynamic and Syntactic Universals*: – 25. Nonverbal universals; – 26. The polyvalence of the picture and the omnivalence of the movie; – 27. The description of omnivalence as a floating target; – 28. Dynamic universals: beginning, middle, and end—a prologue; – 29. Language and the momentum of the body; – 30. Syntactic universals: interval, context, and repetition; Interval; Context; Repetition; – 31. The synergy of symmetry; – 32. Sidebar—another parallel model and another speculative future; – 33. Formal references in music and cinema; – 34. The developmental leap—keeping the referent a mystery; – 35. Resemblance and resonance; – 36. The subliminal pull of the flicker; – 37. Aural and visual cadence; – 38. The frame of the experience; – 39. Resonance among frames; – 40. Ancient history—the medium as the model; – 41. Illustration, induction, and repetition; – 42. The material and the medium; – 43. Sonics and seamlessness; – 44. The private language machine and the evolution of a medium; – 45. Illusions and ontological linchpins; – 46. Delimiting an audience; – 47. Summarizing the singular window en route to the panoramic view. – Part III: *Considering Description: Tropes, Tunes, and Moving Pictures*: – 48. The world of description; – 49. Recapitulation and prospectus.

Bartkowiak, Mathew J. / Kiuchi, Yuya: *The Music of Counterculture Cinema: A Critical Study of 1960s and 1970s Soundtracks*. Jefferson, NC: McFarland 2015, viii, 207 S.

Films produced in late 1960s and early 1970s America continue to frame our understanding of the counterculture era. A study of contemporary film soundtracks reveals a great deal of complexity. The coinciding struggles to define collective and individual identities based on race, class, gender and generation is well documented in the music of counterculture cinema.

Inhalt: 1. Framing Utopia: *Monterey Pop* and the heart of the counterculture – 2. Creating the downfall: *Gimme Shelter* and the “end” of the counterculture – 3. Searching for the *real* times, baby: *Head* and the unmaking of the Monkees – 4. Love in counterculture films: music's diplomatic role in *Harold and Maude* – 5. Space is the place: *Barbarella* and hearing the future – 6. Did the soundtrack also blow it?: using rock to capture counterculture generational identity – 7. Setting the escapist scene with music: sex and comedy in an exotic world – 8. Generational genocide: selling youth rebellion in Roger Corman's *Gas-s-s* – 9. African American artists in Hollywood: Isaac Hayes' contribution to *Shaft* – 10. I'm watching it for its music: Deep throat and its soundtrack – 11. Challenging normativity and pushing boundaries: *Midnight Cowboy* and cultural resistance – 12. Ambiguous meaning of music: combining technology and music in the dystopian world of *A Clockwork Orange* – 13. Understanding country ways: a talk with Country Joe McDonald about counterculture film – 14. Bringing the 1960s to life: an interview with director Robert Greenwald.

Baumgartner, Michael: J.S. Bach, Jean-Luc Godard, and the reimagining of the immaculate conception in “Hail Mary”. In: *Bach* 50,2, 2019, S. 175–219.

In his 1985 film *Je vous salue, Marie (Hail Mary)*, Jean-Luc Godard integrated preexisting music by J. S. Bach. The choice is a surprise, as Godard hardly ever used the music of the German baroque master in his sixty-year film career. Since this use of Bach marks a singular instance in Godard’s oeuvre, the objective of this essay is to explore the process

of Godard's cinematic reappropriation of Bach's music and how the music infuses the filmic narrative with a Lutheran message. *Je vous sauve, Marie* is an intimate, modern-day adaptation of the story of Mary, from the Annunciation to Christ's birth. Mary is a basketball-playing high school student and Joseph a taxi driver in contemporary Geneva. In *Je vous sauve, Marie*, Godard examines the inexplicable idea of conception without corporeal contact in a contemporary world that has lost its unchallenged acceptance of incomprehensible occurrences. The mystical and intangible aura of the film is evoked through numerous short musical fragments, excerpted from the best-known highlights of Bach's oeuvre. Godard exploits the nineteenth- and twentieth-century notion of Bach as both the quintessential composer of sacred music and the unrivaled master of the most sublime of all late baroque music. The use of Bach's music allows us to interpret, on the one hand, Mary in a Catholic theological understanding as an enigmatic, mysterious, and transcendental figure and, on the other hand, Christ through Luther's concept of the *theologia crucis*. Godard integrates Bach's music into *Je vous sauve, Marie* in a thoughtful and profound manner. He seeks to reinterpret Mary's immaculate conception, her biblical role, and her relationship to her son within a critical contemplation of the historical, religious, and social foundations of Western society. Beaster-Jones, Jayson / Sarrazin, Natalie: *Music in Contemporary Indian Film: Memory, Voice, Identity*. London: Routledge 2017, xi, 212 S.

Provides a rich and detailed look into the unique dimensions of music in Indian film. Music is at the center of Indian cinema, and India's film music industry has a far-reaching impact on popular, folk, and classical music across the subcontinent and the South Asian diaspora. In twelve essays written by an international array of scholars, this book explores

the social, cultural, and musical aspects of the industry, including both the traditional center of “Bollywood” and regional film-making. Concentrating on films and songs created in contemporary, post-liberalization India, this book will appeal to classes in film studies, media studies, and world music, as well as all fans of Indian films.

Inhalt: Part I: Hindi Hegemony: 1. 1942 -A Love Story: R.D. Burman’s Posthumous “Comeback” at the End of Old Bollywood (Gregory D. Booth). – 2. Antakshari in Maine Pyar Kiya: Intertextual Pleasures and Musical Medleys at the Dawn of a New Era in Hindi Cinema (Peter Kvetko). – 3. From Vamp to Queen: The Remixed Sound of the Bollywood Scene (Ajay Gehlawat). – 4. Authorizing Gesture: Mirchi Music Awards and the Re-calibration of Songs and Stardom (Monika Mehta). – 5. Tensions of Musical Re-animation from Bollywood to Indian Idol (Anaar Desai-Stephens). – 6. Magic, Destruction, and Redemption in the Soundtracks of Aashiqui 2, RockStar, Rock On!! (Natalie Sarrazin). – *Part II: Regions and Identities:* 7. Violence, Reconciliation, and Memory: A.R. Rahman’s “Bombay Theme” (Jayson Beaster-Jones). – 8. Iconic Voices in Post-Millennium Tamil Cinema (Amanda Weidman). – 9. Folk Drums and Tribal Girls: Sounding the Himalayas in Indian Film (Stefan Fiol). – 10. Beiche, Michael: Musik und Film im deutschen Musikjournalismus der 1920er Jahre. In: *Archiv für Musikwissenschaft* 63,2, 2006, S. 94–119.

In 1928, when silent movies were undergoing the final throws of replacement by the talkies, questions relating to film music were “still initially being formulated.” This sceptical point of view, voiced by Hans Mersmann, paradigmatically represents the views of many other contemporary music journalists, musicologists, and composers. In this study, Paul Hindemith's contribution to the Chamber Music Festival in Baden-Baden in 1928 (“Zu unserer Vorführung ‘Film und Musik’”) forms the backdrop for the systematic exami-

nation of other texts that appeared in Die Musik, Melos, and Musikblätter des Anbruch up until ca. 1930. Misgivings about silent movies' inadequacies with respect to music as mere illustration or with respect to the lack of synchronization between sound and picture proved no longer relevant with the establishment of talking movies. Decisive, however, is the continuing demand for original film music, which in its components and structure was expected to adequately fulfil the needs of the newly developed medium.

Filmfachzeitschriften wie der *Kinematograph* und die *LichtBildBühne* stellten bereits ab 1907 – und somit deutlich vor der Musikfachpresse – ein wichtiges Medium für den Austausch von Ideen, Gedanken und Erfahrungen für Kinomusiker dar. Neben Erläuterungen zu den verschiedenen musikalischen Begleitungsmethoden, von Improvisation bis hin zur Originalkomposition, wurden hier auch die alltäglichen Belange der Kapellmeister und Musiker diskutiert. Zu einer Zeit, in der die Filmindustrie noch wenig Interesse an der musikalischen Untermalung des bewegten Bildes zeigte, unterstützte die Filmfachpresse ihre Leser bereits durch praktische Ratschläge und Illustrationsvorschläge in beispielsweise speziellen Filmmusikführern, Werbung für Instrumente und Notensammlungen sowie Stellenanzeigen und bietet damit zugleich Einblicke in die zeitgenössischen musikalischen Aufführungspraktiken und deren Rezeption in den ersten Jahren des Mediums Film. Zudem wird der Einfluss der Filmfachzeitschriften auf eine Standardisierung von Filmmusik deut-

lich.

Bellano, Marco: The Silent Maestro: Giacomo Puccini and the *Allgemeines Handbuch der Film-Musik*. In: *Kieler Beiträge zur Filmmusikforschung* 11, 2014, S. 106–127; [[URL](#)].

Abstract: The article studies the use of Giacomo Puccini's creations in one of the most complete and complex catalogues of music for silent films: the *Allgemeines Handbuch der Filmmusik* (1927), by Giuseppe Becce, Hans Erdmann and Ludwig Brav. The presence of Puccini in this compilation consists of 86 fragments from 6 operas: *Gianni Schicchi*, *La Fanciulla del West*, *Manon Lescaut*, *Suor Angelica*, *Il Tabarro* and *Le Villi*. The fragments are extracted from instrumental "fantasies" by Emile Tavan, Gaetano Luporini and Adolphe Gauwin. The excerpts are classified by an elaborated system based on a series of verbal "labels" referring to emotions or situations, which are ordered in a hierarchical scale.

However, the hierarchy seems to present some intrinsic contradictions, as the "labels" with the higher rank appear to be slightly different between the main index and the actual catalogue. It's nonetheless possible to infer a tripartite hierarchy, based on the concepts of "Dramatic", "Lyric" and generic "Situation" (Dramatische, Lyrische and Incidenz). A throughout analysis of the puccinian selection reveals that most of the fragments appear in the "Lyric" section. Moreover, the greatest part of them are joined with labels referring to positive emotions ("Love", "Luck", "Joy and Peace", "Hymn" etc.). Puccini's music tends to be completely separated from its original context and meaning. Becce seems to have been guided by the mere "acoustic" feeling of the fragments to assign them their respective places. In this selection, Puccini's operas like *Il Tabarro* or *Suor Angelica* are depicted as overall bright works, incline to fantasy, melancholy and occasional gaiety. It's possible to explain this apparently unacceptable interpretation of Becce with a quotation from the first volume of the *Allgemeines Handbuch*: «The best film music is the one that cannot be listened to alone.» Becce, Erdmann and Brav were already aware of one of the main principles that modern film composers use in their work: the music has to depend on the moving images, and these images have to be completed by music. If Puccini's music would have been catalogued in strict respect to its original finalities, it would have resulted in being inappropriate for cinema performances: it would have recalled memories and sensations that would likely have given a wrong sense to a film sequence. That kind of logic is perhaps the same that made Becce avoid to use excerpts from operas such as *La Bohème*, *Tosca* and *Madame Butterfly*: their melodies may have been too well-known to be effectively "disguised" through a clever work of classification. Puccini's music, in the *Allgemeines Handbuch der Filmmusik*, contributed to the consolidation and to the explication of an important aesthetic tendency in early film music. However, it managed to do such a thing by losing its dramatic sense and its verses. In the cinema hall Puccini became a silent maestro, who gave a life and a future to flickering shadows on a luminous screen.

Bennett, Alexis: Music with a British Accent: Underscoring in British Films of the 1930s. In: *Dandelion* 4,1, 2013, [URL].

A number of notions prevail about the music composed for British films in the 1930s. One is that underscoring (a term that has now developed a specific meaning: the non-diegetic musical accompaniment of dialogue) was kept to an absolute minimum; further, within this apparent restriction, the closely synchronized recitative-style of underscoring so prevalent in Hollywood was very unusual in films produced in the United Kingdom. In this article I will be examining such received perceptions of film music culture in Britain, with particular reference to the music composed for London Films Productions, the company founded by Alexander Korda in 1932.

Biancorosso, Giorgio: *Situated Listening: The Sound of Absorption in Classical Cinema*. New York/Oxford: Oxford University Press 2016, xi, 246 S.

Screenwriters and film directors have long been fascinated by the challenges of representing the listening experience on screen. While music has played a central role in film narrative since the conception of moving pictures, the representation of music listening has remained a special occurrence. In *Situated Listening: The Sound of Absorption in Classical Cinema*, author Giorgio Biancorosso argues for a redefinition of the music listener as represented in film. Rather than construct the listener as a reverential concertgoer, music analyst, or gallery dweller, this book instead shows how films offer a new way of thinking about listening as distributed experience, an activity made public and shareable across vast cultural spaces rather than an insular motion. It shows how cinema functions as not only a reservoir of established modes of listening, but also an agent in the development of new listening practices. As Biancorosso argues, many films have perpetuated a long-existing paradox of music as a means of silencing. Consider an aggressive score overlaying bat-

tle scenes or a romantic scene conveying unspoken intimacy. In the place of conversational exchange exists a veil of sound in the form of music, and Situated Listening explains why this function influences both the course of interpretation and empathy experienced by film spectators. By focusing on cinematic, physical, and emotional scenery surrounding a character, viewers can recognize aspects of their own lives, developing a deeper empathy for each fictional character through real and shared listening practices.

Inhalt: The character-as-vector. Music, off stage – The listener in the picture – The radio broadcast as anamorphic spot – The spectator as situated listener – Heterological silence. Epiphanies – Love at first sight.

Bick, Sally: *Of Mice and Men: Copland, Hollywood, and American Musical Modernism*. In: *American Music: A Quarterly Journal Devoted to All Aspects of American Music and Music in America* 23,4, 2005, S. 426–472.

Bick, Sally: *Unsettled Scores: Politics, Hollywood, and the Film Music of Aaron Copland and Hanns Eisler*. Urbana/Chicago/Springfield: University of Illinois Press 2019, xiii, 232 S. (Music in American life.).

Sally Bick's dual study of Copland and Eisler pairs interpretations of their writings on film composing with a close examination of their first Hollywood projects: Copland's music for *Of Mice and Men* and Eisler's score for *Hangmen Also Die!* Bick illuminates the different ways the composers treated a film score as means of expressing their political ideas on society, capitalism, and the human condition. She also delves into Copland's and Eisler's often conflicted attempts to adapt their music to fit Hollywood's commercial demands, an enterprise that took place even as they wrote hostile critiques of the film industry.

Il y a des scènes de films que nous connaissons par cœur, et des musiques de cinéma que nous pouvons fredonner instantanément. Cette conjonction paraît évidente au spectateur. Mais ce que l'on ignore, et qui sera révélé dans cet ouvrage à travers une série d'entretiens passionnants avec des cinéastes et des compositeurs, ce sont les hasards miraculeux ou les conflits intenses, le travail acharné ou les élans d'inspiration qui ont présidé à d'oubliables morceaux d'anthologie. – L'idée de ce livre, c'est aussi de montrer que la même

complicité peut s'instaurer entre les cinéastes et les compositeurs de tous les types de cinéma, des *Aventures de Rabbi Jacob* mises en musique par Vladimir Cosma aux œuvres exigeantes d'Atom Egoyan et Claire Denis en passant par les succès planétaires des musiques d'Ennio Morricone.

Inhalt: I. Musiciens de cinéma à l'œuvre: 1. Ennio Morricone: Dépasser les conditionnements du cinéma – 2. Vladimir Cosma: Une expression art total – 3. Stephen Frears: À bas le réalisateur !

Binns, Alexander: Desiring the diegesis: music and self-seduction in the films of Wong Kar Wai. In: *CineMusic? Constructing the Film Score*. Ed. by David Cooper. Newcastle: Cambridge Scholars Publishing 2008, S. 127–140.

Examines Hong Kong art cinema, especially the work of film director Wong Kar-Wai, as a means of illustrating a use of music in film that puts a strain on the distinctions between diegetic music and its authoritative other, the non-diegetic, which have played a crucial role in developing a critical approach to film music. The discussion focuses on two films from the mid-1990s: *Chungking Express* and *Fallen Angels*.

Bloch-Robin, Marianne: *Carlos Saura: paroles et musique au cinéma*. Villeneuve-d'Ascq: Presses universitaires du Septentrion 2018, 336 S. (Arts du spectacle: Images et sons.).

À partir de l'œuvre cinématographique du réalisateur espagnol Carlos Saura, cet ouvrage s'intéresse aux rôles narratifs et esthétiques de la musique vocale dans les films de fictions. Les fonctions de la musique vocale (paroles et musique) au sein du film sont analysées sous différents aspects: ordre, temps et espace du récit, caractérisation des personnages, révélation de leurs points de vue et de celui de l'énonciateur filmique. La notion de résémantisation est au cœur des analyses proposées car l'interrelation constante entre paroles, musiques et les autres matières sonores et visuelles produit toujours un glissement sémantique de la chanson qui influence elle-même la compréhension des autres éléments filmiques. L'œuvre polysémique du cinéaste espagnol, très grand mélomane et maître de l'« œuvre ouverte », permet de mettre en évidence ces rôles de la chanson, car la musique vocale se prête parfaitement à une révélation détournée du sens, caractéristique chez l'auteur de *Cria Cuervos*.

Boczkowska, Ewelina: "Chopin meant everything to us then": Chopin nostalgia in Polish cinema, 1944–91. In: *Music, Collective Memory, Trauma, and Nostalgia in European Cinema After the Second World War*. New York: Routledge 2020, S. 253–275.

This chapter traces the shifting meanings of Chopin's music in Polish biopics, documentaries, and experimental films. Chopin's historical status was reinvented repeatedly by Polish filmmakers during periods of political instability in Poland: by the end of Second World War (1944–1945), at the height of the Stalinist period (1949–1952), and after the transition to democracy (1990–1991). Chopin served different cultural ends in these films: as an emblem of societal trauma, as an epitome of social progress, and later, as a symptom of collective melancholia. Each reconfiguration, this chapter argues, was rooted in nostalgia of a nation struggling to rebuild itself after the war and communism. With these evolutionary threads, a largely unexplored cultural history of Chopin's music during the German occupation, the Stalinist period, and the early 1990s, Poland can be traced. (Vorlage)

Bombola, Gina: From *There's Magic in Music* to *The Hard-Boiled Canary*: Promoting "Good Music" in Prewar Musical Films. In: *Journal of the Society for American Music* 12,2, 2018, S. 151–178.

In 1941, Paramount released *There's Magic in Music*, a film about a soprano who sings opera in burlesque and wins a scholarship to attend Interlochen. The movie's utopian view of art music, however, caused difficulties for the studio in regard to marketing, leading to a studio-wide debate over the film's title. Archival documents position *There's Magic in Music* as a valuable case study for investigating the transitional period of musical film

production between the Great Depression and the onset of World War II, particularly with respect to operatic musicals. Just prior to the United States' entry into the war, Hollywood moved away from the escapist fantasy of 1930s cinema toward the realism that would mark the 1940s. To reboot fading interest in musicals, studios toyed with the formula of the backstage musical to focus more on dramatic narratives and star power. There's Magic in Music thus serves as a lens through which we might examine changes both in musical film production and in notions of "good music" at the eve of World War II.

Bombola, Gina: Searching for a fresh point of view: Aaron Copland, identity, and *The Heiress* (1949). In: *The Journal of Musicology* 35,3 2018, S. 368–396.

In the early 1940s Aaron Copland cultivated an identity as an authority on film composition through public lectures, interviews, and his own film scores. Championing film music's potential as a serious art form, Copland sought to show Hollywood that film composers could branch out from the romantic and post-romantic aesthetics that infused contemporary soundtracks and write in a more modern, even American, style. During the 1940s the film industry was already embracing an abundance of new production styles, techniques, and genres that fostered innovation in the development of cinematic musical codes. When Copland returned to Hollywood in 1948 to score William Wyler's psychological melodrama "The Heiress" (1949), he chose to take on a set of new challenges. Copland attempted to discover a new idiom for love music, on the one hand, and began to use leitmotifs as a structural device, on the other. Copland's experience with "The Heiress" opens a space in which to reassess his opinions about appropriate film-scoring techniques as well as his public endorsement of film composition. His perspectives on film composition – as demonstrated in his writings, correspondence, and film scores as well as in interviews and reviews of his film music – reveal a tension between the composer's artistic sensibilities and his attitude toward the commercialism of film music. Indeed he maintained a more ambivalent attitude toward cinematic composition than he publi-

cally professed. Understood in this context, Copland's scoring decisions in *The Heiress* reflect a turn away from the Americana of "Rodeo" (1942) and "Appalachian Spring" (1944) and the Russian-themed score of "The North Star" (1943), as he sought to refashion his identity as a composer in the post-war years.

“The Racked Pianoforte” and “The Great Silent Cinema.”

In kyrill. Schrift. – *Abstract:* The article considers the activities of pianists accompanying silent cinema. They can be equally related to the history of cinema, the history of music, and piano performance. Musical accompaniment was an important additional means of influencing the viewers and a variable component of the historical film show. This practice is a thing of the past now, along with silent cinema, and attempts to revive it in modern conditions are a mere reconstruction. The author suggests that it was not the invention of technical capabilities for synchronizing sound and images that determined the aesthetic boundary between the silent and sound era; it was the renunciation of pianists as direct musical accompaniment of the films, the removal of the “human factor”. The most authentic

materials for studying the activities of illustrator pianists are interviews and archival filming of musicians who had actual experience in silent film scoring. Of the printed sources, photoplay music-sheet music collections for tappers are very informative. There could be one or many authors to such collections. The article analyzes the photoplay music by John Stepan Zamecnik and Ernö Rapée. The conclusion is that the plays included in one-author collections are distinguished by the simplicity of form, genre definiteness, and recurrence of musical language. By contrast, compiled collections including works from different eras composed by different authors, systematized by themes, are stylistically diverse. Using pieces from photoplay music collections, as well as from popular classical melodies and contemporary dance music, illustrators compiled their "soundtracks", linking them by composed or improvised parts. As time passed by, "taper culture" revealed its patterns, which later became the basis of cinema music in the sound era and was clearly manifested in the work of Shostakovich. The author draws several parallels between the recommendations of the photoplay music compilers and the artistic practices of filmmakers of the second half of the twentieth century. Speaking about the revival of silent film illustrators as a profession in the modern cultural space, the author emphasizes that piano helps to preserve the artistic integrity of silent pictures for modern viewers. This activity of pianists is interpreted as one of the branches of historically informed performance. The article offers examples of similar specific art projects. In conclusion, it is emphasized that modern cinema, by the way it preserves and reproduces reality, has become a totally technical art. In mass cinema, recordings of live symphony orchestras are being replaced by less expensive computer phonograms. The author sees this as the next aesthetic boundary beyond which the cinema will enter its digital age.

Borum, Jeremy: *Guerrilla Film Scoring: Practical Advice from Hollywood Composers*. Lanham, Md.: Rowman & Littlefield Publishers 2015, xx, 250 S.

In this book, Jeremy Borum provides valuable guidance on how to make a good film score

both quickly and inexpensively. Featuring insights from 20 professional composers, this handbook encompasses the entire film scoring process including education, preparation, writing and recording a score, editing, mixing and mastering, finding work, career development, and sample contracts.

Bovi, Michele: *Cinebox vs. Scopitone: Songs to See. / Canzoni da guardare*. Edizione italiana e inglese. Milano: Arcana 2013, 197 S.

Ausstellungskatalog. Zuerst 2011. – The first music videos in color, the true ancestors of modern day video clips. They were implemented in Italy during the late fifties and marketed from 1961 onwards, exactly fifty years ago, in symbioses with the inspired birth of the revolutionary Cinebox which introduced the new concept of push button keyboard selection of one music video at a time. The Cinebox provoked fierce international competition between Italy and France. Artistic creative commercial battles were fought in Europe and later in the United States. The competitive commercial war, spanned a decade in which many internationally famous artists, producers and film directors of the nineteen sixties were at loggerheads. Among these, were Claude Lelouch, Francis Ford Coppola, Robert Altman, the Italian film director Vito Molinari, the Italian tv director Enzo Trapani, and many large influential Italian industries such as Ottico Meccanica Italiana, Innocenti, Lepetit-Ledoga, the Beretta Group, the Microstampa and Cinestabilimento Donato. In conclusion, all the excitement aroused the interest of the mafia and consequently that of Robert Kennedy, who as chairman of the Federal Grand Jury, spearheaded the fight against the mafia.

Michele Bovi, a journalist and author, has diligently gathered all the historical facts pertaining to these events and the birth of the Cinebox. He has extensively interviewed the protagonists, participants and witnesses of this fascinating history and of the artistic and commercial rivalry between the Italian Cinebox and its French counterpart, the Scopi-

tone. In this book, besides the story and testimonials, it lists all the short films and music videos filmed throughout the world and captures the reader's interest with documentation and original photos taken on the film sets, that binds together in this book, a snapshot of many famous artists of that era with its unrepeatable artistic creativity with the legendary and innovative Italian invention, the Cinebox.

Bozynski, Michelle Carole: *Music in Canadian Visual Narrative: Musical Collaborations in Five Films of Atom Egoyan and Patricia Rozema*. Ph.D. thesis, University of Toronto, Musicology, 2004, 401 S.

The goal of this project is to promote an awareness of some important recent contributors to Canadian film music, and draw attention to the collaborative process between composers and filmmakers in Canada. My investigation of film music through a multi-contextual framework engages the larger question of how music adds layers of meaning to film. Music is an agent of narrativity in film, and the case studies benefit our understanding of Canadian film music's potential to inform the multiple narratives through which it passes. This project examines the work of two Canadian independent feature filmmakers, Atom Egoyan and Patricia Rozema, and the film composers – Mychael Danna, and Lesley Barber and Mark Korven, respectively – with whom they have collaborated since their emergence in the 1980s. Their works serve as case studies for an understanding of the ways film music can engage visual narrative and how the convergence of music and story can inform broader and Canadian considerations. In the first chapter, I discuss film as social text and as personal and cultural expression within a context of national cultural policies. I consider how music, in its ability to mediate and interpret film, and as the product of creative interactivity, becomes a site through which individual and national identities can be negotiated. In a national and social

sense, I investigate some of the ways music can be "heard" differently when we acknowledge its particular social, cultural and ideological contexts – within and outside the film. In the spirit of the multidisciplinary approach necessitated by the subject matter, this project brings together interpretive strategies informed by cultural and anthropological studies, film music theory, postmodernism and gender theory, among others. Using cultural studies and ethnographic methods as the backbone for examination of the music's "extrafilmic" contexts, while applying detailed musical analyses in consideration of music's "extrafilmic" roles, the second and third chapters provide layered and multi-variable discussions of the music and music makers of five Canadian films. Egoyan's films, *Family Viewing* (1987) and *Exotica* (1994), and Rozema's films, *I've Heard the Mermaids Singing* (1987), *White Room* (1991), and *When Night is Falling* (1995) fuel the discussion.

Bribitzer-Stull, Matthew: *Understanding the Leitmotif: From Wagner to Hollywood Film Music*. Cambridge/New York: Cambridge University Press 2015, xxiv, 331 S.

The musical leitmotif, having reached a point of particular forcefulness in the music of Richard Wagner, has remained a popular compositional device up to the present day. In this book, Matthew Bribitzer-Stull explores the background and development of the leitmotif, from Wagner to the Hollywood adaptations of *The Lord of the Rings* and the *Harry Potter* series. Analyzing both concert music and film music, Bribitzer-Stull explains what the leitmotif is and establishes it as the union of two aspects: the thematic and the associative. He goes on to show that Wagner's Ring cycle provides a leitmotivic paradigm, a model from which we can learn to better understand the leitmotif across style periods. Arguing for a renewed interest in the artistic merit of the leitmotif, Bribitzer-Stull reveals how uniting meaning, memory, and emotion in music can lead to a richer listening experience and a better understanding of dramatic music's enduring appeal.

Brown, Richard H.: Breaking the Sound Barrier: Transparency and Cinematic Space in *Works of Calder* (1950) and *Jackson Pollock* 51'. In: *Contemporary Music Review* 33,5–6, 2014, S. 512–538.

In the early 1950s John Cage and Morton Feldman were commissioned to score documentary films on two significant American artists: Cage for the Herbert Matter documentary on sculptor Alexander Calder, and Feldman for the Hans Namuth and Paul Falkenberg documentary on Abstract Expressionist painter Jackson Pollock. Both artists saw these commissions as opportunities to formalize connections between their compositional approaches to sound and the visual approach to space, kinetic movement, and ground revealed in the time-based poetics of the moving image. Examination of archival documents from these film commissions, including original scores and correspondence, reveals numerous parallels between the New York schools of music and visual arts. Both films predate the radical shift in Cagean esthetics by only a year, and the commissions provided a self-conscious examination of the artistic ‘intermedia’ connections between auditory and visual approaches to a work of art.

Brown-Montesano, Kristi: Terminal Bach. Technology, media, and the “Goldberg variations” in postwar American culture. In: *Bach. The Journal of the Riemenschneider Bach Institute, Baldwin-Wallace College* 50,1, 2019, S. 81–117.

The curious link between Bach’s music and psychopaths in English-language film can be traced back to at least *Dr. Jekyll and Mr. Hyde* (1931) and *The Black Cat* (1934), but this cinematic trope regained horror credibility in the late twentieth century with Dr. Hannibal Lecter in *The Silence of the Lambs* (1991). Lecter’s creator, author Thomas Harris, gave his cannibalistic serial killer preternatural intelligence and a taste for fine culture, including the keyboard works of Bach, most notably the Goldberg Variations. Scholars and fans alike have investigated almost every aspect of Lecter’s persona, including his musical preferences, yet a broader question arises: how exactly did we get to Lecter’s Bach? What cultural factors – musical and otherwise – might have influenced Harris to fix on Bach, Gould, and the Goldberg Variations specifically for his supervillain? This investigation considers significant events of the postwar period that likely played a role in the evolution of the Lecterian Bach: (1) the modernist turn in Bach reception, performance practice, and recording in the United States between 1945 and 1968, especially as evidenced in the sensational albums of Glenn Gould and Wendy Carlos; (2) the twentieth-century cinematic association between Bach’s music and destructive drives, particularly as redefined from the early 1970s via the use of Variation 25 in *Slaughterhouse-Five* (1972) and *The Terminal Man* (1974); and (3) the postwar boom in computer science and the significance of Bach’s music to related discourses such as the development of artificial intelligence. All of

these threads intersect with a phenomenon of modern, industrialized American culture that Mark Seltzer describes in his *Serial Killers: Death and Life in America's Wound Culture* (1998) as “techno-primitive.” The life process and machine process are integrated “such that the call of the wild represents not the antidote to machine culture but its realization.” As a superhuman genius who kills like a machine, Lecter undeniably represents the techno-primitive. Yet, his cultured intellectualism (including his love of Bach’s music) taps into postwar popular understanding of the composer’s work as the highest expression of musical logic, ideally suited to the technological age. Buhler, James: *Theories of the Soundtrack*. New York: Oxford University Press 2019, xlv, 318 S. (The Oxford Music/Media Series.).

This book summarizes and critiques major theories of the soundtrack from roughly 1929

until today. Rather than providing an exhaustive historical survey, it sketches out the range of theoretical approaches that have been applied to the soundtrack since the commercial introduction of the sound film. The basic theoretical framework of each approach is presented, taking into account the explicit and implicit claims about the soundtrack and its relation to other theories. The organization is both chronological and topical, the former in that the chapters move steadily from early film theory through models of the classical system to more recent critical theories; the latter in that the chapters highlight central issues for each generation: the problem of film itself, then of image and sound, of adequate analytical-descriptive models, and finally of critical-interpretative models.

Buhler, James / Lewis, Hannah (eds.): *Voicing the Cinema: Film Music and the Integrated Soundtrack*. Urbana, Ill.: University of Illinois Press 2020 x, 309 S.

The collection is divided into four sections. The first explores historical approaches to technology in the silent film, French cinema during the transition era, the films of the so-called New Hollywood, and the post-production sound business. The second investigates the practice of the singing voice in diverse repertoires such as Bergman's films, Eighties teen films, and girls' voices in *Brave* and *Frozen*. The third considers the auteuristic voice of the soundtrack in works by Kurosawa, Weir, and others. A last section on narrative and vococentrism moves from *The Martian* and horror film to the importance of background music and the state of the soundtrack at the end of vococentrism.

Bullerjahn, Claudia / Güldenring, Markus: An empirical investigation of effects of film music using qualitative content analysis. In: *Psychomusicology: A Journal of Research in Music Cognition* 13,1–2, 1994, S. 99–118.

This study investigated the effects of film music by using both standardized methods (rating scales) and qualitative research methods. An experimental film of about 10 min duration

was created to resemble part of a real feature film with various interpretations. Three professional film music composers produced music soundtracks for the film in the style of a thriller, a melodrama and one other version. For the study, five versions were selected differing in style, orchestration, use of motifs, and the place and length of the music in relation to the film. Using both rating scales and open-ended questions, over 400 subjects provided information about the relationships between the characters and about the history and outcome of the events depicted by the film excerpt. Results indicated that filmmusic polarizes the emotional atmosphere and influences the understanding of the plot.

Burke, Patrick Lawrence: Rock, race, and radicalism in the 1960s: the Rolling Stones, black power, and Godard's *One plus One*. In: *The Journal of Musicological Research* 29,4, 2010, S. 275–294.

Jean-Luc Godard's 1968 film *One Plus One* is of musicological significance because, unlike most music scholars, Godard directly confronts racial issues in 1960s rock. By juxtaposing studio footage of the Rolling Stones with staged tableaux of black militants, Godard both highlights white appropriation of black music and suggests that any cultural expression that seems transparently authentic is actually constructed rhetorically. "One Plus One" undermines the romantic notion of the 'rock revolution' that continues to inform popular accounts of 1960s rock, suggesting instead that rock was part of a complex and often contradictory political culture. Calabretto, Roberto: La musica per film al Convegno Internazionale dei Centri Sperimentali di Musica Elettronica di Firenze del 1968: alcuni segnali provenienti dall'Est. In: *Musica/Tecnologia* 9, 2015, S. 157–180.

The International Conference of the Experimental Centres of Electronic Music was held in Florence from 9 to 14 July 1968, during the XXXI Maggio Musicale Fiorentino, thanks to Pietro Grossi's effort. Many musicians and researchers attended, coming from different European nations. Among them were Ivan Stadtrucker (Bratislava Television Experimental Studio), who illustrated the use of electronic musical devices in film practice, and Evgenij A. Murzin (Moscow Studio), who presented the ANS synthesizer – a device made by 720 oscillators that covered a range of seven octaves and that was used also by Andrej Tarkovskij in *Solaris*. The essay deals with these two presentations relating them to the universe of European film music in the second half of the 20th century.

Calella, Michele: Jazz, Sex und Filmmusik. Musik und Gender in Hollywoods Filmdramen der 1950er Jahre. In: *Musiktheorie: Zeitschrift für Musikwissenschaft* 27,3, 2012, S. 247–265.

The famous sequence depicting the sexually allusive reconciliation of Stanley and Stella in Elia Kazan’s *A Streetcar Named Desire* (1951) was heavily censored before the film was released. The motion picture production code forced the producers to remove also Alex North’s jazz-inflected cue, which was replaced by a “symphonic” one. This article tries to reconstruct the musical and social discourse of jazz music which lies behind this singular case of musical censorship. A cultural and musical analysis of film scores until the early 1960s shows the importance of jazz-inflected music as a powerful instrument for the construction of sexual female behaviour in Hollywood films. The frequent use of jazz-inflected musical topoi as a sign of promiscuity and prostitution in these movies shows only apparently a change of mentality and reveals actually the same discursive background of the censorship of North’s score in 1951.

Callaghan, Andrew: Realism and the “inaudible” score for *Spotlight*. In: *Context: A Journal of Music Research* 42, 2017, S. 53–66.

Reality poses a problem for film composers. For decades, filmmakers in Hollywood have leaned towards an avoidance of non-diegetic music in films that seek a realistic aesthetic. The post-millennial examples of this phenomenon are perhaps most recognisable in the found footage genre, which includes such films as *Quarantine* and *Cloverfield*. However, there have been a number of film productions in the last ten years that bear many hallmarks of illusory realism yet include the use of musical scores. It appears that this contradiction of realist aims with practices that include non-diegetic music results in film scores that feature distinctive designs and occasionally compromise the scope of their functions. One of the most recent of these films is *Spotlight*, a docudrama directed by Tom McCarthy and co-written with Josh Singer. This film’s relationship with truth and realism can be described in terms of its subject, social position and craft. The score was written by Howard Shore. Having previously worked on productions by David Cronenberg and the The Lord of the Rings franchise, Shore is not widely known for creating scores that go unnoticed. Nevertheless, the score for *Spotlight* contains many features that make it a textbook case of unobtrusiveness, drawing on old traditions of Hollywood while adding a number of new features. These features can also be observed in other recently produced film scores, representing a style that is frequently employed by significant composers working on serious dramatic settings.

Callaway, Kutter: *Scoring Transcendence: Contemporary Film Music as Religious Experience*. Waco, Texas: Baylor University Press 2013, x, 253 S.

By engaging scores from the last decade of popular cinema, Callaway reveals how a musically aware approach to film can yield novel insights into the presence and activity of God in contemporary culture. And, through conversations with these films and their filmmakers, viewers can gain a new understanding of how God may be speaking to modern society through film and its transcendent melodies.

Campanella, Andrea (a cura di): *Piero Umiliani: in parole e musica*. Milano: Haze / Auditorium 2014, 125 S. (Rumori. 33.).

Essays und Interviews zum italienischen Komponisten Piero Umiliani (1926–2001); [Filmographie: [URL](#)].

Piero Umiliani era un grande musicista, tra i padri del moderno jazz italiano. Era un compositore di musiche per il cinema: oltre a “I soliti ignoti”, ne ha firmate altre 150 almeno. Piero Umiliani ha scritto “mah-nà mah-nà”, sigla del Muppet Show, e “Il valzer della toppa”, col testo di Pasolini. Ha scritto anche sigle televisive per 90° minuto, la Domenica Sportiva, La Corrida... Piero Umiliani era un artista di talento, ma anche un artigiano interessato all’elettronica e alle nuove tecnologie. È stato il pioniere della cocktail generation e della lounge music. Di quelli come lui si dice che “erano avanti”, “erano geniali”, “precorrevano i tempi”. Piero Umiliani era così... Le musiche di Piero Umiliani le conosciamo tutti. Questo libro racconta anche il resto. Con interventi e testimonianze di Franco D’Andrea, Paolo Fresu, Enrico Intra, Dino Piana, Enrico Pieranunzi... (Verlag)

Carayol, Cécile / Rossi, Jérôme (sous la dir. de): *Musiques de séries télévisées*. Préface de Jean-Pierre Esquenazi. Rennes: Presses universitaires de Rennes 2015, 275 S (Le spectaculaire.).

Longtemps considérée comme un avatar esthétiquement dégradé et moralement simpliste de la fiction cinématographique, la série télévisée s'est pourtant peu à peu autonomisée au sein des études culturelles jusqu'à devenir un objet digne des recherches universitaires, tant pour la manière dont elle met en scène les phénomènes sociaux que pour la diversité des codes et des stratégies narratives qu'elle mobilise. Mors que la musique de film constitue dorénavant un important champ d'investigation en France, on ne peut en dire autant en ce qui concerne son étude dans le cadre de la télévision. Mépris ? Condescendance ? Absence de spécialistes ? Les équipements audiovisuels domestiques – télévision et projecteur numériques, son 5.1, lecteur Blu-ray – ont pourtant largement contribué à re-

donner aux musiques de séries une part importante dans l'expérience du spectateur. – En se fondant sur un corpus varié de séries américaines et françaises – de *Twilight Zone* (1959) aux *Revenants* (2012) – le présent ouvrage s'attache à étudier ces musiques sous les angles successifs de la spécificité de la musique de série – singularités esthétiques et mémoire spectatorielle –, des rapports des partitions de séries avec celles proposées par le cinéma, et de la possibilité de compositions hybrides mélangeant les genres.

Inhalt: Jean-Pierre Esquenazi: Préface / 7. – Jérôme Rossi et Cécile Carayol: Introduction / 9 – 1. *Spécificités d'une musique de série: singularités esthétiques et mémoire spectatorielle*: – Julie Mansion-Vaquié: *The X-Files*: une série et son tube / 21. – Anaïs Le Févre-Berthelot: Voix de chœur/voix du cœur: musique et paroles dans *Ally McBeal* / 35. – Sarah Hatchuel: *Lost* ou la musique retrouvée / 53. – Ariane Hudelet: La texture musicale de *Treme* / 71 – 2. *Série vs cinéma: correspondances et réinventions des codes*: – Cécile Carayol: Correspondances musicales série – cinéma: Bernard Herrmann et les reflets fantastiques de *Twilight Zone* / 91. – Clara Brenier: Convergences et divergences de la démarche compositionnelle d'Antoine Duhamel dans *Belphegor* et *Pierrot le Fou* / 109. – Chloé Huvet: *The Tudors* de Trevor Morris: l'importation du « style Media Ventures » dans une série télévisée? / 119. – Cécile Carayol: *True Blood* de Nathan Barr: réappropriation de la figure musicale du vampire du cinéma à la série / 139 – 3. *La musique de séries: vers une hybridation des genres*: – Philippe Gonin: Serge Gainsbourg et la télévision dans les années 1960: l'expérience *Marie-Mathématique* / 163. – Mathieu Pierre: Des liens étroits entre narration et musique dans *Buffy the Vampire Slayer* de Joss Whedon / 183. – Florent Fayard: It's in the frakkin' ship! La réflexivité musicale au service du récit dans *Battlestar Galactica* / 201. – Jérôme Rossi: Musique et temporalité dans la série *Pigalle la nuit* / 219. – Jérémy Michot: Analyse comparative des représentations musicales de la mort dans les génériques de séries télévisées (*Six Feet Under*, *Dexter*, *The Walking Dead* et *Les Revenants*) / 237.

Cardinal, Serge: *Profondeurs de l'écoute de la musicalité du cinéma*. Strasbourg: Presses uni-

versitaires de Strasbourg 2018, 244 S. (Formes Cinématographiques.).

Que peut-on gagner à faire de John Wayne un ornithologue ? Que peut-on découvrir dans le chant élégiaque des vaqueiros du Sertão qui concernerait le cinéma ? Quelle peut être la motivation d'un chercheur faisant du comique phono-musico-visuel de Jerry Lewis l'efficace reprise de la théorie critique pratiquée par T. W. Adorno ? Et qui, à l'exception de Stanley Cavell peut-être, peut prendre au sérieux la proposition suivante : par sa puissance propre d'articulation de la musique et de l'espace filmique, Gene Kelly pose le double problème du scepticisme cognitif et éthique ? Qui encore peut découvrir dans les utopies musicales de l'art radiophonique les lieux d'une réflexion sur l'expérience esthétique, éthique et politique au cinéma ? Que veut-il celui qui attend de l'analyse d'un film qu'elle tire des leçons de l'interprétation musicale et devienne épellation mimétique ? – En mobilisant tour à tour un film d'Howard Hawks, un documentaire de Marilia Rocha, le corps de Jerry Lewis, *Brigadoon* de Vincente Minelli, le paysage sonore de la radio, la musique dans *Mauvais sang* de Leos Carax, enfin *La mort de Molière* de Robert Wilson, Serge Cardinal élabore le concept de musicalité du cinéma.

Carroll, Brendan G.: Filmmusik als Kunstform. Korngolds Musik zu »A Midsummer Night's Dream«. In: *Österreichische Musikzeitschrift* (ÖMZ) 62 (2007) 7, S. 15–25.

Caston, Emily: Not Another Article on the Author! God and Auteurs in Moving Image Analysis: Last Call for a Long Overdue Paradigm Shift. In: *Music, Sound, and the Moving Image* 9,2, 2015 (Special Issue: "Musical Screens: Musical Inventions, Digital Transitions, Cultural Critique". Guest ed.: James To-bias), S. 145–161.

Many scholars in popular music and film studies accept the limitations of current film

theories of authorship in relation to music video. This article moves the debate forward through a case study of the work of acclaimed music video director, Jamie Thraves. It focuses on three examples of his work: Jake Bugg's 'Two Fingers' (2012), Coldplay's 'The Scientist' (2002), and Radiohead's 'Just' (1995). Evidence of Thraves's close collaboration with the musicians in the scripting, shooting, and editing of each of these videos is used to investigate authorship in both domains of music and film production. The central argument of the analysis is about the conflicting expectations of power and control participants hold in the production process. These are based on a collision between historically distinct production cultures and intellectual property regimes. The article contributes to ongoing debates in the UK about moral rights, value, labour, and intellectual property in moving image production and argues that a paradigm shift for analysing creative production in music video is long overdue.

Čehovin, Martin Björkman / Ditlevsen, Christoffer Moe: *Den dramatiska kraften i filmmusik: Filmmusikens dramatiska vikt i modern media*. Kandidatarbete i Medieteknik [M.A.-Arbete], Karlshamn/Karlskrona: Blekinge Tekniska Högskola, Institutionen för teknik och estetik 2014, 32, (1) S.; [[URL](#)].

Abstract: When and why is music implemented to a specific scene in a film? With informational resources and theories from established media-abstractionists like Michel Chion, Oliver Sacks and Johnny Wingstedt, we're on a hunt for the ultimate answer. With well proven analytic methods we break down critically acclaimed movies in search of how music has characterized them. The outcome of the analyses has been put together to identify their common dramatic core. In the discussion we state that there are many tools available when one wishes to accentuate the expressionistic and emotional effects of a piece, and why one would use these pieces for film. The reason being that of wishing to emphasize a message or feeling show in picture, or induce a feeling of something not visible on screen. The results were then used for the framework which we work within when producing sound and music material for *Emil* (2014), a modern, darker interpretation of

Emil i Lönneberga (1971).

Chattopadhyay, Budhaditya: *The Auditory Setting: Environmental Sounds in Film and Media Arts*. Edinburgh: Edinburgh University Press 2020, 208 S.

The Auditory Setting introduces and investigates how narrative and a sense of place are constructed in film and media arts through the reproduction and mediation of site-specific environmental sounds, or 'ambience.' Although this sonic backdrop acts as the acoustically mediated space where a story or event can take place, there has been little academic study of sound's undervalued role in cinematic setting and production. Drawing on theories of narrative, diegesis, mimesis and presence, and following a varied number of relevant audio-visual works, this book is a ground-breaking exploration of human agency in mediating environmental sounds and the nature of the sonic experience in the Anthropocene.

Inhalt: Part I: *Introduction*. – 1. The first sound and the curiosity – 2. The auditory context and signification – 3. Key concepts and definitions – 4. Approach and method – Part II: *Sonic trajectories*. – 5. Monaural soundtracks and recording (sonic) reality – 6. Stereo sound and the expanded space – 7. Digital surround sound and the mimetic site – Part III: *On location and other stories*. – 8. Land, field, meadow – 9. Forest, jungle – 10. Village, rural environment – 11. Indoors – 12. Riverback, beach, island – 13. Street, public squares, urban neighbourhood – 14. Public transport – 15. Airport – 16. Underwater, outer space. – Part IV: *Critical listening*. – 17. Mapping the aesthetic choices in sound production – 18. Auditory presence and better practice – 19. The God of small sounds – 20. Emerging trends and future directions.

Chion, Michel: *La musique au cinéma*. 2e éd. revue et augm., Paris: Fayard 2019, 535 S. (Les chemins de la musique.).

Le titre de l'ouvrage le dit: une musique dans un film ne s'y dissout pas, mais elle en est modifiée tout en le modifiant. C'est dans le film même qu'il faut l'étudier. Ce retour aux œuvres, à leur vision et à leur écoute – à leur

« audio-vision » – fait apparaître, loin des professions de foi abstraites, la richesse des scènes, des effets, des situations. Le cinéma est, étymologiquement, ce mouvement que le mouvement de la musique tantôt entraîne et soutient, et tantôt immobilise et charme. Depuis la première édition de cette somme, le quart de siècle écoulé a vu apparaître de nouvelles formules de présence de la musique au cinéma et de nouveaux auteurs ; l'intérêt pour le thème n'a cessé de croître, en même temps que l'accès aux œuvres musicales et cinématographiques – par câble, tablettes, « baladeurs » internet, vidéo à la demande – s'est diversifié. Cette nouvelle édition de La Musique au cinéma, refondue et complétée, en tient compte et en montre l'impact dans les films eux-mêmes. Elle propose aussi une chronologie réactualisée, se concentrant notamment sur soixante films marquants parmi des milliers. Une ronde internationale de noms et de films, de chansons et de danses, d'images et de sons tourbillonne dans ces pages, du cinéma expérimental aux films-opéras, de Claude Debussy au Kasai Allstars du Congo, en passant par Ennio Morricone, Arvo Pärt et Hans Zimmer, de Bernard Herrmann à Michel Legrand, du Chanteur de jazz à Birdman, de Jean-Luc Godard à Jia Zhangke, et de Nino Rota à Federico Fellini. Compositeur de musique concrète, réalisateur de films et d'œuvres audiovisuelles, cofondateur de l'association Acoulogia qui se consacre à des formations, Michel Chion a publié une trentaine d'essais, dont plusieurs sur le son et le langage au cinéma, et, chez Fayard, sur l'œuvre de Pierre Henry, la symphonie romantique et la musique à programme. La première édition de cet ouvrage a reçu en 1995 le Prix du Syndicat français de la Critique de cinéma.

Clifton, Kevin: “We all go a little mad sometimes. Haven't you?” Musical empathy in Hitchcock's *Psycho*. In: *Music Analysis* 37,1, 2018, S. 47–67.

This essay explores a web of cognised and embodied empathies that emerge while watching Hitchcock's *Psycho*, focusing on the role of musical empathy as it relates to Marion Crane's story. Drawing on work on empathetic music in film music studies, I explore how the actors, the characters, the musical score and the filmic audience are drawn together by a ‘sigh’ figure, a symbolic gesture that unifies the soundtrack.

Coady, Christopher: Shotgun Weddings and Bohemian Dreams: Jazz, Family Values and

Storytelling in Australian Film. In: *Jazz Research Journal* 8,1–2, 2015, S. 144–162.

Recent research on jazz presence in Australian film has demonstrated how the genre was once used to enhance narratives about both the threats and the perceived benefits of impending modernisation during the 1920s and 1930s. This article charts out the way in which the musical trope of the bluesy solo horn – established in American and Australian film noir productions of the 1970s and 1980s – was used in contrast to conjure a sense of nostalgia in Australian films produced during the early 1990s. Despite pivoting a period of 60 years, analysis undertaken in this article of Gillian Armstrong's *The Last Days of Chez Nous* (1992) and Paul Harmon's *Shotgun Wedding* (1993) reveals the continued deployment of jazz sounds to rhetorical ends within Australian films bent on exploring competing societal visions. In turn, its identification of a shift from the sound of jazz in general as a marker of the modern to the sound of the bluesy solo horn as a nostalgic trope reinforces the need to read the semiotics of jazz presence in Australian film against particular historical frames.

Coleman, Lindsay / Tillman, Joakim (eds.): *Contemporary Film Music: Investigating Cinema Narratives and Composition*. London: Palgrave Macmillan 2017, xvi, 272 S.

The purpose of this book, through its very creation, is to strengthen the dialogue between practitioner and theorist. To that end, a film academic, a composer, and a composer/musicologist have collaborated as editors on this book, which is in turn comprised of interviews with composers alongside complementary chapters that focus on a particular feature of the composer's approach or style, written by a musicologist or film academic who specializes in that particular element of the composer's output. In the interview portions of this book, eight major film composers discuss their work from the early 1980s to the present day. The focus is on the practical considerations of film composition, the relationship each composer has with the moving image, technical considerations, personal motivations in composing, the relationships composers have with their directors, and their own creative processes. Contemporary Film Music also explores the contemporary influence of electronic music, issues surrounding the mixing of soundtracks, music theory, and the evolution of composers' musical voices.

Collombin, Jean-Blaise: *Ennio Morricone: perspective d'une œuvre*. Paris: L'Harmattan 2016, 212 S. (Univers musical).

« Cinq cents films sinon rien », ainsi pourrait se résumer la riche carrière du maître italien de la musique de cinéma. Par-delà les cinquante années de cet étonnant parcours s'est profilée peu à peu l'une des plus fascinantes créations artistiques du monde contemporain. Souvent imitées, jamais égalées, les compositions du maestro se veulent surtout une formidable leçon d'art humaniste traversant les épreuves du temps avec brio. Cet ouvrage constitue un panorama clair et précis de l'œuvre du compositeur.

Combs, C. Scott: *The Jazz Singer or the corpse. Al Jolson, diegetic music, and the moment of death*. In: *Music and the Moving Image* 5,3, 2012, S. 46–55.

Online. – This article looks at Alan Crosland's *The Jazz Singer* (1929), the first talking film to employ recorded sound for a death scene, in order to determine how it compensates for the absence of a visible depiction of death. Diegetic music places the terminal sign of death further outside the screen body and closer to the body of the spectator. (Vorlage)

Conway, Kelley: Popular Songs in Renoir's Films of the 1930s. In: Phillips, Alastair / Vincendeau, Ginette (eds.): *A Companion to Jean Renoir*. Oxford: Blackwell 2013, S. 199–218.

This chapter focuses on Jean Renoir's *La Chienne* (1931), *Le Crime de Monsieur Lange* (1936), and *La Bête humaine* (1938), films made within a seven-year period and during an era of relative stability in terms of French filmmaking norms – after the coming of sound, but well before the thematic, material, and ideological constraints imposed by the

German occupation. Thematically, the films have much in common. Each film is a realist drama that tells a story about people of modest means and each film culminates in a murder. Despite these similarities, the films employ music in diverse ways, reflecting Renoir's ongoing interest in soundtrack experimentation. Although Renoir's use of external, or nondiegetic, music certainly deserves attention, I shall focus on his use of diegetic music in an effort to demonstrate Renoir's multiple approaches to the use of popular songs in his 1930s films.

Cooke, Mervyn / Ford, Fiona (eds.): *The Cambridge Companion to Film Music*. Cambridge: Cambridge University Press 2016, xxi, 411 S. (Cambridge Companions to Music.).

This wide-ranging and thought-provoking collection of specially-commissioned essays provides a uniquely comprehensive overview of the many and various ways in which music functions in film soundtracks. Citing examples from a variety of historical periods, genres and film industries – including those of the USA, UK, France, Italy, India and Japan – the book's contributors are all leading scholars and practitioners in the field. They engage, sometimes provocatively, with numerous stimulating aspects of the history, theory and practice of film music in a series of lively discussions which will appeal as much to newcomers to this fascinating subject as to seasoned film music aficionados. Innovative research and fresh interpretative perspectives are offered alongside practice-based accounts of the film composer's distinctive art, with examples cited from genres as contrasting as animation, the screen musical, film noir, Hollywood melodrama, the pop music and jazz film, documentary, period drama, horror, science fiction and the Western.

Inhalt: Part one: Making film music. Evolving practices for film music and sound, 1925–1935 / James Buhler and Hannah Lewis – “Pictures that talk and sing”: sound history and technology / David Cooper – The composer and the studio: Korngold and Warner Bros. / Ben Winters – Can't buy me love?: economic imperatives and artistic achievements in the British pop-music film / Stephen Glynn – “A film's first audience”: the composer's role in film and television / George Fenton in conversation with Mervyn Cooke. – *Part two: Approaching film music.* Film-music theory / Guido Heldt – Studying film scores: working in archives and with living composers / Kate Daubney – Returning to *Casablanca* / Peter Franklin – Parental guidance advised?: mash-ups and mating penguins in *Happy Feet* /

Fiona Ford – Materializing film music / Miguel Mera. – *Part three: Genre and idiom*. Film noir and music / David Butler – Another other history of jazz in the movies / Krin Gabbard – Horror and science fiction / Stan Link – The Western / Robynn J. Stilwell – The music of screen musicals / Caryl Flinn – “Britannia–The Musical”: scores, songs and soundtracks in British animation / Paul Wells. – *Part four: Music in world cinemas*. Leone, Morricone and the Italian way to Revisionist Westerns / Sergio Miceli – Music, noise and silence in the late cinema of Jean-Luc Godard / Danae Stefanou – Hans Werner Henze and *The Lost Honour of Katharina Blum* / Annette Davison – Tōru Takemitsu’s collaborations with Masahiro Shinoda: the music for *Pale Flower*, *Samurai Spy* and *Ballad of Orin* / Timothy Koozin – Welcome to Kollywood: Tamil film music and popular culture in South India / Mekala Padmanabhan.

Corbella, Maurizio: Which people’s music? Witnessing the popular in the musicscape of Giuseppe De Santis’s *Riso amaro* (1949, *Bitter Rice*). In: *Music, Collective Memory, Trauma, and Nostalgia in European Cinema after the Second World War*. Ed. by Michael Baumgartner & Ewelina Boczkowska. New York: Routledge 2020, S. 45–69.

Focusing on Giuseppe De Santis’s *Riso amaro* (1949), this chapter investigates Italian neorealism as an archive of mediatized musical memory with special reference to the multi-faceted subject of popular music during the immediate post-war years in Italy. The musical texture of *Riso amaro* can thus be characterized by the neorealist duality between diegetic musical numbers and a non-diegetic film score. The diegetic music is dialectically layered by juxtaposing field-recorded folk tunes of the female paddy workers – mondine – with American-influenced boogie-woogie.

From a narrative perspective, the folk chants act as a manifestation of the mondine’s collective identity while the erotically charged boogie-woogie dance scenes convey the main character’s embodied urge for self-determination and her illusive and tragic attempt to escape her socioeconomic condition. Finally, Goffredo Petrassi’s revisiting of folk and jazz tunes in his symphonic score can be seen as an attempt to rehabilitate the popular music register within a modernist framework – a response to the rhetorical overuse of folklore and to the censorship of jazz during the fascist era. This chapter examines the interactions and clashes of these musical layers by highlighting *Riso amaro*’s multi-authorial and even contradictory musical testimony. (Vorlage)

Coulter, John: Electroacoustic Music with Moving Images: The Art of Media Pairing. In: *Organised Sound* 15,1, 2010, S. 26–34.

Composers working with sounds and moving images are immediately confronted with a paradox. On one hand, audiovisual materials appear to offer the possibility of complementing one another – of forming a highly effective means of communicating artistic ideas – and on the other, they appear to carry the risk of detracting from one another – of deforming the musical language that he or she has worked so hard to create. Durk Talsma and Max Mathews succinctly state the opposing principles. ‘Many behavioural studies have provided evidence for the hypothesis that integrating visual and auditory stimuli serves the purpose of enhancing perceptual clarity ... These results suggest that communication between the visual and auditory brain areas is a highly effective and relatively automatic process’. This article seeks to transcend this paradox through the identification of audiovisual materials that function in different ways. Examples of creative work are offered to illustrate more general points of ‘language’, a model for classifying media pairs is put forward, and practical methods of audiovisual composition are proposed. The narrow findings of the study offer a vocabulary for discussing the functionality of audiovisual materials, detailed methods of media pairing, and techniques of parametric alignment, while the wider findings extend to associated domains

such as live electronic music, and hyper-instrument design.

Decobert, Lydie: *La corde musicale d'Alfred Hitchcock*. Paris: L'Harmattan 2015, 214 S. (Cinéma(s).).

Musique et crime ne se dissocient pas dans le cinéma hitchcockien. La musique joue un rôle déterminant dans la narration: elle déclenche le soupçon, trahit un meurtrier, place une héroïne en danger de mort, révèle un repaire de bandits ou attise la furie d'oiseaux ravageurs. Comment „la corde musicale“ d'Alfred Hitchcock se manifeste-t-elle ? La musique mise en scène scande la montée de la tension, dynamise les images, découpe les séquences. Les lèches décochées par l'archer musicien font vibrer les images en traversant l'écran et le cœur du spectateur. Musique et crime ne se dissocient pas dans le cinéma hitchcockien. La musique joue un rôle déterminant dans la narration: elle déclenche le soupçon, trahit un meurtrier, place une héroïne en danger de mort, révèle un repaire de bandits ou attise la furie d'oiseaux ravageurs. Elle se fait aussi métaphore de l'innocence ou incarnation de l'inini. Comment «la corde musicale» d'Alfred Hitchcock se manifeste-t-elle ? La musique mise en scène scande la montée de la tension, dynamise les images, découpe les séquences; elle inspire des processus de développement. La «mesure» placée à la clé... de l'énigme permet-elle de «déchiffrer» un film comme on déchiffre une partition ? Est-ce parce que la musique imprègne les images qu'elle leur confère

une forme qui échappe à la représentation?

In the first decades of the twenty-first century, 'indie' became a widespread descriptor for a gaming culture comprising developers, players, and distributors interested in creating an alternative to what was seen as a glutted, uninspired, and corporatised game market. While the indie movement is often argued to have facilitated a new, 'DIY' mentality in the design and practice of games and interactive media, the aesthetics and technical practices behind the culture share strong affinities to computational forms of art and music throughout the late twentieth century. This essay aligns the aesthetics and creative practices of indie game designers with traditions of 'generative' art and music from the late twentieth century. In doing so, I outline a broader musical turn that has occurred within gaming culture—one in which sound becomes a primary mechanic in the shaping of 'procedural' and generative aesthetics at the heart of various forms of digital art. Ultimately, I provide not only an account of the ways in which sound and musical design have helped to characterise the ludic interests of the indie game movement in the first decades of the twenty-first century, but also a theoretical model adequate to understand the relationship between interactive systems, musical and sonic meaning, and user experience both in games and digital platforms more broadly.

Mit Analysen zu den US-Spielfilmen *Casablanca* (USA 1942, Michael Curtiz), *Psycho* (USA 1960, Alfred Hitchcock) und *Hatari* (USA 1962, Howard Hawks) sowie zu den spanischen Kurzfilmen *Peliculeros* (2009, José Lobillo), *Vic* (2011, Diana Saavedra y Clara) und *Clara. El mar* (2009, Dany Campos).

En esta investigación se profundiza en el papel del análisis de la música cinematográfica como modelo en el que basar la propia creación musical de bandas sonoras (este término lo utilizaremos en adelante en su acepción más extendida, como sinónimo de música de una película). Para ello se ha llevado a cabo un estudio en el que se combinan diferentes metodologías: analítico-descriptiva, hermenéutica y creativo-performativa. En este trabajo estudiaremos la importancia del análisis de la música de cine tanto a nivel teórico como por su potencial de herramienta para la creación. Para ello comenzaremos con un acercamiento previo al concepto de música de cine, sus clasificaciones tipológicas, las funciones que puede desempeñar como elemento activo de un film, la historia de esta disciplina artística y el complejo proceso de creación de una banda sonora musical, con los diferentes factores humanos y técnicos que intervienen.

Donnelly, Kevin J.: *Occult Aesthetics: Synchronization in Sound Film*. New York/Oxford: Oxford University Press 2014, xii, 260 S. (The Oxford Music / Media Series.).

This book offers the first sustained theorization of synchronization in sound film. The author addresses the manner in which the lock of audio and the visual exerts a synergetic effect, an aesthetic he dubs occult: a secret and esoteric effect that can dissipate in the face of an awareness of its existence. Drawing upon theories of sound from Sergei Eisenstein to Pierre Schaeffer to Michel Chion, the book approaches and investigates points of synchronization as something like repose, providing moments of comfort in a potentially threatening environment that can be fraught with sound and image stimuli. Correspondingly, lack of synchrony between sound and images is characterized as potentially disturbing for the audience, signaling moments of danger. From this perspective, the interplay between the two becomes the central dynamic of audio-visual culture more generally which provides a starting point for a new understanding of audio/visual interactions. This fresh approach to the topic will be discussed in theoretical and historical terms as well as elaborated through analysis of and reference to a broad selection of films and their soundtracks

Donnelly, Kevin J. / Wallengren, Ann-Kristin: *Today's Sounds for Yesterday's Films: Making Music for Silent Cinema*. Basingstoke/New York: Palgrave Macmillan 2016, xi, 225 (Palgrave Studies in Audio-Visual Culture.).

In recent years, there has been something of an explosion in the performance of live music to silent films. There is a wide range of films with live and new scores that run from the historically accurate orchestral scores to con-

temporary sounds by groups such as Pet Shop Boys or by experimental composers and gothic heavy metal bands. It is no exaggeration to claim that music constitutes a bridge between the old silent film and the modern audience; music is also a channel for non-scholarly audiences to gain an appreciation of silent films. Music has become a means both for musicians and audiences to understand this bygone film art anew. This book is the first of its kind in that it aims to bring together writings and interviews to delineate the culture of providing music for silent films. It not only has the character of a scholarly work but is also something of a manual in that it discusses how to make music for silent films.

Drees, Stefan: „...das, was hinter den Bildern gemeint ist“. Johannes Kalitzkes Musik zum Stummfilm *Schatten* von Arthur Robison. In: *Neue Zeitschrift für Musik* 178,1, 2017, S. 36–39.

Drees, Stefan: Erschütterung des Urvertrauens und Einbruch des Unheimlichen. Zur Funktion der Liedmelodien in der filmischen Narration von »Ich seh Ich seh« (AUT 2014, Veronika Franz und Severin Fiala) und in Olga Neuwirths Filmmusik, in: *Kieler Beiträge zur Filmmusikforschung* (14.01.2019), S. 9–33.

Als klanggewordene Signaturen eines noch unerschütterten Vertrauensverhältnisses zwischen Eltern und Kind gehören Schlaf- und Wiegenlieder zu den intimsten Gesängen überhaupt. Im österreichischen Film 'Ich seh Ich seh' (2014) von Veronika Franz und Severin Fiala spielen zwei dieser Lieder – das Brahms'sche Wiegenlied „Guten Abend, gut' Nacht“ und das Schlaflied „Weißt du wie viel Sternlein stehen?“ – eine zentrale Rolle. Der Autor setzt sich einerseits mit der dramaturgischen Funktion der beiden Liedmelodien innerhalb der filmischen Narration auseinander. Andererseits wird untersucht, auf welche Weise die Lieder in der Filmmusik von Olga Neuwirth Verwendung finden. Anhand einer Produktionsversion des Films lässt sich zeigen, wie die Komponistin die Melodien in ihre Filmmusik eingearbeitet hat und dadurch eine enge Verknüpfung zwischen Diegese und musikalischem Kommentar herstellt. Die endgültige Filmversion wiederum verdeutlicht, wie die beiden Regisseure diese Verknüpfungen durch Neuabmischung und partielle Eliminierung der Musik wieder aufgelöst haben. (Autor)

Drees, Stefan: What remains of the past ...: diegetic music in the *Star Trek* series as reference to the cultural heritage of humanity. In:

Lied und populäre Kultur: Jahrbuch des Zentrums für Populäre Kultur und Musik 64, 2019, S. 141–154.

The paper focuses on the use of diegetic or source music in the *Star Trek* universe. Its main purpose is to investigate which references are used in *Star Trek: The Original Series* (1966–1969), *Star Trek: The Next Generation* (1987–1994), *Star Trek: Deep Space Nine* (1993–1999), *Star Trek: Voyager* (1995–2001), *Star Trek: Enterprise* (2001–2005), and *Star Trek: Discovery* (2017ff.) to construct a particular prospect of music as one of the most important parts of our cultural heritage from the future's point of view. Dubowsky, Jack Curtis: *Intersecting Film, Music, and Queerness*. Basingstoke/New York: Palgrave Macmillan 2016, viii, 266 S. (Palgrave Studies in Audio-visual Culture.).

[U]ses musicology and queer theory to uncover meaning and message in canonical American cinema. This study considers how queer readings are reinforced or nuanced through analysis of musical score. Taking a broad approach to queerness that questions heteronormative and homonormative patriarchal structures, binary relationships, gender assumptions and anxieties, this book challenges existing interpretations of what is progressive and what is retrogressive in cinema. Examined films include *Bride of Frankenstein*, *Louisiana Story*, *Rudolph the Red-Nosed Reindeer*, *Blazing Saddles*, *Edward Scissorhands*, *Brokeback Mountain*, *Boys Don't Cry*, *Transamerica*, *Thelma & Louise*, *Go Fish* and *The Living End*, with special attention given to films that subvert or complicate genre. Music is analyzed with concern for composition, intertextual references, absolute musical structures, song lyrics, recording, arrangement, and performance issues. This multidisciplinary work, featuring groundbreaking research, analysis, and theory, offers new close readings and a model for future scholarship.

Dufays, Sophie / Nasta, Dominique / Cadalanu, Marie (éds.): *Connait-on la chanson?*

Usages de la chanson dans les cinémas d'Europe et d'Amérique Latine depuis 1960. Bruxelles / Bern / Berlin / New York / Oxford / Warsawa / Wien: Peter Lang 2019, 340 S. (Repenser le Cinéma. / Rethinking Cinema. 9.).

Les chansons, liées au cinéma depuis ses origines, ont acquis une force nouvelle et singulière tant dans les productions commerciales que dans les films d'auteur récents, notamment en Europe et en Amérique latine. Mais si les études consacrées aux rôles de la chanson et de la musique populaire dans le cinéma se sont multipliées, peu de travaux ont considéré leur place dans les cinémas européens et latino-américains au-delà de la période classique. C'est sur un corpus de films à chansons parus à partir des années 1960 que se concentre le présent ouvrage. Les différentes contributions proposent un panel d'approches novatrices et complémentaires, esthétiques mais aussi culturelles, historiques et musicologiques, qui offrent un éclairage inédit sur cette production. L'ambition de ce volume est de participer au développement d'une analyse esthétique et théorique du film à chansons dégagée du modèle hollywoodien mais aussi, plus largement, de tout modèle générique. Penser la place qu'occupe la chanson dans des cinématographies très variées géographiquement et historiquement, du cinéma français au cinéma brésilien en passant par les cinématographies d'Europe de l'Est, permet de susciter de nombreux rapprochements inédits, susceptibles d'ouvrir la voie à de nouvelles approches.

Inhalt: Marie Cadalanu, Sophie Dufays, Dominique Nasta: Introduction / 13. – I. *Approches théoriques:* – Phil Powrie: La chanson-cristal et la répétition / 33. – Laurent Guido: Entre appropriation et aliénation: usages ambivalents de la chanson au cinéma (à partir de *Bande de filles*, Céline Sciamma, 2014) / 49. – Dominique Nasta: Chanson et signification au cinéma: un demi-siècle de parcours croisés (1964–2014) / 63. – Maria Luisa Ortega: Les paysages affectifs de la chanson dans le cinéma espagnol du XXIe siècle / 81. – II. *Approches culturelles / historiques:* – Martin Barnier: Le film avec chanson au début des années 1960 et le cas de *Cléo de 5 à 7* / 107. – Renaud Lagabrielle: Le film *en chanté*, un genre en devenir du cinéma français? / 121. – Pablo Piedras & Sophie Dufays: Chanson populaire,

2nd ed., [s.l. (Raleigh, NC)]: DMG / Lulu.com 2014, 167 S.

This essay represents the first organic study about Jerry Goldsmith (1929–2004), an emblematic American film composer from the second half of the 20th century. His personality is examined within the cinematic production system in which he operated for about fifty years, collaborating with directors like

John Huston, John Frankenheimer, Franklin J. Schaffner, Roman Polanski, Joe Dante, Richard Donner, Paul Verhoeven and many others.

Eicke, Stephen: *The Struggle Behind the Soundtrack: Inside the Discordant New World of Film Scoring*. Jefferson, N.C.: McFarland 2019, vii, 219 S.

From the Westerns of the 1960s to current blockbusters, composers for both film and television have faced new challenges – ever-more elaborate sound design, temp tracks, test audiences and working with companies that invest in film score recordings all have led to creative sparks, as well as frustrations. Drawing on interviews with more than 40 notable composers, this book gives an in-depth analysis of the industry and reveals the creative process behind such artists as Klaus Badelt, Mychael Danna, Abel Korzeniowski, Walter Murch, Rachel Portman, Alan Silvestri, Randy Thom and others.

Etcharry, Stéphan / Rossi, Jérôme (sous la dir. de): *Du concert à l'écran: La musique classique au cinéma*. Rennes: Presses universitaires de Rennes 2019, 459 S. (PUR-Cinéma.).

En s'associant à un film, toute musique préexistante apporte non seulement son atmosphère sonore particulière mais également un réseau de significations liées à son histoire. En se concentrant sur la « musique classique » expression désignant ici une certaine manière « savante » d'élaborer une œuvre, cet ouvrage s'empare de morceaux riches d'une tradition interprétative et d'une réception qui ont parfois plusieurs siècles. Outre une charge sémantique nouvelle, le passage d'un média à un autre induit une perte d'autonomie, de profonds changements dans les contextes d'exécution et les conditions d'écoute, le passage d'une temporalité de la moyenne ou de la longue durée permettant le développement de la forme musicale à des formats souvent très réduits qui trahissent d'inévitables coupures. Les cinq thématiques de ce livre « Topoi de la musique classique au cinéma », « Musique et vérité historique », « Musique et narration », « Musique et identité » et « Musique et structure » croisent d'autres questionnements concernant les choix d'extraits opérés, les interprétations retenues, la manière dont la musique classique dialogue avec d'autres musiques préexistantes et la musique originale, les arrangements et les réécritures pour s'adapter au propos filmique.

Inhalt: Introduction. – 1. *Topoi de la musique classique au cinéma*. Delphine Vincent: *A Night at the Opera*: la visite à l'opéra dans le cinéma américain contemporain. – Gérard Dastugue: *La Chevauchée des Walkyries* au cinéma: une citation en palimpseste. – Grégoire Tosser: Vicissitudes cinématographiques du « Cold Song » de Purcell – 2. *Musique et vérité historique*. Thierry Grandemange: *Jeanne d'Arc* selon Jacques Rivette et Philippe Ramos: la musique de film entre vérité et vraisemblance. – Isabelle Ragnard: Résonances

musicales de la Renaissance dans un film des années 1930: *The Private Life of Henry VIII* (Alexander Korda, 1933). – Bertrand Porot: Tous les matins du monde: la leçon de musique baroque d'Alain Corneau. – 3. *Musique et narration*. Lionel Pons: La musique classique dans *A Room With a View* de James Ivory: l'interpolation comme construction d'un personnage. – Chloé Huvet: « Live as a monster, or die as a good man? » Musique classique, hantise et distorsion du réel dans *Shutter Island* (Martin Scorsese, 2010). – Jérôme Rossi: Poétique de la musique répétitive au cinéma: le recours aux œuvres de John Adams dans *Io sono l'Amore* (Luca Guadagnino, 2009). – 4. *Musique et identité*. New York*. – 5. *Musique et structure*. Stéphan Etcharry: Britten et le monde de l'enfance au prisme de la musique du film *Moonrise Kingdom* (Wes Anderson, 2012). – Benjamin Lasauzet: *2001: l'Odyssée du spectre*. – Florian Guilloux: Once upon a music adaptation: un aperçu du travail de George Bruns dans *Sleeping Beauty* (*La Belle au bois dormant*, 1959) des studios Disney. – Stéphan Etcharry et Jérôme Rossi: Conclusion.

Ethnersson Pontara, Johanna: Musical narration, performance and excess: the creation of horror in the Swedish opera *Tintomara* by Lars Johan Werle. In: *Act: Zeitschrift für Musik & Performance* 7, 2017, 22 S.; [[URL](#)].

[E]xamines the different layers in the opera *Tintomara* by Lars Johan Werle and Leif Söderström (Stockholm 1973), based on the short story “The Queen’s Jewel” by Carl Johan Love Almqvist. Pontara’s thesis claims that the opera’s message is expanded by the composition technique. By assembling the different styles Werle brings the relationship between narration and performance to oscillation. He uses his experience as a film music composer to create shock effects, such as those caused by the music in horror films, in order to perform them on the listeners’ bodies. Ethnersson Pontara applies film theories

to reveal how the orientation and disposition of the hermaphrodite Tintomaras is undermined by the power disparities between male subjects and female objects as they are traditionally represented in romances, porn and horror films. (Vorlage)

Etscheit, Ulrich: „Ich habe die Oper mein ganzes Leben gehaßt“: Zur Rezeption von Musik im literarischen und filmischen Schaffen Pier Paolo Pasolinis. In: *Musica* 42, 1988, S. 246–254.

Evans, Mark: *Sounding Funny: Sound and Comedy Cinema*. Sheffield/Bristol: Equinox Publishing 2016, vi, 259 S. (Genre, Music and Sound.).

Comedy has been a feature of cinema since its inception. From mickey-moused accompaniments to slapstick scenes, ironic musical statements, clever musical allusions and jokes, well-worn sound effects, and even laugh tracks, sound has been integral to the development of the comedy on screen. This volume covers all aspects of sound (including dialogue) and music as they have been utilised in comedy film. The volume looks at various subsets of the ‘comedy film’ from the post-War period, including black comedy, romantic comedy, slapstick, dialogue comedy, parody and spoofs. This volume aims to explore the way in which music and sound articulate humour, create comedic situations and direct comedic identifications for viewer/listeners.

Evans, Mark / Hughes, Diane (eds.): *The Singing Voice in Contemporary Cinema*. Sheffield: Equinox 2017 [2019], 256 S. (Genre, Music and Sound.).

This volume focuses on the singing voice in contemporary cinema from 1945 to the present day, and rather than being restricted to one particular genre, considers how the singing voice has helped define and/or confuse genre classification. Typically heard in song, the singing voice is arguably the most expressive of all musical instruments. This volume celebrates the ways in which singing features in film. This includes the singing

voice as protagonist, as narrator, as communicator, as entertainer, and as comedic interlude. Whether the singing voice in film is personally expressive, reflexive and distant, or synchronized for entertainment, there is typically interplay between the voice and visual elements. Extending beyond the body of literature on ‘the musical’, the volume is not about musicals per se. Rather, *The Singing Voice in Contemporary Cinema* discusses the singing voice as a distinct genre that focuses on the conceptualization and synchronization of the singing voice in the post-War era. It explores the relationship between screen, singing, singer and song; it celebrates the intersection of the singing voice and popular culture. In doing so, the volume will cross multiple disciplines including vocal studies, film studies, film sound studies, and music production (vocal processing).

Inhalt: 1. The Singing Voice in Contemporary Cinema / Diane Hughes & Mark Evans. – 2. Singing, Sonic Authenticity and Stardom in *Dancer in the Dark* / Nessa Johnston. – 3. Find Your Voice: Narratives of Women’s Voice Loss in American Cinema / Katherine Meizel. – 4. Singing a Life in Bondage: Black Vocality and Subjectivity in *12 Years a Slave* / Gianpaolo Chiriacò. – 5. Ghost Singers: The Singing Voice in Korean Pop Cinema / Sarah Keith & Alex Mesker. – 6. Voices of Sheila: Re-signification in Bollywood Filmic and Non-filmic Contexts / Nina Menezes. – 7. Before #MeToo: Hearing Vulnerability / Diane Hughes & Mark Evans. – 8. Trailer Trash or Inspired Vocality? Song as Promotion and Aesthetic Object in Cinematic Previews / James Deaville & Agnes Malkinson. – 9. ‘You’ve Got a Friend in Me’: Singing Voices in the *Toy Story* Films / Natalie Lewandowski & Penny Spirou. – 10. The Singing Voice and its Use to Evoke Unease, Discomfort and Violence / Mark Thorley & Liz Giuffre. – 11. The Female Singing Voice: Gospel, Blues, Epic Stories and Animation / Anne Power. – 12. From *Despicable Me* to *Happy*: Animated Vocality in the Evolution of Felonius Gru / Diane Hughes & Veronica Stewart.

Evans, Tristian: *Shared Meanings in the Film Music of Philip Glass: Music, Multimedia and Postminimalism*. Farnham, Surrey/Burlington: Ashgate 2015, xvii, 221 S.

Inhalt: Glass, postminimalism and the media: initial questions and contexts – The satisfaction of a drive: postminimal music and the advertising media – Postmodern unfoldings: narrative, temporality and repetition in postminimal music – Notes on a soundtrack: reading Glass’s recent film scores – Metamorphic meanings in Glass’s intertextual soundtracks – This is (not) a soundtrack: Dracula the movie or music drama? – Existential conflict in *Naqoyqatsi*, book of longing and watchmen.

Everingham, Matthew: *Orchestrating Film: The contrasting orchestral-compositional approaches of Bernard Herrmann and John Williams and their modern legacy*. In: *Puratoke: Journal of Undergraduate Research in the Creative Arts and Industries* 1, 2017, S. 110–138; [[URL](#)].

Music is one of the most powerful forces in film, and composers’ varied use of orchestration and sound is fundamental to the impact of music in this medium. From the live accompaniments of the earliest silent film, to the lush orchestrations of the ‘golden age’, to the electronic and experimental scores of the twenty-first century, the role of orchestration, timbre and sound has been pivotal to the function of music in film and its ability to shape and inform narrative, character and theme (Gorbman, 1987). In an increasingly vast and constantly evolving body of film music, two figures stand out as proponents of contrasting compositional approaches to orchestration in film: Bernard Herrmann and John Williams (Cooke, 2004). Their work reveals orchestration and compositional considerations as powerful tools that contribute to dramatic elements of narrative, character and theme. To understand these approaches their influences and contexts must be discussed (Part I). Analysing the contrasting orchestral approaches of Herrmann and Williams in their respective films *The Day the Earth Stood Still* (1951) and *Close Encounters of the Third Kind* (1977) sheds light on the contrasting ways orchestration is approached to influence dramatic elements in film (Part II). It is important to examine the legacy of Herrmann and Williams’ contrasting approaches in more recent film music such as the representative scores of Thomas Newman (*Wall-E*, Stanton,

2008)) and Stephen Price (*Gravity*, Cuarun, 2013)) to fully examine the role of orchestration in film today (Part III).

Faulkner, Robert R.: *Hollywood Studio Musicians: Their Work and Careers in the Recording Industry*. With a new preface by Howard S. Becker. New Brunswick, NJ: Aldine Transaction 2013, xiv, 218 S.

Zuerst: Chicago, Ill.: Aldine-Atherton 1971, ix, 218 S. (Observations.).

When originally published in 1971, *Hollywood Studio Musicians* was the first detailed analysis of the work and careers of production personnel in an industry devoted to mass culture. Previously, most researchers overlooked mass-culture industries as work settings, preferring to focus on content rather than the artists who created it. This lucid and insightful book looks under the hood of the Hollywood film scoring and recording industry, focusing upon the careers and work of top-flight musicians. A new preface by Howard S. Becker highlights the study's historical context and importance. Based upon in-depth interviews with freelance musicians, Faulkner provides original insights into how we conceptualize occupations as well as the highly stratified system of professional prestige that results in what we now call the “A-

List.“ Faulkner develops a framework for discovering and exploring how rapidly changing and demanding freelance work induces status hierarchies, sustains and updates collegial reputations, tightens social networks between contractors, and musicians, and restricts access to upward career paths. This volume is a gem, a masterpiece of field research combined with probing, theoretically informed analysis. Aside from the value of its own findings, the volume offers students of sociology, film, and other creative industries a prime example of how to do good social science research. In short, it is a model for investigators to turn to when their own research needs help, an exemplar of how research is done when it is done well.

Feiten, Benedikt: *Jim Jarmusch: Musik und Narration: Transnationalität und alternative filmische Erzählformen*. Bielefeld: transcript 2017, 208 S.

Feiten nutzt Filmwissenschaft, Musikwissenschaft und transnational orientierte Amerikanistik, um deren narrative Funktionen zu ergründen. Er zeigt, wie die Musik ein Erzählsystem stützt, das nicht auf Entwicklung, sondern auf Wiederholung und Variationen aufbaut.

Felsmann, Klaus-Dieter (Hrsg.): *Klang der Zeiten: Musik im DEFA-Spielfilm. Eine Annäherung*. Berlin: Bertz+Fischer 2013, 270 S.

Rez. (Laura Böhm) in: *Medienwissenschaft: Rezensionen*, 2016, S. 27–28.

Etwa 145 Komponisten waren zwischen 1946 und 1990 im DEFA-Spielfilmstudio in Babelsberg an der Produktion der rund 950 dort entstandenen Filme beteiligt. Auch wenn sie alle einem Auftraggeber verpflichtet waren – der ihnen recht komfortable Arbeitsbedingungen bot – führte das nicht zu einem einheitlichen DEFA-Sound. Die individuellen kompositorischen Handschriften spiegeln über den gesellschaftlichen Entstehungskontext hinaus sowohl die musikästhetischen als auch die zeitpolitischen Strömungen der zweiten Hälfte des 20. Jahrhunderts wider. – Durch Gespräche mit Komponisten wie Peter Rabenalt, Wolfgang Thiel, Bernd Wefelmeyer und Christian Steyer und durch Analysen von

DEFA-Filmen wie u.a. *EHE IM SCHATTEN* (Musik: Wolfgang Zeller), *DER FALL GLEIWITZ* (Musik: Kurt Schwaen), *DIE LEIDEN DES JUNGEN WERTHERS* (Musik: Siegfried Matthus), *TECUMSEH* (Musik: Günther Fischer) nähert sich der vorliegende Band dem komplexen kulturhistorischen Thema an. Dabei geht es sowohl um zeitgeschichtliche Aspekte als auch um grundsätzliche Fragen einer Ästhetik der Filmmusik.

Inhalt: Klaus-Dieter Felsmann: So könnte es gewesen sein – Möglichkeiten und Grenzen einer Annäherung / 11. – Wolfgang Thiel: Klänge aus Babelsberg – eine kurze Geschichte der Musik zu DEFA-Spielfilmen / 19. – *Komponisten im Gespräch:* – Peter Rabenalt: Die jazzige Art gefiel den jungen Regisseuren / 49. – Bernd Wefelmeyer: Für mich ist Filmmusik mit großer Orchestermusik verbunden / 71. – Peter Michael Gotthardt: Eine Filmmischung ist für mich immer eine heilige Handlung / 91. – Christian Steyer: Was keine Sinnlichkeit hat, hat keinen Sinn / 115. – Wolfgang Thiel: »Schreiben Sie für den Film einfacher, junger Mann« / 136. – Andre Asriel: Die beste Filmmusik ist die, die überhaupt nicht kommt / 160. – Reiner Bredemeyer: Oberstes Prinzip: Dramaturgie / 176. – *Film-musikalische Analysen ausgewählter DEFA-Filme:* – Wolfgang Thiel: Ernst Roters. *Die Mörder sind unter uns* / 183. – Wolfgang Thiel: Wolfgang Zeller. *Ehe im Schatten* / 187. – Guido Heldt: Hanns Eisler. *Der Rat der Götter* / 192. – Jean Martin: Paul Dessau. *Du und mancher Kamerad* / 198. – Denis Newiak: Joachim Werzlau. *Lissy* / 202. – Jean Martin: Günter Klück. *Berlin – Ecke Schönhauser* / 207. – Wolfgang Thiel: Kurt Schwaen. *Der Fall Gleiwitz* / 211. – Dieter Wiedemann: Andre Asriel. *Der verlorene Engel* / 215. – Ruben Fischer: Karl-Ernst Sasse. *Signale – ein Weltraumabenteuer* / 219. – Jean Martin: Reiner Bredemeyer. *Bye-Bye Wheelus* / 223. – Denis Newiak: Günther Fischer. *Tecumseh* / 227. – Dieter Wiedemann: Peter Michael Gotthardt. *Die Legende von Paul und Paula* / 232. – Dieter Wiedemann: Gerhard Rosenfeld. *Leben mit Uwe* / 238. – Ruben Fischer: Friedrich Goldmann. *Till Eulenspiegel* / 242. – Robert Rabenalt: Siegfried Matthus. *Die Leiden des jungen Werthers* / 246. – Guido Heldt: Andreas Aigmüller. *Junge Leute in der Stadt* / 251.

Finocchiaro, Francesco (a cura di): *Musica e cinema nella repubblica di Weimar*. Roma: Aracne 2012, 149 S. (Aracne. 10. / Scienze dell'antichità, filologico-letterarie e storico-artistiche. 803.).

Il volume intende offrire un contributo preliminare in direzione di un'indagine storica sistematica, volta a documentare le relazioni fra musica d'avanguardia e cinema, nel secondo e terzo decennio del Novecento. Per una ricerca storica sulla componente musicale nell'era del „muto“, la stagione del cinema tedesco compresa fra il 1913 e il 1929 costituisce un caso di studio esemplare, poiché rappresenta, nella sua complessità, uno snodo di assoluta importanza nella storia dell'arte cinematografica e musicale. Tanto complesso e poliedrico è l'oggetto di studio, tanto sfaccettato e vario è l'approccio che i cinque saggi propongono ad altrettanti temi paradigmatici: dalle convergenze tra arte cinematografica e musicale nel cinema astratto di Hans Richter e Viking Eggeling, alla collaborazione fra Hugo von Hofmannsthal, Richard Strauss e Robert Wiene per la versione cinematografica del Cavaliere della rosa, dalle presenze jazzistiche nella musica di Gottfried Huppertz per Metropolis di Fritz Lang, alla recezione della musica per film e del cinema come arte nell'opera e nel pensiero di Arnold Schönberg e Alban Berg.

Finocchiaro, Francesco: *Musical Modernism and German Cinema from 1913 to 1933*. Cham, Switzerland: Palgrave Macmillan 2017, xix, 259 S.

This book investigates the relationship between musical Modernism and German cinema. It paves the way for an unorthodox path of research, one which has been little explored up until now. The main figures of musical Modernism, from Alban Berg to Paul Hindemith, and from Richard Strauss to Kurt Weill, actually had a significant relationship with cinema. True, it was a complex and contradictory relationship in which cinema often emerged more as an aesthetic point of reference than an objective reality; nonetheless, the reception of the language and aesthetic of cinema had significant influence on the domain of music. Between 1913 and 1933, Modernist composers’ exploration of cinema reached such a degree of pervasiveness and consistency as to become a true aesthetic paradigm, a paradigm that sat at the very heart of the Modernist project. In this insightful volume, Finocchiaro shows that the creative confrontation with the avant-garde medium par excellence can be regarded as a vector of musical Modernism: a new aesthetic paradigm for the very process – of deliberate misinterpretation, creative revisionism, and sometimes even intentional subversion of the Classic-Romantic tradition – which realized the “dream of Otherness” of the Modernist generation.

Inhalt: 1. Introduction: the cinematic paradigm – 2. Prologue: cinema and the arts – 3. Cinema and expressionist drama – 4. Paul Hindemith and the cinematic universe – 5. Edmund Meisel: the cinematic composer – 6. Der Rosenkavalier: a problematic remediation

– 7. Cinema and musical theatre: Kurt Weill and the Filmmusik in Royal Palace – 8. Alban Berg, Lulu, and Cinema as artifice – 9. New objectivity and abstract cinema – 10. Between film music and chamber music – 11. Epilogue: the dawn of sound cinema.

FitzGerald, Louise / Williams, Melanie (eds.): *"Mamma Mia!" The Movie: Exploring a Cultural Phenomenon*. London: I.B. Tauris 2013, xii, 248 S.

Inhalt: Facing our Waterloo: Evaluating *Mamma mia! the Movie* / Louise FitzGerald and Melanie Williams – Everyone listens when I start to sing: gender and ventriloquism in the songs of *Mamma mia!* on stage and screen / Malcolm Womack – *Mamma mia!*'s female authorship / Melanie Williams – 'See that girl, watch that scene': notes on the star persona and presence of Meryl Streep in *Mamma mia!* / Deborah Mellamphy – 'Knowing me, knowing you': reading *Mamma mia!* as feminine object / Caroline Bainbridge.

Mama mia! The Movie (2008) was one of the top international box-office hits of its year and the fastest selling DVD in British history. Responses were passionate but polarized: while legions of fans participated in celebratory sing-along screenings, critics dismissed it as a „Super Pooper“. The critical split often ran along the fault line of gender, with male critics initially unimpressed by the uninhibited, tongue in cheek frivolity of this rare film, produced and directed by women. This welcome first book on a twenty-first century cultural phenomenon explores these diverse responses to *Mama mia!*, along with key issues such as the film's representation of female friendship and its focus on the older female protagonist, as well as its status as queer text.

Flinn, Cary: *"The Sound of Music"*. London: British Film Institute 2015, 112 S. (BFI film classics.).

A half-century after its release, *The Sound of Music* remains the most profitable and recognisable film musical ever made. Foregrounding the film's iconic musical numbers as key to its global longevity and appeal, Cary Flinn's fresh new study traces the film's prehistories, its place amongst the events of the 1960s, and its afterlife amongst fans.

Ford, Andrew: *The Sound of Pictures: Listening to the Movies, from Hitchcock to "High Fidelity"*. Melbourne: Schwartz Publishing / Ann Arbor, Mich.: ProQuest 2010, 185 S.

Dass.: *The Sound of Pictures*. Collingwood, Vic.: Black Inc. 2010, 312 S.

The Sound of Pictures is an illuminating journey through the soundtracks of more than 400 films. How do filmmakers play with sound? And how does that affect the way we watch their movies? Whether pop or classical, sweeping or sparse, music plays a crucial role in our cinematic experience. Other sounds can be even more evocative: the sounds of nature, of cities and of voices. In *The Sound of Pictures*, Andrew Ford speaks to acclaimed directors and composers, discovering radically different views about how much music to use and when. And he explores some of cinema's most curious sonic moments. How did Alfred Hitchcock use music to plant clues in his films? Why do some 'mix-tape' soundtracks work brilliantly and others fall flat? How do classics from *A Clockwork Orange* to *The Godfather*, *Cinema Paradiso* to *High Noon*, use

music and sound effects to enhance what we see on screen?

Inhalt: Introduction – The role of music – Five composers: Ennio Morricone; Richard Rodney Bennett; Dick Hyman; Lalo Schifrin; Howard Shore – Listening to the music: Classical music in films; Pop goes the score; Pictures of sound; Listening for clues in Hitchcock; The sound of voices; The sounds of silence (and Bumps in the night) – Five directors: Bruce Beresford; Sally Potter; Wim Wenders; Peter Greenaway; Peter Weir – Epilogue: The shared experience of sound.

In: *Music and Sound in Silent Film: From the Nickelodeon to “The Artist”*. Ed. by Simon Trezise & Ruth Barton. London: Routledge 2019, S. 124–145.

Fox, Albertine: *Godard and Sound: Acoustic Innovation in the Late Films of Jean-Luc Godard*. London/New York: I.B. Tauris 2018, xiii, 274 S.

By detailing the production contexts and philosophy behind Godard's idiosyncratic sound design, it provides an accessible route to understanding his complex use of music, speech and environmental sound, alongside the distorting effects of speed alteration and auditory excess. The book is framed by the concept of ‘acoustic spectatorship’: a way of cultivating active listening in the viewer. It also draws on ideas by leading sound theorists, philosophers, musicians, and poets, giving particular emphasis to the pioneering thought of French sound engineer and theorist, Pierre Schaeffer.

Fraile, Teresa / Viñuela, Eduardo (eds.): *Relaciones música e imagen en los medios audiovisuales*. Oviedo: Ediciones de la Universidad de Oviedo 2015, 449 S.

Este libro engloba diferentes campos de la investigación actual sobre música y medios audiovisuales. El objetivo de esta publicación es ofrecer al lector una visión multidisciplinar de las líneas de trabajo que se están desarrollando en el campo de estudio que se ocupa de las relaciones entre la música y la imagen. De esta manera, el volumen se divide en diferentes bloques: comienza con un apartado dedicado a cuestiones metodológicas, en el que se abordan debates fundamentales para el análisis de la música en el audiovisual, como las funciones de la música en el cine. Un segundo bloque se centra en la música del cine español en diferentes períodos de la historia. A continuación se examina la obra de diversos compositores para el cine (Alan Menken, José Nieto, Alberto Iglesias) y la presencia de la música en la filmografía de directores como Von Trier o Visconti. Otro apartado se dedica al análisis pormenorizado de la música de películas concretas con ejemplos que van desde el periodo del cine ‘mudo’ hasta la actualidad. Tras los bloques dedicados específicamente al cine, recogemos otro tipo de investigaciones, comenzando con las que utilizan la relación música-imagen como herramienta pedagógica. A continuación, incluimos un apartado sobre la presencia de las músicas populares urbanas en los medios audiovisuales (cine, videoclip, videojuego), así como el uso que ha-

cen diversos géneros musicales, como el ska o el heavy, del lenguaje audiovisual. Para finalizar, dedicamos un apartado especial a la música en las series de televisión, con ejemplos tan populares como *Pretty Little Liars* o *Cómo conocí a vuestra madre*.

Zuerst als Diss., Universität Wien 2015.

Die Verfasserin referiert zunächst den Stand der Forschung zur Filmmusikgeschichte. Die Herausgeber des Handbuchs, Giuseppe Becce, Hans Erdmann und Ludwig Brav, werden vorgestellt. Ein eigenes Kapitel ist dem „Entstehungskontext der musikalischen Hermeneutik“ gewidmet; große Bedeutung hat hier der Musikwissenschaftler Hermann Kretzschmar. Sehr differenziert werden dann zeitgenössische Schriften zur Stummfilm-musik in Deutschland dargestellt. Der Blick richtet sich schließlich auf das „Allgemeine Handbuch der Film-Musik“, auf dessen Reper-toireauswahl des „Thematischen Skalenregis-ters“ und seine Gliederung. Ein spezielles Kapitel ist schließlich dem Komponisten Ernö Rapée vorbehalten, der von Hans Erdmann unangemessen scharf kritisiert wurde, was man aus heutiger Sicht als Antiamerikanis-mus bezeichnen kann.

Fuchs, Maria: Silent Film Music in the Weimar Republic: Reception by the Contemporary Criticism and Modernist Composers. In: Jordi Ballester & Héman Gan Quesada (eds.): *Music Criticism 1900–1950*. Turnhout: Prepols Publishers 2018, S. 399–421 (Music, Criticism, & Politics.).

This chapter discusses the criticism of silent film music in Germany's trade press throughout the 1920s. Not only the new film media itself but also the sounds accompanying silent films quickly gained a bad reputation in Germany. Using musical illustrations, especially musical compilations, was one of the most common methods for producing silent-film accompaniments during those years. So-called “Kinomusikbibliotheken” (cinema music libraries) consisted of pre-existing compositions, mostly from traditional European art music, and especially that from the late nineteenth century together with newly composed musical pieces to suit specific moods and recurring scenes. Composing original music for a specific film was not economical nor easy but it was considered as superior by

contemporary critics, composers and conductors. The technique of musical illustration was criticised from various aesthetic and ideological viewpoints. However, the value of music illustration was discussed widely by many including representative modern composers such as Paul Hindemith and Kurt Weill. They evaluated original film scores as well as “mechanical music”, an aspect, which is to be understood against the background of the so called ‘Neue Sachlichkeit’ movement, during the Weimar Republic. By using a wide and variegated set of publications from the film trade press, contemporary music press and daily papers of the 1920s, this article examines the artistic and aesthetic value of the prevailing practices of musical illustration from a new perspective and demonstrates the ideological resentment shown in the journalism against this practice. Fuchs, Maria: Hermann Kretzschmar's for-gotten heirs: ‘Silent’ Film Music as Applied Musical Hermeneutics. In: *Music and the Mov-ing Image* 12,3, 2019, S. 3–24.

The *Allgemeines Handbuch der Film-Musik* was published by Hans Erdmann, Ludwig Brav, and Giuseppe Becce in 1927 by the Berlin-based publisher Schlesinger. It repre-sents the most comprehensive and undoubt-edly most significant document pertaining to the practice of “silent”-film accompaniment during the 1920s in Germany. The four hundred-page work is divided into two volumes: The first one delivers an elaborate aesthetic and theoretical debate about the prevalent and ideal methods of film accompaniment, and the second volume contains a cinema music catalog, the so-called *Thematisches Skalenregister* (Thematic Music Index), with over three thousand musical incipits. While the Handbuch was firmly grounded in the musical practice of cinema musicians, the two parts were not solely intended as a manual to facilitate the fast-paced working routine of practitioners, like the numerous cinema mu-sic catalogs that were published in Germany in the wake of Becce's *Kinotheken* (1919–1929). In these catalogs, music pieces of vari-ous origins were organized according to cer-tain parameters in order to satisfy the musico-dramatic demands of day-to-day “silent”-film accompaniment. The pieces were inter-

preted for their extramusical associations and labeled under specific semantic categories in order to be used for specific and recurrent types of film scenes. This labeling of music was based on the tradition of “musical hermeneutics,” and it inspired the conception of the Handbuch’s second volume, the Thematic Music Index, which is a complex and multilayered classification system for cinema music. Thus, in addition to providing a precise method for film accompaniment, the Handbuch contains a theory and an aesthetics that applies the music-hermeneutical ideas of German musicologist Hermann Kretzschmar to the practice of film accompaniment. Kretzschmar (1848–1924) located the core problem of musical hermeneutics? a discipline of music analysis that essentially studies musical meaning and interpretation? in the nomenclature of musical expression, which formed the basis of the musical accompaniment method in “silent” cinema. This essay focuses on the influence of Kretzschmar’s theory of musical hermeneutics on the indexing system of the Handbuch as well as on the author’s intentions to ground their work in academic theory. Fujak, Július: Influence of Musical Semiotics and Aesthetics on Music-Intermedia Arts (Examples from Personal Practice). In: *p-e-r-f-o-r-m-a-n-c-e* 1,1, Oct. 2014, [[URL](#)].

The paper deals with the phenomena of music semiosis from the perspective of Slovak theoreticians Peter Faltin; his original semiotic theories in the 1970s, including his last work *Signification of Aesthetic Signs – Music and Language* (to be specific, its second part *Meaning in Music*), and post-structuralist aesthetician Jozef Cseres at the break of 1990s/2000s. Following this, the author devotes his attention to the aesthetic interpretation of his various contemporary, experimental music-intermedia projects from the beginning of 21st century – created in cooperation with artists from musical ensembles *theEoRy Of Shake* (SK/CZ), The California EAR Unit (USA), and fine artist Ludivine Allegue (F), among others –, and influenced by his experience with the semiotic theoretical comprehension of music.

“The Transition of Musical Expression in Yasushi Akutagawa’s Film Music: Paying Attention to Emphasis on Theme Music and Conversion of Motifs.

In japan. Schrift. – *Abstract:* This essay develops a basis for exploring the musical strategy of Yasushi Akutagawa’s film music. The author divides Akutagawa’s career of film music into two periods: one (period I) is from 1951 to 1970, the other (period II) is from 1974 to 1982. In an interview held in 1978, he referred to the change of his ideal in composing film music: in the earlier era, he prioritized the synchronicity between music and picture, while he gradually came to deemphasize the idea and put stress on what he called “theme music.” To verify his statement, this essay examines three of his film scores chronologically: *A Cat, a Man and Two Women* (猫と庄造と二人のをんな, 1956), *Hana Noren* (花のれん, 1959) and *Portrait of Hell* (地獄変, 1969). Furthermore, this essay links this analysis to “conversion of motifs,” a characteristic that previous researches such as Kuniharu Akiyama and Hisao Nishikawa have singled out as Akutagawa’s signature.

Fujiwara, Masao: Sengonihon eiga sangyō to ongakuka: Akutagawa Yasushi to ‘3-ri no kai’ no katsudō o rei ni [藤原 征生: 戦後日本映画産業と音楽家: 芥川也寸志と「3人の会」の活動を例に]. In: *Ningen kankyō-gaku* [人間・環境学] 27, 2018, S. 77–88.

“Musicians in Post-War Japanese Film Industry: The Work of Yasushi Akutagawa and the Three-Composer Group.”

In japan. Schrift. – *Abstract:* Recent film studies tend to focus on cinema as an industry. In the field of Japanese film studies, some scholars such as Masao Inoue and Takafusa Hatori have published important researches which discuss studio system including Five-/Six-Company Agreement, the agreement which restricted actors and staffs’ free movement

between companies and formed the basis of the studio system in post-war Japanese cinema. However, a field that these previous studies hardly explored surely exists; that is, the relationship between film industry and musicians. This essay aims to elucidate how musicians were engaged in the film industry in post-war Japan. To this goal, the author firstly outlines the connection between musicians and the film industry at that time according to Seitaro Omori's Western Music in Japan, Volume Two and evaluates musicians, especially composers, as "super-studio systematic" existence. After that, the author examines the work of Yasushi Akutagawa and Three-Composer Group, the group which Akutagawa formed with Ikuma Dan and Toshiro Mayuzumi in 1953. Specifically, the author points out that the group had a function as cooperative association for film music which allows the members to behave free from The Agreement. Furthermore, Akutagawa repeatedly used the motif called "Theme from Ako Roshi" as a result of his "super-studio systematic" behavior. The author concludes that Akutagawa's works were quite unique in the history of film music in Japan.

Fujiwara, Masao: Akutagawa Yasushi no ongaku kara miru "Jigoku-mon" no eiga/ongaku-shi-teki igi [藤原征生: 芥川也寸志の音楽からみる『地獄門』の映画/音楽史的意義]. In: *Ningen kankyō-gaku* [人間・環境学] 28, 2019, S. 81–92.

"The Significance of *Gate of Hell* on Film/Music History inferred from its Music by Yasushi Akutagawa."

In japan. Schrift. – *Abstract*: As a landmark in Japanese cinema's overseas advance or as one of the earliest successful color motion pictures in Japan, *Gate of Hell* (dir. Teinosuke Kinugasa, 1953) has received a certain appreciation in the film history. However, its music composed by Yasushi Akutagawa has been overlooked. This essay firstly points out the characteristics of the music of *Gate of Hell* in both 'synchronic' features, that is, influences from other film music of the times, and 'diachronic' features which can be found in his later film music. Then I show how the music of *Gate of Hell* is strongly connected to his Prima Sinfonia (1954/55) in terms of the reuti-

lization of motifs and the similarity of thematic. Prima Sinfonia was premiered at the first concert by Sannin no Kai (「3人の会」). Sannin no Kai, a collective formed by three composers, Akutagawa, Ikuma Dan, and Toshiro Mayuzumi in 1953, left big marks on post war Japanese music culture. What's interesting is that both Prima Sinfonia and the music of *Gate of Hell*, composed around almost same time, use the same motif. Thus this essay reevaluates *Gate of Hell* from a viewpoint of the connection with the history of music in post war Japan which has been scarcely mentioned by former studies.

Gadzinski, Anna: Appropriated music – an altered system of relationships between music and image. In: *New Sound: International Magazine for Music* (Belgrade: Union) 36,2, 2010, S. 91–100.

It is noticeable that the relationship between music and image has been considerably altered since a few decades ago. But what is the nature of it? If we persistently stick to analyzing the scores, we are prone to miss it, and if

we assign the innovations in film music to technological developments alone, the final assumption will not be the one of a musical nature, or a musicological one, respectively. This article is looking into alternative approaches that have emerged within the fields of sound theory and the aesthetics of popular music in the last decades. Aside from this, the modern art concepts require the implementation of the specialized vocabulary. The aim is to gain a closer look at characteristics of both “sides” and suggest a new place for film music, preferably beyond the common commerce versus art frontier. (Vorlage)

Abstract: [E]xamines one of the unsung influences on the Hollywood musical—the lower budget folk musicals produced by Mexican, Yiddish, and African-American filmmakers. Far from mere escapist entertainments, these films expressed both the struggles and dreams of immigrants and minorities in America. Offering a revised history of the American musical, *The Migration of Musical Film* provides a window into the ways in which Americans and immigrants have negotiated the boundaries of belonging in our society..

La musica per film e, in senso più lato, l’interazione audiovisiva rappresentano, allo stato attuale della nostra contemporaneità, un fattore mediatico di importanza cruciale nella ricezione quotidiana delle informazioni estetiche. Nella prima parte del libro si esaminano quali sono, a livello inferenziale e combinatorio, i livelli comunicativi di un dato musicale rispetto ad un’opera filmica. Nella seconda parte, ampio spazio è dedicato all’analisi di un singolo film (Espiazione, oscar come miglior colonna sonora a Dario Marianelli) per verificare in corpore vili come la musica agisca su, dentro, per mezzo o a dispetto apparente delle immagini.

Gimello-Mesplomb, Frédéric: *Analyser la musique de film*. Paris: Books on Demand 2010, 188 S.

L'objet de cet ouvrage est d'offrir aux enseignants quelques outils afin d'aborder la musique de film de manière simple et intuitive dans un cadre pédagogique, que ce soit dans l'enseignement traditionnel ou en conservatoire. Éitant de préconiser des «pistes pédagogiques», issues du savoir de quelques initiés, nous avons préféré rassembler sous la forme d'un ouvrage collectif les retours d'expériences d'un certain nombre éducateurs et de professionnels de la musique ayant eu à mener, à des niveaux d'enseignement divers (du primaire à l'université), des analyses de musiques de film auprès de leurs élèves ou étudiants.

Godsall, Jonathan: *Reeled in...: Pre-existing Music in Narrative Film*. London/New York: Routledge 2019, xii, 189 S. (Ashgate Screen Music.).

How and why is pre-existing music used in films? What effects can its use have on films and their audiences? And what lasting impact can appropriation have on the music? *Reeled In* is a comprehensive exploration of these questions, considering the cinematic quotation of Beethoven symphonies, Beatles songs, and Herrmann scores alike in films ranging from the early sound era to the present day, and in every role from 'main title theme' to 'music playing in bar'. Incorporating a discussion of such factors as copyright and commerce alongside examination of texts and their effects, this broad study is a significant contribution to the scholarship on music in screen media, demonstrating that pre-existing music possesses unique attributes that can affect both how filmmakers construct their works and how audiences receive them, to an extent regardless of the music's style, genre, and so on. This book also situates the reception of music by film, and by audiences experiencing that music through film, as significant processes within present-day culture, while more generally providing an illuminating case study of the kinds of borrowings, adaptations, and reinventions that characterize much of today's art and entertainment.

Inhalt: 1. Production contexts and considerations. – 2. Intention and interpretation. – 3. Functions of musical reference. – 4. Post-existing music

Goldmark, Daniel: Before Willie: Reconsidering Music and the Animated Cartoon of the 1920s. In: Goldmark, Daniel; Lawrence Kramer; Richard Leppert (eds.): *Beyond the Soundtrack: Representing Music in Cinema*. Berkeley: University of California Press 2007, S. 225–245.

Goldmark, Daniel: Drawing a New Narrative from Cartoon Music. In: Neumeyer, Daniel (ed.): *The Oxford Handbook of Film Music Studies*. New York/London: Oxford University Press 2014, S. 229–244.

Goldmark, Daniel: Adapting *The Jazz Singer*: From Short Story to Screen: A Musical Profile. In: *Journal of the American Musicological Society* 70,3, 2017, S. 767–817.

The Jazz Singer grew from a moment of inspiration when author Samson Raphaelson saw Al Jolson perform in 1917. Raphaelson's idea of a rising singer, Jack Robin, torn between sacred and secular, became in turn a short story, a play, a feature film, a novelization, and a radio play. With each new adaptation, the music evolved; the thread that binds together all of these stories is the jazz singer's stock in trade – his songs. For Jolson and *The Jazz Singer*, these songs serve several functions: besides providing a unique snapshot of popular vaudeville melodies in the 1920s and beyond, the songs used in the various tellings of *The Jazz Singer* have a specific connection to Jolson, providing numerous opportunities to retell his (largely fictionalized) origin story with the very songs he had used to make it on Broadway in the first place. We might then consider *The Jazz Singer* a proto-jukebox musical, in which preexisting songs with a com-

mon thread or history become the basis for a new story. Making extensive use of archival documentation and addressing previously unexamined adaptations of the story, this article shows how each version of *The Jazz Singer* came to be a musical summary of Jolson's life as a performer.

Goldmark, Daniel / Keil, Charles (eds.): *Funny Pictures: Animation and Comedy in Studio-Era Hollywood*. Berkeley: University of California Press 2011, viii, 331 S.

This collection of essays explores the link between comedy and animation in studio-era cartoons, from filmdom's earliest days through the twentieth century. Written by a who's who of animation authorities, *Funny Pictures* offers a stimulating range of views on why animation became associated with comedy so early and so indelibly, and illustrates how animation and humor came together at a pivotal stage in the development of the motion picture industry. To examine some of the central assumptions about comedy and cartoons and to explore the key factors that promoted their fusion, the book analyzes many of the key filmic texts from the studio years that exemplify animated comedy. *Funny Pictures* also looks ahead to show how this vital American entertainment tradition still thrives today in works ranging from *The Simpsons* to the output of Pixar.

Kaufman / 51). – Infectious Laughter: Cartoons' Cure for the De-

pression (Donald Crafton / 69). – “We're Happy When We're Sad”: Comedy, Gags, and 1930s Cartoon Narration (Richard Neupert / 93). – Laughter by Numbers: The Science of Comedy at the Walt Disney Studio (Susan Ohmer / 109). – “Who Dat Say Who Dat?: Racial Masquerade, Humor, and the Rise of American Animation (Nicholas Sammond / 129). – “I Like to Sock Myself in the Face”: Reconsidering “Vulgar Modernism” (Henry Jenkins / 153). – Auralis Sexualis: How Cartoons Conduct Paraphilia (Philip Brophy / 175). – The Art of Diddling: Slapstick, Science, and Antimodernism in the Films of Charley Bowers (Rob King / 191). – Tex Avery's Prison House of Animation, or Humor and Boredom in Studio Cartoons (Scott Curtis / 211). – Tish-Tash in Cartoonland (Ethan de Seife / 228). – Sounds Funny/Funny Sounds: Theorizing Cartoon Music (Daniel Goldmark / 257). – The Revival of the Studio-Era Cartoon in the 1990s (Linda Simensky / 272).

Goldmark, Daniel / McKnight, Utz: Locating America: Revisiting Disney's *Lady and the Tramp*. In: *Journal for the Study of Race, Nation and Culture* 14,1, 2008, S. 101–120.

By studying the diegesis and music of the film *Lady and the Tramp*, the authors describe a specific form of American social membership that continues to define social politics today. In the film, dogs, cats and rats represent human archetypes, their needs, desires and activities, and provide a narrative that secures an American ideal about the place of race and nation. The argument is put forth that this representation defines a politics of whiteness that not only uses the threat of formal exclusion and elimination from society to define ethnicity and race, but also seeks to eliminate the likelihood of a successful radicalization of the border. This is a nation where even the idea of difference is defeated and domestication is total. Against this narrative, the authors contend that the absence of an adequate description in the film of the class politics and racial practices that support this vision raises serious questions as to the social coherence of Disney's America.

“Beethoven in Film Text Space: *Lecture 21* of A. Baricco.”

In kyrill. Schrift. – *Abstract:* The paper focuses on the feature film of Alessandro Baricco *Lecture 21* [Lezione 21, Italien/Großbritannien 2008]. Addressing the Symphony No. 9 of L. van Beethoven, the director tries to give the answer to a question of what the choral symphony of the composer is today: unsurpassed example of classical heritage of the master or “an exaggerated masterpiece”? Analyzing the film music, in particular the Symphony No. 9 of L. van Beethoven used by A. Baricco, the

author on a tangent addresses movies of S. Kubrick (*Clockwork Orange*), A. Tarkovsky (*Nostalgia*) and other directors, proposing the version of the response to the question raised by the director.

Green, Jessica: Understanding the score: Film music communicating to and influencing the audience. In: *Journal of Aesthetic Education* 44,4, 2010, S. 81–94.

When most people sit down to watch a film, their focus usually stays on the very dynamic images that move onscreen. The dialogue, as a form of diegetic sound, is probably the next piece of the film they concentrate on, but this only imitates actual experience, since most people understand communication by both watching and listening. Christian Metz, in his influential text *Film Language: A Semiotics of the Cinema*, describes film as "Born of the fusion of several pre-existing forms of expression, which retain some of their own laws (image, speech, music, and noise)," to which he later adds "written materials" as a fifth component. Of these five channels of information included in film, music is the most artificial.

Greenwald, Ted: The Self-Destructing Modules behind the Revolutionary 1956 Soundtrack of *Forbidden Planet*. In: *Keyboard Magazine*, Febr. 1986, S. 54–65.

Grover-Friedlander, Michal: *Vocal Apparitions: The Attraction of Cinema to Opera*. Princeton, N.J.: Princeton University Press 2005, xii, 186 S.

One of the guiding questions of this book is what occurs when what is aesthetically essential about one medium is transposed into the aesthetic field of the other. For example, Grover-Friedlander's comparison of an opera by Poulenc and a Rossellini film, both based on Cocteau's play *The Human Voice*, shows the relation of the vocal and the visual to be surprisingly affected by the choice of the medium. Her analysis of the Marx Brothers'

A Night at the Opera demonstrates how, as a response to opera's infatuation with death, cinema comically acts out a correction of opera's fate. Grover-Friedlander argues that filmed operas such as Zeffirelli's *Otello* and Friedrich's *Falstaff* show the impossibility of a direct transformation of the operatic into the cinematic. Paradoxically, cinema at times can be more operatic than opera itself, thus capturing something essential that escapes opera's self-understanding.

Gschwendtner, Petra: *Song Scoring „Juno“: Die Rolle der Popmusik im Film „Juno“ – von Kimya Dawson bis Sonic Youth*. Diplomarbeit, Wien: Universität Wien, Philologisch-Kulturwissenschaftliche Fakultät 2015, 121 S.; [[URL](#)].

Zu Jason Reitmans Spielfilm *Juno* (USA 2007). *Zusammenfassung*: Die Verwendung von Popmusik im Kino kann bis in die Stummfilmzeit zurückverfolgt werden. In den 1960er Jahren hielt die Popmusik als Song Score in Filmen wie *Easy Rider* oder *The Graduate* Einzug und ist heute nicht mehr als Filmmusik wegzudenken. In dieser Arbeit wird dieses Phänomen zunächst theoretisch beschrieben, um die verschiedenen Funktionen und Elemente von Song Scores anschließend am Filmbeispiel *Juno* analytisch festzumachen und die Entwicklungen in einen neuen Diskurs zu stellen. *Juno* vereint bestehende Populärmusik verschiedener Jahrzehnte mit extra für den Film komponierten Songs. Die Analyse zeigt, dass die verschiedenartige Musik in *Juno* auf den ersten Blick sehr ähnlich wirkt, bei genauerer Betrachtung jedoch ganz unterschiedliche Funktionen erfüllt. Popsongs können somit, richtig eingesetzt, auch Funktionen annehmen, die man theoretisch nur extra für den Film komponierter Musik zuweist. In der Praxis gibt es bereits eine Weiterentwicklung, denn immer öfter komponieren bekannte Pop-Interpreten Musik extra für Filme.

Guarracino, Serena: Musical "contact zones" in Gurinder Chadha's cinema. In: *European Journal of Women's Studies* 16,4, 2009, S. 373–390; [[URL](#)].

This article explores strategies of cultural representation in the production of Gurinder Chadha, a British director of Sikh origin.

Chadha's work is located in what Marie Louise Pratt defines as 'contactzones', negotiating between US, European and Indian audiences. The result is a directing style that puts together 'East' and 'West', Bollywood and Hollywood, in an in-between space that has been radically reconfigured through hybridization. This happens in particular through her use of music and soundtrack, from the documentary *I'm British but...* (1990), up to the recent *Bend It Like Beckham* (2002) and *Bride and Prejudice* (2004). Here, many and diverse musical languages are put together through the representational strategies of parody and kitsch, deconstructing the idea of cultural identity in the very gesture that creates it.

Guglielmetti, Yohann: *Musique et cinéma, l'union libre*. Paris: L'Harmattan 2020, 120 S. (Champs visuels.).

La musique doit vous dire quelque chose que vous ne savez pas encore, qu'on ne peut pas deviner en regardant uniquement les images. Cette vision exprimée par le compositeur Carter Burwell se retrouve chez son homologue Bruno Coulais qui donne à la musique la mission de „capter les choses invisibles du film“. Comme le résume le réalisateur-compositeur Tom Tykwer: „Lorsque vous écrivez un script, vous étudiez la structure, alors que quand vous écrivez de la musique, c'est beaucoup plus porté sur l'émotion abstraite.“ Cette problématique des „deux histoires en une“, l'une visuelle, „matérielle“, qui „étudie la structure“, l'autre sonore, „spirituelle“ et „beaucoup plus porté[e] sur l'émotion abstraite“, suppose indéniablement une complémentarité, au même titre que la conscience et le cérébral pour Bergson ou l'esprit et le corps pour Descartes, qui pose la question des théories reposant sur les principes de concordance ou de non-concordance entre musique et images.

Guglielmetti, Yohann: *L'indépendance de la musique de film*. Paris: L'Harmattan 2020, 138 S. (Champs visuels.).

La musique navigue entre fonctionnalité et indépendance au cinéma comme dans l'opéra. L'idée d'une musique au service de l'image se

retrouve tant dans les métaphores visuelles employées par les biographes de Beethoven que dans *Alexandre Nevski* et *Ivan le terrible*. Pourtant, élément de mémoire et de mystification émotionnelle du film, au cœur de la problématique du rythme et de la temporalité intrinsèque de l'œuvre, la musique peut tant se rattacher à la vie intérieure des personnages, à la diégèse et à l'intrigue que s'accorder toute latitude par rapport aux images. Cinéastes et compositeurs gagnent même à l'exclure de cette dichotomie et à lui préférer un caractère omniscient basé sur le scénario, ce qui nous interroge sur l'autonomie du compositeur face aux attentes du réalisateur et sur le cas particulier des réalisateurs-compositeurs: écrivent-ils une musique fonctionnelle ou indépendante?

Guglielmetti, Yohann: *Silence, bruit, et musique au cinéma*. Paris: L'Harmattan 2020, 111 S. (Ouverture Philosophique – Esthétique).

Peut-on encore croire aux frontières entre musique, bruit et silence au cinéma? Dans ce livre, vous explorerez les ressorts esthétiques du silence et les enjeux de son application. Vous naviguerez le long de la frontière poreuse entre bruit et musique, croisant les considérations usuelles sur le bruit, et serez transportés aux racines de la musique occidentale qui tracent les prémisses de cette démarcation. Vous sonderez la part de bruit dans la musique et, afin de prendre conscience de la perméabilité de ces frontières et de mettre en relief les potentialités dramatiques du bruit au cinéma, l'origine de la mystérieuse „règle des trois“ vous sera dévoilée. Son „naturel“ et son „artificiel“ afficheront leur étonnante complicité que nous démasquerons dans *Les oiseaux* d'Hitchcock, à travers l'observation de représentations sonores du feu ou l'archétype du tonnerre dont l'usage comme ponctuation dramatique ou comme signifiant au cinéma est pour le moins ... subjuguant.

Hager, Laura-Christine: „*The Jazz Singer*“ (1927): Die Musik im ersten Tonfilm. Masterarbeit, Wien: Universität Wien, Philologisch-Kulturwissenschaftliche Fakultät 2015, 116 S.; [[URL](#)].

Zusammenfassung: Diese Masterarbeit befasst sich mit dem Film „The Jazz Singer“ aus dem Jahr 1927, welcher als erster Tonfilm in die Filmgeschichte einging. Dabei liegt das Hauptaugenmerk auf der Musik im Film und ihren Funktionen. Zunächst wird die Entstehung des Films beschrieben und ein Bild des Amerikas um 1927 vermittelt, damit die Handlung und die Musik in den gesellschaftlichen Kontext gebracht werden kann. Der Inhalt, der einen Generationenkonflikt in einer jüdischen Emigrantenfamilie schildert, wird mit der Musik in einen szenischen und dramaturgischen Kontext gesetzt. Dazu werden die einzelnen Musikgenres aus „The Jazz Singer“, wie etwa der Jazz, (vorwiegend romantische) Kunstmusik oder jüdische Musik auf ihre Funktionen untersucht und im Detail analysiert. Das Resümee ergibt, dass der Film sich einerseits bekannter Hits der Popularkultur der 1920er Jahre bedient, um ein breites Publikum anzusprechen und andererseits Kunstmusik verwendet, um ihn auf ein anspruchsvollereres Niveau zu heben und ihn dramaturgisch zu unterstützen.

Haines, John: *Music in Films on the Middle Ages: Authenticity vs. Fantasy*. New York: Routledge 2013, xvii, 229 S. (Routledge Research in Music Series.).

This book explores the role of music in the some five hundred feature-length films on the Middle Ages produced between the late 1890s and the present day. Haines focuses on the tension in these films between the surviving evidence for medieval music and the idiomatic tradition of cinematic music. The latter is taken broadly as any musical sound occurring in a film, from the clang of a bell off-screen to a minstrel singing his song. Medieval film music must be considered in the broader historical context of pre-cinematic medievalisms and of medievalist cinema's main development in the course of the twentieth century as an American appropriation of European culture. The book treats six pervasive moments that define the genre of medieval film: the church-tower bell, the trumpet fanfare or horn call, the music of banquets and courts, the singing minstrel, performances of Gregorian chant, and the music that accompanies horse-riding knights, with each chapter visiting representative films as case studies. These six signal musical moments, that create a fundamental visual-aural core central to making a film feel medieval to modern audiences, originate in medievalist works predating cinema by some three centuries. Halfyard, Janet K.: *Music of Fantasy Cinema*. Sheffield: Equinox Publishers 2012, viii, 244 S. (Genre, Music and Sound.).

Fantasy has had a modern resurgence in cinema due largely to the success of superhero narratives and the two major fantasy series, the *Lord of the Rings* and *Harry Potter*. Often regarded as mere escapism, works of both literature and cinema wishing to be taken seriously by the public, by critics and by academics have tended to shelter under the euphemistic umbrella of Magic Realism and, until very recently, there has been a general lack of serious academic work concerned with fantasy as a genre. This volume explores the way in which music and sound articulate the fantastic in cinema and contribute to the creation of fantasy narratives. Apart from the accusation of frivolous escapism that attaches itself to the fantasy genre, another issue is the lack of a single and simple definition of what fantasy is: the consensus of academic opinion appears to be that fantasy invokes the magical within its narratives as the means by which to achieve what would be impossible in our own reality, as compared to sci-fi's as-yet unknown technologies and horror's dark and deadly supernatural forces. Fantasy remains problematic, however, because it defies many of the conventional mechanisms by which genre is defined such as setting, mood and audience. In a way quite unlike its co-genres, fantasy moves with infinite flexibility between locations – the world (almost) as we know it, historical, futuristic or mythic locations; between moods – heroic, epic, magical; and between audiences – children, teens, adults. In English-language cinema, it encompasses the grand mythic narratives of *Lord of the Rings*, *Legend* and *The Seventh Voyage of Sinbad*, the heroic narratives of Superman, Flash Gordon and Indiana Jones and the magical narratives of *Labyrinth*, *Edward Scissorhands* and the *Harry Potter* series, to name just some of films that typify the variety that the genre offers. What these films all have in common is a requirement that the audience accepts the fundamental break with reality within the diegesis of the filmic narrative, and embraces magic in its many and various

forms, sometimes benign, sometimes not. This volume examines music in fantasy cinema across a broad historical perspective, from Bernard Herrmann's scores for Ray Harryhausen, through the popular music scores of the 1980s to contemporary scores for films such as *The Mummy* and the *Harry Potter* series, allowing the reader to see not only the way that the musical strategies of fantasy scoring have changed over time but also to appreciate the inventiveness of composers such as Bernard Herrmann, John Williams, Jerry Goldsmith, Danny Elfman and Elliot Goldenthal, and popular musicians such as Queen and David Bowie in evoking the mythic, the magical and the monstrous in their music for fantasy film.

Halfyard, Janet K.: *Sounds of Fear and Wonder: Music in Cult TV*. London/New York: I.B. Tauris 2016, xi, 215 S.

How does music enrich and define cult television series? This book analyzes theme tunes and scoring on television to reveal how composers construct a series' identity using musical idioms and instruments. Characters and plot developments, similarly, are enhanced by their musical accompaniment. The different scoring strategies employed in science fiction and horror-based genres, comprising for example *Star Trek* or *Dr. Who*, are considered alongside cult shows set in our reality, such as *Dexter*, *The Sopranos* and *Queer as Folk*. These discussions are complimented by in-depth case studies of musical approaches in three high-profile series: *Buffy the Vampire Slayer*, *Battlestar Galactica* and *Lost*. Written from a musicological standpoint but fully accessible to non-musicologists, the book significantly advances television and music studies. (Umschlag)

Dans le cadre de cette étude, nous explorons la structure du film animé *Valse avec Bashir*, son esthétique et sa musique. Cette œuvre, qui traite des mêmes thèmes que ceux des reportages sur la guerre du Vietnam rédigés par Michael Herr pour le magazine *Esquire* (plus tard recueillis dans *Dispatches*), explore les limites du genre et montre les difficultés de présenter la guerre de façon conventionnelle. Cette représentation subjective et consciente de la guerre, cette esthétique peu conventionnelle aident l’artiste à mettre en avant la relation complexe entre la représentation littéraire et la réalité. Harris, Michael W.: A score full of grief: Fumio Hayasaka’s music for *Sanshō the Bailiff* (1954). In: *Asian Music: Journal of the Society for Asian Music* 46,2, 2015, S. 25–54.

When Fumio Hayasaka began work on the music for Kenji Mizoguchi’s 1954 cinematic adaptation of the Japanese legend *Sanshō the Bailiff*, he found a film that had turned the tale into an allegory of postwar Japan’s struggle for a national identity following the American occupation. To depict this, Hayasaka wrote a sound track that mixed traditional Japanese and European instruments, making them aural stand-ins for Mizoguchi’s narrative theme of conflict between new (Western) and old (Japanese) values. This article focuses on the music’s three main elements and discusses how they articulate Mizoguchi’s narrative interrogation of Japan’s postwar struggle. (Vorlage)

Haunschmidt, Elisabeth: *Wo man singt, da laß dich nieder – Böse Menschen kennen keine Lieder: Musik in Film und Roman über psychopathische Gewalttäter*. Diss., Universität Wien, Institut für Musikwissenschaft 2005, 262 S.

The focal point of discussion is the seemingly paradox interrelation of music and psychopaths in literature and film. Music denotes the best, human being is capable of producing, and the violent murderer is the most horrid facette of humanity. Fritz Lang, Alfred Hitchcock, Anthony Burgess, Stanley Kubrick and Bret Easton Ellis critically stated that evil is part of humanity and subtly challenged humanity's predominantly positive self-reflection. All artists use the combination of music and the psychopath to present man as a double-edged creature, to illustrate the wide range of mankind's facilities and to point to contemporary social problems (not without being severely attacked by critics and the audience). Music has the advantage of introducing a great spectrum of meaning, almost without any limitations. Music can produce a wide range of emotions, give precise links to creation and creator, yet remains per se unfathomable, its meaning infinite. Even more so, it can denote contradicting ideas at the same time. Music is therefore the most successful medium portraying mankind in its dichotomy, fragmentariness and ambiguity and therefore plays an essential, self-sufficient role in portraying the fictional extreme char-

acters in analysed films and novels. Hitchcock, Burgess and Kubrick see in Beethoven's music, that entails the myth of his life as well, an important instrument to portray genius, sensibility and morbid violence. Lang makes use of one well-known whistled melody by Grieg to point out the inherent evil powers of man and current maladies of society, as all investigated artists. And Ellis considers the kitsch and fake sentimentality of the 80s pop-music accurate and apt in presenting his fictional hero and society as compulsively and obsessively holding up a façade that hides terrible illnesses.

Hazelwood, Zachary: *Music, Action, and Narrative in Film: An Energetic and Gestural Approach to Film Score Analysis*. Ph.D. Thesis, Louisiana State University 2014, xi, 206 S. (LSU Doctoral Dissertations. 327.); [[URL](#)].

Music theorists and philosophers, such as Mark Johnson, Janna Saslaw, Robert Hatten, and Steve Larson, have commented on the value of considering music through one's embodied experiences. Film and music are inherently energetic, as both contain perceivable energies and forces. Analyzing the common energetic qualities of film and music provides an approach for connecting film music to certain filmic and narrative attributes and events. This dissertation uses models based in physics to reveal the latent constructs that connect music to extramusical associations. Building off of established concepts and models in the work of composers and theorists such as Ernst Kurth, Steve Larson, and Arnold Schoenberg, this dissertation reconsiders several energetic models based in motion and applies them to film music analysis. This study also proposes several original models based in the related branch of continuum mechanics by considering the internal structure and changes of musical concepts and gestures as objects. These concepts and models create a

system of analysis that considers and accounts for the connections between film music, onscreen actions, and narrative events.

Heine, Erik: Chromatic mediants and narrative context in film. In: *Music Analysis* 37,1,

2018, S. 103–132.

This article examines specific narrative connotations associated with chromatic mediant motions in film music. Following the neo-Riemannian work of theorists such as David Kopp and Richard Cohn, and film-music theorists such as Scott Murphy and Frank Lehman, I propose a lexicon of harmonic motions and associative connotations. The article provides a survey of both major-mode and minor-mode chromatic mediant relationships in as many different genres of film as possible, with science-fiction and fantasy films being most common. Through this survey I aim to demonstrate not only the extent to which chromatic mediants have become staple devices of film-scoring harmonic practice, with meanings so consistent that they can be subverted for ironic and satirical purposes, but also to lay out a speculative path for future film-music theorists to use these connotations in additional film contexts.

Heiner, Stefan: Musik in Spielfilmen mit Epilepsie. In: *Zeitschrift für Epileptologie* 29,1, 2016, S. 25–30.

Epilepsie spielt vergleichsweise häufig eine Rolle im internationalen Spielfilm. Anfälle werden oft zur Dramatisierung des Geschehens eingesetzt. Filmmusik im weitesten Sinne kann dabei mehr als nur „Begleitmusik“ sein. Mit der „Tonspur“ verfügt der Spielfilm über ein hervorragendes Mittel, Außen- und Innensicht epileptischen Geschehens wiederzugeben. Das lässt sich an den beiden Filmen „The exploding girl“ und „The exorcist“ zeigen, die ein extrem gegensätzliches Bild der Epilepsie zeichnen. Letzterer nutzt raffinierte Klangcollagen dazu, den Zuschauer in eine Welt anhaltenden Schreckens zu versetzen. „The exploding girl“ mischt effektvoll szenische und außerszenische Tonfolgen, um Sinneseindrücke der Betroffenen und Erfahrungen ihres miterlebenden Freundes dem Zuschauer nahezubringen. Die Botschaft der beiden Filme umfasst den weiten Erwartungshorizont – von Abscheu bis Empathie –, den noch heute die Begegnung mit Epilepsiekranken auszeichnet.

Heldt, Guido: *Music and Levels of Narration in Film: Steps across the Border*. Bristol: Intellect 2013, x, 290 S.

The first book-length study of the narratology of film music and is an indispensable resource for anyone researching or studying film music or film narratology. It surveys the so far piecemeal discussion of narratological con-

cepts in film music studies and tries to (cautiously) systematize, expand and refine them with reference to ideas from general narratology and film narratology (including contributions from German-language literature less widely known in Anglophone scholarship). The book goes beyond the current focus of film music studies on the distinction between diegetic and non-diegetic music (music understood to be or not to be part of the story-world of a film) and takes into account different levels of narration: from the extrafictional to 'focalizations' of subjectivity and music's many and complex movements between them. The conceptual toolkit proposed in the first part of the book is put to the text in a series of case studies: of numbers in film musicals; of music and sound in horror films; and of music and narrative structures in, among others, films by Sergio Leone, *The Truman Show*, *Breakfast at Tiffany's* and *Far from Heaven*.

Heldt, Guido / Krohn, Tarek / Moormann, Peter / Strank, Willem (Hrsg.): *Martin Scorsese: die Musikalität der Bilder*. München: Ed. text + kritik 2015, 128 S. (FilmMusik.).

Bereits in *Mean Streets* im Jahre 1973 gelang Martin Scorsese eine Szene, deren Kombination von Bild und Musik Kultstatus erlangte: Der Auftritt Robert De Niro zum Song „Jumpin' Jack Flash“ der Rolling Stones sollte nur der erste Wurf eines Regisseurs sein, der es wie kaum ein anderer verstand, Musik und Film zur Einheit zu verschmelzen. Martin Scorseses Werke zeigen eine Fülle von Facetten der Komposition von Bild und Ton und zeugen von einer Musikkenntnis jenseits stilistischer und zeitgeschichtlicher Befangenheit. Ob in Bernard Herrmanns Soundtrack zu *Taxi Driver* (1975), ob als Hommage an die goldenen Zeiten des Jazz in *New York, New York* (1977) und *Raging Bull* (1980), ob in Peter Gabriels Originalkomposition zu *The Last Temptation of Christ* (1987), in zahlreichen Reminiszenzen an die Oper oder in Konzertdokumentationen wie *The Last Waltz* (1978), *Feel Like Going Home* (2003), *No Direction Home* (2005) oder *Shine a Light* (2008) – immer wieder ist es Scorsese gelungen, den Zuschauer zum Zuhörer zu machen. Der zweite Band der Reihe „FilmMusik“ nimmt daher das Werk eines der musikalischsten

aller Filmregisseure in den Blick, mit Beiträgen zu Scorsese und Oper, zu präexistenter Musik als Autorensignatur, zu Musik und Stadt in *New York, New York*, zur Schizophrenie der Musik in *Taxi Driver* und zu Scorseses Arbeit mit seinem „music editor“ Robbie Robertson. (Verlag)

Heldt, Guido / Krohn, Tarek / Moormann, Peter / Strank, Willem (Hrsg.): *Musik in der Filmkomödie*. München: edition text + kritik 2017, 199 S. (FilmMusik. 3.).

Der dritte Band der Reihe „FilmMusik“ untersucht filmmusikalische Gags, Jazz als Idiom für Satire und Parodie in Film und Fernsehen, Musik und Komödie im stalinistischen Kino, Frank Zappas *200 Motels* sowie Musik in Horrorkomödien.

Inhalt: Vorwort 7. – Tarek Krohn: Überlegungen zum filmmusikalischen Gag / 11. – Lindsay Carter: Das Leben ist freudiger geworden. Musik und Komödie im stalinistischen Kino / 43. – Konstantin Jahn: »Who put the wit in syncopation?«. Jazz als Signum von Satire, Parodie und Humor in Vaudeville-Film, Cartoon und TV-Comedy / 73. – Jörg Heuser: Frank Zappa, 200 Motels: Weltenkollision / 109. – Guido Heldt: Furchtbar lustig. Musik in Horrorkomödien / 130.

Heldt, Guido / Krohn, Tarek / Moormann, Peter / Strank, Willem (Hrsg.): *Musik im Vorspann*. München: edition text + kritik 2020, 142 S. (FilmMusik. 4.).

Die Musik im Vorspann stimmt die Zuschauerrinnen und Zuschauer, ähnlich den Ouvertüren vieler Opern und Operetten vor allem des 19. Jahrhunderts, auf das Bevorstehende ein, begleitet sie als „Ohrwurm“ nach Ende der Kinovorführung oder Fernsehausstrahlung und bleibt im Gedächtnis als Pars pro Toto für die Gesamtheit des Scores. Doch trotz ihrer prägenden Wirkung und zentralen Position wurde der Rolle der Musik im Vorspann bisher nur äußerst wenig Beachtung geschenkt. Der neue Band der Reihe „FilmMusik“ versucht diese Lücke mit vier Beiträgen zu schließen: zum Hollywood-Kino und Erich Wolfgang Korngold, zum Quality-TV, zum wechselhaften Werdegang Hanns Eislers und zur Wiederverwendung einer bekannten Vorspann-

musik in zahlreichen anderen Produktionen. Beiträger des Bandes sind Felix Kirschbacher, Frank Lehman, Wolfgang Thiel und Andreas Wagenknecht.

Inhalt: Vorwort. – Frank Lehman: Form und thematische Struktur in Vorspannmusiken Erich Wolfgang Korngolds (11–52). – Wolfgang Thiel: Hanns Eislers Vorspannmusiken zu Spielfilmen aus drei Jahrzehnten (53–77). – Felix Kirschbacher: Das Beste kommt zum Anfang. Episodenbeginn und Vorspann in *The Good Wife* (78 – 103). – Andreas Wagenknecht: Immer wenn die Duduk spielt. Zur Wiederverwendung der Musik aus dem Vorspann des Films *The Last Temptation Of Christ* in Fernsehdokumentationen und Dokumentarfilmen (104 – 127).

Hellégouarch, Solenn: *Musique, cinéma, processus créateur: Norman McLaren – Maurice Blackburn, David Cronenberg – Howard Shore*. Paris: Vrin 2020, 295 S. (MusicologieS.).

Norman McLaren œuvre dans le domaine onirique de l'animation. David Cronenberg est maître du genre de l'horreur intérieure. Que peuvent donc partager ces deux cinéastes canadiens aux univers si distincts ? Chacun a construit une relation à long terme avec un compositeur – respectivement Maurice Blackburn et Howard Shore. D'un duo à l'autre, le musicien occupe une place centrale au sein de la création collective ; sa musique se révèle comme une composante fondamentale. Quels processus créatifs lui permettent de se déployer ? Le livre fait la lumière sur les mécanismes collaboratifs et la pensée de ces duos. Plus généralement, il établit une poétique de la création musico-filmique, décrit et comprend les processus créateurs filmique et musical qui déterminent la composition d'une musique de film et, plus encore, une musicalité de tout le complexe audiovisuel. Du cinéma d'animation expérimental (*A Phantasy*) au long-métrage de fiction (*Crash, A Dangerous Method*) en passant par le documentaire engagé (*Jour après jour*), l'auteure offre un portrait inédit de pratiques musico-filmiques novatrices tout en proposant de nouvelles approches analytiques pour la musique de film.

Über den Film von Alan Crosland.

Herget, Ann-Kristin: On music's potential to convey meaning in film: A systematic review of empirical evidence. In: *Psychology of Music* [Online first] (26.3.2019); [[DOI](#)].

With its schema-activating potential to influence an audience's perception and interpretation of film plot and protagonists, film music goes far beyond the role of an emotionalizing accessory in film contexts. For this review, 24 German and English empirical studies that tested music's potential to convey meaning were identified to be compared in their research questions, the characteristics of their methods, designs, samples, and stimulus materials, as well as main results. Depending on the degree of realism and the abstraction level of the audio-visual stimulus material, differently connotated music or music of different genres trigger supra-individual associations, which make the recipients' perceptual patterns and evaluations of film plot and protagonists predictable. The review provides a systematization of music's effects as well as methodological and content-related indications for future research.

van Heuckelom, Kris / Guść, Iwona: Songs of home (and away): Ethnically-coded diegetic

music and multidirectional nostalgia in fiction films about Polish migrants. In: *NECSUS: European Journal of Media Studies* 5,2 Autumn 2016, 171–191; [[URL](#)].

This article offers a textual and contextual analysis of ethnically-coded musical performances in migration-themed fiction film, with a particular focus on productions featuring expatriate characters from Poland. As we argue, the Polish sample substantially differs from soundtrack-related approaches prevalent in films about postcolonial migrants and ethnics. In the hands of the filmmakers and actors involved, traditional Polish songs that typically revolve around protective domesticity and bonding (especially lullabies) hint at the possibility of reinstalling a sense of intergenerational affinity at the core of the local household. Therefore, rather than evoking an aura of multicultural hybridity or exotic Otherness, the foreign-language musical performances featured in the films involved create a soundscape in which nostalgia ceases to be the exclusive property of the displaced newcomer.

Hoeckner, Berthold [...]: Film music influences how viewers relate to movie characters. In: *Psychology of Aesthetics, Creativity, and the Arts* 5,2, 2011, S. 146–153.

The study provides evidence that film music can influence character likability and the certainty of knowing the character's thoughts, which are antecedents of empathetic concern and emphatic accuracy. Thus film music may be regarded as modulating antecedents of empathetic concern and empathetic accuracy.

Hoeckner, Berthold: *Film, Music, Memory*. Chicago, Ill.: The University of Chicago Press 2019, 278 S. (Cinema and Modernity.).

Film has shaped modern society in part by changing its cultures of memory. Film, Music,

Memory reveals that this change has rested in no small measure on the mnemonic powers of music. As films were consumed by growing American and European audiences, their soundtracks became an integral part of individual and collective memory. Berthold Hoeckner analyzes three critical processes through which music influenced this new culture of memory: storage, retrieval, and affect. Films store memory through an archive of cinematic scores. In turn, a few bars from a soundtrack instantly recall the image that accompanied them, and along with it, the affective experience of the movie. Hoeckner examines films that reflect directly on memory, whether by featuring an amnesic character, a traumatic event, or a surge of nostalgia. As the history of cinema unfolded, movies even began to recall their own history through quotations, remakes, and stories about how cinema contributed to the soundtrack of people's lives. Ultimately, Film, Music, Memory demonstrates that music has transformed not only what we remember about the cinematic experience, but also how we relate to memory itself.

Holbrook Morris B.: Ambi-diegetic Music in the Movies: The Crosby Duets in *High Society*. In: *Consumption, Markets and Culture* 8,2, June 2005, S. 153–182.

One key element in the product design of a motion picture, ambi-diegetic music – that is, cinemusical material that appears on-screen (like “diegetic” music) that advances the dramatic development of plot, character, or other important cinematic themes (like “non-diegetic” music) – helps to shape the meanings conveyed to a film’s viewing audience. By way of illustration, the present paper examines the role of a pivotal cinemusical duet (“Now You Has Jazz”) by two stellar performers (Bing Crosby and Louis Armstrong) in the MGM musical *High Society* (1956). By pairing off a middle-aged Bing Crosby with a much younger Grace Kelly, this film faces the challenge of rehabilitating the image of Bing in time to let him plausibly win the hand of the youthful Grace in the end. The mechanism for this recuperation appears in the symbolically central role played by the ambi-diegetic duet entitled “Now You Has Jazz.” Via his visual, musical, and historical connection with Armstrong and thereby with a walking embodiment of jazz iconography, Crosby attains a rejuvenated vitality to emerge as Kelly’s viable suitor of choice.

Holbrook, Morris B.: Cinemusical meanings in motion pictures: commerce, art, and Brando loyalty ... or ... De Niro, My God, To Thee. In: *Journal of Consumer Behaviour Volume* 6,6, Nov./Dec. 2007, S. 398–418.

The theme of art-versus-commerce has sur-

faced in many motion pictures but serves here to juxtapose three otherwise disparate films that draw upon the power of jazz as a force toward the dramatic development of character, plot, central themes, and other cinemusical meanings. Specifically, via the significance of its ambi-diegetic music, *New York, New York* (1977) shows the elevation of artistic integrity (Robert De Niro as Jimmy Doyle) over commercialism (Liza Minnelli as Francine Evans). In *Heart Beat* (1980), the raw honesty of a committed-but-doomed creative genius (Art Pepper) provides nondiegetic music that signifies the self-destructive degradation of a key protagonist (Nick Nolte as Neal Cassady). Finally, in *The Score* (2001), the appealing nature of diegetic jazz in a cinematically-enriched nightclub environment helps to explain why a soon-to-be-reformed criminal (Robert De Niro, again, as Nick Wells) would risk everything in collaboration with two bizarre partners (Marlon Brando as Max Baron and Ed Norton as Jack Teller) in hopes of a payoff big enough to allow him to retire from a lucrative career in crime in order to run his legitimate jazz venue and to settle down with his true love (Angela Bassett as Diane Boesman).

Hope, Daniel / Knauer, Wolfgang: *Sounds of Hollywood: Wie Emigranten aus Europa die amerikanische Filmmusik erfanden*. Reinbek: Rowohlt 2015, 319 S., 8 Bl.

Daniel Hope ist als Geiger ein Weltstar. Mit seinem Buch «Familienstücke» über die Geschichte seiner jüdischen Vorfahren hat er Aufsehen erregt. Jetzt macht er sich auf die Suche nach den Spuren deutscher und österreichischer Emigranten in Hollywood. Und er entdeckt, dass der schwelgerische Sound und der opulente Orchesterklang, von denen die Filmmusik der amerikanischen Studios bis heute geprägt ist, zum großen Teil von Komponisten geschaffen wurden, die vor den Nazis in die USA geflohen waren. Hope trifft die Nachfahren vieler Musiker. Er zeigt, wie sehr die Traumfabrik von Los Angeles ein Ort war, an dem Gestrandete ihre Hoffnungen aus den Koffern kramten und ihre Träume in Musik verwandelten. Von Erich Wolfgang Korngold über Kurt Weill bis zu Ennio Morricone geht die Spurensuche des Autors, von Hitchcocks *Spellbound* über Michael Curtiz'

Casablanca bis zu Spielbergs *Schindlers Liste*. Das Ergebnis ist ein sehr persönliches Buch mit bewegenden Eindrücken und Erkenntnissen. ein überraschender Blick auf ein wichtiges Kapitel unserer Kulturgeschichte. (Verlag)

Huvet, Chloé: La musicologie du cinéma. Enjeux disciplinaires et problèmes méthodologiques. In: *Intersections: Canadian Journal of Music* 36,1, 2016, S. 53–84.

Film music has been neglected for a long time in scholarly literature, especially in French-speaking countries. This shortcoming is addressed since a few decades by the blossoming of musicological and specialized analysis devoted to film music. By casting a retrospective glance over this young academic field called "film musicology", we will first ques-

tion the place of film music study within musicological research, so as to understand the disavowal it has been subjected to. Disparities still exist between North American and French approaches, but we will demonstrate that the progressive institutionalization of film music and its inclusion within musicology are set on an encouraging path. The issues specific to film music study will be examined in order to highlight what methodological challenges such a research object entails. We will also show how they relate to and reengage a number of reflections taking place within musicology itself.

"The functions of music in film and Terayama Shūji's *Throw Away Your Books and Rally in the Streets*".

In japan. Schrift. – Zur Musik in Shūji Terayamas experimentellem Spielfilm *Werft die Bücher weg und geht auf die Straße* (Japan 1971). – *Abstract*: Dieses Paper ist ein Versuch, die Funktion von Musik in einem Film zu betrachten, wobei der Film *Werft die Bücher weg und geht auf die Straße* (1971) von Shūji Terayama als Hinweis verwendet wird. Zuerst werden Terayamas grundlegende Absichten in Bezug auf die Beziehung zwischen dem Subjekt der ästhetischen Erfahrung und dem Objekt und der Dekonstruktion der Handlung bestimmt, und dann wird die Diskontinuität oder Desorganisation dieses Films extrahiert. Es wird jedoch klargestellt, dass diese Schwächen in der Dramaturgie das sind, was Terayama selbst beabsichtigt hat, indem er das ursprüngliche Drehbuch und die Spuren seiner Umschreibung nachzeichnet. Nachdem in vier Fällen bestätigt wurde, dass eine eng mit Musik verwandte Szene in Form des Ausschneidens der Grundhandlung in diesen Film eingefügt wurde, wird die Funktion der Musik in diesem Film zwangsläufig generiert. [...] Im letzten Kapitel wird in diesem Beitrag mit Hilfe von Siegfried Krakauers Filmtheorie die Funktion der Musik in diesen Filmen gegen die tragische kreative Position dargestellt, die Aristoteles der Musik in der Poesie zugewiesen hat. [...]

Ivaškin, Aleksandr V. / Kirkman, Andrew (eds.): *Contemplating Shostakovich: Life, Music and Film*. Burlington, VT/Farnham: Ashgate

2012, xxviii, 285 S.

Contemplating Shostakovich marks an important new stage in the understanding of Shostakovich and his working environment. Each chapter covers aspects of the composer's output in the context of his life and cultural milieu. The contributions uncover 'outside' stimuli behind Shostakovich's works, allowing the reader to perceive the motivations behind his artistic choices; at the same time, the nature of those choices offers insights into the workings of the larger world – cultural, social, political – that he inhabited. Thus his often ostensibly quirky choices are revealed as responses – by turns sentimental, moving, sardonic and angry – to the particular conditions, with all their absurdities and contradictions, that he had to negotiate. Here we see the composer emerging from the role of tortured loner of older narratives into that of the gregarious and engaged member of his society that, for better and worse, characterized the everyday reality of his life. This invaluable collection offers remarkable new insight, in both depth and range, into the nature of Shostakovich's working circumstances and of his response to them. The collection contains the seeds for a wide range of new directions in the study of Shostakovich's works and the larger contexts of their creation and reception.

Iversen, Gunnar / Tiller, Asbjørn: *Lydbilder: mediene og det akustiske*. Oslo: Universitetsforlaget 2014, 203 S.

Wir haben eine starke Tradition darin, die visuelle Seite von Film und Fernsehen zu analysieren, aber die Tonstudien sind weniger entwickelt. «Lydbilder» ["Tonbilder"] ist eine Einführung in Ton in Film, Fernsehen und moderner Kunst. – Die Autoren geben zunächst eine allgemeine Einführung in Klang und Theorien über Klang in den Medien und wie Klang in verschiedenen Genres und spezifischen Texten funktioniert. Sie diskutieren, was Ton ist, welche Funktionen er in verschiedenen Erzählungen hat, die Beziehung zwischen Ton und Bild und die technologische Entwicklung auf dem Gebiet des Tons. – Teil Zwei besteht aus der Analyse von Medientexten, bei denen der Schwerpunkt auf der Funktion des Klangs liegt. Die Analysen

konzentrieren sich auf Filme (*Oslo, 31. August* und die *Alien*-Filme), Fernsehserien (*Mad Men* und *Boardwalk Empire*), Dokumentarserien (*Madagaskar* und *Kingdom of Plants*) und auf Klang in der modernen Kunst (z. B. die Ton-
skulptur *Flyndre*).

Jacobs, Lea: *Film Rhythm after Sound: Technology, Music, and Performance*. Oakland, Cal.: University of California Press 2015, XII, 266 S.

Inhalt: Introduction: film rhythm and the problem of sound. A lesson with Eisenstein: rhythm and pacing in *Ivan the Terrible*, Part I / Mickey Mousing reconsidered / Lubitsch and Mamoulian / Dialogue timing and performance in Hawks.

The seemingly effortless integration of sound, movement, and editing in films of the late 1930s stands in vivid contrast to the awkwardness of the first talkies. Film Rhythm after Sound analyzes this evolution via close examination of important prototypes of early sound filmmaking, as well as contemporary discussions of rhythm, tempo, and pacing. Jacobs looks at the rhythmic dimensions of performance and sound in a diverse set of case studies: the Eisenstein-Prokofiev collaboration *Ivan the Terrible*, Disney's *Silly Symphonies* and early Mickey Mouse cartoons, musicals by Lubitsch and Mamoulian, and the impeccably timed dialogue in Hawks's films. Jacobs argues that the new range of sound technologies made possible a much tighter synchronization of music, speech, and movement than had been the norm with the live accompaniment of silent films. Filmmakers in the early years of the transition to sound experimented with different technical means of achieving synchronization and employed a variety of formal strategies for creating rhythmically unified scenes and sequences. Music often served as a blueprint for rhythm and pacing, as was the case in mickey mousing, the close integration of music and movement in animation. However, by the mid-1930s, filmmakers had also gained enough control over dialogue recording and editing to utilize dialogue to pace scenes independently of the music track. Jacobs's highly original study of early sound-film practices provides significant new contributions to the fields of film music and sound studies.

Zeichentrickfilme mit Mickey Mouse, Tom und Jerry oder Bugs Bunny waren in Holly-

woods Goldenem Zeitalter integraler Bestandteil des Kinoprogramms und erfreuten sich größter Beliebtheit. Mit Anbruch des Tonfilms konnten sich die Cartoonfiguren nicht nur visuell gebärden, sondern auch durch Musik, Geräusche und Stimme unmittelbar akustisch äußern, um beim Publikum eine der menschlichsten emotionalen Reaktionen auszulösen: das Lachen. Das Buch untersucht das konstitutive Zusammenspiel von Bild und Ton in jenen Filmen, die bis heute nichts an Durchschlagkraft verloren haben. Aus historischer, technischer und analytischer Perspektive wird in dieser Studie das Genre der animierten Kurzfilme erschlossen und dabei die Besonderheit des Soundtracks herausgearbeitet, der die Glaubwürdigkeit der idiosynkratischen Mensch-Tier-Hybride maßgeblich befördert. Mit weitreichenden Bezügen zur Ästhetik und Emotionsforschung erklärt Saskia Jaszoltowski anschaulich, wie Filmmusik die gezeichneten Karikaturen lebendig und menschlich werden lässt. (Verlag)

Nachdr. London: Routledge 2017.

Joe, Jeongwon: *Opera as Soundtrack*. Surrey: Ashgate 2013, xv, 207 S.

Inhalt: Opera as geno-song – Opera in cinematic death – Opera in Woody Allen's *Match Point* – Is cinema's anxiety opera's envy? – Film divas: the problem and the power of the singing women – Behind the discourse on the opera-cinema encounter.

Filmmakers' fascination with opera dates back to the silent era but it was not until the late 1980s that critical enquiries into the intersection of opera and cinema began to emerge. Jeongwon Joe focusses primarily on the role of opera as soundtrack by exploring the distinct effects opera produces in film, effects which differ from other types of soundtrack music, such as jazz or symphony. These effects are examined from three perspectives: peculiar qualities of the operatic voice; various properties commonly associated with opera, such as excess, otherness or death; and multifaceted tensions between opera and cinema – for instance, opera as live, embodied, high art and cinema as technologically mediated, popular entertainment. Joe argues that when opera excerpts are employed on soundtracks they tend to appear at critical moments of the film, usually associated with the protagonists, and the author explores why it is opera, not symphony or jazz, that accompanies poignant scenes like these. Joe's film analysis focuses on the time period of the post-1970s, which is distinguished by an increase of opera excerpts on soundtracks to blockbuster titles, the commercial recognition of which promoted the production of numerous opera soundtrack CDs in the following years. Joe incorporates an empirical methodology by examining primary sources such as production files, cue-sheets and unpublished interviews with film directors and composers to enhance the traditional hermeneutic approach. The films analysed in her book include Woody Allen's *Match Point*, David Cronenberg's *M. Butterfly*, and Wong Kar-wai's *2046*.

Johan, Adil: Scoring Tradition, Making Nation: Zubir Said's Traditionalised Film Music for *Dang Anom*. In: *Malaysian Journal of Music* 6,1, 2017, S. 50–72.

Zur Musik in Hussain Haniffs Film von 1962.

Johan, Adil: *Cosmopolitan Intimacies: Malay Film Music of the Independence Era*. Singapore: NUS Press 2018, xxvii, 387 S.

Drawing on analyses of lyrics and music, interviews with musicians, and the content of Malay entertainment magazines, in an ap-

proach that spans ethnomusicology and cultural studies, he reveals this body of work to be a product of a musical and cultural cosmopolitanism in the service of a nation-making process based on ideas of Malay ethnonationalism, initially fluid but increasingly homogenized over time. Malay film music of the period covertly expressed radical sentiments despite being produced within a commercialized film industry.

Johnson, Bruce (ed.): *Earogenous Zones: Sound, Sexuality and Cinema*. London/Oakville: Equinox 2010, x, 246 S.

Auch: [Ann Arbor, MN]: ProQuest 2010.

This collection exemplifies a variety of approaches to the sonic representation of sexuality in cinema. It draws on a range of sexual scenarios from pornography to sci-fi to art-house and includes cinema from various cultures and countries. Among the topics addressed are how the deployment of sound is implicated in gender politics in the representation of sexuality and how sounds are able to radically colour and even override the visual and lexical content of a film.

Inhalt: S. 12–37: Sound decisions: Interviews with Ole Ege / Bruce Johnson. – S. 38–53: Beyond the Valley of the ultra cliché: Erotic plentitude in the films of Russ Meyer / Mark Evans & Matt Burgess. – S. 54–65: The dynamics of sound in Bertolucci's *Last Tango in Paris*, *The Last Emperor* and *The Sheltering Sky* / Lesley Chow. – S. 66–88: Depraved desire: Sadomasochism, sexuality and sound in the mid-1970s cinema / Clarice Butkus. – S. 89–101: The peculiar 'love' music in Oshima's *Ai no korida* / James Wierzbicki. – S. 102–124: Lust in space: Science fiction themes and sex cinema (1960–82) / Philip Hayward. – S. 125–139: Science fiction themed porn cinema and its soundtracks 1990–2010 / Philip Hayward & Emil Stoichkov. – S. 140–157: Music in New wave hookers carries the joke / Laura Wiebe Taylor. – S. 158–173: Making "a mall movie about a man with a 13-inch penis": Popular music representations of pornographic intention / Liz Giuffre. – S. 174–189: Musical loops: *Eyes Wide Shut ... Ears wide open* / Kevin Clifton. – S. 190–202: Sound, sex and aural dominance in *9 Songs* / Andrea Warren. – S. 203–216: Music, image, orgasm: Getting off on the

Shortbus / Marianne Tatom Letts. – S. 217–233: In extremis: The roots, soundscapes and significations of twenty-first-century zombie porn / Ralph G. Marsh.

Johnston, Nessa: The Voiceless *Acousmêtre*: *Paranormal Activity's* Digital Surround Sound Demon. In: *Music, Sound, and the Moving Image* 9,2, 2015 (Special Issue: "Musical Screens: Musical Inventions, Digital Transitions, Cultural Critique". Guest ed.: James Tobias), S. 131–144.

Paranormal Activity's (2007) 'found footage' horror conceit hinges upon the efforts of yuppie Micah to use his digital video camera to capture proof of his girlfriend's supernatural visitations. Micah concentrates on capturing visual evidence but the demon remains elusive. Only ephemeral effects of its presence are captured visually – instead, the invisible demon is embodied sonically. This article will concentrate on this sonic embodiment within the broader context of found footage horror's cultural significance. Though *Paranormal Activity* mainly employs a screen-centred 2.0 stereo sound mix in keeping with its 'home movie' sound aesthetic, it later uses the surround channels so that the eerie, demonic sound 'creeps' into the full 5.1 surround sound field. Referring to Michel Chion's and Randolph Jordan's theorisations of the acousmêtre as an unseen diegetic character whose audible voice is imbued with mysterious power, and Mark Kerins' work on digital surround sound, this article argues that *Paranormal Activity* opens up a space beyond the screen for the digital surround sound demon to 'haunt' the exhibition space sonically as a voiceless *acousmêtre* beyond its 'home movie' digital screen.

Jung-Kaiser, Ute / Simonis, Annette (Hrsg.): *Erich Wolfgang Korngold, „der kleine Mozart“*. *Das Frühwerk eines Genies zwischen Tradition und Fortschritt*. Hildesheim/Zürich/New York: Georg Olms 2017, xiii, 211 S. (Wegzeichen Musik. 12.).

Der Sammelband widmet sich schwerpunkt-mäßig Korngolds Frühwerk, in dem die Fundamente seiner späteren epochenmachenden Filmmusiken liegen. Darauf hinaus beleuch-

ten die Beiträger die intermedialen Verflechtungen sowie die internationale Dimension seines Œuvre, das grenzüberschreitend zwischen Fin de Siècle und Moderne angesiedelt ist.

Zu Karoline Grubers Hamburger Inszenierung der *Toten Stadt* (2015) / 189.

Jünger, Hans: Unpopuläre Filmmusik. In: *Bildung, Musik, Kultur – Horizonte öffnen*: [BMU, Bundesverband Musikunterricht, 2. Bundeskongress Musikunterricht, Leipzig 2014]. Hrsg. v. Dorothee Barth, Ortwin Nimczik, Michael Pabst-Krueger. Kassel/Mainz: BMU, Bundesverband für Musikunterricht 2015, S. 185–191 (Musikunterricht. 2.).

Justus, Timothy: Toward a Naturalized Aesthetics of Film Music: An Interdisciplinary Exploration of Intramusical and Extramusical Meaning. In: *Projections* 13,3, 2019, S. 1–22; [[URL](#)].

In this article, I first address the question of how musical forms come to represent meaning – that is, the semantics of music – and il-

lustrate an important conceptual distinction articulated by Leonard Meyer in *Emotion and Meaning in Music* between absolute or intra-musical meaning and referential or extramusical meaning through a critical analysis of two recent films. Second, building examples of scholarship around a single piece of music frequently used in film – Samuel Barber's Adagio for Strings – I follow the example set by Murray Smith in *Film, Art, and the Third Culture* and discuss the complementary approaches of the humanities, the behavioral sciences, and the natural sciences to understanding music and its use in film.

Kaganovsky, Lilya / Masha Salazkina (eds.): *Sound, Speech, Music in Soviet and Post-Soviet Cinema*. Bloomington, IN/Indianapolis: Indiana University Press 2014, viii, 299 S.

Challenges the ways we look at both cinema and cultural history by shifting the focus from the centrality of the visual and the literary toward the recognition of acoustic culture as formative of the Soviet and post-Soviet experience. Leading experts and emerging scholars from film studies, musicology, music theory, history, and cultural studies examine the importance of sound in Russian, Soviet, and post-Soviet cinema from a wide range of interdisciplinary perspectives. Addressing the little-known theoretical and artistic experimentation with sound in Soviet cinema, changing practices of voice delivery and translation, and issues of aesthetic ideology and music theory, this book explores the cultural and historical factors that influenced the use of voice, music, and sound on Soviet and post-Soviet screens.

Inhalt: From the history of graphic sound in the Soviet Union, or, Media without a medium / Nikolai Izvolov. – Silents, sound, and modernism in Dmitry Shostakovich's score to *The New Babylon* / Joan Titus. – To catch up and overtake Hollywood: early talking pictures in the Soviet Union / Valerie Pozner. – ARRK and the Soviet transition to sound / Natalie Ryabchikova. – Making sense without speech:

the use of silence in early Soviet sound film / Emma Widdis. – The problem of heteroglossia in early Soviet sound cinema (1930–35) / Evgeny Margolit. – Challenging the voice of God in World War II-era Soviet documentaries / Jeremy Hicks. – Vocal changes: Marlon Brando, Innokenty Smoktunovsky, and the sound of the 1950s / Oksana Bulgakowa. – Listening to the inaudible foreign: simultaneous translators and Soviet experience of foreign cinema / Elena Razlogova. – Kinomuzyka: theorizing Soviet film music in the 1930s / Kevin Bartig. – Listening to *Muzykal'naya istoriya* (1940) / Anna Nisnevich. – The music of landscape: Eisenstein, Prokofiev, and the uses of music in *Ivan the Terrible* / Joan Neuberger. – The full illusion of reality: repentance, polystylism, and the late Soviet soundscape / Peter Schmelz. – Russian rock on Soviet bones / Lilya Kaganovsky.

“How changes in background music and situations influence the processes of animation comprehension.”

In japan. Schrift. – *Abstract:* This study examines the factors that influence the processes of animation comprehension. To that aim, the study both applies the Event-Indexing Model, which is a model of textual comprehension, to elucidating the factors that influence the comprehension of animations and examines whether those factors differ according the animation genre by contrasting two genres. The factors investigated are the five situational dimensions proposed by the Event-Indexing Model, as well as both the introductions and

endings of background music (BGM). The results of multiple regression analysis, conducted on shot-by-shot reaction times as the dependent variable, indicate that the situational dimensions that influence animation comprehension vary for different genres. In contrast, the results also indicate that the BGM endings influence comprehension processes irrespective of the genre. In addition to indicating that BGM can potentially enhance the updating of situational model, these findings also provide hints for animation production that can potentially facilitate audience comprehension.

Kalinak, Kathryn (ed.): *Music in the Western: Notes from the Frontier*. New York [...]: Routledge, 2012, ix, 237 S. (The Routledge Music and Screen Media Series.).

Presents essays from both film studies scholars and musicologists on core issues in western film scores: their history, their generic conventions, their operation as part of a narrative system, their functioning within individual filmic texts and their ideological import, especially in terms of the western's construction of gender, sexuality, race and ethnicity. The Hollywood western is marked as uniquely American by its geographic setting, prototypical male protagonist and core American values. Music in the Western examines these conventions and the scores that have shaped them. But the western also had a resounding international impact, from Europe to Asia, and this volume distinguishes itself by its careful consideration of music in non-Hollywood westerns, such as *Ravenous* and *The Good, the Bad, and the Ugly* and in the "easterns" which influenced them, such as *Yojimbo*.

Other films discussed include *Wagon Master*, *High Noon*, *Calamity Jane*, *The Big Country*, *The Unforgiven*, *Dead Man*, *Wild Bill*, *There Will Be Blood* and *No Country for Old Men*.

Kalinak, Kathryn [Marie] (ed.): *Sound: Dialogue, Music, and Effects*. New Brunswick, N.J.: Rutgers University Press 2015, 224 S. (Behind the Silver Screen.).

Sound has always been an integral component of the moviegoing experience. Even during the so-called "silent era," motion pictures were regularly accompanied by live music, lectures, and sound effects. Today, whether we listen to movies in booming Dolby theaters or on tiny laptop speakers, sonic elements hold our attention and guide our emotional responses. Yet few of us are fully aware of the tremendous collaborative work, involving both artistry and technical wizardry, required to create that cinematic soundscape. Sound, the latest book in the Behind the Silver Screen series, introduces key concepts, seminal moments, and pivotal figures in the development of cinematic sound. Each of the book's six chapters cover a different era in the history of Hollywood, from silent films to the digital age, and each is written by an expert in that period. Together, the book's contributors are able to explore a remarkable range of past and present film industry practices, from the hiring of elocution coaches to the marketing of soundtrack records.

Kassabian, Anahid: *Ubiquitous Listening: Affect, Attention, and Distributed Listening*. Berkeley: University of California Press 2013, xxx, 151 S.

From the conclusions of the book: This book may have seemed an idiosyncratic journey. From music at home to experimental video art to sensory films to TV musical episodes to Armenian jazz to Putumayo albums, what holds these items together is far from obvious, when inventoried by object. But that is, as I hope has become clear along the way, my point. There are very few kinds of music that are not listened to as ubiquitous music, and in fact listened to frequently in that way. From classical music in restaurants and cars to techno in clubs and on condo websites, very little music escapes this...

Kirby, Philip: Sound and fury? Film score and the geopolitics of instrumental music. In: *Political Geography* 75, 2019, online.

Political geography has devoted substantial attention to visual popular culture. Where the aural has been considered, this has generally been through the spoken-word (e.g. radio) or lyrics (e.g. popular music). The geopolitics of instrumental music – music without words – is yet to be considered in depth. This article provides an outline of how such media might be approached, building on affectual analyses of sound in human geography. In particular, it examines the example of instrumental film score. It suggests that, rather than just providing background to the visual component of film, score provides a key mode through which geopolitical knowledges are communicated. Through case studies of musical constructions of identity/difference from three geopolitical periods – World War Two, the Cold War, and the War on Terror – this article makes the case for adding instrumental musi-

cal literacy to political geography's methodological toolkit.

Караева: от «Дон Кихота» к «Гойе»]. In: *Muzika v mire iskusstv / Music in the World of Arts* [Rostov-na-Donu] 2014, S. 82–86; [[URL](#)].

«Cinematographic Intentions» in the Symphonism by Qara Qaraev: From «Don Quijote» to «Goya».

In kyrill. Schrift. – *Abstract*: The most important features of artistic conceptions and musical dramaturgy in symphonic engravings «Don Quijote» and the Fourth symphony «Goya» by Q. Qaraev are elucidated in the article. The researcher characterizes program-music specificity of this works which is depended on its connection with the literary origins by M. Cervantes and L. Feuchtwanger. The ways of realization of soundtracks' music material (from movies by G. Kozintsev and K. Wolf) in «Don Quijote» and «Goya» are examined. The role of pictorialism and abstract plotness as basic types of program-music thinking in symphonic works by Q. Qaraev is marked.

Köhle, Katharina: *Musik ist Stenographie der Gefühle: Ein Versuch der Untersuchung der durch Musik und musikalischer Untermalung hervorgerufenen bzw. gestützten emotionalen*

Kommunikation in Filmen. Magisterarb. Wien: Universität Wien, Fakultät für Sozialwissenschaften 2019, 174 S.; [URL].

Abstract: Das Ziel dieser Arbeit ist es, aus kommunikationswissenschaftlicher Sicht, die Beziehung und Funktion von Filmmusik innerhalb des medialen Systems Film zu untersuchen. Die zentrale Fragestellung befasste sich mit dem kommunikativen Charakter von Filmmusik, außerdem wurde besonderes Augenmerk auf den Aspekt der narrativ-emotionalisierenden Funktion von Musik im filmischen Kontext gelegt. Um diese Thematik induktiv-qualitativ zu untersuchen, wurden, vor dem Hintergrund einer ausführlichen Theorie-recherche in den Bereichen der Musik- und Filmwissenschaft, der Emotionspsychologie und Kommunikationswissenschaft, Praktiker-Interviews mit vier Film-schaffenden der österreichischen Filmbranche geführt. Ausgehend von den Erkenntnissen aus diesen Interviews wurden zwölf Sequenzen aus insgesamt vier Filmen des Regisseurs Jim Jarmusch qualitativ-inhaltsanalytisch auf die musikalischen Funktionen hin untersucht. Die Ergebnisse zeigen eine narrativ-kommunikative Rolle von Filmmusik innerhalb des Filmsystems, sowie eine starke Tendenz der emotionalisierenden Funktion.

[Text first presented as a key note lecture on a large-scale film conference in Seoul, South Korea, in 2010.]

A movie soundtrack album makes it possible to “take the movie home”: By listening to the music over and over again, you re-experience key scenes from the movie – and the emotions you felt the first time you saw these scenes. How does this process work? How does music evoke film scenes and emotions, and how does it interact with film sound and speech on soundtrack albums?

Kollinger, Franziska: *Von der Bühne zum Film: Georges Aurics Musik der 1930er Jahre*. Stuttgart: Steiner 2019, 185 S. (Beihefte zum Archiv für Musikwissenschaft. 82.).

Der Name des französischen Komponisten Georges Auric ist zwar geläufig, sein Werk und Wirken jenseits einer Verortung innerhalb der Pariser Künstler-Avantgarde der 1920er Jahre jedoch kaum erschlossen. Franziska Kollinger untersucht erstmals systematisch Aurics Bühnen- und Filmmusiken der 1930er Jahre und entschlüsselt das dichte Geflecht aus strukturellen, ästhetischen und medialen Einflussfaktoren, welche die erneute Wende in der Debatte um die ästhetischen und kulturellen Werte der Musik im Frankreich der 1930er Jahre prägten. Auric figuriert hierbei als Seismograph für die disparaten Entwicklungen seiner Zeit, indem er die verschiedenen Diskurse zum einen als Beobachter registrierte und dokumentierte und zum anderen grundlegende Strukturveränderungen für seine Kompositionspraxis und die Vermittlung seiner Werke nutzte. Diese bilden damit zugleich eine Topographie der Pariser Kulturlandschaft der 1930er Jahre, die den Horizont der oftmals verkürzten Darstellung des Jahrzehnts in der Musikgeschichte erweitert. Aurics Werke erscheinen auf diese Weise aber nicht nur im Spiegel ihrer Zeit: Es treten auch die Grenzen und Möglichkeiten ihrer besonderen Medialität hervor.

Kompanek, Sonny: *From Score to Screen: Sequencers, Scores, & Second Thoughts – The New Film Scoring Process*. New York: Schirmer 2004, xviii, 174 S.

Scoring for film has changed dramatically over the past twenty years. With the advent of MIDI, sequencers and low-cost recording gear, just about any composer anywhere can score a film.

Koozin, Timothy: Parody and ironic juxtaposition in Toru Takemitsu's music for the film, *Rising Sun* (1993). In: *The Journal of Film Music* 3,1, 2010, S. 65–78.

Toru Takemitsu created music for more than a hundred films, but only one was for a major Hollywood studio, *Rising Sun* (1993) with Sean Connery and Wesley Snipes. In his music for *Rising Sun*, Toru Takemitsu contrasts and juxtaposes exotic, popular, and modernist musical elements to depict the cinematic drama in ways that are analogous to proce-

dures that have been noted in dramatic music by Debussy, Stravinsky, and Messiaen, composers Takemitsu is known to have admired. At the same time, Takemitsu references traditional Japanese music, American jazz, and musical genres of the crime drama and film noir to construct a musical narrative of evocative color, irony, and dark humor. *Rising Sun* is based on a Michael Crichton novel that was criticized as a reactionary statement against Japanese economic aggression. This study shows how Takemitsu's compelling music ironically projects the themes of economic warfare and cultural division in the film while also providing resistance through a subtle projection of his own humanistic worldview. The considerable changes that director and screen co-writer, Philip Kaufman made in adapting the novel dramatically alter the underlying social/political implications in the story. The analysis examines how this transformation from the original story is communicated through cultural codes embodied in preexisting music layered in the soundtrack along with Takemitsu's originally composed textures, by artists including Cole Porter, Duke Ellington, Latino rappers Cypress Hill, and the seventies New Wave band, the B-52s.

Kubaczek, Marianne / Pircher, Wolfgang: Fading: über das Verschwinden der Musik im Tonfilm. In: *1929. Beiträge zur Archäologie der Medien*. Hrsg. v. Stefan Andriopoulos & Bernhard J. Dotzler. Frankfurt: Suhrkamp 2002, S. 350–369 (Suhrkamp-Taschenbuch Wissenschaft. 1579.).

Der Tonfilmpionier Oskar Messter stellt im Jahr 1903 ein System vor, das eine annähernde Synchronisation von Filmvorführapparat und Schallquelle ermöglicht. Dieses Verfahren wird in der Folge zur Herstellung von Ki-

noclips verwendet, in denen bekannte Musikstücke nachträglich „verfilmt“ werden. Das Interesse Arnold Schönbergs für den Tonfilm schließt das Bewusstsein ein, dass es sich bei diesem Medium um ein „selbständiges Instrument zu neuartigem künstlerischem Ausdruck“ (Schönberg) handle. An der Zusammenarbeit von Sergej Eisenstein und Sergej Prokof'ev (*Aleksandr Newskij*, 1938) sowie an Hanns Eislers Nachvertonung von Joris Ivens' Stummfilm *Regen* (1941) werden unterschiedliche Zugänge zur Filmmusik diskutiert. Die ästhetischen Erwartungen der genannten Künstler werden dadurch negiert, dass im Zuge der tontechnischen Verbesserungen die Filmmusik tendenziell zur Begleitmusik herabgestuft wird. Der Tonfilm wandelt nicht nur den Stummfilm per se in ein Kunstprodukt um, er macht auch den Film zum Gesamtkunstwerk, in dem Bild und Ton in gleicher Weise formbestimmend sind. (Wendelin Bitzan)

Kulezic-Wilson, Danijela: Musically Conceived Sound Design, Musicalization of Speech and the Breakdown of Film Soundtrack Hierarchy. In: Kulezic-Wilson, Danijela & Liz Greene (eds): *The Palgrave Handbook of Sound Design and Music in Screen Media: Integrated Soundtracks*. London: Palgrave Macmillan 2016, S. 429–444.

Kulezic-Wilson explores the growing trend of disrupting the traditional hierarchical relationships between speech and music in film soundtracks manifested in the musical use of the spoken word. By using examples from several recent films with strong musical underpinnings – Drake Doremus' *Breathe In* (2013), Harmony Korine's *Spring Breakers* (2012) and Shane Carruth's *Upstream Color* (2013) –, Kulezic-Wilson identifies the main strategies involved in the musicalization of film speech and argues that undermining the narrative sovereignty of the spoken word and endorsing the interchangeability of speech and music promote modes of perception which can change our expectations of narrative film and emphasize its musical and sensuous qualities.

Kupfer, Peter: “Good hands”: The music of J. S. Bach in television commercials. In: *Bach* 50,2, 2019, S. 275–302.

Despite Mervyn Cooke's assertion that the use of Bach's music in film is, among classical composers, “perhaps the most susceptible to contrasting interpretations,” I argue in this article that in the case of recent television commercials, Bach has more or less taken on a single function: reassurance. It is no coincidence that most companies that use Bach in their commercials offer financial or insurance services (including American Express, MetLife, and Allstate), thus requiring a message of trust. But even commercials for non-finance products, like Wix.com, Healthy Choice Café Steamers, and Papa Murphy's Pizza, have used Bach as the sound of reassurance. Furthermore, it is a particular subset of works that continually reappears in such contexts, particularly the Prelude from the Violoncello Suite No. 1 in G Major BWV 1007 and the Prelude in C Major from the Well-Tempered Clavier Book I. Drawing on Bach scholarship, screen music scholarship, my own empirical studies on the reception of classical music in television commercials, and interviews with advertising creative directors, I demonstrate how and why Bach's music has in commercials come to represent the sound of “good hands” (“to invoke Allstate Insurance's motto). In the process, I reveal that what might seem on the surface to be an obvious association is actually the result of negotiations among aesthetic, semiotic, and socio-demographic factors, and especially the evolution of television advertising in recent decades. “Sound and Image in Michel Legrand's Art Works: “Birds” as a Metaphor of Music and Peace.”

In japan. Schrift. – Abstract: The most remarkable point of the feature film, *Cinq jours en juin* (1989), directed by Michel Legrand (1932–), is that only two of the music origi-

nally composed by Legrand in the film. What is more, the ambient sounds of birdsong in the film is distinctively choreographed. In different works of Legrand (film music, picture book, novel), the use of “birds” as musical elements can be easily found. This paper seeks to show the significance of the bird in his works through an analysis of metaphor as a mode of expression and of the experiences of Legrand himself. The Legrand’s use of “birds” as musical elements reveals not only his intention to connect birds and music but also his antipathy to war. Thus, if it represents Legrand’s belief that “the music (musical elements) in the film must surpass the political unreasonableness,” the expression of “birds” is not simply a symbol of peace in general but is also a mirror to reflect Legrand’s aspiration for peace.

“Synchronization of Screen Images and Sound: The Basis and Application of the Principle of the ‘Picture Leading Sound’.”

In japan. Schrift. – Abstract: The principle of the “picture leading sound” is widely applied in animation production with regard to the synchronization of screen images and audio inputs, it is believed that the final product is superior when the picture leads the sound by two frames. For example, Disney’s short animation movie series *The Silly Symphony* was produced for 10 years from 1929, and initially, the rule of maintaining the unity of moving pictures and music was followed. However, computer analyses confirm that with time, pictures began leading the sounds. While the principle of the “picture leading sound” is simply a rule of thumb for filmmakers, and the scientific rationale for this practical standard has not yet been sufficiently investigated. It is said that human beings perceive “deviations” with screen images when their corresponding sounds are three frames or 0.1 second or more apart regardless of whether they are viewing a live-action or an animation film. Therefore, it is necessary to refer to theories of perceptual psychology to adequately understand the principle of the “picture leading sound” to develop a hypothesis about film production norms concerning stimuli reaching the human brain. This paper aims to present a theoretical explanation for

the adoption of the above manner of frame processing in filmmaking. It further intends to analyze specific examples from cinema to reveal that the method of image preceding sound brings about artistic dynamism in all motion pictures and not in animated films alone.

Kuykendall, James Brooks: William Walton's film scores: New evidence in the autograph manuscripts. In: *Notes: Quarterly Journal of the Music Library Association* 68,1, 2011/12, S. 9–32.

Über den Filmkomponisten William Walton.

Kyriakides, Yannis: *Imagined Voices: A Poetics of Music-Text-Film*. Diss. Leiden, Leiden University 2017, 283 S.

Imagined Voices deals with a form of composition, music with on-screen text, in which the dynamic between sound, words and visuals is explored. The research explores the ideas around these 'music-text-films', and attempts to explain how meaning is constructed in the interplay between the different layers of media. Issues that initially arose out of the research, were directly related to the question of 'voice': Who is narrating? And where is the voice located? These questions became more pertinent after noticing a phenomenon occurring during performances of these works: that when we read text synchronised to music, we become very aware of an inner voice silently reading along. This effect of hearing one's own voice in the music, was a discovery that had many consequences for the ways in which the ideas about listening and the role of multimedia could function within music.

Laing, Heather: *The Gendered Score: Music in 1940s Melodrama and the Woman's Film*. Aldershot/Burlington, VT: Ashgate 2007, xiv, 196 S. (Ashgate Popular and Folk Music.).

Heather Laing examines, for the first time, the issues of gender and emotion that underpin the classical style of film scoring, but that have until now remained unquestioned and untheorized, thus providing a benchmark for thinking on more recent and alternative styles of scoring. Many theorists have discussed this type of music in film as a signifier of emotion and 'the feminine', a capacity in which it is frequently associated with female characters. The full effect of such an association on either

female or male characterization, however, has not been examined. This book considers the effects of this association by progress through three stages: cultural-historical precedents, the generic parameters of melodrama and the woman's film, and the narrativization of music in film through diegetic performance and the presence of musicians as characters. Case studies of specific films provide textual and musical analyses, and the genres of melodrama and the woman's film have been chosen as representative not only of the epitome of the Hollywood scoring style, but also of the narrative association of women, emotion and music. Laing leads to the conclusion that music functions as more than merely a signifier of emotion. Rather, it takes a crucial role in both indicating and determining how emotion is actually understood as part of the construction of gender and its representation in film.

Lasuén, Sergio: *La armonía en las bandas sonoras del cine español de los noventa*. Prólogo de Pascal Gaigne. Alicante: Investigación y Publicación 2018, 228 S.

Utilizando una propuesta metodológica original, personal e inductiva, Sergio Lasuén sistematiza distintos tipos de herramientas armónicas que aparecen asociadas de forma recurrente a secuencias cinematográficas con unas expectativas expresivas similares. Partiendo de un enfoque aplicable a distintos tipos de obras interdisciplinares que surgen como resultado de lo que denomina proceso creativo

global y tras una primera parte en la que nos explica y deja traslucir el alcance de su propuesta, la pone en práctica sirviéndose de una amplia muestra del cine español de los noventa, formada por 26 largometrajes, dirigidos por 21 realizadores distintos y con música de 12 compositores diferentes. Para contrastar sus resultados, hace referencia a más de 200 secuencias en las que el lector puede profundizar discrecionalmente. Este libro es una obra indispensable para cualquier alumno de composición atraído por los proyectos interdisciplinares, así como para cualquier persona interesada en el análisis musical. Es también útil para intérpretes, ya que probablemente participarán en alguna obra interdisciplinar a lo largo de su carrera profesional. Por otro lado y a pesar de que se utiliza terminología específica, tanto aficionados a las bandas sonoras sin formación musical como profesionales del mundo del cine han manifestado su interés por los resultados aquí obtenidos. – Mit Notenbeispielen. – *Inhaltsverzeichnis*: [\[URL\]](#).

Laver, Mark: Gender, genius and rock and roll in *Roy Orbison and Friends: A Black and White Night*. In: *Popular Music: A Yearbook* 30,3, 2011, S. 433–453.

To a considerable extent, the mythology of rock and roll rebellion is predicated upon a similarly mythologised male sexual potency that Simon Frith and Angela McRobbie have characterised as “aggressive, dominating, and boastful, ... [constantly seeking] to remind the audience of [its] prowess, [its] control” (Frith and McRobbie 1990, p. 319). In this article, I look to Roy Orbison – a musician who was a key figure in the genesis of rock and roll, but who nevertheless subverts this phallocentric meta-narrative. Focusing on the 1987 concert film, *Roy Orbison and Friends: A Black and White Night*, I argue that Orbison’s staid performance style, unusual voice and unconventional songwriting as evidenced (and amplified) by that film trouble the purportedly monolithic rock and roll masculinity, and the concomitant mythology of rebellion. At the same time, however, I propose that even as normative masculinity appears to be destabilised, a close reading of the film reveals that the performance situates Orbison within a different masculinist discourse: the 19th-century Romantic discourse of masculine genius that continues to inflect 21st century notions about artists and art music. Thus, in *Black and White Night*, normative and non-normative masculinities are thoroughly imbricated, each simultaneously destabilising and reaffirming the other. (Vorlage)

Lee, Hyunseon: *Metamorphosen der Madame Butterfly. Interkulturelle Liebschaften zwischen Literatur, Oper und Film*. Heidelberg: Winter 2020, 445 S. (Reihe Siegen. Beiträge zur Literatur-, Sprach- und Medienwissenschaft. 181.).

Aus Pierre Lotis „Madame Chrysanthème“ (1867) entwickelt sich am „Fin de Siècle“ das globale Narrativ der „Madame Butterfly“. Im Laufe des 20. Jahrhunderts werden so westlich-asiatische Liebesbeziehungen in diversen medialen Spielarten und Kulturen transformiert. Das kulturell „Andere“ wird als diskursives Objekt produziert und zirkuliert

in einem global-medialen Kontext. Die Studie zeigt auf, wie die modernen Kulturen und Diskurse miteinander verflochten sind und wie Stereotype die wechselseitige Bezugnahme prägen. Die diskurstheoretische und komparative Medienanalyse legt auch die intermediale Ästhetik zwischen Literatur, Musiktheater und Film von Künstlern wie Giacomo Puccini, Fritz Lang, Franz Lehár, François Truffaut, Alain Resnais, David Cronenberg u.a. kritisch reflektierend offen. Die (De-)Konstruktion des Butterfly-Mythos kulminiert in seiner postkolonialen, sogar transkulturellen Überformung jenseits europäischer Opernbühnen wie in den japanischen Butterflies von Mori Ogai und Saegusa Shigekatsu oder den subalternen GI-Bräuten des koreanischen Kinos.

Lehman, Frank: Transformational analysis and the representation of genius in film music. In: *Music Theory Spectrum: The Journal of the Society for Music Theory* 35,1, 2013, S. 1–22.

Neo-Riemannian theory offers an auspicious toolkit for analyzing film music – a repertoire in which dramatic exigency takes precedence over functional tonal logic. The ability of neo-Riemannian theory to model harmonic progressions as dynamic and contextually determined, particularly with association-laden chromatic motions, suits it eminently to Hollywood scoring practice. This transformational approach is tested on James Horner's music for the film *A Beautiful Mind*. In this score, Horner illustrates the mental life of the mathematician John Nash with wildly chromatic but firmly triadic music. A group generated by the operators L, R, and S provides the transformational fount for a “Genius complex” “that represents intense intellection. Three cues from *A Beautiful Mind* are analyzed. Collectively, their tonal spaces reveal a distinctly transformational contribution to narrative and characterization. These readings further evince a tension between the logical teleology of sequential patterning with the radically contingent, even game-like quality of Horner's triadic manipulations. (Vorlage)

Lehman, Frank: Hollywood cadences. Music and the structure of cinematic expectation. In: *Music Theory Online (MTO) – A Journal of Criticism, Commentary, Research, and Scholarship* 19,4, 2013, [URL].

Cadences are one of the most powerful tools at a film composer's disposal. The structure and placement of a cadence can shape the emotional arc of a scene, accentuate narrational information, and manipulate generic expectations. Drawing from theories of film genre and cadential definition from Altman (1999) and Caplin (2002), I explore several cinematically significant “cadential genres” – harmonic routines arising through the convergence of independent musical phenomena that together project a punctuative function. Through processes of attribute substitution and subtraction, a cadential genre can adapt

to shifting scoring practices and generic expectations. I showcase four such cadential genres. The mixed plagal cadence imports transcendent harmonic associations from the Romantic era. Phrasal “mickey mousing” arises through cadential synchronization, as shown in an analysis of Korngold's *Robin Hood*. The subtonic half cadence is strongly linked with a specific film genre: the Western. Through analysis of Jerome Moross's subtonic-saturated scores and subsequent adapted and abstracted usages, I show the value of the generic approach to style-based analysis. Lastly, I inspect the chromatically modulating cadential resolution (CMCR): the strategy of initiating a diatonic cadence in one key only for the dominant to discharge onto the tonic of a chromatically related key. Through a variety of intrinsic and contextual traits describable by linear, transformational, and cognitive models, I explain the strong association of CMCRs with cinematic evocations of wonderment. This is illustrated through a case study of Williams's *Jurassic Park*. (Vorlage)

Lehman, Frank: Scoring the President. Myth and politics in John Williams's *JFK* and *Nixon*. In: *Journal of the Society for American Music* 9,4, 2015, S. 409–444.

Throughout his career, John Williams has set the musical tone for the American presidency, most elaborately with his scores for Oliver Stone's controversial films *JFK* (1991) and *Nixon* (1995). While invested in capturing the character of these commanders in chief through musical codes, Williams's soundtracks are equally engaged in the act of the evocation and telling of “history.” Specifically, they construct a tragic myth of 1960s America in which the promise represented by JFK is destroyed from without, and Nixon from within, both by the malevolent forces of the military-industrial complex. In considering the thematic and dramatic means by which Williams paints his orchestral portraits, I reveal the extent to which music supports Stone's paranoiac narratives, especially in cases where the director's collage-like visual aesthetic puts pressure on the otherwise nostalgic traits of Williams's default tonal style. I offer a music-analytical approach to *JFK* and *Nixon* informed by interviews, studies of po-

itical mythology and paranoia, and musical appraisals of Williams's music. Stone's 1960s-as-lapsarian-metanarrative positions Kennedy as a romanticized absence, an image of the fabular fallen King, and Williams renders him as a public recollection rather than a human being with interiority. Nixon, by contrast, is a tragic antihero, consumed by dark forces of history and an abundance of ambivalent thematic material. Particular attention is paid to the dismantling of Kennedy's noble leitmotif during *JFK*'s prologue and motorcade sequence and to the near-fascistic musical accompaniment of Nixon's speeches. Having demonstrated the active role these scores play, I conclude that Williams's music constitutes an authoring of history in a strong, albeit postmodern, sense, consistent with but independent from Stone's screenplay. (Vorlage)

Lehman, Frank: Film-as-Concert music and the formal implications of 'cinematic listening'. In: *Music Analysis* 37,1, 2018, S. 7–46.

What does it mean for film music – subordinated, contingent, 'unheard' – to be plucked from its intended context and placed at the forefront of the listener's attention? The tradition of excerpting and arranging movie scores for the concert hall poses this question sharply. While scholarship on 'cinematic listening' has picked up in recent years, the specifically music-theoretical issues raised by this repertoire have been largely unaddressed. In this article, I argue that film-as-concert music presents hearing 'cinematically' as a valid alternative to structural modes of listening, a form of hearing that subverts both naive formalism and reflexive anti-formalism. Following a discussion of theoretical and interpretative priorities for analysing film-as-concert music, I begin investigation of a subset of the film-as-concert corpus: stand-alone scherzi originating from action set pieces. More than any other type of underscore, action cues answer to dramatic, editorial and visual imperatives rather than to 'absolute' logic. My core data emerges from a detailed study of John Williams's film and concert scherzi, with short analyses of cues/pieces from *E.T.*, the *Indiana Jones* movies and *Star Wars*. My approach emphasises the way in which formal alterations bring about drasti-

cally different ways of hearing the work tonally and expressively across multiple versions. A larger-scale case study of 'The Asteroid Field' from *The Empire Strikes Back* serves to demonstrate the tonal, sectional and narratival transformations that occur between movie theatre and concert hall. To conclude, I propose that the film-as-concert mindset can be transferred to filmgoing itself, as a new mode of cinematic listening. (Vorlage)

Lehmann, Frank: *Hollywood Harmony: Musical Wonder and the Sound of Cinema*. New York: Oxford University Press 2018, xvii, 292 S. (Oxford Music/Media Series.).

Film music often tells us how to feel, but it also guides us how to hear. Filmgoing is an intensely musical experience, one in which the soundtrack structures our interpretations and steers our emotions. Hollywood Harmony explores the inner workings of film music, bringing together tools from music theory, musicology, and music psychology in this first ever book-length analytical study of this culturally central repertoire. Harmony, and especially chromaticism, is emblematic of the "film music sound," and it is often used to evoke that most cinematic of feelings-wonder. To help parse this familiar but complex musical style, Hollywood Harmony offers a first-of-its kind introduction to neo-Riemannian theory, a recently developed and versatile method of understanding music as a dynamic and transformational process, rather than a series of inert notes on a page. This application of neo-Riemannian theory to film music is perfect way in for curious newcomers, while also constituting significant scholarly contribution to the larger discipline of music theory. Author Frank Lehman draws from his extensive knowledge of cinematic history with case-studies that range from classics of Golden Age Hollywood to massive contemporary franchises to obscure cult-films. Special emphasis is placed on scores for major blockbusters such as *Lord of the Rings*, *Star Wars*, and *Inception*. With over a hundred meticulously transcribed music examples and more than two hundred individual movies discussed, Hollywood Harmony will fascinate any fan of film and music.

Lejeune, Vivien / Dasnoy, Romain: *Le guide des compositeurs de musique de films*. Paris: Ynnis Éditions 2017, 251 S.

Au cinéma, la musique est très vite devenue indissociable de l'image, lui apportant une nouvelle dimension à part entière. Derrière les thèmes cultes que le public connaît par cœur œuvrent des compositeurs amoureux d'un art aux formes multiples. Chacun d'entre eux apporte ses couleurs et ses inspirations dans des styles qui parcourent tous les genres musicaux, et parfois même les plus expérimentaux. Cet ouvrage rédigé par deux passionnés de cinéma et de musique retrace le parcours de la musique de film, des compositeurs les plus prolifiques à des noms plus confidentiels, des films qu'on ne présente plus à ceux qu'il faut absolument découvrir: grands classiques, musicals, science-fiction, action, aventure, romance... Le Guide des compositeurs de musique de film vous guidera sur les sentiers d'un univers auditif riche dont chaque note est une image. John Williams, Hans Zimmer, Howard Shore, James Horner, Bernard Herrmann, Lalo Schifrin, Ennio Morricone, Michel Legrand, Joe Hisaishi, Jerry Goldsmith, Maurice Jarre, Alan Silvestri, Henry Mancini, Alexandre Desplat, Nino Rota et bien d'autres.

Auch zur Filmmusik. –[U]ntersucht die Wirkung des musikalischen Tempos im Kontext audiovisueller Medien. Im Vorfeld gibt der

Autor einen umfassenden Einblick in die Forschung zu musikalischen Tempo in audiovisuellen Medien und daran angrenzende Gebiete. Die drei explizit untersuchten Aspekte betreffen erstens die gegenseitige Beeinflussung der visuellen Geschwindigkeit durch das musikalische Tempo und die umgekehrte Richtung, zweitens den Einfluss des musikalischen Tempos und der visuellen Geschwindigkeit auf die Wahrnehmung der Schätzung der Gesamtdauer sowie drittens die emotionale Beeinflussung durch das musikalische Tempo.

Inhalt: Psychologische Grundlagen zur audiovisuellen Wahrnehmung, zur Wahrnehmung von Zeit, audiovisuellen Medien, Filmmusik und dem Themenkomplex Emotion. – Empirische Überprüfung von drei Forschungshypothesen. – Methodische Zugänge und statistische Auswertungsverfahren.

Leonard, Kendra Preston: *Shakespeare, Madness, and Music: Scoring Insanity in Cinematic Adaptations*. Lanham/Toronto/Plymouth, UK: Scarecrow Press 2009, ix, 153 S.

Shakespeare's three political tragedies – *Hamlet*, *Macbeth*, and *King Lear* – have numerously been presented or adapted on film. These three plays all involve the recurring trope of madness, which, as constructed by Shakespeare, provided a wider canvas on which to detail those materials that could not be otherwise expressed: sexual desire and expectation, political unrest, and, ultimately, truth, as excavated by characters so afflicted. Music has long been associated with madness, and was often used as an audible symptom of a victim's disassociation from their surroundings and societal rules, as well as their loss of self-control.

Leonard, Kendra Preston: Sounds of India in *Supple's Twelfth Night*. In: *Bollywood Shakespeares*. Ed. by Craig Dionne & Parmita Kapadia. New York: Palgrave Macmillan 2014, S. 147–163.

The concept of "Bollywood Shakespeare" almost invariably suggests adaptations of Shakespeare's works into which traditional large-scale song and dance numbers have been interpolated, a hybrid film of dramatic and musical performance that appeals to multiple audiences. Two recent examples include director/writer/composer Vishal Bhardwaj's *Omkara* (2006) and *Maqbool* (2003), adaptations of *Othello* and *Macbeth* set in the Indian criminal underworld. While these two films follow the plots of Shakespeare's plays fairly closely, they also each contain the several song and dance spectaculars that would be startling to unsuspecting audiences but are expected by fans and serve as universal signifiers of a Bollywood production. Indeed, Sangita Gopal and Sujata Moorti claim that for a movie to be a true "Bollywood film," "the song-dance sequence is the dealmaker."

“In this essay I explore the use of musical mimesis in the score for D. W. Griffith’s 1921 film *Orphans of the Storm*.“

Leonard, Kendra Preston: Performing Spiritualism in the Silent Cinema. In: *Performance, Religion, and Spirituality* 1,2, October 2018, S. 1153–188.

The silent film era coincided with a revival of belief in spiritualism in America. Desperate to find meaning in the deaths of the Great War and the 1918 Spanish Flu epidemic, the bereaved sought contact with the dead and evidence of an afterlife. Given this fascination with spiritualism, it is not surprising that the topic quickly became a favorite for filmmakers. This resulted in numerous moving pictures that featured the presence of spirits, which in turn required musical accompaniment suited to the subject. Cinema musicians borrowed from the aural atmosphere of the Spiritualist Church, private and public séances, and other entertainments and experiences involving the supernatural. Both professions were ones in which women could not only fully participate, but were thought by many to be better suited than men for the work at hand. The highly gendered musical and moral educations and expectations for women in the nineteenth century, which were intended to prepare women for domesticity, were exactly the training they needed to succeed as professional mediums and cinema accompanists. The code of morals that held up accomplished women as respectable models provided mediums and accompanists with considerable power in determining the aesthetics and practices of their workplaces

„Die Himmlischen Zwillinge zu den Ursprüngen von Musik und Kino.“

In kyrill. Schrift. – [...] The present article, based on the author’s presentation at the House of Scientists in Haifa and devoted to the 90th anniversary of the talkies, discusses the history of music in cinematography and the key role played in it by the composers Irving Berlin and Max Steiner – a couple of celestial twins born during the Phoenix Hour between 1885–1900. Significantly, the following story of the legendary pair of the film music fathers makes it possible to unite all three groups in a single historical example. Due to them, we may learn in parallel about the confluent major events in their historical period; we may also discover the consonance of their personal leitmotifs with the underscoring major theme of their epoch as well as the resonance that their music evoked in the society.

Lewis, Hannah: *French Musical Culture and the Coming of Sound Cinema*. New York: Oxford University Press 2019, xii, 245 S.

Hannah Lewis argues that the debates about sound film resonated deeply within French musical culture of the early 1930s, and conversely, that discourses surrounding a range of French musical styles and genres shaped audiovisual cinematic experiments during the transition to sound. Lewis' book focuses on many of the most prominent directors and screenwriters of the period, from Luis Buñuel to Jean Vigo, as well as experiments found in lesser-known films. Additionally, Lewis examines how early sound film portrayed the diverse soundscape of early 1930s France, as filmmakers drew from the music hall, popular chanson, modernist composition, opera and operetta, and explored the importance of musical machines to depict and to shape French audiovisual culture. In this light, the author discusses the contributions of well-known composers for film alongside more popular music hall styles, all of which had a voice within the heterogeneous soundtrack of French sound cinema.

[“Roman Palester as a pioneer of Polish film music.”]

Roman Palester’s film music has left a lasting trace on Polish cinematography, even though the composer himself did not attach much importance to this aspect of his work. The present paper is dedicated to the first stage of his work for the film industry (until 1939). On the basis of surviving audio-visual materials and indirect sources, I aim to sketch a panorama of the reception of Palester’s film music in the cultural environment between the two world wars, to analyse the principles of his collaboration with other composers in the case of co-authorship, and briefly to characterise the function, significance and qualities of Palester’s soundtracks, with particular reference to the film *Zabawka* (*Toy*). Palester’s most productive collaboration was that with film director Józef Lejtes (1901–83). The composer wrote music for five of Lejtes’s films: *Dzikie pola* (*Wild Fields*, 1932), *Młody las* (*The Young Forest*, 1934), *Dzień wielkiej przygody* (*The Day of Great Adventure*, 1935), *Róża* (*Red Rose*,

1936), and *Dziewczęta z Nowolipek* (*Girls of Nowolipki*, 1937).

[“Polish reflections on music in sound film in the 1930s: Major ideas and perspectives of musicological research.”]

In Poland, the first evidence of reflections concerning music sounding directly from the screen precedes the premiere of the first Polish sound film *Moralność pani Dulskiej* ([*The Morality of Mrs Dulski*], 1930). As early as in the late 1920s, researchers such as Kamieński and Dembiński noticed the vast potential of ‘cinematic music’ and the need to synchronize the music setting with the plot of a film. After the presentation of film music at the Music Festival in Baden-Baden (1929), an attempt was made to introduce a systematic categorization of the pioneering sound films (*Stromenger*). In the 1930s, Mateusz Gliński addressed the subject of sound film several times. The issue of the acoustic layer of a film perceived holistically was also discussed by other journalists (Zahorska, Fryd, Braun), filmmakers (Bohdziewicz) and composers (Rathaus). They usually identified an ideal model for such a synthesis in animated films and René Claire’s movies. In addition, in the reflections on sound film in Poland psychological themes were also present (e.g. Czerwiński and Furmanik), and concerned the role of music in the viewer-listener’s experience of the film. The most comprehensive and insightful approaches to film music were expressed by Marian Neuteich and Zofia Lissa in 1937. All the sources quoted above are undoubtedly valuable material for film-related musicological research, focused on such subjects as style, genre and function, ‘film biographies’ of Polish composers, or studies into Polish film music perceived as ‘modern music’.

López Hernández, Sofía: The contributions of the music of George Fenton to the films of Ken Loach. In: *Anuario Musical* 72, 2017, S. 277–292.

Ken Loach is a high profile British film director. Since the mid 1960's, he has made numerous films for cinema and television. There is already a lot written about his way of filming and yet very little is written about the music for his films. To be able to get inside the music of Ken Loach's films, we must first talk about George Fenton as he has been Loach's usual composer since 1994. The object of this article is to fill this gap: to discover what musical characteristics Fenton contributes to Loach's cinema.

López González, Joaquín: Música y cine en la España del Franquismo. El compositor Juan Quintero Muñoz (1903–1980). In: *Revista de musicología* 33,1–2, 2010, S. 573–601.

This article presents the Spanish musicological community with the work carried out over the last five years, which resulted in the PhD thesis "Music and Film in Spain during the Franco Regime: the Composer Juan Quintero Muñoz (1903–1980)". Although based on a particular composer, this thesis was written with the aim of tackling art, music and film culture during a decisive period in the recent history of the culture of our country. In the post-war context, cinema and music theatre, in particular the operetta and revue genres, attracted audiences' interest. Juan Quintero composed his works over nearly three decades, dividing his time between the success of his compositions for the theatre and his increasingly prolific musical creation for film. This thesis aims to discuss all of the composer's facets in a broad and exhaustive manner: the composition of light music during the twenties and thirties, his activity as a theatrical composer, and especially his work in the field of film music, in which he was

outstanding. Quintero is also used as an example to study the work system and musical production mechanisms of Spanish cinema of the time.

Losseff, Nicky / Doctor, Jenny (eds.): *Silence, Music, Silent Music*. Aldershot, Hants: Ashgate 2007, xii, 253 S.

The contributions in this volume focus on the ways in which silence and music relate, contemplate each other and provide new avenues for addressing and gaining understanding of various realms of human endeavour. The book maps out this little-explored aspect of the sonic arena with the intention of defining the breadth of scope and to introduce interdisciplinary paths of exploration as a way forward for future discourse. Topics addressed include the idea of 'silent music' in the work of English philosopher Peter Sterry and Spanish Jesuit St John of the Cross; the apparently paradoxical contemplation of silence through the medium of music by Messiaen and the relationship between silence and faith; the aesthetics of Susan Sontag applied to Cage's idea of silence; silence as a different means of understanding musical texture; ways of thinking about silences in music produced during therapy sessions as a form of communication; music and silence in film, including the idea that music can function as silence; and the function of silence in early chant. Perhaps the most all-pervasive theme of the book is that of silence and nothingness, music and spirituality: a theme that has appeared in writings on John Cage but not, in a broader sense, in scholarly writing. The book reveals that unexpected concepts and ways of thinking emerge from looking at sound in relation to its antithesis, encompassing not just Western art traditions, but the relationship between music, silence, the human psyche and sociological trends – ultimately, providing deeper understanding of the elemental places both music and silence hold within world philosophies and fundamental states of being. Silence, Music, Silent Music will appeal to those working in the fields of musicology, psychology of religion, gender studies, aesthetics and philosophy. (Publisher)

Ma, Jean: *Sounding the Modern Woman: The Songstress in Chinese Cinema*. Durham, N.C.: Duke University Press 2015, 296 S.

In the introduction, Ma lays out the historical and theoretical underpinnings for the analyses she pursues in the following chapters. The five chapters, then, follow in a more or less chronological order the origins of the songstress in the Shanghai film industry of the 1920s and 1930s, the migration of much of this industry to Hong Kong beginning in the Second World War and continuing through the communist revolution, the further iterations of the songstress in Hong Kong Mandarin cinema as wildcat and then mambo girl, and finally, the unraveling of the songstress image in a return to the stereotype of the performing woman undone by love. The coda wraps things up with a quick reference to the go-go girl of the late 1960s, discussion of the displacement of the songstress by the martial arts hero, and mention of the few revivals of the songstress in later Hong Kong cinema.

McGinney, William Lawrence: *The Sounds of the Dystopian Future: Music for Science Fiction Films of the New Hollywood Era, 1966–1976*. Ann Arbor, Mich.: UMI [2009], IV, 221 S.

Zuerst: Ph.D. Diss., Denton, TX: University of North Texas, 2009.

From 1966 to 1976, science fiction films tended to depict civilizations of the future that had become intrinsically antagonistic to their inhabitants as a result of some internal or external cataclysm. This dystopian turn in science fiction films, following a similar move in science fiction literature, reflected concerns about social and ecological changes occurring during the late 1960s and early 1970s and their future implications. – In these films, "dystopian" conditions are indicated as such by music incorporating distinctly modernist sounds and techniques reminiscent of twenty-

eth-century concert works that abandon the common practice. In contrast, music associated with the protagonists is generally more accessible, often using common practice harmonies and traditional instrumentation. – These films appeared during a period referred to as the "New Hollywood," which saw younger American filmmakers responding to developments in European cinema, notably the French New Wave. New Hollywood filmmakers treated their films as cinematic "statements" reflecting the filmmaker's artistic vision. Often, this encouraged an idiosyncratic use of music to enhance the perceived artistic nature of their films. – This study examines the scores of ten science fiction films produced between 1966 and 1976: *Fahrenheit 451*, *Planet of the Apes*, *2001: A Space Odyssey*, *THX-1138*, *A Clockwork Orange*, *Silent Running*, *Soylent Green*, *Zardoz*, *Rollerball*, and *Logan's Run*. Each is set in a dystopian environment of the future and each reflects the New Hollywood's aspirations to artistic seriousness and social relevance. – The music accompanying these films connoted an image of technological and human progress at odds with the critical notions informing similar music for the concert hall. These film scores emphasized the extrapolated consequences of developments occurring during the 1950s and 1960s that social activists, science fiction writers, and even filmmakers regarded as worrisome trends. Filmmakers drew on the popular perceptions of these musical sounds to reinforce pessimistic visions of the future, thereby imbuing these sounds with new meanings for listeners of the contemporaneous present.

MacMahon, Orlene Denice: *Listening to the French New Wave: The Film Music and Composers of Postwar French Art Cinema*. Bern: Peter Lang 2014, 320 S. (New Studies in European Cinema. 16.).

[...] offers the first detailed study of the music and composers of French New Wave cinema, arguing for the need to re-hear and thus reassess this important period in film history. Combining an ethnographic approach with textual and score-based analysis, the author challenges the idea of the New Wave as revolutionary in all its facets by revealing traditional approaches to music in many canonical New Wave films. However, musical innovation does have its place in the New Wave, particularly in the films of the marginalised Left Bank group. The author ultimately brings to light those few collaborations that engaged with the ideology of adopting contemporary music practices for a contemporary medium. Drawing on archival material and interviews with New Wave composers, this book re-tells the story of the French New Wave from the perspective of its music.

Rev. (Thompson, Brian C.) in: *Journal of the Society for American Music* 10,1, 2016, S. 85–89.

This study examines the idea of recognizing

music as a tool in interpreting the films of Stanley Kubrick, primarily through close analyses of *Lolita*, *2001: A Space Odyssey*, and *A Clockwork Orange*. While *Lolita*'s music seems to fit within Hollywood scoring practices, predicated upon what I term 'associative listening,' close inspection reveals Kubrick's mastery in combining music (on the basis of structure, style, or both) with the narrative in subtle ways which inform the film. The use of diegetic and nondiegetic realms in *Lolita* forecasts Kubrick's famous use of pre-existing music in later films. I will focus on moments in Kubrick's films that feature the most well-known preexisting pieces of music, such as the *Blue Danube Waltzes* of Johann Strauss, Jr., in *2001: A Space Odyssey*, and Beethoven's *Ninth Symphony* in *A Clockwork Orange*. Paying special attention to the reception histories and dynamic bodies of associations with which these pieces conjure, I will identify ways in which the pieces interpret the films and the ways in which the films confer meaning upon the music. Musical recognition will pertain to music that recurs within a film as well as to music the spectator is likely to have encountered before seeing the film. In addition to making a case for interpretations that take musical recognition as a central component in offering fresh readings of the films and situating the films as commentary on music, I identify four categories of musical techniques across Kubrick's oeuvre. These describe the distinctive roles played by (1) diegetic music that is heard before its source is seen; (2) monophonic music signaling danger or isolation for a character; (3) a piece that follows dialogue or narrative events in moment-to-moment correspondence and recurs in the same capacity across the film; and (4) music in the diegetic and nondiegetic realms to articulate relationships among characters and between characters and spectators. A concurrent aim of this study that has arisen through my exploration of musical recognition is to situate Kubrick's oeuvre as stylistically influenced by the filmmaker Max Ophuls. Themes and techniques in Kubrick have direct antecedents in Ophuls, musical usage chief among these. I compare numerous scenes from the two directors' films as evidence, and offer an analysis of *Eyes Wide Shut* as Kubrick's greatest homage to Ophuls.

Magee, Gayle Sherwood: *Robert Altman's Soundtracks: Film, Music, and Sound from "M*A*S*H" to "A Prairie Home Companion"*. New York/Oxford: Oxford University Press 2014, xiii, 296 S. (The Oxford Music / Media Series.).

American director Robert Altman (1925-2006) first came to national attention with the surprise blockbuster *M*A*S*H* (1970), and he directed more than thirty feature films in the subsequent decades. Critics and scholars have noted that music is central to Altman's films, and in addition to his feature films, Altman worked in theater, opera, and the emerging field of cable television. His treatment of sound is a hallmark of his films, alongside overlapping dialogue, improvisation, and large ensemble casts. Several of his best-known films integrate musical performances into the central plot, including *Nashville* (1975), *Popeye* (1980), *Short Cuts* (1993), *Kansas City* (1996), *The Company* (2003) and *A Prairie Home Companion* (2006), his final film. Even such non-musicals as *McCabe and Mrs. Miller* (1971) have been described as, in fellow director and protege Paul Thomas Anderson's evocative phrase, as "musicals without people singing." Robert Altman's Soundtracks considers Altman's celebrated, innovative uses of music and sound in several of his most acclaimed and lesser-known works. In so doing, these case studies serve as a window not only into Altman's considerable and varied output, but also the changing film industry over nearly four decades, from the heyday of the New Hollywood in the late 1960s through the "Indiewood" boom of the 1990s and its bust in the early 2000s. As its frame, the book will consider the continuing attractions of auteurism inside and outside of scholarly discourse, by considering Altman's career in terms of the director's own self-promotion as a visionary and artist; the film industry's promotion of Altman the auteur; the emphasis on Altman's individual style, including his use of music, by the director, critics, scholars, and within the industry; and the processes, tensions, and boundaries of collaboration.

Mazey, Paul: *British Film Music: Musical Traditions in British Cinema, 1930s–1950s*. Cham, Switzerland: Palgrave Macmillan 2020, xii, 213 S. (Palgrave Studies in Audio-Visual Culture.).

From the celebration of landscape and community encompassed by pastoral music and folk song, and the connection of both with the English Musical Renaissance, to the mystical strains of choral sonorities and the stirring effects of the march, this study explores the significance of music in British film culture. With detailed analyses of the work of such key filmmakers as Michael Powell and Emeric Pressburger, Laurence Olivier and Carol Reed, and composers including Ralph Vaughan Williams, William Walton and Brian Easdale, this systematic and in-depth study explores the connotations these musical styles impart to the films and considers how each marks them with a particularly British inflec-

tion.

Merritt, Russell: Recharging Alexander Nevsky: Tracking the Eisenstein-Prokofiev War Horse. In: *Prokofiev's Music for the Silent Film* 48,2, 1994, S. 34–47.

Meyer, Stephen C.: *Epic Sound: Music in Post-war Hollywood Biblical Films*. Bloomington/Indianapolis: Indiana University Press 2014, X, 272 S.

Lavish musical soundtracks contributed a special grandeur to the new widescreen, stereophonic sound movie experience of post-war biblical epics such as *Samson and Delilah*, *Ben-Hur*, and *Quo Vadis*. In *Epic Sound*,

Stephen C. Meyer shows how music was utilized for various effects, sometimes serving as a vehicle for narrative plot and at times complicating biblical and cinematic interpretation. In this way, the soundscapes of these films reflected the ideological and aesthetic tensions within the genre, and more generally, within postwar American society. By examining key biblical films, Meyer adeptly engages musicology with film studies to explore cinematic interpretations of the Bible during the 1940s through the 1960s.

Inhalt: Introduction – 1. A Biblical Story, for the Post-World-War II Generation?: Victor Young's Music for DeMille's *Samson and Delilah* – 2. Turning Away from “Concocted Spectacle”: Alfred Newman's Score for *David and Bathsheba* – 3. Spectacle and Authenticity in Miklós Rózsa's *Quo Vadis* Score – 4. Novel and Film, Music and Miracle: Alfred Newman's Score to *The Robe* – 5. Spirit and Empire: Elmer Bernstein's Score to *The Ten Commandments* – 6. The Law of Genre and the Music for *Ben-Hur* – 7. *King of Kings* and the Problem of Repetition – 8. Suoni nuovi, suoni antichi: The Soundscapes of *Barabbas* – 9. Universality, Transcendence, and Collapse: Music and *The Greatest Story Ever Told* – Epilogue.

Meyer, Stephen C. (ed.): *Music in Epic Film: Listening to Spectacle*. New York/London: Routledge 2017, xii, 244 S (Routledge Music and Screen Media Series.).

Inhalt: Branding the franchise: music, opening credits, and the (corporate) myth of origin / James Buhler. – Manufacturing the epic score: Hans Zimmer and the sounds of significance / Frank Lehman. – Topoi and intertextuality: narrative function in Hans Zimmer's and Lisa Gerrard's music to *Gladiator* / Joakim Tillman. – The politics of authenticity in Miklós Rózsa's score to *El Cid* / Stephen C. Meyer. – From authenticity to anachronism: pre-existing music and “epic Englishness” in *Elizabeth* and *Master and Commander* / Alexandra Wilson. – Records, repertoire and rollerball: music and the auteur epic / Julie Hubbert. – “The epic and intimately human”: contemplating Tara's theme in *Gone with the Wind* / Nathan Platte. – “We're the real countries”: songs as private musical territories in the epic ro-

mances *Casablanca*, *Doctor Zhivago*, and *The English Patient* / Todd Decker. – Inverting the epic: the music of Ridley Scott's *Kingdom of Heaven* / Kirsten Yri. – The western as national epic: musical persona and narrative distance in *High Noon* / Jordan Carmalt Stokes.

Meyer, Stephen C.: Dystopia and transcendence. Tavener's music for *Children of Men*. In: *Music and the Moving Image* 13,1, 2020, S. 43–61.

Online. – Among the selections used for the score to Alfonso Cuarón's *Children of Men* are two works by John Tavener: *Eternity's Sunrise* (1997) and *Fragments of a Prayer*, written, as the composer says, “in response” “to the film. The pairing of Tavener's music with scenes of dystopian violence articulates spiritual processes of witness and grief, processes which find fulfillment in the final scene of the film. (Vorlage)

A history and analysis of film music from the silent era into the late 20th century. Music and film from many countries and styles are examined.

Michaylov, Marcus / Hindi, Mohammed / Eriksson, Edward: “More Than a Feeling”: En kvalitativ studie om hur synkronisering kan stärka en artistens varumärke. Kandidatuppsats [B.A.-Arbete], Kalmar/Växjö: Linnéuniversitetet, Institutionen för marknadsföring (MF) 2016, 68 S.; [[URL](#)].

The purpose of this study is through a quali-

tative study understand how artists and their representatives in the Swedish music industry can strengthen an artist brand by synchronizing music, and what aspects should be taken into account in the synchronization. This study is based on a qualitative research approach with a primary deductive approach, with some elements of inductive approach. These approaches of methods became obvious for us because we had an interest and desire to look more closely at the subject and going into depth. The empirical data consisted of eight people with insight and extensive experience of the swedish music industry. All the interviews were semi-structured interviews. Through our theory and literature, we have created a stability based on marketing theories, such as branding and relations. We have even used theories, which are directly collected from the music business about synchronization. Throughout our analysis and final discussion we concluded that artist must take into account many aspects of the placement of their music when synchronizing. We have referred to and discussed these aspects in the conclusions which are; Image, congruence aesthetics and capitalize the possibility. The artists brand can become stronger, if these aspects are done right.

Micheeva, Ju[lij]a V[sevolodovna]: Igra v igre: muzykal'nye stilizacii v kinematografie [Михеева, Ю[лия] В[севолодовна]: Игра в игре: музыкальные стилизации в кинематографе]. In: *Filosofia i Kultura* 11 (83), 2014, S. 1684–1689; [[URL](#)].

“Spielen Sie im Spiel: Musikstile in der Kinematographie.”

In kyrill. Schrift. – *Abstract*: Gegenstand der Forschung in diesem Artikel sind musikalische Stilisierungen in der Kinematographie am Beispiel russischer Kultfilme der 1960er bis 1980er Jahre. Die Entwicklung von Methoden, Formen und Bedeutungen der Verwendung von Musikstilisierungen in der Geschichte des Kinos wird verfolgt. Basierend auf dem hermeneutischen Konzept des Spiels enthüllt der Autor die Stilisierungsmerkmale von Dmitri Schostakowitsch, Alfred Schnittke, Sergej Kuryochin und anderen Filmkomponisten, die nicht nur den Stil des Komponisten und das Konzept des Regisseurs des

Films charakterisieren, sondern auch die ideologischen und künstlerischen Tendenzen ihrer Zeit widerspiegeln. Stilisierungen werden im Kontext des audiovisuellen Kontrapunkts, in der polysemantischen Rahmenstruktur, in der Ästhetik der visuellen Absurdität untersucht. Der Autor verwendete: die hermeneutische Methode zur Interpretation und zum Verständnis eines Kunstwerks, den historischen und kulturellen Ansatz, die Methode zur vergleichenden Analyse von Genres und Stilen der Musikkunst und des Kinos. Musikalische Stilisierungen in der Kinematographie werden erstmals auf der Grundlage des hermeneutischen Spielkonzepts sowie der hermeneutischen Konzepte des ästhetischen Gefühls, der ästhetischen Erfahrung, Interpretation, des Verständnisses und der Schaffung eines theoretischen Modells eines Kunstwerks untersucht. Das Verständnis von musikalischen Stilisierungen in einem Film als Spiel in einem Spielraum wird begründet. Die Schlussfolgerung wird über den Beginn der Globalisierung im künstlerischen Weltprozess gezogen, was sich insbesondere in der multikulturellen Natur moderner Musikstilisierungen in der Kinematographie äußert.

“Typologie der audiovisuellen Lösungen im Kino: (am Material der Spielfilme der 1950er bis 2010er Jahre). ”

In kyrill. Schrift. – *Aus der Einleitung*: Die Forschungsarbeit konzentriert sich auf audiovisuelle Lösungen im Kino im allgemeinen Kontext des Russischen und in der Westeuropäischen und nordamerikanischen Kultur von der zweiten Hälfte des 20. bis zu den ersten Jahrzehnten des 21. Jahrhunderts. Film Bild und Ton werden nicht nur als Bestandteile der klangvisuellen Synthese betrachtet, sondern auch als Ausdruckselemente und Indika-

toren verschiedener problematischer Aspekte moderner Kultur, darunter: das Verhältnis von Masse und Elite, klassische und nicht-klassische Kulturen, Assimilation von für das Eurozentrisches Modell nicht-traditionellen kulturellen Werten von anderen Ländern – ehemalige Kolonien, Fragen der Globalisierung, des Transkulturalismus und des Schutzes der nationalen Kulturen, kultureller Dialog usw.

Inhaltsverzeichnis [in dt. Übers.]: Kapitel 1. *Definition des audiovisuellen Raums des Films im künstlerischen und historischen Kontext*: – 1.1. Bildung klang-visueller Beziehungen im Raum des Stummkinos / 26 – 1.2. Die sinnlich isomorphe Art audiovisueller Lösungen im Kino: vom Stummfilm bis zu den neuesten Tonfilmen / 33 – 1.3. Audiovisueller Kontrapunkt: Die Manifestation der Klangsubjektivität / 42 – 1.4. Der Ursprung und die Entwicklung des audiovisuellen Kontrapunkts / 48 – 1.5. Die Struktur des audiovisuellen Raums eines Tonfilms. Die relativen und absoluten Aspekte des Klangs in Film / 66 – 1.6. Ästhetische Lokalisierung des Autors als Grundlage für die Typologisierung audiovisueller Lösungen im Kino / 73. – Kapitel 2. *Reflexiver Typ*: – 2.1. Ton als Methode und Reflexionsrichtung in der Intraframe-Zeit eines Films / 79 – 2.2. Existentielle Reflexion im Klang / 90 – 2.3. Filme über die "menschliche Grenze" und die klangliche Ekstase / 110 – 2.4. Spekulation in Klängen: Erfahrungen mit spirituellen Suchen und Reflexionen von Direktoren / 131 – Kapitel 3. *Phänomenologischer Typ*: – 3.1. Ideen der philosophischen Phänomenologie und der Kinotheorie / 157 – 3.2. Schallreduzierung als phänomenologisches Mittel im Kino / 162 – 3.3. Ton und Nicht-Ton als Mittel, um die Essenz eines visuellen Ereignisses zu erfassen / 185 – Kapitel 4. *Spieltyp*: – 4.1. Der Spielbegriff in der Geschichte des philosophischen Denkens und der Kultur des 20. Jahrhunderts. Die Struktur des Spielraums / 213 – 4.2 Elemente von Soundspielen im Bildschirmbereich: Musikzitate, automatische Zitate, Quasi-Zitate, Meta-Zitate, Stilisierungen / 219 – 4.3. Klangunfälle und Improvisationen / 237 – 4.4 Theatralisierung und Mystifizierung der Realität im Kino mit audiovisuellen Techniken / 244 – 4.5 Intonationsspiele im Bildschirmbereich / 267 – 4.6. Sound Ironie als die Einstellung des Autors zur Bildschirmaktion / 270 - 4.7. Audiovisuelle Collage: Kunstform, Spielaktivität, Weltanschauung des Autors /

275. – Kapitel 5. *Verfremdeter Typ*: – 5.1. Geisteszustände als Formen des gesunden Denkens und Wahrnehmens / 282 – 5.2 Klangverfremdung und meditative Klangzonen in Filmen / 288 – 5.3 Musikalischer Minimalismus als besondere Art des künstlerischen Denkens / 302 – 5.4. Musikalischer Minimalismus in der Kinematographie / 308. – Schlussfolgerung / 323. – Bibliographie / 332. – Filmographie.

Michot, Julie: *Billy Wilder et la musique d'écran: filmer l'invisible*. [Préface de Christian Viviani.] Reims: Épure, Éditions et presses universitaires de Reims 2017, 200 S. (Studia Remensis. 5.).

[R]elève le défi d'aborder Billy Wilder par le biais de la musique et nous ouvre une perspective passionnante en nous faisant réaliser à la fois l'abondance et la diversité de cette dimension dans l'œuvre du cinéaste. De plus, dans cette analyse, la musique, parce qu'elle sous-tend le dialogue et le son, devient à la fois un outil d'investigation original et un instrument de création considérable et, jusqu'ici, négligé. Car, par le biais de la musique, c'est la maîtrise chorégraphique qui est étudiée (l'hôtel-cabaret de Berlin-Est dans *Un, deux, trois*, qui culmine dans les trémoussements de Lise-lotte Pulver au son de *La Danse du sabre*; la ronde effrénée des danseurs autour de Watson dans *La Vie privée de Sherlock Holmes*) ; puis la gestion de la mécanique des corps devient naturellement celle des voix et des répliques,

voire des détails faciaux (il y a chez Wilder une chorégraphie du visage de Jack Lemmon). Bref, en un remarquable équilibre de rigueur analytique et de gourmandise cinéphile, Julie Michot célèbre un art complet, souverain, bien plus profond et complexe que ses apparences enivrantes le laissent supposer. – Entält Filmografie, Diskografie und Indexe.

Miley, Mike: David Lynch at the crossroads. Deconstructing rock, reconstructing *Wild at Heart*. In: *Music and the Moving Image* 7,3, 2014, S. 41–60.

This paper examines the use of rock music in David Lynch's *Wild at Heart* (1990) to challenge the film's reputation as a vapid mess of postmodern irony and show how the film's references to rock 'n' roll forms, iconography, and history assert a Romantic conception of art as a generative force in the American spirit.

Millard, Russell: Telling Tales: A Survey of Narratological Approaches to Music. In: *Current Musicology*, 103, Fall 2018, online.

Of the various hermeneutic approaches to the study of music developed in the last half century or so, narratological analysis has gone further than many in navigating a path that draws on both cultural and structural contexts. This overview of the development of narrative theory in music charts the course of three "waves" of narratological engagement with music: (1) the scholars of the 1980s, such as Anthony Newcomb, Susan McClary, and Patrick McCreless, whose work focused on narrative in instrumental tonal music; (2) a period of critical reappraisal of musical narrative in the 1990s by writers such as Jean-Jacques Nattiez and Carolyn Abbate; (3) the opening up of narrative theory to broader musical repertoires—e.g. film and popular music—with scholars such as Nicholas Reyland. Important strands of narrative thinking are highlighted, demonstrating the significance of balancing structural and "humanistic" approaches to the study of music through narrative, encouraging close theoretical links between cultural and analytical readings.

Minnick, Jonathan: Cyborgs and cybernetics. Electroacoustic characterization and ecology in *Forbidden Planet*, In: *Lied und populäre Kultur: Jahrbuch des Zentrums für Populäre Kultur und Musik* 64, 2019, S. 49–66.

Forbidden Planet's (1956) premiere electrified the burgeoning Sci-Fi genre, which dramatized the international exploration efforts of the Space Race, allowing audiences to witness and hear imagined cosmic landscapes. Louis and Bebe Barron's fully electronic film score, the first of its kind, sparked the imagination of generations of Sci-Fi directors, composers, and enthusiasts to come. During the early stages of the Barrons' electronic music experimentation, Louis read Norbert Wiener's *Cybernetics, or Control and Communication in the Animal and the Machine* (1948), which theorizes the relationship between human-generated mechanics and electronics and structures of animals and other beings. Rather than using the then-available synthesizers or the theremin in their orchestration, the Barrons engineered their own electronic oscillators and circuits, applying the same mathematics and schematics found in Wiener's book. This foundational connection to Wiener's inquiries encourages us to consider an ecomusicological analysis, exploring the complex relationship between the natural and the non-natural present in the soundtrack as well as the film. Although the sound machines were designed to mimic animals, their electroacoustic ties to characters both human and non-human transports the listener to a non-earth setting. The binary of these sound machines mirrors elements in the film, like the humanoid Robby the Robot and the Krell monster, a creation of Dr. Morbius's subconscious. Furthermore, *Forbidden Planet*'s reworking of Shakespeare's *The Tempest*, and numerous ecocritical readings of this play, elucidates post-colonial theories of imperialism. Themes of conquest are common in Sci-Fi movies, in which unsustainable lifestyles on Earth have forced humans to search for new planets to settle. Ecomusicology has traditionally focused on Earth-based landscapes, but my research on *Forbidden Planet* expands the boundaries to the realms of outer space. An ecological reading of the music associated with *Forbidden Planet*'s humans, non-humans, and alien landscapes demonstrates how the cyborg sound machines ani-

mate the complex elements of the forbidden planet Altair IV. From the invisible, dangerous Krell, to the harmless "Shangri-La In The Desert," this paper shows how the sound machines of the soundtrack curate a cosmic environment filled with objects and beings that exhibit the shared human/non-human binary. Miroškina, A[л'фия] F[аритовна]: Vojna i «Tri cveta vremeni žizni» (o fil'mach I. Talankina s muzykoj A. Šnitke) [Мирошкина, А[льфия] Ф[аритовна]: Война и «Три цвета времени жизни» (о фильмах И. Талянкина с музыкой А. Шнитке)]. In: *Ežekvartal'nyj recenziruemij, referiruemij naučnyj žurnal «Vestnik AGU»*, Vypusk 3 (164), 2015, S. 136–141; [[URL](#)].

"The war and «3 colors of a lifetime» (about I. Talankin's movies with A. Schnittke's music)."

In kyrill. Schrift. – Zu Schnittkes Musik für drei Filme von Igor Talankin: *Vstuplenie* (*Вступление*, *Entry* aka *Introduction*, 1963), *Dnevnye zvezdy* (*Дневные звёзды*, *Tagessterne*, 1968) und *Zvezdopad* (*Звездопад*, *Sternenregen* aka *Sternschnuppe* (DDR) aka *Wenn die Sternschnuppen fallen ...* (DDR), 1981).

Abstract: The paper deals with a kind of «war trilogy» directed by I. Talankin with the music of a composer Alfred Schnittke and, as a separate musical text, the composer partition to the following movies: «Entry», «Daytime Stars» and «Star Fall». The work identifies the basic principles how the director and the composer reveal deeply moral issues in the context of war and peace. For the first time on the basis of archival materials and unexplored partitions the composer's method of work in the movie is cleared up: the principles of monothematicism, the system of leitmotifs (leit-theme of war, fate, hope, dreams and farewell), the ratio of music in shot and behind-the-scenes and conjugations of different styles in partitions. During the analysis of movies and partitions their genre and stylistic features and the peculiarities of composition solutions are revealed. The methods and techniques of the composer developing deep psychological problems, implied realities, symphonic pairings of sharply contrasting musical images are highlighted. The importance of lyrical-psychological and tragic spheres of

music for Talankin's movies is emphasized. It was found out that music of Schnittke in the Talankin's movies is always meaningful; it gives additional information, reveals deep psychological motives and complex emotional feelings of the characters. The work of Alfred Schnittke in the cinema is shown to be important for the formation of polystylistic writing method, peculiar to master, as well as testing of many imaginative, timbre and harmonic solutions being implemented into the major or academic genres (for example, «Faustian theme»).

„Alfred Schnittkes Filmmusik: Eine Forschungserfahrung.“

Zur Filmmusik der russ.-dt. Komponisten Alfred Schnittke (Al'fred Garri'evič Šnitke, 1934–1998). – In kyrill. Schrift.

Mitchell, Helen: Against all odds: The decline and resurgence of the symphonic film score in Hollywood. In: *The Journal of Film Music* 2,2–4, 2009), S 175–200.

With the birth of sound film, the symphonic film score would begin a journey which would firmly entrench the symphonic score in Hollywood practice and parlance. On route, the symphonic film score would experience many highs and lows, reflecting changes within the film and music industries and also within society at large; changes compounded by the impact of new technologies.

Mogl, Verena: Musik in Bewegung. Mieczysław Weinbergs Kompositionen für den Film. In: *Osteuropa* 60 (2010) 7, S. 123–137.

Möller, Hartmut: Dis-sonare – Auseinanderklingen in der Musik / Dis-sonare – Sounding

apart in music. In: *Musiktherapeutische Umstau: Forschung und Praxis der Musiktherapie* 36,4 2015, S. 294–308.

Zusammenfassung: Der Dissonanzbegriff wird in allen europischen Sprachen auf das Zusammenklingen unterschiedlicher Tonhohen angewandt. Dabei fuhrt die unterschiedliche Gewichtung von physikalischen, wahrnehmungspsychologischen und esthetischen Aspekten vom Mittelalter bis heute zu unterschiedlichsten Begrundungen der Grenze zwischen konsonanten und dissonanten Zusammenklangen und der musikgeschichtlichen Rolle der Dissonanz. Seit dem 20. Jahrhundert stehen dem Selbstverstndnis der Neuen Musik, dass mit Schnbergs Emanzipation der Dissonanz die Tonalitat gestorben sei, der davon unbeeindruckte ausdrucksvolle Dissonanzgebrauch in weitgehend tonaler Pop- und Filmmusik gegenuber.

Monaghan, Terry: *Rock around the clock*. The record, the film, and the last historic dance revolt. In: *Popular Music History* 3,2, 2008, S. 123–148.

The unruly surge of enthusiastic mass dancing to rock ’n’ roll music became a defining event of 1956, a year packed with memorable political and cultural changes. Through detailed analysis of key films from *Rock Around the Clock* to *Jailhouse Rock*, this article locates 1950s rock’n’roll on the cusp between the remnants of the swing era, and the subsequent period of music industry control. After the shock administered by mid-1956 rock ’n’ roll music and mass dancing to the then prevailing racially segregated social norms, Hollywood films downplayed the role of dance and refocused creative audience interest on the “rock’n’roll” “vocal stars.”

Morat, Daniel / Ziemer, Hansjakob / Rutz, Rainer (Hrsg.): *Handbuch Sound: Geschichte –*

Begriffe – Ansätze. Stuttgart: Metzler 2018, XI, 437 S.

Überblick über Sound in den Kultur-, Geistes- und Sozialwissenschaften. Ausgehend von der Beobachtung, dass Sound ein soziales und damit auch ein historisches Phänomen ist, greifen die Autorinnen und Autoren die Vielfalt von Sound in unterschiedlichen Erscheinungs- und Darstellungsformen auf und verfolgen ihre Spuren in Geschichte und Gegenwart. Sie skizzieren methodisch-theoretische Zugänge und Begriffe der Soundforschung und gehen auf disziplinäre Perspektiven und Traditionen ebenso ein wie auf einzelne akustische Phänomene. Dabei werden spezifische Räumlichkeiten genauso berücksichtigt wie die medialen und politischen Kontexte, in denen Sound produziert und erfasst, angeeignet und genutzt wird.

Inhaltsübersicht: I. Methodisch-theoretische Zugänge – II. Begriffe – III. Disziplinäre Perspektiven – IV. Akustische Phänomene – V. Räume – VI. Medien – VII. Politik.

Morricone, Ennio / Tornatore, Giuseppe: *Ennio: un maestro*. Milano: HarperCollins 2018, 334 S.

Due amici si incontrano e discutono. Discutono del mondo e del loro lavoro, perché non sono soltanto amici, si muovono anche nello stesso universo artistico. Uno realizza cinema, l'altro realizza musiche per il cinema. È così che nascono queste pagine densissime, animate dalle domande di Giuseppe Tornatore, che riportano i suoi lunghi colloqui con Ennio Morricone. Pagine nelle quali il cinema è un tema ed è un pretesto, qualche volta in primo piano, qualche altra sullo sfondo dei loro incontri. Ne parlano, lo affrontano, lo rigirano da ogni parte per capire cosa sia stato, cosa sia oggi e che futuro abbia, lo osservano da cineasti, lo osservano da appassionati, lo osservano anche da spettatori. Intrecciano le loro

opinioni, i loro racconti, le loro sensazioni. Ogni tanto sembra che i loro ruoli si invertano. Tornatore cerca una sua musica delle immagini, Morricone una misteriosa visibilità dei suoni.

Rev. (David Clampin) in: *Contemporary British History* 31,1, March 2017, S. 136–137.

The Nazi Party stressed the superiority of Germanic culture, and the promotion of Richard Wagner and Carl Orff was central to Hitler's cultural program. In Britain, the War Office under Winston Churchill chose to promote Edward Elgar and Hubert Parry, but also to appropriate and 'de-Nazify' Ludwig van Beethoven – whose Fifth Symphony was used extensively in wartime broadcasts and has since become synonymous with VE Day. Meanwhile, the work of Ralph Vaughan Williams, whose music was commissioned by Powell and Pressburger for use in *49th Parallel*, reclaimed a particularly English past stretching back to the Tudors. A cultural history of music in wartime based on detailed archival research, *Culture and Propaganda in World War II* analyses the use of music in the work of British and German film-makers and will be essential reading for historians, musicians, film scholars and propaganda analysts.

Motazedian, Tahirih.: *To Key or Not to Key: Tonal Design in Film Music*. Diss. Ph.D. Thesis, Yale University 2016.

Dazu: *Dissertation Abstracts International* DAI-A 78/07(E).

Scholars have long been dismissive of the viability of long-range tonal organization in film music. Controversy over questions of authorial intent, aural perception and tonal memory, and the ability of a sound track to function as a cohesive "work" "have led scholars to steer clear of (or reject) the concept of tonal design in film. To date, filmic tonal design has been explored by only a few scholars in the context of a few films. Having analyzed over sixty films, my work addresses this lacuna, and establishes a systematic methodology for tonally analyzing film sound tracks. My analyses reveal overarching tonal organization and elaborate networks of harmonic relationships, in which specific keys serve explicit functions within the filmic narrative and structure. In addition to overturning prevalent assumptions about the feasibility of large-scale tonality in film, my findings foster a fascinating new level of engagement between a film's music and narrative, and challenge the sedimented notion that key is an irrelevant parameter in the study of film music. The following films will be analyzed: *The Talented Mr. Ripley* (1999), *The English Patient* (1996), *Breaking and Entering* (2006), *The Grand Budapest Hotel* (2014), *The Royal Tenenbaums* (2001), *Fantastic Mr. Fox* (2009), *Moonrise Kingdom* (2012), *The Darjeeling Limited* (2007), *Persuasion* (1995), *Emma* (1996), and *Amadeus* (1984).

Müller, Janina: *Musik im klassischen Film noir*. Würzburg: Königshausen & Neumann 2019, 276 S. (Klangfiguren. 5.).

Zuerst als Diss., Humboldt-Universität Berlin 2018.

Die Studie beleuchtet die Rolle der Musik in Hollywoodfilmen der 1940er und 1950er Jahre, die französische Filmkritiker nach dem Ende des Zweiten Weltkriegs Film noir tauften. Gegenüber dem klassischen Erzählkino prägt der Film noir eine Reihe von Besonderheiten aus. Dazu gehört seine thematische Vorliebe für die Schattenseiten zwischenmenschlicher und gesellschaftlicher Beziehungen, der Einsatz von subjektivierten Erzählverfahren und eine expressive Raumgestaltung. Seine Musik, die mit Komponisten wie Miklós Rózsa, Roy Webb, George Antheil, Adolph Deutsch, Max Steiner und Henry Mancini verbunden ist, greift sowohl harmonische Stilmittel aus dem Epochenfeld zwischen Spätromantik, Impressionismus und Moderne als auch Einflüsse der populären Musik und des Jazz auf. Das stereotyp Bild von Hollywoods Filmmusik der „goldenen Ära“ als einer spätromantisch verhafteten Praxis ist mit Blick auf diesen stilistischen Eklektizismus revisionsbedürftig. Hier setzt die Arbeit an, um auf der Basis von film-musikalischen Quellenstudien einen Einblick in die facettenreiche musikalische Charakteristik des Film noir zu geben. Im Fokus steht eine Auswahl von filmgeschichtlich ausgezeichneten Produktionen, darunter John Hustons *The Maltese Falcon* (1941), Howard Hawks' *The Big Sleep* (1946), Robert Siodmaks *The Killers* (1946) und Nicholas Rays *In a Lonely Place* (1950) bis hin zu Billy Wilders Hollywoodsatire *Sunset Boulevard* (1950) und Orson Welles' *Touch of Evil* (1958).

Müller, Janina / Plebuch, Tobias: Decomposing heroism. Rolf Wilhelm's music for *Radetzky-marsch* (1965). In: *Music, Collective Memory, Trauma, and Nostalgia in European Cinema After the Second World War*. New York: Routledge 2020, S. 209–234.

In 1965, Joseph Roth's famous novel *Radet-*

zkymarsch (1932) was adapted for the screen with an original score by Rolf Wilhelm. Compared to escapist monarchy films from the 1950s, *Radetzky-marsch* shifts the perspective to the dark sides of the Habsburg era. In-depth analysis of the autograph score demonstrates a similar tendency of the music. A progressive decay of the march determines its Mahlerian trajectory *per astra ad inferi*. Wilhelm employs a variety of traditional and modernist techniques including plain quotations, subtle allusions, caricature, fragmentation, rhythmic manipulation, and cluster chords. His music thus exhibits an anti-sublime attitude in accord with prevalent post-war sentiments in Austria and Germany. (Vorlage)

Münzmay, Andreas: Bird, Blues, Broadway. Gestalt und Funktion der Musik in *Shadows* von John Cassavetes. In: Willem Strank/Claus Tieber (Hg.): *Jazz im Film: Beiträge zu Geschichte und Theorie eines intermedialen Phänomens*. Wien/Berlin: Lit 2014, S. 133–158.

John Cassavetes' *Shadows* (USA 1959) mit dem von Charles Mingus' Jazz Workshop eingespielten Soundtrack gilt als Paradigma des improvisierten Films. Eine differenziertere Lektüre gerade auch der musikalischen Komponente des Films ergibt eine präzisere Bestimmung des Verhältnisses von Improvisation zu kompositorischen Verfahrensschritten wie Materialauswahl, Arrangement, Schnitt und Synchronisation. Erarbeitet wird – nicht zuletzt mit höranalytischen Verfahren – ein Gesamtüberblick über die Verwendung von Musik in *Shadows*. Davon ausgehend zielen die beiden zentralen Fragen des Beitrages auf das künstlerische Handeln, die künstlerischen Entscheidungen von Cassavetes und Mingus: Welche Musik kommt zum Einsatz? In welcher Weise kommt Musik zum Einsatz? Zitathafte Verbindungen ergeben sich zu verschiedenen kulturellen Ausdrucksformen wie Rock'n'Roll (Elvis Presley), Bebop (Charlie Parker), Blues (Earl Hines/Billie Eckstine), Musical und Film (*The Ziegfeld Follies*, USA 1936); so dass die insgesamt 21 verschiedenen Musiken, die an 37 Stellen im Film eingesetzt werden, jeweils in beredter Weise unmittelbar mit Inhalt und Bildlichkeit des Films interagieren. In drei nach phänomenologischen Kriterien unterschiedenen Durchgängen wird die gesamte *Shadows*-Musik in den Blick genommen: solistische Jazzimprovisation; Ensemblearrangements aus der Feder von Charles Mingus; zitierte Musik. Zu lesen sind Film und Musik nicht zuletzt als emphatisches Statement für eine gegenseitige Öffnung afroamerikanischer und weißer populärer (Musik-)Kulturen. (Autor)

Murphy, Scott: The Major Tritone Progression in Recent Hollywood Science Fiction Films. In: *Music Theory Online (MTO)* 12,2, 2006, [[URL](#)].

In the 2002 film *Treasure Planet*, composer James Newton Howard accompanies the pri-

mary shot of the titular orb with an undulation between two major triads a tritone apart. I offer three approaches to understanding the appropriateness of this image/music pairing. First, I present several scenes from recent Hollywood films that conspicuously combine this triadic progression with settings of, or objects from, outer space. Second, I relay ways in which the intrinsic harmonic and voice-leading characteristics of this triadic progression invoke the concepts of great distance, ambiguity, and unfamiliarity. Third, I conclude with a more thorough study of Howard's harmonic language in the score for *Treasure Planet*, suggesting that this progression and the scene it accompanies represents the culmination of musical and visual/narrative processes, respectively.

Nagari, Benjamin: *Music as Image: Analytical Psychology and Music in Film*. London/New York: Routledge 2016, xix, 157 S.

Through a theoretical and practical exploration of Jungian and post-Jungian concepts surrounding image, this book moves beyond the visual scope of imagery to consider the presence and expression of music and sound, as well as how the psyche encounters expanded images – archetypal, personal or cultural – on both conscious and unconscious levels. By closely examining music in film, Nagari considers music's complementary, en-

hancing, meaningful, and sometimes disruptive, contribution to expressive images. Chapters present a Jungian approach to music in film, highlighting how ‘music-image’ functions both independently and in conjunction with the visual image, and suggesting further directions in areas of research including music therapy and autism. Divided into three cumulative parts, Part I explores the Jungian psychological account of the music-image; Part II combines theory with practice in analysing how the auditory image works with the visual to create the ‘film as a whole’ experience; and Part III implements a specific understanding of three individual film cases of different genres, eras and styles as psychologically scrutinised ‘case histories’.

Nagato, Yōhei: *Eiga onkyōron: Mizoguchi Kenji kiga o kiku* [長門洋平: 映画音響論: 溝口健二映画を聴く]. Tōkyō: Misuzu Shobō 2014, vi, 391, 19 S.

[„Theorie des Filmtons: Kenji Mizoguchis Filme hören“.]

In japan. Schrift. – Kenji Mizoguchi (1898–1956) war kreativ in einer Vielzahl von Genres, Stilen und Technologien, einschließlich Pionierversuchen zu Beginn der Talkies und seiner Beschäftigung mit neuer und zeitgenössischer Avantgarde-Kunst. Analysiert wird die Klangerzeugung in japanischen Filmen vom frühen Talkie bis zum goldenen Zeitalter der 1950er Jahre. In diesem Buch wird die Nützlichkeit von Ton in Mizoguchis Filmen in Bezug auf Bilder und Geschichten betrachtet. Darüber hinaus wird die Klangerzeugung im Produktionsprozess anhand der Partitur und des Manuskripts des Komponisten selbst analysiert. Wichtige Literatur zum Filmklang wird eingeführt. Es ergibt sich ein theoretischen Rahmen für die Analyse von Filmen von der auditorischen Seite her, der eine Methodik bietet, die von Experten auf verschiedenen Gebieten wie der audiovisuellen Kultur und der Medienforschung verwendet werden kann. Im Anhang ein langes Interview mit Iwao Otani, dem verantwortlichen Toningenieur für alle Mizoguchi-Filme, die in den 1950er Jahren in Daiei Kyoto produziert wurden. Mit sorgfältigen Analysen von *Tokyo Symphony*, *Furusato*, *Elegie in Naniwa*, *Erzählung von den späten Chrysanthemen*, *Die*

Legende vom Meister der Rollbilder und *Die Straße der Schande*. Es wird eine filmakustische Theorie entwickelt, die nicht nur Filmmacher und Musikwissenschaftler einbezieht, sondern auch technologische, geschlechtsspezifische und postkoloniale theoretische Perspektiven umfasst.

Inhalt: 1. Tonorte – Grundlegende Gedanken zur Klassifizierung von Filmtönen. – 2. *Tōkyō kōshinkyoku* [*Tokyo Symphony* aka *Tokyo March*] (1929) – Versuch eines Talkie. – 3. *Furusato* (1930) – die Morgendämmerung der Talkie-Ära. – 4. *Naniwa erejī* [*Elegie in Naniwa* aka *Osaka Elegy*] (1936) – das Fehlen von Begleitmusik und der Realismus. – 5. *Zangiku monogatari* [*Erzählung von den späten Chrysanthemen*] (1939) – Stimme, Stille, Phantoms Geschichte. – 6. *Chikamatsu monogatari* [*Die Legende vom Meister der Rollbilder* aka *Eine Erzählung nach Chikamatsu*] (1954) – Die Ästhetik der „unvollständigen“ Musik. – 7. *Akases chitai* [*Die Straße der Schande*] (1956) – Nachkriegs- und zeitgenössische Musik im japanischen Film.

Neumeyer, David: *Meaning and Interpretation of Music in Cinema*. With contributions by James Buhler. Bloomington: Indiana University Press 2015, xv 317 S. (Musical Meaning and Interpretation.).

By exploring the relationship between music and the moving image in film narrative, David Neumeyer shows that film music is not conceptually separate from sound or dialogue, but that all three are manipulated and continually interact in the larger acoustical world of the sound track. In a medium in which the image has traditionally trumped sound, Neumeyer turns our attention to the voice as the mechanism through which narrative (dialog, speech) and sound (sound effects, music) come together. Complemented by music examples, illustrations, and contributions by James Buhler, *Meaning and Interpretation of Music in Cinema* is the capstone of Neumeyer's 25-year project in the analysis and interpretation of music in film.

Inhalt: Part 1: Meaning and interpretation – Music in the vococentric cinema – Tools for analysis and interpretation. – Part 2: Music in the mix: Casablanca – Acoustic stylization: the film's sound world – Music and utopia: a reading of the reunion scene – The reunion scene's contexts. – Part 3: Topics and tropes: two preludes by Bach Performers onscreen – Underscore four studies of the C major prelude.

O'Brien, Charles: *Movies, Songs, and Electric Sound: Transatlantic Trends*. Bloomington: Indiana University Press 2019, xi, 212 S.

How did the introduction of recorded music affect the production, viewing experience, and global export of movies? In *Movies, Songs, and Electric Sound*, Charles O'Brien examines American and European musical films created circa 1930, when the world's sound-equipped theaters screened movies featuring recorded songs and filmmakers in the United States and Europe struggled to meet the artistic and technical challenges of sound production and distribution. The presence of singers in films exerted special pressures on film technique, lending a distinct look and sound to the films'

musical sequences. Rather than advancing a film's plot, songs in these films were staged, filmed, and cut to facilitate the singer's engagement with her or his public. Through an examination of the export market for sound films in the early 1930s, when German and American companies used musical films as a vehicle for competing to control the world film trade, this book delineates a new transnational context for understanding the Hollywood musical. Combining archival research with the cinematric analysis of hundreds of American, German, French, and British films made between 1927 and 1934, O'Brien provides the historical context necessary for making sense of the aesthetic impact of changes in film technology from the past to the present.

O'Meara, Jennifer: Character as DJ: Melomania and Diegetically Controlled Music. In: *The New Soundtrack* 5,2, 2015, S. 133–151.

Despite a wealth of literature on the narrative and emotional implications of film music, little has been written on the relationship between musical choices and characterisation. When character is discussed in relation to music, the focus tends to be on how directors and sound designers use non-diegetic music – either a score or pre-existing songs – to comment on a character's psyche. This article considers possible implications of, and benefits to, characters shown to choose and play music for themselves. In Auteur Music, Claudia Gorbman uses the term *mélomane* to describe 'music-loving directors' who treat music 'as a key thematic element and a marker of authorial style' (2007: 149). Just as Gorbman suggests that melomania allows an auteur to express individuality through musical choices, I argue for the significance of character melomania in granting these fictional constructs individuality through music. As can be demonstrated through a series of case studies from the films of – among others – Sofia Coppola, Hal Hartley and Jim Jarmusch, this trend for a character to serve as DJ is particularly strong in American independent cinema. Through engagement with theories of character construction and identification (Dyer 1998; Smith 1995), as well as literature on indie cinema as character rather than plot-based (King 2005; Newman 2011), this article reveals

diegetically controlled music to be an important tool for the development of, and audience identification with, characters. The technique is also connected to selected findings from socio-musicology, whereby character DJs can be seen to represent the way that, in everyday life, individuals use music to develop their social identity.

Ovsyannikova-Trell, Aleksandra: Film Music in the Works of Contemporary Ukrainian Composers. In: *Visnyk Natsionalnoi akademii kerivnykh kadryv kultury i mystetstv* [Kyiv] 2, 2016, S. 91–94; [[URL](#)].

Abstract: The purpose of the article. The research is related to the study of film music of contemporary Ukrainian composers. It is a specific genre layer in Ukrainian music culture of today. The author tries to define the problem field of cultural studies of film music of Ukrainian composers and identify some aspects of its understanding (film music as a sound reality of culture, communicative function of music and sound image, etc.). Research methodology lies in the use of comparative methodological principles as well as system and musical-historical methods. The above methodological approach allows to study the applied (by its origin) composing sphere in perspective of representation of contemporary culture and reveal national and cultural identity of film music of Ukrainian composers. The scientific novelty of this study consists in the expansion of notions of the "secondary" field of Ukrainian composers' works, which is a significant part of our culture and often reflects the major trends of its development. "Music for Films" is a constant of the works of Ukrainian authors, but this issue has not yet become the subject of a special scientific discussion. Conclusions. Film music of Ukrainian composers of the second half of the XX century and today represents a specific phenomenon, characterized by heterogeneity of functional and stylistic manifestations. If, in some cases, music created for a film, is only a special case of manifestation of

the creative talent of the composer (as Boris Liashynsky, Miroslav Skoryk, Valentin Silvestrov), in others – we are dealing with real experts in this area, whose works in their bulk are connected to the “production” of music for films (Vladimir Guba, Oleg Kiva).

Ozsvárt, Viktória: Interactions between symphonies and film music in the œuvre of László Lajtha. In: *Studia musicologica: An International Journal of Musicology* 58,2, 2017, S. 239–253.

In the case of Hungarian composer and ethnomusicologist László Lajtha (1892–1963) discovering the manifold potentials in a symphonic orchestra linked strongly with the composition of works for stage and screen. Nevertheless, it clearly makes sense to examine the long-term relations Lajtha had with the film as a genre, by searching for common features in the structure of his music composed for films and his symphonies. Much of the musical material in Lajtha’s Third Symphony is similar to those he used in his 1948 film music for *Murder in the Cathedral*. The similarity gains more complexity if one takes into consideration that the Third Symphony was marked by the composer as the starting point in a monumental, five-fold symphonic cycle composed through the 1950s. The article makes an attempt to explore the thematic and motivic relationship between the Third Symphony, the Variations and the film score *Murder in the Cathedral* by analysing the musical material and the structure, and by searching for correlation between the audible and visual effects of the music Lajtha used in the movie scenes. This kind of examination may offer a new perspective on the sources of inspiration that shaped Lajtha’s workmanship and it also gives some important information about his way of thinking about music.

In: *Music, Sound, and the Moving Image* 9,2, 2015 (Special Issue: “Musical Screens: Musical Inventions, Digital Transitions, Cultural Critique”. Guest ed.: James Tobias), S. 177–190.

Recent cinema music scholarship has demonstrated that the correspondence between commercial music production and Hollywood filmmaking has rarely operated according to a stable or fixed formula, but has instead taken place as an ever-shifting negotiation between media industries. Through a case study that examines the production histories and promotional efforts of Elvis Presley’s first two films, this essay builds upon existing scholarship to propose a political economy of film music stardom as a means to historicise the intersections between media industries. By applying the methodologies and concepts of comparative media studies to a history of postwar Hollywood that found itself challenged by a proliferation of ‘new’ media, particularly in the emergence of a youth-oriented consumer culture and the increasingly popular competing screen of television, this article demonstrates how transmedia stardom indexes the ways in which production cultures have understood the development of media industries and commodities in relation to one another.

Diss. Paderborn: Universität Paderborn 2016. Die Verbindung von Handlung und Musik ist ein zentrales Merkmal in Oper, Film und anderen theatralen Formen. Doch welche Funktionen erfüllt die Musik für die Handlung? Mit welchem Zweck wird sie eingesetzt und von wem? Ist sie Ausdruck der Gefühle der Figuren oder ein Kommentar des Komponisten ans Publikum? «Hören» die Figuren selbst die Musik? Antworten auf diese Fragen sam-melt die Autorin aus allen relevanten Fachge-bieten und nutzt die Betrachtung von Leitmo-tivik, Kommunikationsmodellen, Theaterse-miotik, Schauspielmusik und Filmmusik zur Entwicklung eines eigenen umfassenden und für alle musiktheatralen Gattungen gültigen Funktionssystems. In Beispielen aus Werken Albert Lortzings zeigt sich paradigmatisch das virtuose Spiel des Komponisten mit den unterschiedlichen Funktionen der Musik.

Phillipot, Michel: 'Musique à ne pas voir'. In: *Vibrations*, 4, 1987, S. 58–64.

Phinney, Nicole Dawn: *The Influence of Music in Transportation and Character Identification*.

Diss., Santa Barbara, CA: Fielding Graduate University 2017.

This paper seeks to answer if music has an influence on the level of transportation and character identification in a fictional narrative. Two groups were asked to watch nine videos each and rate the level of transportation (how invested in the narrative they were) and the level of character identification, including if they wished to watch more of the film. It was found that music as an emotional variant produced significant results in both levels of transportation and character identification. Significant results were found in both between-group and pairwise comparison. Furthermore, when gender was examined as a condition, it was found that music as an emotional valance had a significant impact in some, but not all, videos. One video in particular, *Vanilla Sky*, produced significant results in gender, independent from music as an emotional variant.

Piccardi, Carlo / Anderson, Gillian B. / Bagnoli, Lidia: Pierrot at the cinema. The musical common denominator from pantomime to film, pt. 2. In: *Music and the Moving Image* 2,2, 2009, S. 7–23.

Having noted similar theoretical issues and challenges in the setting of music for pantomime and for film, Carlo Piccardi collected an exhaustive list of early theoretical comments, reactions, and descriptions about the issue. In part I, in *Music and the Moving Image*, volume 1, number 2, extensive quotes by Jacques de Baroncelli, Paul Huguonet, Alice Orient, Jeanne Ronsay, and Émile Jaques-Dalcroze (among many others) demonstrated the similarities between the development of music for pantomime and that for dance and cinema, and cinema music's connection to the futurist movement. In part II, we have observations and ruminations by Ricciotto Canudo and Sebastiano Arturo Luciani. It is astonishing to read comments written almost a hundred years ago that reflect on issues that are still very much with us today. (Vorlage)

Piegler, Theo / Konrad Heiland (Hrsg.): *Der Soundtrack unserer Träume: Filmmusik und Psychoanalyse*. Gießen: Psychosozial-Verlag 2013,

271 S.

Erst in den letzten Jahrzehnten begann die psychoanalytische Auseinandersetzung mit Film und Musik. Insbesondere Soundtracks von Filmen wurde bisher wenig Beachtung geschenkt. Dabei ist die Gestaltung der Tonspur wesentlich für die emotionale und ästhetische Wirkung eines Films. Im vorliegenden Band untersuchen renommierte Musikwissenschaftler und Psychoanalytiker Filmmusik von ihrer Komposition über deren Wirkung – auch der von Stille oder Geräuschen – bis hin zu ihrer Rezeption im Rahmen des audiovisuellen Gesamtkunstwerks. Zur Veranschaulichung werden zahlreiche Filmbeispiele, wie Disneys *Fantasia* (1940), *The Shining* (1980) oder *The Artist* (2011), herangezogen.

Pilewski, Marcelo: Film music. Interactive audio-visual approaches. In: *Min-Ad: Israel Studies in Musicology Online* (Ramat-Gan: Bar-Ilan University) 15, 2018, S. 228–239.

This work deals with the analysis and composition of film music. After presenting the principal approaches in musical multimedia research, the work proposes a general music analysis tool that considers extra-musical aspects of a movie. The tool examines film-music from points of view related to the narrative of the film. It presents categories that point to functions of the music in an audio-visual context. The categories are non-exclusive. Each film requires the selection of the categories for analysis which are relevant to it. The goal is to avoid granting superiority to the visual plane, and to remark the analog influence of the two channels, sound and image, on the creation of the meaning. Afterwards, a few ideas for the application of the tool in learning music composition will be suggested.

Platte, Nathan R.: *Musical Collaboration in the Films of David O. Selznick, 1932–1957*. Diss., University of Michigan, Ann Arbor 2010, xvii, 486 S.; [URL].

Abstract: This dissertation investigates the collaborative process of film scoring as practiced in the films of David O. Selznick, a producer whose close attention to music distinguished him from Hollywood competitors. Drawing from extensive archival research, I examine the producer’s memos, composers’ scores, and various correspondences to trace streams of influence that shaped the musical rhetoric of Selznick’s most significant films. Close study reveals that interpretive arguments concerning these films are best grounded in a thorough knowledge of the film scores’ collaborative construction. Rather than depicting Selznick as a producer-auteur who merely imposed his ideas on composers, this dissertation views the scores from his films as sites of artistic contestation in which musical decisions made before, during, and after composition alternately reflect instances of negotiation and resistance. Selznick’s collaboration with composers Miklós Rózsa, Max Steiner, Dimitri Tiomkin, and Franz Waxman forms the centerpiece of this study, with select scores receiving special emphasis. Analysis of *King Kong* (1933), *The Young in Heart* (1938), *Gone with the Wind* (1939), and *Rebecca* (1940) shows Selznick’s growing involvement in the film scoring process and

also highlights the savvy mediation of composers and music directors. Inspection of *Symphony of Six Million* (1932), *Little Lord Fauntleroy* (1936), and *Since You Went Away* (1944) further reveals Selznick's indebtedness to musical practices of the silent cinema. The scores for *Spellbound* (1945), *The Paradise Case* (1947), and *Portrait of Jennie* (1948) bear intricate collaborative tensions—often involving director Alfred Hitchcock—and receive a chapter each, allowing ample space to explore the aesthetic controversies surrounding each score's production, promotion, and reception. In these chapters theoretical concerns, such as the relationship between music, subjectivity, and gender, gain nuance when set against the backdrop of creative collaboration. By considering issues of authorship and artistic control, this dissertation demonstrates that the scores for Selznick's films convey a dense polyphony of ideas, revisions, and interpolations effected by composers, music editors, directors, and producer. Scrutiny of these scores and the process of their construction illuminates rarely glimpsed facets of film music production, encouraging the scholar to reconsider the social dynamics that constitute artistic collaboration in multimedia.

Platte, Nathan [R.]: *Making Music in Selznick's Hollywood*. New York: Oxford University Press 2019, ix, 398 S. (The Oxford Music/Media Series.).

Through the rise and fall of the Hollywood studio system, David O. Selznick reigned as Hollywood's preeminent producer. His reputation depended in large part on music. The orchestral cacophony of *King Kong*, the pulsing electronic sonorities of *Spellbound*, and the Tara theme from *Gone with the Wind* made music a distinguishing feature of the Selznick experience. By flaunting music's role in film and overseeing its distribution through sheet music, concerts, radio broadcasts, and soundtrack albums, Selznick cultivated a fascination with film scores. But he did not do it alone. In *Making Music in Selznick's Hollywood*, Nathan Platte brings to light the men and women whose work sounds throughout Selznick's many films. The cast includes familiar composers like Max Steiner, Franz Waxman, and Dimitri Tiomkin, but extends to overlooked contributors, including music editor Audray Granville, orchestrator Hugo Friedhofer, harpist Louise Klos, choral director Jester Hairston, publicist Ted Wick, and many others. Novelists, studio writers, and directors like Alfred Hitchcock also influenced the soundscapes of Selznick's films. Whether working with the producer directly or managing his presence from a distance, all had to reckon with Selznick's musical preoccupations. Rarely was it easy. Rewritten scores, fired personnel, and other skirmishes reflect the troubles-and uneven compromises-that shaped music for films like *Gone with the Wind*, *Duel in the Sun*, and *Rebecca*.

Plebuch, Tobias: Der dunkle Spiegel. Bachs Musik in den Filmen Ingmar Bergmans. In: *Johann Sebastian Bach und die Gegenwart: Beiträge zur Bach-Rezeption 1945–2005*. Hrsg. v. Michael Heinemann u. Hans-Joachim Hinrichsen in Zusammenarb. mit Andreas Krause. Köln: Dohr 2007, S. 167–199.

Bergman verwendet in zwölf seiner Filme Kompositionen Bachs, fast ausschließlich langsame Instrumentalsätze. Vor dem Hintergrund der Vielzahl an Filmen mit Bachscher Musik werden am Beispiel von Bergmans Filmen Szenen mit Bachs Musik analysiert und wiederkehrende Konstellationen von Problemen und Personen bestimmt. Der Analyse des frühesten Beispiels (*Wilde Erdbeeren [Smultronstället]*, 1957) folgt zunächst die Untersuchung derjenigen Filme, in denen die Musik Momente der Hoffnung und Heilung ausdrückt (*Wie in einem dunklen Spiegel [Sasom i en spegel]*, 1961, *Das Schweigen [Tystnaden]*, 1963, *Ach, diese Frauen [För att inte tala om alla dessa Kvinnor]*, 1963, *Persona*, 1966, *Schreie und Flüstern [Viskningar ich rop]*, 1972), *Herbstsonate [Höstsonaten]*, 1978, *Sarabande*, 2003), anschließend folgen diejenigen Szenen, in denen Momente der Angst und Bedrohung musikalisch umgesetzt werden (*Die Stunde des Wolfes [Varstimmen]*, 1968, *Schande [Skammen]*, 1968, *Passion [En Passion]*, 1969, *Fanny und Alexander*, 1982). Im Vergleich der behandelten Szenen werden drei Thesen herausgearbeitet: 1. Bergman vollzieht mit Bachs Musik einen moralisch und ästhetisch prekären Balanceakt in Bezug auf Sentimentalität; 2. Filmszenen mit Bachscher Musik rücken bei Bergman ein existentielles Problem, einen Krisenmoment in den Vordergrund; 3. Vergleichbare Charakterkonstellationen prägen diese Szenen. – Trotz unterschiedlicher Handlungsdetails werden eine unverwechselbare Handschrift und ähnliche Rollenkonstellationen, Grundstimmungen und handlungstreibende Probleme erkennbar: Bach erklingt häufig in (latent) religiösen Situationen, in denen die Kommunikation zwischen Familienmitgliedern zutiefst gestört ist. Gleichwohl geht von der Musik meist eine heilende, Hoffnung verleihende oder Trost spendende Kraft aus. (Beatrix Obal)

Pokorny, Johannes: *Stilmittel und Kompositionstechniken zur Suggestion von Emotionen im Film: Dargestellt anhand von „Inception“ und „The Curious Case of Benjamin Button“*. Masterarbeit, Wien: Universität Wien. Philologisch-Kulturwissenschaftliche Fakultät 2014, 131 S.; [\[URL\]](#).

Zusammenfassung: Die Filmmusik ist oftmals mit dem Vorurteil konfrontiert, lediglich begleitende Funktionen des Bildes zu übernehmen, und wird fernab jeglicher Kunstmusik kategorisiert. In der vorliegenden Arbeit wird diesem Vorurteil durch genaue Szenenanalyse sowie Sequenzprotokolle zu den Filmen *Inception* und *The Curious Case of Benjamin Button* nachgegangen. Untersucht wird dabei der in der Handlung sowie in den Szenen anhand von Kompositionstechniken. Im Vergleich der Kompositionen von Hans Zimmer und Alexandre Desplat wird an einigen Beispielen bewiesen, dass der Filmmusikkomponist als Teil eines Produktionsteams eines Films seine kreativen Ideen mit bestimmten Techniken in seinen Kompositionen entwickeln kann. Es zeigt sich, dass der Komponist jedes Mal aufs Neue vor einer komplexen Aufgabe steht, diese mit seinem Ideenreich-

tum und handwerklichen Geschick bewältigt und eine zum Bild korrelierenden Filmmusikkomposition schafft.

Pontara, Tobias: *Andrei Tarkovsky’s Sounding Cinema: Music and Meaning from “Solaris” to “The Sacrifice”*. New York/London: Routledge 2020, xi, 193 S. (Music and Sound on the International Screen.).

Abstract: Andrei Tarkovsky’s Sounding Cinema adds a new dimension to our understanding and appreciation of the work of Russian director Andrei Tarkovsky (1932–1986) through an exploration of the presence of music and sound in his films. The first comprehensive study in English concentrating on the soundtrack in Tarkovsky’s cinema, this book reveals how Tarkovsky’s use of electronic music, electronically manipulated sound, traditional folk songs and fragments of canonized works of Western art music plays into the philosophical, existential and ethical themes recurring throughout his work. Exploring the multilayered relationship between music, sound, film image and narrative space, Pontara provides penetrating and innovative close readings of *Solaris* (1972), *Mirror* (1975),

Stalker (1979), *Nostalghia* (1983) and *The Sacrifice* (1986) and in turn deeply enriches critical understanding of Tarkovsky’s films and their relation to the broader traditions of European art cinema. An excellent resource for scholars, researchers and students interested in European art cinema and the role of music in film, as well as for film aficionados interested in Tarkovsky’s work.

This article considers the early development of the opera film and focuses on the final few opera films made in France – *Boris Godounov* (Andrzej Zulawski, 1989), *Madame Butterfly* (Frédéric Mitterrand, 1995) and *Tosca* (Benoît Jacquot, 2001) – placing them in the context of the challenges faced by the subgenre.

Priewe, Marc: The Power of Conformity: Music, Sound, and Vision in *Back to the Future*. In: *European Journal of American Studies* 12,4, 2017, [[URL](#)].

This essay investigates the aesthetic and political functions of the choice and placement of music in *Back to the Future* (1985; dir. Robert Zemeckis). After an overview of the movie's cultural contexts, the focus shifts to the interplays between sound and cinematic mise-en-scène, with a particular emphasis on popular music. I argue that the film employs music strategically in order to convey a nostalgic view of American culture and society in the 1950s by including certain songs and excluding others, as well as by a score that is deeply rooted in the traditions of Hollywood film music. The intermedial use and remediation of music not only amplifies the movie's quasi-philosophical treatment of time and history in intricate ways, it also resonates with the contemporary sense of American exceptionalism.

Prock, Stephan: Strange voices. Subjectivity and gender in *Forbidden Planet*'s soundscape of tomorrow. In: *Journal of the Society for American Music* 8,3, 2014, S. 371–400.

As the first Hollywood film to employ an all-electronic score, *Forbidden Planet* (1956) helped cement the association of science-fiction films with electronically produced sounds and music. While sounds lacking real-world referents were crucial for representing sonically the nature of fantastic objects and beings, Louis and Bebe Barron's soundscape also had to serve the more conventional musical demands of narrative cinema where music sets mood and atmosphere and creates the illusion of character subjectivity. This double function of their 'electronic tonalities', however, en-

gendered a strange ambiguity in the film's sonic ontology. In this article, I examine how the practical and aesthetic issues arising from this ambiguity forced the Barrons to confront in their score a complex of intertwined musical and cultural messages: how electronic music evokes notions of the exotic Other; how conceptions of vocality and embodiment in their music intersect with other visual and narrative elements to illuminate a gendered divide among envoiced bodies in the film; and how music in the film evolves to illustrate and posit a threat to the male body and, thus, masculinity itself – only in order, ultimately, to restore and reassert conventional patriarchy and the primacy of male subjectivity. As I argue, by using modernist methods and materials to serve a conventionally populist representational form, the Barrons effectively exposed some of the deep underlying tensions and contradictions within modernism itself, even while revisioning fundamental aspects of the Hollywood film score.

Purcell, Fernando / González, Juan Pablo: Amenizar, sincronizar, signicar: Música y cine silente en Chile, 1910–1930. In: *Latin American Music Review* 35,1, Spring/Summer 2014, S. 88–114; [[URL](#)].

This article deals with discussions and debates about the relationship between music and silent cinema in Chile. During the 1910s and 1920s music altered cinema's functionality. It shifted from the role of enlivening cinematic spectacles to a more complex one in which the challenge was synchronizing the content of images with appropriate music. The analysis here makes clear that this was part of a global phenomenon that included Chile. This becomes evident through analysis of Erno Rapée's 1924 compilation that synthesized cinematic musical practices that are possible to trace not just in the United States but in different Chilean cities.

Rabenalt, Robert: *Musikdramaturgie im Film: Wie Filmmusik Erzählformen und Filmwirkung beeinflusst*. München: edition text + kritik 2020, 420 S.

Die auditive Gestaltung im Kino lädt zum aufmerksamen Zuhören ein, um eine Geschichte interessant und unterhaltsam zu erzählen. Musik im Film ist ein dramaturgisches Mittel und beeinflusst dabei sowohl Form als auch Wirkung des Films. Der schillernde Begriff „Dramaturgie“, der sich stets zwischen Theorie und Praxis behaupten muss, erfährt in diesem Buch eine für die Beschäftigung mit Filmmusik notwendige Konkretisierung. – Mit zahlreichen Beispielen und auf unterschiedlichen Wegen der Filmmusikanalyse, die vom Allgemeinen zum filmmusikalischen Detail führen oder umgekehrt von einem Teilmoment ausgehen und auf dessen Bedeutung für das Ganze schließen lassen, werden Grundformen und Ausnahmen des filmischen Erzählens thematisiert und die Rolle, die der Filmmusik dabei zukommt, illustriert. – Mit Blick auf das Verwenden und Komponieren von Musik sowie auf deren Wahrnehmung im Kontext einer Geschichte wird die oft benannte, aber bisher weder ausführlich noch systematisch untersuchte Bedeutung der Dramaturgie von Grund auf überdacht. – Das dramaturgisch Verbindende der verschiedenen eingenommenen Perspektiven, die Querverbindungen zwischen Musiktheorie, filmischer Montage, Erzählformen und Filmrezeption führen schließlich zu einem neuen, auf die dramaturgische Wirkungsweise von Musik spezialisierten Modell der auditiven Ebenen im Film. In Verbindung mit einer Systematik von dramaturgisch wirksamen Musik-Bild-Kopplungen und dem Konzept vom Fabelzu-

sammenhang der Filmmusik wird ein universelles und zeitgemäßes Analysemodell für Filmmusik offeriert, das sich auch über die besprochenen Genres und Formen hinaus anwenden lässt. Ein ausführliches Glossar schließt das Buch ab, das damit für Medienschaffende und Forschende gleichermaßen von Interesse sein wird.

Inhalt: Einleitung. – Teil I: *Grundlagen und interdisziplinäre Umgebung:* – 1. Rainer, Svenja Maria: *Emotionsinduktion durch Stummfilmmusik*. Masterarbeit, Wien: Universität Wien, Philologisch-Kulturwissenschaftliche Fakultät 2017, 82 S.; [[URL](#)].

Zusammenfassung: Generell hat sich in der vorliegenden Arbeit gezeigt, dass Musik jedenfalls emotionsverstärkend wirkt, auch wenn sie zumeist nicht als Induktor jener im Alleingang fungiert und somit vor allem auf künstlerischer Ebene ein wichtiger Teil des

Gesamtkunstwerkes Film ist. Dass die Stummfilmmusik zu Beginn aus rein pragmatischen Gründen genutzt wurde, schafft eine grundsätzliche Abhängigkeit des Films von musikalischer Begleitung. Allerdings zeigte sich schon bei der frühen Nutzung dieser Funktion eine Bedeutung für die emotionelle Ebene des Filmerlebens durch Realitätsschaffung mit „Ich-Nähe“ der Zuschauers(-hörers). In der parallelen Entwicklung von Film und Musik zeigte sich außerdem, dass von den Film- und Musikschauffenden bewusst auf kompositorische Elemente zur Emotionsinduktion zurückgegriffen wurde. (Aus dem letzten Abschnitt).

Deux notes suffisent parfois pour suggérer l’angoisse ... Il n’est pas rare non plus que des trompettes se mêlent aux vaisseaux spatiaux dans le vide sidéral d’une galaxie lointaine ... L’histoire de la musique de film a débuté dès l’apparition du cinéma. Même muet, il a toujours été sonore! Comment est née la musique de *Star Wars*? Quels blockbusters ont permis à Hans Zimmer d’imposer sa marque de fabrique à Hollywood? Qui a composé la première partition originale pour le cinéma? Combien de thèmes a conçu Ennio Morricone durant sa carrière? Comment Howard Shore

a-t-il écrit *Le Seigneur des anneaux*? Qui est l'auteur du thème de *James Bond*? Des origines jusqu'à l'Âge d'or des studios hollywoodiens, de la Nouvelle Vague aux premières expériences électroniques, *Musiques de films, une autre histoire du cinéma* raconte plus de cent-vingt ans de mariage dans les salles obscures, avec (par ordre d'apparition) Max Steiner, Erich Wolfgang Korngold, Maurice Jaubert, Alfred Newman, Georges Auric, Miklós Rózsa, Bernard Herrmann, Elmer Bernstein, Henry Mancini, Georges Delerue, Maurice Jarre, Michel Legrand, Vladimir Cosma, Nino Rota, Jerry Goldsmith, Ennio Morricone, Lalo Shifrin, John Barry, John Williams, Vangelis, James Horner, Hans Zimmer, Danny Elfman, Éric Serra, Michael Kamen, James Newton Howard, Howard Shore, Alexandre Desplat et Michael Giacchino parmi les rôles principaux.

Rawle, Steven / Donnelly, Kevin J. (eds.): *Partners in Suspense: Critical Essays on Bernard Herrmann and Alfred Hitchcock*. Manchester: Manchester University Press: 2017, xii, 223 S.

This volume of new, spellbinding essays explores the tense relationship between Alfred Hitchcock and Bernard Herrmann, featuring new perspectives on their collaboration. Featuring essays by leading scholars of Hitchcock's work, including Richard Allen, Charles Barr, Murray Pomerance, Sidney Gottlieb and Jack Sullivan, the collection examines the working relationship between the pair and the contribution that Herrmann's work brings to Hitchcock's idiom. Examining key works, including *The Man Who Knew Too Much*, *Psycho*, *Marnie* and *Vertigo*, the essays explore approaches to sound, music, collaborative authorship and the distinctive contribution that Herrmann's work with Hitchcock brought to this body of films, examining the significance, meanings, histories and enduring legacies of one of film history's most important partnerships. By engaging with the collaborative work of Hitchcock and Herrmann, the book explores the ways in which film directors and composers collaborate, how this collaboration is experienced in the film text, and the ways in which such partnerships inspire later work.

Raybould, Clarence: Music and the Synchronized Film. In: *Sight and Sound* 2,7, Autumn 1933, S. 80–81.

Reddell, Trace: *The Sound of Things to Come: An Audible History of the Science Fiction Film*. Minneapolis/London: University of Minnesota Press 2018, 478 S.

Reddell assembles a staggering array of movies from sixty years of film history—including classics, blockbusters, B-movies, and documentaries from the United States, Britain, France, Germany, Japan, and the Soviet Union—all in service to his powerful conception of sound making as a speculative activity in its own right. Reddell recasts debates about noise and music, while arguing that sound in the science fiction film provides a medium for alien, unknown, and posthuman sound objects that transform what and how we hear.

Inhalt: Introduction: New sounds in science fiction – The origins of sonic science fiction (1924–50) – Ambient novum, alien novum

(1950–68) – Cosmos philosophy and thought synthesizers (1959–1968) – Sonic alienation and the psytech at war (1971–77) – Sonorous object-oriented ontologies (1979–89) – Conclusion: Sonic science fiction into the twenty-first century.

Reinsch, Paul N.: Music over words and sound over image: *Rock Around the Clock* and the centrality of music in post-classical film narration. In: *Music and the Moving Image* 6,3, 2013, S. 3–22.

This article argues for the centrality of the Bill Haley and His Comets song *Rock Around the Clock* in creating post-classical sound through its appearance in *Blackboard Jungle* and *Rock Around the Clock*. The song turns the cinema into a music delivery system and relegates the image to perhaps only accompanying the sound. The audience for each film also repurposes the cinema space for active response in the form of dancing and thereby challenges theorizations of the cinema as a series of images meant to be received by a passive audience.

Rentsch, Ivana / Stollberg, Arne (Hrsg.): *Ton-Spuren aus der alten Welt: Europäische Filmmusik bis 1945*. München: Edition Text + Kritik 2013, 319 S.

Als „beste“ Filmmusik gilt gemeinhin jene, die nicht bewusst wahrgenommen wird – und doch ist Filmmusik auf einzigartige Weise dazu imstande, eine Handlung klanglich zu intensivieren und ihr neue Bedeutungsebenen zu erschließen. „Ton-Spuren aus der Alten Welt“ will das nur unbewusst Bekannte ins Zentrum der Aufmerksamkeit rücken und dabei zugleich ein bisher wenig erkundetes Terrain beleuchten: die europäische Filmmusik bis 1945. Während sich das Forschungsinteresse auch heute noch primär auf die Soundtracks der „goldenen Ära“ Hollywoods ab den 1930er Jahren richtet, bleiben die „Ton-Spuren“ der Alten Welt häufig im Schatten. Erst recht fühlbar werden die Lücken in der Filmmusik-Forschung mit der Erweiterung der Perspektive über das Kino der Weimarer Republik und den nationalsozialistischen Propagandafilm hinaus. So stellt sich die Frage, ob sich innerhalb der europäischen Filmindustrien bis zur Zäsur des Jahres 1945 verschiedene „nationale“ Traditionstränge entwickelten oder ob das musikalische Vokabular rückblickend als ein dezidiert „gesamteuropäisches“ anzusehen ist. Das Buch trägt dieser Ausgangslage Rechnung, indem es die Filmmusik-Traditionen einzelner europäischer Länder anhand ausgewählter Beispiele zum Thema macht: von Deutschland, Österreich und der Schweiz über Frankreich, Italien und Spanien bis hin zu Dänemark, der Tschechoslowakei und der Sowjetunion. Ergänzt werden die Fallstudien durch systematisch ausgerichtete Beiträge zu Theorie und Ästhetik der Filmmusik allgemein sowie zu Fragen ihrer heutigen Rekonstruktion.

Reyland, Nicholas: Corporate Classicism and the Metaphysical Style: Affects, Effects, and Contexts of Two Recent Trends in Screen Scoring. In: *Music, Sound, and the Moving Image* 9,2, 2015 (Special Issue: "Musical Screens: Musical Inventions, Digital Transitions, Cultural Critique". Guest ed.: James Tobias), S. 115–130.

Situating the aesthetic practices of recent narrative film scoring within debates on 'intensified' or 'post-continuity' style, as well as accounts of reception in terms of post-cinematic affect or distributed subjectivity, this paper identifies two significant stylistic tendencies in film scoring: 'corporate classicism' and 'the metaphysical style'. Examples are drawn from film and a wider range of musical media, with an analytical focus on representative cues from Hans Zimmer and James Newton Howard's score to *The Dark Knight* (2008) and Thomas Newman's score to *American Beauty* (1999). The two styles of screen music scoring, orchestration, production, and post-production beg reminders not only of the problematic 'utopian' call of classical Hollywood film scoring (Flinn 1992), but also suggest that the powerful affective work performed by these scores raises the question of 'unheard melodies' (Gorbman 1987) anew.

"The role of the song in the Ukrainian film." In kyrill. Schrift. – *Abstract*: The purpose of the article is to analyze the role of the song in the Ukrainian film in the process of organiz-

ing the film score and identify the features of using the song in films of different genres. The research methodology consisted in the application of audiovisual analysis of Ukrainian motion pictures, which provided for understanding the main functions of the song in film music. The scientific novelty of the research lies in the fact that the basic principles of using the song in the film were formed for the first time, revealing its influence on the film score. Conclusions. The song can be the leitmotif of the whole film, an audiovisual counterpoint, or a comment on the film. It can unite and move forward the action, enhance the dramatic nature of the situation, and accurately describe the time setting of the film. In the film, the song is addressed to the on-screen "listeners"; it affects their feelings, emotional experience, behavior, that is, participates in the development of the plot. The song in the film, most notably a solo, represents not only itself but a certain type of performance at the same time. Sometimes the song functions as a symphonic coda in the final scene of the film.

Ribac, François (sous la dir. de): *Rock et Cinéma. = Volume! La revue des musiques populaires / The French Journal of Popular Music Studies*, Hors-série 1, 2004, 138 S.

The articles analyze the use of rock 'n' roll in various films: *Phantom of Paradise* by Brian De Palma, *Exploding Plastic Inevitable* by Andy Warhol with The Velvet Underground's music, *A Hard Day's Night* by Richard Lester, David Lynch movies, as well as Frank Zappa, Aphex Twin and "kinok".

Richards, Mark: Film Music Themes: Analysis and Corpus Study. In: *Music Theory Online* (MTO) 22,1, 2016, [[URL](#)].

The phrase structure of film music themes remains virtually unexplored in scholarly literature. This article proposes an analytical system that expands and adapts Caplin 1998 in order to categorize the gamut of film music themes in some detail. This system is then applied to a cross-section of 482 themes from Oscar-nominated scores ranging from the early 1930s to the present day. In doing so, notable divisions appear around 1960 and

1990, times that coincide with trendsthat drastically affected the composition of film music in general.

Riethmüller, Albrecht: Musik als Emblem in Billy Wilders Film *The Emperor Waltz* (1948). In: *Archiv für Musikwissenschaft* 76,3, 2019, S. 166–176.

Three years after the end of World War II and after the Holocaust became publicly known, Paramount Pictures released Billy Wilder's *The Emperor Waltz*, in which the film maker – born in the Habsburg monarchy and a refugee from Hitler's Reich – depicts the Austrian Emperor Franz Joseph I and the American salesman Virgil Smith (Bing Crosby), who around 1900 was trying to sell gramophones to the Old World. The music for Smith was sung by Crosby, whereas the music for Franz Joseph is symbolized, but not exclusively, by Johann Strauss Jr.'s “Kaiser-Walzer,” which makes its entrance into the film's title. The paper focuses on the juxtaposition of the music and scenery of 1900 with the political circumstances of 1945. (Vorlage)

Rogers, Holly: Audio-Visual Biography: Music and Image in Derek Jarman's *Caravaggio*. In: *The Journal of Musicological Research* 27,2, 2008, S. 134–168.

Working beyond mainstream practice, Derek Jarman creates films that are unusually musical. *Caravaggio*, a biography of the artist, is a case in point. Jarman's collaboration with composer Simon Fischer Turner from the start of the filmmaking process enables music to assume a structural role, a procedure that turns common music-image interaction on its head in two ways. First, rather than strive for the audio-visual fusion common to many mainstream films, music and image are here juxtaposed. Second, as music becomes audible, the film's illusion of realism is destroyed. This article explores how Jarman's challenge to conventional filmmaking procedure can expose the fragility of reception history by comparing visual, literary, and musical versions of Caravaggio's biography. Rogers, Holly [Claire] (ed.): *Music and Sound in Documentary Film*. Preface by Bill Nichols. New York, Abingdon, Oxon: Routledge 2015, xi, 210 S. (Routledge Music and Screen Media Series.).

This collection of fourteen essays provides a rich and detailed history of the relationship between music and image in documentary films, exploring the often overlooked role of music in the genre and its subsequent impact on an audience's perception of reality and fiction. Exploring examples of documentary films which make use of soundtrack music, from an interdisciplinary perspective, *Music and Sound in Documentary Film* is the first in-depth treatment on the use of music in the nonfiction film and will appeal to scholars and students working in the intersection of music and film and media studies.

Rogers, Holly / Barham, Jeremy (eds.): *The Music and Sound of Experimental Film*. New York: Oxford University Press 2017, xvi, 320 S.

This book explores music/sound-image relationships in non-mainstream screen repertoire from the earliest examples of experimental audiovisuality to the most recent forms of expanded and digital technology. It challenges presumptions of visual primacy in experimental cinema and rethinks screen music discourse in light of the aesthetics of non-commercial imperatives. Several themes run through the book, connecting with and significantly enlarging upon current critical discourse surrounding realism and audibility in the fiction film, the role of music in mainstream cinema, and the audiovisual strategies of experimental film. The contributors investigate repertoires and artists from Europe and the USA through the critical lenses of synchronicity and animated sound, interrelations of experimentation in image and sound, audiovisual synchresis and dissonance, experimental soundscape traditions, found-footage film, re-mediation of pre-existent music and sound, popular and queer sound cultures, and a diversity of radical technological, aesthetic, tropes in film media traversing the work of early pioneers such as Walther Ruttman and Len Lye, through the mid-century innovations of Norman McLaren, Stan Brakhage, Lis Rhodes, Kenneth Anger, Andy Warhol, and studio collectives in Poland, to latter-day experimentalists John Smith and Bill Morrison, as well as the contemporary practices of Vjing.

Inhalt: Absolute sounding images: abstract film and radio drama of the 1920s as complementary forms of a media-specific art / Dieter Daniels. – A primitivism of the senses: the role of music in Len Lye's experimental animation / Malcolm Cook. – An education avant-garde: sound and music in Julien Bryan's OIAA films on Latin America, 1942–1949 / James Tobias. – “bump...bup...bup”: au-

ral innovation in the films of Norman McLaren / Terence Dobson. – Sights and sounds of the moving mind: the visionary soundtracks of Stan Brakhage / Eric Smigel. – Discontinuities and resynchronisations: the use of sound in Polish experimental cinema from the 1930s to the 1980s / Daniel Muzyczuk. – Grid intensities: hearing structures in Chantal Akerman's films of the 1970s / Paul Hegarty. – Meaning and musicality: sound-image relations in the films of John Smith / Andy Birtwistle. – Audiovisual dissonance in found-footage film / Holly Rogers. – Rebalancing the picture-sound relationship: the audiovisual compositions of Lis Rhodes / Aimee Mollaghan. – Sounding decay in the digital age: “audio-visions” of *Decasia* (2002) and *Lyrical Nitrate* (1991). – The sound of queer experimental film / Juan A. Suárez. – Avant-gardists and the lure of pop music / Carol Vernallis. – The music of Gustav Mahler in experimental film contexts: questions of visual music and intermedial theory / Jeremy Barham.

Román, Alejandro (ed. por): *C.I.N.E.M.A.: Composición e investigación en la música audiovisual*. Madrid: Visión Libros 2014, 363 S.

Este libro da testimonio del trabajo investigativo de un grupo de jóvenes compositores con una completa formación teórica, técnica y musical que culminó un proceso formativo de muchos años de intenso estudio. Para la elaboración de cada uno de los artículos los autores han seleccionado aquellos aspectos más

relevantes de cada uno de sus trabajos de investigación fin de carrera dentro del ámbito de los estudios de „Composición para Medios Audiovisuales“ realizados en el Real Conservatorio Superior de Música de Madrid y dirigidos por el compositor y profesor Alejandro Román. Los nueve ensayos que en este volumen se presentan abordan diferentes aspectos de la música aplicada al cine, tanto desde puntos de vista psicológicos, instrumentales y técnicos, pasando por los distintos usos dependiendo de los géneros cinematográficos, ya sean el „thriller“, la „ciencia ficción“ o el cine „místico“, e incluso el uso de músicas cultas preexistentes que aportan nuevos significados entrando a formar parte de las películas. El texto, por tanto, constituye una buena muestra de la excelencia de las nuevas generaciones de músicos, que va más allá de la práctica musical, tanto en su faceta interpretativa como compositiva, en la cual el pensamiento a través de la investigación va a aportar, en este caso a la teoría musical cinematográfica, nuevos puntos de vista desde la propia práctica musical, nuevas perspectivas que ahondarán en las intrincadas mazmorras de la comprensión de la música desde la propia música entendida y explicada por los propios músicos.

Rone, Vincent: Scoring the familiar and unfamiliar in Howard Shore's *The Lord of the Rings*. In: *Music and the Moving Image* 11,2, 2018, S. 37–66.

Each December between 2001 and 2003, Tolkien fans and film lovers alike flocked to theaters to see *The Lord of the Rings* films. Peter Jackson's interpretation of Tolkien's work invited audiences to immerse themselves in the landscapes and peoples of Middle-earth. Howard Shore's film music became integral to that process and consequently garnered critical attention. Many have noted Shore's adop-

tion of musical techniques used in Romantic opera, especially his predilection for Wagnerian leitmotifs. Yet Shore scores Middle-earth in a far more nuanced manner than just the adoption of the leitmotif. He distinguishes entire peoples of Middle-earth through entire systems of harmony. In fact, Shore's score parallels an ordered triple of races (Hobbits, Men, and Elves) with an ordered triple of harmonic accompaniment (major-minor diatonic, modal diatonic, and nondiatonic [chromatic mediants]). Moreover, analysis of each race in this series places them on a continuum of familiar to unfamiliar, from ordinary to fantastical, derived from associativity codified in the Romantic era. I first trace the associativity of each harmonic system to developments in the nineteenth century and then locate their correlates in the textual and cinematic depictions of each race, as well as their leitmotifs. For example, tonality's association with normativity parallels the Hobbits, the familiar. Next, the revitalization of modes as expressive deviations from tonality and as markers of the past suggests how Men reflect both familiarity and unfamiliarity. Finally, composers often have used mediant progressions to summon the fantastical, which parallels music of the Elves, the unfamiliar. Howard Shore's compartmentalization of harmony in *The Lord of the Rings* invites close investigation as to how film scores can continue several nineteenth-century traditions and can assist in our understanding of entire peoples in the fantasy genre. Rosar, William H.: Film music and Heinz Werner's theory of physiognomic perception. In: *Psychomusicology: A Journal of Research in Music Cognition* 13,1–2, 1994, S. 154–165.

Rosar, William H.: Music for Martians. Schillinger's two tonics and harmony of fourths in Leith Stevens' score for *War of the Worlds* (1953). In: *The Journal of Film Music* 1,4, 2006, S. 395–438.

After seeing Steven Spielberg's remake of "War of the Worlds" "on the 4th of July weekend 2005, an old friend who sat with me during the screening commented on how effective John Williams' score for it was, and that it reminded her of film noir scores. An inter-

esting coincidence, I thought, as many years earlier I had been struck by how passages in Leith Stevens' score for Paramount's "War of the Worlds" (1953) reminded me of "crime drama music," music for gangster or detective movies. Why should Stevens and Williams write music for a science fiction film in a style evocative of another film genre?

Rosenfeld, Ninett / Steffens, Jochen: Effects of audiovisual congruency on perceived emotions in film. In: *Psychomusicology: A Journal of Research in Music Cognition* 29,4, 2019, S. 200–208.

This study examined the influence of film music on the emotional perception of unambiguous semantically (in)congruent audiovisual film scenes. We predicted that the visual stimulus would dominate the emotional perception of the combined audiovisual stimuli and that a sarcastic or melancholic effect would be conveyed when the visual and musical stimuli are semantically incongruent. Therefore, one visual stimulus and one musical stimulus clearly representing one of the four emotions (anger, fear, happiness, and sadness) were chosen and combined in a congruent and incongruent way with each other. Utilizing an online experimental methodology, participants watched 16 stimulus combinations, rating them in terms of the perceived emotions (anger, fear, happiness, and sadness) and the emotional effects (melancholy and sarcasm) on a unipolar 5-point Likert scale. In addition, participants rated the perceived congruence between image and music for each stimulus. The results showed that the perceived audiovisual emotion was determined by the visual emotion, and semantically incongruent music was able to decrease the visually perceived emotions, compared to the congruent condition. Furthermore, a sarcastic effect was perceived when happy music accompanied negatively valent visual content. The results also showed that the perception of a melancholic effect was influenced by sad film music. The study provides further empirical foundations for the interaction of visual and auditory sensory channels, and its effect on the emotional perception of film scenes. Thus, it contributes to the understanding of audiovisual perception and highlights the importance of both film content and film music on the in-

terpretation of a scene. (Vorlage)

Rossi, Jérôme: Recherches formelles et émotions populaires. L’Art de la „chanson de film“ selon Claude Lelouch. In: *La chanson dans le film français et francophone depuis la Nouvelle Vague*. Würzburg: Königshausen & Neumann 2016, S. 209–224.

Rossi, Jérôme: Henri Dutilleux et la tradition française de la musique de film. In: *Revue de Musicologie* 105,1, 2019, S. 111–144.

In the 1930s, as the opera gave signs of slow-down, composers went into the new media such as radio and film. Initially commissioned to compose music for documentaries, the young Dutilleux also wrote, at the age of thirty years, the score of Henri Decoin’s feature film *La fille du diable* (1945), followed by four other films, *Le café du cadran* (1946), *Six heures à perdre* (1946), *Le crime des justes* (1950) and *L’amour d’une femme* (1953), which confirmed the composer’s appetite and talent for film dramaturgy. The last film he was involved in, *Sous le soleil de Satan* (1986), shows the strength of his music with images, even if it’s based on a previous work. The filmography of Dutilleux presents a very perceptible evolution since *La fille du diable* where he dogged Arthur Honegger’s footsteps – aiming at an autonomous musical form, a particular thematism, the musical stylization of noises – to *L’amour d’une*

femme where, under the impetus of the film-maker and composer Jean Grémillon, he composed a music that is both less symphonic and less thematic (with only one recurring theme). This economy of means, combined with the sparse presence of the music, finally links Dutilleux to Maurice Jaubert, a composer whose film approach he admired.

Rossi, Jérôme: Composers and “microgénie”. A study of the symphonic sound of French cinema in the thirties. In: *Music and the Moving Image* 12,2, 2019, S. 15–39.

During the thirties, French cinema was mostly accompanied by small symphonic orchestras. Through the theoretical writings on “microgénie” (“i.e., quality of a composition well-written for the microphone) and the scores of Arthur Honegger, we will try to define a conception of cinematic orchestral sound of this neoclassical composer and his contemporaries. While studying the number of musicians and the orchestral parts, the microphone positioning, the diversity of orchestral devices, and some musical writing principles, we will distinguish a “French film music sound” “from the Hollywood orchestral sound of the same period. (Vorlage)

Roth, Raphaël: *À l’écoute de Disney: Une sociologie de la réception de la musique au cinéma*. Préface d’Emmanuel Ethis et Damien Malinas. Paris: L’Harmattan 2017, 256 S. (Champs visuels.).

Zuerst als Diss.: *Bande originale de film, bande originale de vie*. Université Avignon, 2013.

Comment Disney nous a-t-il dotés des oreilles de Mickey ? Des *Trois Petits Cochons* (1933) à *La Reine des Neiges* (2013), le succès des films et des chansons des studios Disney est international et traverse plusieurs générations. Le cinéma est l’un des médias qui a le plus investi nos vies, tant parce qu’il les traduit par la fiction que parce qu’il nous réunit collectivement dans les salles ou dans nos foyers. Cet ouvrage décrit les modalités de la constitution du voir et de l’entendre cinématographiques au travers du « cas » Disney. Univers qualifié de merveilleux, magique ou enchanté, le monde musical de Disney se laisse saisir par

les discours des spectateurs de cinéma. Ils ont grandi avec ces musiques emblématiques qui sont devenues des tubes qui précèdent ou prolongent leur expérience devant le film. Par le biais d'une enquête sociologique, À l'écoute de Disney présente une analyse des ressorts sémiotiques de la réception de la musique de films et tente de dépasser, par le cinéma qui lui donne un ancrage, l'ineffabilité de cette musique que l'on ressent toujours sans ne jamais pouvoir la matérialiser.

Inhaltsüberblick: 1. La naissance des musiques emblématiques : description des modalités du voir et de l'entendre cinématographiques par la synchronisation / 25. – 2. *Alice on The Wall* : les structures culturelles de la synchronisation audiovisuelle / 61. – 3. Qu'y a-t-il d'original dans une bande originale ? Précautions théoriques et méthodologiques pour l'analyse des significativités musicales au cinéma / 107. – 4. Rothbart, Peter: *The Synergy of Film and Music: Sight and Sound in Five Hollywood Films*. Lanham, Md./London: The Scarecrow Press 2013, xx, 159 S.

Although writers on film music frequently allude to specific parts of scores, comprehensive examinations of entire scores are rare. In addition, most analyses of scores composed for the screen are discussed outside their cinematic context. To best understand the role music plays in the production of a motion picture, however, it benefits the viewer to consider all of the elements that comprise the film experience. In *The Synergy of Film and Music: Sight and Sound in Five Hollywood Films*, Peter Rothbart considers the aural and visual aspects of five representative films: *West Side Story*, *Psycho*, *Empire of the Sun*, *Altered States*, and *American Beauty*. For each film, the author demonstrates how a variety of elements work together to create a singular experience.

Rupp, Ciara / Wulff, Hans Jürgen: "Love You 'till the end": Musik und Subjektivität in der romantischen Komödie *P.S. I Love You* (2007), In: *Samples: Notizen, Projekte und Kurzbeiträge zur Populärmusikforschung* 17, 2019, online.

P.S. I Love You (2007) is a romantic comedy that deals with a man's early death by cancer and his wife's grief. Before he died, the man wrote her a series of letters that will guide her, not only through her sorrow, but also in rediscovering herself. The soundtrack mainly draws upon a pop song, "Love You 'Till The End", which takes on a very crucial role in many ways. The song functions as a reminder to the wife of her deceased husband when she dreams or hallucinates. It also encourages her to express herself in public, disguising her individual emotions in a collective mood. The sound-track uses stylistic means that refer to Irish folk music (evoking an impression of Irishness), especially in scenes that take place in Ireland. Finally, the pop score displays a particular realm of pop culture and its soundscapes. (Vorlage)

Salamone, Frank A.: Jazz and Film Noir. In: *Anthropos: Časopis za psihologijo in filozofijo ter za dodelovanje humanističnih ved* 49, 2017, S. 143–157.

Jazz became the music most associated with film noir. The key movie was *The Wild One*, starring Marlon Brando who personified the noir hero, or anti-hero. He was looking for trouble, any trouble. Great jazz figures were drawn to the noir form, and there was a noir style of music. West Coast trumpeter Shorty Rogers had 4 tunes in Leith Stevens great score. Great jazz stars Bud Shank, Jimmy Giuffre, Shelley Manne and Henry Mancini followed. The TV show Peter Gunn soon appeared and kept great jazz musicians working. Jazz became the sound of the hard-boiled detective and the noir film.

Sánchez López, Roberto: *Jazz de película: such sweet thunder*. Zaragoza: Ed. Doce Robles 2015, 227 S. (Colección Cine.).

El cine y el jazz nacieron poco antes del siglo XX y se convirtieron en manifestaciones artísticas casi al mismo tiempo. No es casualidad que la primera película sonora se llamara *El cantor de jazz* (1927). Sus caminos se han unido en numerosas ocasiones con resultados tan memorables como irregulares: algunas de las obras maestras del cine llevan el sonido inconfundible de las apasionadas notas del jazz. Roberto Sánchez, crítico de cine y profesor de Historia del Arte en la Universidad de Zaragoza, ofrece en Jazz de película un exhaustivo y fascinante recorrido por la confluencia de ambas sendas artísticas. Desde los inicios del sonoro hasta la actualidad, el género musical de Duke Ellington, Billie Holiday, Bird (Charlie Parker), Miles Davis, John Coltrane o Louis Armstrong ha cautivado a grandes maestros del cine. El jazz, como banda sonora, como presencia poderosa en la pantalla, como parte fundamental, pero oculta, de películas que no se entenderían sin su música. El jazz en los grandes musicales y en documentales específicos y genéricos. Todo ello convierte a este libro en un gran regalo para los amantes del cine y del jazz.

Schmidl, Stefan: *The Film Scores of Alois Melichar: Studies in the Music of Austro-German Cinema 1933–1956*. Wien: myMorawa 2018, 88 S.

Due to his provocative writings against Arnold Schoenberg and other proponents of 20th century's musical avant-garde, Alois Melichar (1896–1976) has gained a reputation as one of the most controversial film composers of his time, which overshadowed the efforts in his primary calling: movie music. This concise monography encompasses Melichar's prolific career as a composer for Austro-German cinema for the first time, tracing the chronology and the particularities of his work for film. Considering their peculiar ingraining in the media of the Third Reich and the Wirtschaftswunder, Melichar's scores offer valuable insights into the musical techniques of emotional persuasion in cinema.

Sclafer, Germain: 2001: *A Pace Odyssey*. The Donau Sequence as an American Film Musical Number. In: *Quarterly Review of Film and Video* 36,1, 2019, S. 26–41.

For its singular use of the Johann Strauss Jr.'s "An der Schönen, Blauen Donau" ("The Blue Danube") Viennese waltz, the spaceships sequence from Stanley Kubrick's 2001: *A Space Odyssey* (1968) created a revolution in respect of film scoring, turning spectators into apes facing a black monolith and generating reactions of reject. To fill such lack of understanding, the number of studies increased, generally focused on the semantic shock – between the old and respected Western classical music on one hand, and the popular science fiction imagery on the other – and neglecting the syntactic analysis. However, it seems that this aspect is essential to apprehend Kubrick's unprecedented combination. This paper will point out how the real revolution came from the structuration of the whole Donau sequence, built according to the parameters of the American film musical's numbers as defined by Rick Altman, and the creation of a fusion between two film genres thought as totally incompatible until then – and still today.

Shaw-Miller, Simon: *Eye hEar: The Visual in Music*. Farnham, Surrey/Burlington, VT: Ashgate 2013, xvi, 207 S., 41 Abb.

Nachdr. London/New York: Routledge 2016.

'Eye hEar The Visual in Music' employs the concept of the visual in proximate relation to music, producing a tension: 'is it not the case that there is a gulf between painting and music, between the visible and the audible? One is full of colour and light yet silent; one is invisible and marvellously noisy?' Such a belief, this book argues, betrays an ideological constraint on music, desiccating it to sound, and art to vision. The starting point of this study is more hybrid (and hydrating): that music is never employed without numerous and complex intersections with the visual. By involving the concept of synesthesia, the book evokes music's multi-sensory nature, stops it from sounding alone, and offers music as a subject for art historians. Music bleeds into

art and visuality, in its graphic depiction in notation, in the theatre of performance, its sights and sites. This book looks at music in its absolute guise as a model for art; at notation and the conductor as the silent visual fulcra around which music circulates; at the music and image of Erik Satie; at the concert hall as white cube; at the symphonic film '2001: A Space Odyssey'; and at the liminality of John Cage and Andy Warhol.

“Realism” in late 1930s Japanese films and Fukai Shiro’s film music: around anti-musical accompaniment arguments.”

In japan. Schrift. – *Abstract*: In Japanese film history, the late 1930s was known as a period when interest in filmic “realism” rose. This study examines how this interest in filmic realism influenced musical accompaniment in narrative films in the late 1930s. It mainly focuses on two complementary aspects of filmic realism: one based on naturalist/ socialist realism in literature and the other based on a new conception of filmic representation that emphasized audiovisual realism. This study investigates the contrasting influences of these two aspects. One influence was the decrease in the use of non-diegetic music, a practice reported in contemporary texts that can be confirmed by existing realist films. The first half of the paper analyzes contemporary discourse on filmic realism and anti-musical accompaniment arguments and reveals that musical accompaniment was considered unsuitable for both the above-mentioned aspects of realism. This influence, however, was not restricted to the decrease in use of non-diegetic music. In fact musical accompaniment was not completely abandoned, and some contemporary Japanese film composers sought an effective way of using it in realist films. The latter half of this paper shows the efforts of Fukai Shiro, one such leading Japanese composer, in this regard.

“Musical Practice and Reception in the Movie Theaters in Tokyo during the Silent: The Relationship between Intermission Music and Accompaniment Music.”

In japan. Schrift. – *Abstract*: Movie theaters in the silent era had a feature as a concert hall. Especially in Japan in the Taisho era, they were central places where ordinary people heard Western music. Though they are important cases for Japanese receptive study of Western music, how film audiences received it has scarcely been investigated. This study, focusing on some theaters in Tokyo especially around 1920 and 1927, tries to show their receptions of Western music. First three sections consider on the audiences’ columns in the pamphlets issued by one of the main movie theaters, Teikokukan in Asakusa. They show that audiences were so interested in Western music which was frequently played as intermission music that, when the same music was used for film accompaniment, it sometimes gained audiences’ attention more than the film it was used for. But until 1927, musical medleys had gradually gained popularity as a new form of intermission music. The popularity was based on each tunes’ associative images which had been formed in audience through their repetitive use in film accompaniment. The peculiar associations formed in the movie theaters gave birth to a unique musical practice.

Shibata, Kōtarō: 1920-Nendai kōhan no jidaigeki eiga ni okeru ongaku bansō no setchū-sei — wayō gassō senkyoku shinsaku-kyoku [柴田康太郎: 1920年代後半の時代劇映画における音楽伴奏の折衷性——和洋合奏・選曲・新作曲——]. In: *Ongakugaku: Journal of the Musicological Society of Japan* 64,1, 2018, S. 1–16.

“The Syncretisms in Musical Accompaniment of *Jidaigeki* Films in the late 1920s: Wayō gasso, Musical Selection, New Composition.”

In japan. Schrift. – *Abstract*: In the 1920s, music for Japanese silent films was undergoing the process of reformation, which was a complex outcome of localization of Western music

in Japan and of the contemporary conversion from stage to film. In the first place, the accompaniment style of Japanese films in the 1910s was implicated in that of kabuki, Japanese traditional drama, because Japanese films at that time were a kind of cheap substitute for stage drama and were shot in long fixed shots and long takes. They were usually accompanied with the Japanese traditional instruments, such as *shamisen* and *taiko*, so as to imitate the soundscape of kabuki. Around 1920, however, such stage-oriented films came to be criticized for being content with old-fashioned stories and for not pursuing film techniques like close up and cross cutting, which were considered to be central to cinema. In the Pure Film Movement, which tried to pursue new Japanese films, the accompaniment music also came to be substantially reformed under the influence of Western music and Western film accompaniment. Moreover, this movement extended over period drama in Japan (*Jidaigeki*), which is under the tradition of kabuki. *Jidaigeki* films began to be screened with classical Japanese music and imported Western music as well as newly composed music, which were played with Western-style ensemble or syncretic-style ensemble of Japanese and Western Instruments. – This study tries to conceive how these accompaniment music of Japanese cinema was transformed through examining the contemporary documents on the screening practices of Japanese movie theaters and on repertoires and ensembles of Asakusa Fuji-kan and Kanda Nikkatsu-kan, premier theaters of Nikkatsu in Tokyo. The first section of the paper examines the try and errors of Iwao Miyake, the manager of Fuji-kan, and the process of introduction of Western ensembles and syncretic ensembles into *Jidaigeki* films. Then, through examining the documents and contemporary scores which survives, the last two sections scrutinize the repertoire of *Jidaigeki* accompaniment around 1926 and the practice of the composer Nobuhiro Matsudaira, one of the representative accompanist of *Jidaigeki* films after 1927, which show how Japanese- and Western styles in the repertoire and ensemble were syncretized and transformed in the latter half of the 1920s.

Shirai, Fumito: Shēnberuku “eiga no ichi ba-

men no tame no bansō ongaku” no sakkyoku katei to sono haikei: Mi happyō no kōsō memo to 1920-nendai no eiga no ongaku to no kanren [白井 史人: シーンベルク 《映画の一場面のための伴奏音楽》の作曲過程とその背景: 未発表の構想メモと 1920 年代の映画の音楽との関連]. In: *Ongakugaku: Journal of the Musicological Society of Japan* 61,1, 2015, S. 1–15.

“Compositional Process and Background of Arnold Schoenberg’s *Begleitungsmusik zu einer Lichtspielszene*: His Unpublished Memo and Film Music in the Twenties.”

In japan. Schrift. – Abstract: Arnold Schoenberg’s *Begleitungsmusik zu einer Lichtspielszene* Op. 34 (1930) indicates the close relation between Schoenberg’s work and film music. Although Schoenberg did not contribute to any films in his career, he had planned to accompany the performance of his work *Die glückliche Hand* (1913) with a silent film. He emphasized the importance of sound film in the 1920s in texts such as “Der sprechende Film,” 1927 (“The Talkie”). His relationship with Guido Bagier, the head of the department in charge of sound films department of Universum Film AG (UFA), also indicates Schoenberg’s interest in films during that time. This paper explores Begleitungsmusik both in terms of its musical structure and with reference to the praxis of musical accompaniment of silent films. First, the musical character of Begleitungsmusik is analyzed from the perspective of its structure and the process of its composition. Discussion of an unpublished memo indicating the programmatic content of this piece and a detailed analysis of Schoenberg’s musical manuscripts show that his revisions emphasized a dramaturgical structure, partly corresponding to the unpublished memo. Second, the relation between the film and Schoenberg’s activities, based on the examination of related preliminary material including the diary of his second wife Gertrud and the unpublished autobiography of Guido Bagier, will be surveyed. Finally, the contemporary situation and the aesthetics of musical accompaniment of silent film are discussed, focusing on the relation of the three subtitles Schoenberg used in his Begleitungsmusik, “threatening danger,” “anxiety,” and “catastrophe.” Musical scenarios published in *Film-Ton-Kunst*, a magazine that specialized in the film music praxis in the

1920s, are systematically explored. Consequently, this paper recontextualizes Begleitungs-musik within Schoenberg's own development and the historical background to clarify that although Schoenberg and contemporary praxis of musical accompaniment attached great importance to dramaturgical construction, nevertheless, their musical languages and attitudes toward the excerpting of musical pieces differed.

Sibilla, Gianni: The Concert will be Televised: Il “live” come modello narrativo e produttivo nella musica pop e nei media. In: *comunicazioni sociali* 2, 2020, 12 S.

The relationship between television and “live music” has been a weak one: the televisive dimension of music was mainly absorbed by the music video model, or by single performances in TV shows. The arrival of digital technology has profoundly affected the dynamics of the music industry: recorded music has undergone a sharp decline in sales while, at the same time, the relevance of live concerts has increased. Live music has become the pivot of musicians' careers and of the music industry

as a whole – therefore the offer of tours and concerts has multiplied. In the last 20 years, the presence of pop music on television has intensified, forming itself as a genre in its own right: the talent show. This phenomenon produces a double movement of exchange and a mutual influence between television and the pop concert: the two areas of that will be the object of study of this contribution. After an introduction on the definition of “live” and “liveness” and after an overview of the relationship between music and TV and on the analysis of the current state of the music industry and its effects on music and media production, the paper will analyze some models of these new forms of transmedia narration of music and the new relationship between concerts live and TV shows. These examples will be aimed at showing both the hybridization of the productive forms and television/spectacular narration in concerts, and the presence of narrative and production forms derived from concerts in television shows. These pages will show how, in the years two thousand, “live” pop-rock concerts and visual and television entertainment converge on the re-discussion of what “live” means. The goal is to show how the relationship between these spaces has become a sort of oxymoron: the “live” concert is more and more televised, and the musical television show is more and more similar to the concert.

Silin, Magdalena: *The Score “Test Drive” as a Narrative Element in the Animation Film “How to Train Your Dragon”*. Degree Thesis, Media Culture, [Helsinki:] Yrkeshögskolan Arcada 2018, 49 S.; [[URL](#)].

Zusammenfassung: The purpose of this thesis is to analyse how the film music works as a narrative element in the scene Test Drive, from the film *How to Train Your Dragon* (2010). The film is produced by DreamWorks Animation and the music is composed by John Powell. The reason for choosing this film and scene is because the film music is an important part as an element both throughout the film. The aim of the thesis is to study how music in action scenes in animated Hollywood mainstream children's films is composed. My purpose is to gain knowledge of how to compose music for film. The analysis is limited to only one children's animation

film and one scene from that film. The material that I used is the scene where the music piece Test Drive occurs, the sheet music of the music piece, the film's script and the music piece on Spotify. The method that I use is case study, and for analysing the music piece is done with music theory knowledge and is a qualitative model that I have developed on my own. There was not found a method that suited the music piece or the purpose of this thesis. There have not been done previous analysis about the film music in How to train your dragon, though small analyses about film music composed by John Powell have been done. I discovered in the analysis that there are many elements that needs to be included in a composition. With recurring themes and melodies that sound different each time and with the help of the three act structure and the dramatic curve, the result of the music piece is extraordinary and outstanding. There is a list of definitions in the introduction chapter where every musical term used in this analysis is explained.

Taxonomy is the rigorous act of distinguishing differentiated concepts by naming and defining them with precision. A case of taxonomic research arises from film music history with regard to musical cues, topoi, used to accompany silent film. The present case study uses the EYL Collection of Dutch silent film music

Smith, Kenneth M.: *Vertigo's* musical gaze. Neo-Riemannian symmetries and spirals. In: *Music Analysis* 37,1, 2018, S. 68–102.

Laura Mulvey coined the term 'male gaze' (1975), using Lacanian theory as a 'political weapon' against the standard mode of viewing in which the viewing subject turns on-screen women into fantasy objects. While politically laudable, her article misconstrues Lacan's concept of 'the gaze', the power of which emanates from the object itself. We might better serve Lacanian theory by inverting Mulvey's reading of Alfred Hitchcock's *Vertigo* to suggest that Scottie (James Stewart) is himself objectified by the mystique of the 'object' he watches and follows: Madeleine (Kim Novak). The screen's gaze reduces spectators to objects too. From this perspective, rather than watching the film, the film can be said to be watching us. This extends to Bernard Herrmann's soundtrack, famously influenced by the yearning of Wagner's "Tristan und Isolde". Developing David Schwarz's (2006) musical gaze (in which repeated pedal points of Schubert songs gaze at us), I analyse *Vertigo's* frequent emphasis on the pitch class D. A pedal D is often repeated in alluring yet sinister bare octaves as Scottie follows

Madeleine. But at key moments in the film, the pitch becomes a sophisticated tool that captivates us in unique ways. Around this central pitch third-relationships circle. These resonate with neo-Riemannian theory, particularly in their hexatonic ‘poles’, which Cohn shows to be agents of the Freudian ‘uncanny’ (2004) and which here also serve as an alternative gaze to the reiterated D. Other pitch constellations, in symmetries or spirals, form similar obsessional musical ‘gazes’ that, using Lacanian theory, prompt the question about whether we are listening to the music or the music is listening to us. (Vorlage)

Smith, Steven C.: *A Heart at Fire's Center: The Life and Music of Bernard Herrmann*. Berkeley/Los Angeles/London: University of California Press 1991, x, 415 S.

Repr. 2002, xiv, 415 S., [14] Bl.

From his first film (*Citizen Kane*) to his last (*Taxi Driver*), Herrmann was a master of evoking psychological nuance and dramatic tension through music, often using unheard-of instrumental combinations to suit the dramatic needs of a film. His scores are among the most distinguished ever written, ranging from the fantastic (*Fahrenheit 451*, *The Day the Earth Stood Still*) to the romantic (*Obsession*, *The Ghost and Mrs. Muir*) to the terrifying (*Psycho*). Film was not the only medium in which Herrmann made a powerful mark. His radio broadcasts included Orson Welles's Mercury Theatre of the Air and *The War of the Worlds*. His concert music was commissioned and performed by the New York Philharmonic, and he was chief conductor of the CBS Symphony.

Smith, Steven C.: *Music by Max Steiner: The Epic Life of Hollywood's Most Influential Composer*. New York/Oxford: Oxford University Press 2020, xvi, 480 S. (Oxford Cultural Biographies.).

During a seven-decade career that spanned from 19th century Vienna to 1920s Broadway to the golden age of Hollywood, three-time Academy Award winner Max Steiner did more than any other composer to introduce and establish the language of film music. Indeed, revered contemporary film composers

like John Williams and Danny Elfman use the same techniques that Steiner himself perfected in his iconic work for such classics as *Casablanca*, *King Kong*, *Gone with the Wind*, *The Searchers*, *Now, Voyager*, the Astaire-Rogers musicals, and over 200 other titles. And Steiner's private life was a drama all its own. Born into a legendary Austrian theatrical dynasty, he became one of Hollywood's top-paid composers. But he was also constantly in debt—the inevitable result of gambling, financial mismanagement, four marriages, and the actions of his emotionally troubled son. Throughout his chaotic life, Steiner was buoyed by an innate optimism, a quick wit, and an instinctive gift for melody, all of which would come to the fore as he met and worked with luminaries like Richard Strauss, George Gershwin, Irving Berlin, the Warner Bros., David O. Selznick, Bette Davis, Frank Sinatra, and Frank Capra. In *Music by Max Steiner*, the first full biography of Steiner, author Steven C. Smith interweaves the dramatic incidents of Steiner's personal life with an accessible exploration of his composing methods and experiences, bringing to life the previously untold story of a musical pioneer and master dramatist who helped create a vital new art with some of the greatest film scores in cinema history.

“The space of film music and film music in the cultural space: popular culture context.”

In kyrill. Schrift. – Abstract: Analized phenomena of film music in the cultural space and space of film music in their ratio as a relatively independent phenomenon in a meaningful, functional and procedural aspects. Shows the importance of studying the problems of film music in connection with the state art and culture, including music, and other cultural phenomena non-fiction character. Describes specific features of different

forms of existence of texts of film music, as in the structure of the film itself, so when you include them in contexts broader scale. Marked by a long history of tradition to address to the problems of music movies since “silent” cinema. The connection and distinction of the space of film music and film music in the cultural space is considered through the ratio of categories such as “genus – species”, “status – mode”. Shows contextual nature of such ratios for categorical phenomena of film music. Reasoned grounds selection of “film music in the cultural space” as in specific theoretical and substantive meanings of the concept of representing real, relatively independent, structurally and functionally complex phenomenon. Particularly focuses on the situation of the nominal connection of film music and film in different ways. There are analyzed the typical situations of transformation of musical texts in the transition from one cultural space to another. Special attention is given to the use of classical music in film, as well as the phenomenon of formation of new classical music on the basis of film music. It is noted contextual significance of popular culture, understood in the author’s interpretation as the most organic and in tune with the film environment. The necessity of more detailed and in-depth study of the phenomenon of film music in the cultural space as insufficiently studied phenomenon. In the analysis of materials apply the principles of contextual and categorical analysis.

Sonnenschein, David: Sound Spheres: A Model of Psychoacoustic Space in Cinema. In: *The New Soundtrack* 1, 2011, S. 13–27.

The importance of localisation of sound in our real world is explored and compared with the use of diegetic sound in film, which has been usefully codified by Michel Chion as onscreen and offscreen. To further develop the theory of filmic psychoacoustic space, the Sound Spheres model offers six levels of sonic experience, beginning from the most inner personal sphere and expanding toward the most outer unknown sphere: I Think, I Am, I Touch, I See, I Know and I Don’t Know. Real world experiences and perceptual exercises of these spheres inform us how they can be applied to the creation of filmic stories.

Sonntag, Sabine: „Seht ihr's Freunde?“: Wagners *Tristan und Isolde* im Film. Würzburg: Königs-hausen & Neumann 2015, 176 S.

Lars von Trier rückte 2011 mit seinem Film *Melancholia* erneut die Frage ins Zentrum, wie gut Wagners „Tristan“-Partitur zur Film-musik taugt und vor allem, wie sehr diese Musik einen Film bestimmen kann. Schon an der Schwelle zum Tonfilm hatte Luis Buñuel 1930 Vorspiel und „Liebestod“ für seine surrealen Filme verwendet. Danach entdeckte das Hollywood-Kino der 1940er Jahre die hochemotionale Musik Wagners für seine Liebes- und Schicksalsdramen. Zwischen Lars von Trier und Buñuel liegt die ganze Bandbreite vom biographischen Wagner- und Ludwig II.-Film über Fantasy-Filme, Filmkomödien und Pornofilme bis zu jener Gattung, wo sich Wagners Musikdrama und der Film besonders nah sind: in den Filmen um Selbstmord, Verklärung und Vision. Interessant ist dabei auch die Frage, wie originalgetreu Wagners Musik verwendet wird. Hier reicht die Spannweite von der Tristan-Schallplatte als Soundtrack in *Melancholia* über die Bearbeitung des „Liebestod“ zum Violinkonzert in „Humoresque“ bis hin zur vollständigen Mutation in Hitchcocks *Vertigo*. Dem Buch liegen Untersuchungen von etwa 100 Filmen zugrunde, und es behandelt u.a. Werke von Alfred Hitchcock, Billy Wilder, Luchino Visconti, Monty Python, Werner Herzog, Ken Russell, Helmut Dietl, Claude Chabrol, Louis Malle und Yukio Mishima. 2010 erschien ihr Buch „Richard Wagner im Kino“, 2013 „Der Opernbesuch im Spielfilm“. (Verlag)

Spadoni, Robert: The Uncanny Body of Early Sound Film. In: *The Velvet Light Trap* 51,1, 2003, S. 4–16.

The first synchronized sound films were widely hailed as a forward leap in cinematic realism. Many critics and other commentators noted that everything in the films and, most strikingly, the speaking human figures in them now appeared to be more lifelike, present, and three-dimensional. Today, silent films seem to viewers who are not accustomed to watching them to be remote, bound

by conventions such as intertitles that are strange and unreal. The impression that sound brought the cinema closer to reality, therefore, seems to have been one that stuck. This was not the only impression that sound films made on their first audiences, however. Sound also brought to the foreground certain uncanny qualities that had always been present in the cinematic image. It complicated the general viewing sensation of the presence of the figures speaking and moving on the screen. Sound changed the visual appearance of these figures in ways that made them look to some viewers like ghosts. This widespread, sporadic, uncontrolled, and temporary film reception phenomenon possibly influenced Hollywood film production trends in ways that long outlived the three and a half years of the sound transition period.

Spring, Katherine: *Saying It With Songs: Popular Music and the Coming of Sound to Hollywood Cinema.* New York/London: Oxford University Press 2013, xi, 229 S. (Oxford Music/Media.).

Hollywood’s conversion from silent to synchronized sound film production not only instigated the convergence of the film and music industries but also gave rise to an extraordinary period of songs in American cinema. *Saying It With Songs* considers how the increasing interdependence of Hollywood studios and Tin Pan Alley music publishing firms influenced the commercial and narrative functions of popular songs. While most scholarship on film music of the period focuses on adaptations of Broadway musicals, this book

examines the functions of songs in a variety of non-musical genres, including melodramas, romantic comedies, Westerns, prison dramas, and action-adventure films, and shows how filmmakers tested and refined their approach to songs in order to reconcile the spectacle of song performance, the classical norms of storytelling, and the conventions of background orchestral scoring from the period of silent cinema. Written for film and music scholars alike as well as for general readers, *Saying It With Songs* illuminates the origins of the popular song score aesthetic of American cinema.

Sprout, Leslie A.: Composing film music in theory and practice. Honegger's contributions to *Les misérables* and *Rapt*. In: *Journal of the American Musicological Society* 72,1, 2019, S. 43–113.

Arthur Honegger composed his first sound film scores in 1933–34. For *Les misérables*, Raymond Bernard, who was under contract at Pathé-Natan to direct big-budget theatrical films that would compete with Paramount's French-language productions, expected Honegger to provide intermittent orchestral underscoring for already filmed sequences that privileged dialogue over music. For *Rapt*, the musically trained Dimitri Kirsanoff used independent financing to collaborate from the start with Honegger and Arthur Hoérée on what the director called "a hybrid form ... in which music, image, and dialogue work together". The innovative electroacoustic and sound editing techniques in the soundtrack for *Rapt* have, I argue, overshadowed the strikingly reciprocal relationship between the soundtrack's more conventional instrumental underscoring and the images on screen. Honegger theorized in 1931 that, in sound film, music's "autonomy" "would free it from the burden of mimesis. Instead, the images on screen would teach listeners about music's abstract "reality". In practice, however, in *Rapt*, mimetic music and musicalized sound effects bridge the gap between aesthetic goals of hybridity and practical demands for intelligible dialogue. My analysis of the abduction, washhouse, storm, and dream sequences in "Rapt" "demonstrates that a successful hybrid of sound and image ultimately has the potential not just to use images to pin down mu-

sic's elusive "reality", but also to use music's mimetic possibilities to influence our reading of ambiguous imagery. It also shows that music does not need to be in itself groundbreaking in order to contribute to groundbreaking innovations in sound film. (Vorlage)

Stabodin, Kerstin: „Die Kinos brauchen die Musik wirklich, brauchen sie dringend“: Über die narrative Funktion der Filmmusik in „The Graduate“ und „Easy Rider“. Diplomarb. Wien: Universität Wien, Philologisch-Kulturwissenschaftliche Fakultät 2015, 113 S.; [[URL](#)].

Abstract: Bereits seit Anbeginn des Mediums Film war es die Musik, welche es vermochte eine wunderliche Faszination zu entfachen, wie sie wohl schon viele Zuschauerinnen und Zuschauer erleben durften. Was wäre das Filmerlebnis ohne die sanften Melodien einer Liebesgeschichte, die spannenden Klänge einer Krimigeschichte oder die unheimlichen Töne einer Horrorgeschichte? Und vielleicht gerade deshalb ist die Musik seit jeher lärmender und doch stiller Begleiter des Filmbildes. Sei es die Live-Musikbegleitung der Stummfilme über die Orchestersymphonien des Klassischen Hollywood-Kinos bis hin zur kommerziell erfolgreichen Verwendung bereits veröffentlichter Songs bekannter Musikgruppen- oder Interpreten, Musik und Film sind untrennbar miteinander verbunden und damit auch die wissenschaftliche Suche nach dem Geheimnis der Faszination um die Filmmusik angeregt. Ende der 1960er Jahre, einer Zeit in welcher die epochalen Orchestersinfonien großer Hollywood-Produktionen längst veraltet schienen und die Jugendbewegung Rebellion und Opposition heraufbeschwor, sollten es *The Graduate* und *Easy Rider* mit bereits veröffentlichten Folk- und Rocksongs schaffen, Publikum und Kritiker gleichermaßen zu faszinieren. Nun ist es die Filmmusik, welche Emotionen und Zeitgeist vermittelt, welche Kontinuität und Hintergrundatmosphäre schafft sowie auch narrative Funktionen übernehmen kann. Vom Wesen des Songs als Verbindung zwischen Sound und Lyrics profitierend, vermag die Filmmusik beider Filme jedoch noch einiges mehr zu erzählen, als es etwa der Hintergrundmusik zu Zeiten des Klassischen Hollywood-Studio-Systems erlaubt war. Ob als Foreshadowing der folgenden Geschichte, ob als Kommentar und Sub-

text zu den Bildern, ob als Teil der Charakterisierung der Protagonisten und damit als Auslöser von Empathie sowie Identifikation, oder gar als Quelle der Mythenbildung, die Filmmusik vermag in beiden Filmen auszudrücken, was über kein anderes filmisches Element vermittelt scheint. Ähnlich dem Chor der antiken Tragödie scheint die Filmmusik nun als gleichberechtigtes, ja entscheidendes narratives Element im Film angekommen. Bens Sommer mit Mrs. Robinson in *The Graduate* sowie *Easy Rider* abenteuerliche Motorradtour quer durch die USA legen es offen – was wäre der Film ohne Musik, was die Musik ohne Film?

Stanfield, Peter: Crossover: Sam Katzman's *Switchblade Calypso Bop Reefer Madness Swamp Girl or Bad Jazz*, calypso, beatniks and rock 'n' roll in 1950s teenpix. In: *Popular Music: A Yearbook* 29,3, 2010, S. 437–455.

This essay challenges the received wisdom that teenpix of the 1950s were dominated by a soundtrack of rock 'n' roll. I argue that this cycle of film production was marked by a diversity of musical genres, styles and types. Not only rock 'n' roll, but rhythm 'n' blues, folk, rockabilly, swing, West Coast jazz, bebop, Latin music such as the mambo, the rhumba, the cha cha chá, and Caribbean calypsos were all heavily featured in these films. This study is carried out through a focus on the temporal arrangements – fads, cycles, trends – that govern serial production and consumption of movies and popular music. Following Philip Ennis' thesis that rock'n'roll is best defined by its ability to "crossover" musical boundaries – to move, for example, across the pop, country, and rhythm'n'blues charts – I argue that the film industry chose not to overly limit the music it had on offer and instead provided a varied package, some of which, it expected, would crossover and appeal to diverse and capricious teenage tastes.

Steinhauer, Iakovos: *Das Musikalische im Film: Zur Grundlegung einer Ästhetik der Filmmusik*. Hildesheim/Zürich: Georg Olms 2018, 271 S. (Studien und Materialien zur Musikwissenschaft. 102.).

Unter welchen Voraussetzungen kann von einer audiovisuellen Verbindung im Film gesprochen werden, die Ton und Musik nicht als akzidentelle, sondern als immanente Elemente des Films behandelt? Um diese Frage zu klären, befasst sich die vorliegende Studie mit einem wenig beachteten Aspekt in der Theorie der Filmmusik, indem sie das Thema der filmischen Bild-Ton-Beziehung aus philosophischer Perspektive untersucht. Durch die Auseinandersetzung mit wichtigen theoretischen Quellen zur Ästhetik der Filmmusik und anhand ausgewählter Filmbeispiele wird ein hauptsächlich von der Phänomenologie und der Filmphilosophie Gilles Deleuzes ausgehendes theoretisches Konzept entworfen, das die Prinzipien des Einsatzes von Ton und Musik im Film auf ihre ästhetischen Grundstrukturen zurückführt.

Stenzl, Jürg: *Dmitrij Kirsanov: Ein verschollener Filmregisseur*. München: Edition Text + Kritik 2013, 238 S.

Als Marc David Kaplan in eine jüdische Kaufmannsfamilie hineingeboren, verließ der Musiker und spätere Filmemacher Dmitrij Kirsanov (1899–1957) kurz vor dem Ende des Ersten Weltkriegs seine Geburtsstadt Dorpat (Tartu) in Estland und ging nach Paris, um dort sein Cellostudium fortzusetzen. Er spielte in Stummfilmorchestern und wurde ab 1921 selbst zu einem unabhängigen und herausragenden Filmregisseur, dessen Filme mittlerweile restauriert und teilweise auf DVD erschienen sind. Aufsehen erregte sein nach einem Pariser Arbeiterviertel benannter Film *Ménilmontant* (1926), danach das kurze

„Filmgedicht“ *Brumes d'automne (Herbstnebel)*, 1928 und der 1933 im schweizerischen Wallis gedrehte kühne Tonfilm *Rapt* (Frauenraub), zu dem Arthur Honegger und Arthur Hoérée eine ganz ungewöhnliche Musik komponierten. 1952 entstand ein weiteres „Filmgedicht“, *Arrière saison (Spätherbst)*. Erst 20 Jahre nach seinem Tode wurde *Ménilmontant* in Frankreich und den USA als einer der zentralen Stummfilme wiederentdeckt, doch im deutschen Sprachgebiet blieb Kirsanov weiterhin unbekannt.

Stenzl, Jürg: *Musik / Film: Konstellationen zwischen Claude Debussy / Dudley Murphy und Hans Werner Henze / Alain Resnais*. München: Text + Kritik 2016, 376 S.

Stenzl ist davon überzeugt, dass bedeutende Filme nicht nur anzusehen, sondern auch – mit „gespitzten Ohren“ – anzuhören sind. Dieser Überzeugung liegt die Einsicht zugrunde, dass sich eine wissenschaftliche Beschäftigung mit dem Thema „Musik und Film“ lohnt – und zwar sowohl für die Musik- und Filmgeschichte generell als auch insbesondere für die Rezeptionsgeschichte der Musik. Vom frühen Stummfilm und deutschen „Bergfilm“ über die Nouvelle Vague bis zum Operettenfilm greifen Jürg Stenzls Studien einzelne konkrete Beispiele heraus und zeigen auf methodisch kluge Art und Weise die vielfältigen wechselseitigen Konstellationen zwischen Film und Musik auf – mit immer wieder ganz überraschenden Erkenntnissen. Stenzl, Jürg: Mozarts Filmdébut als Endspiel: *La Mort de Mozart* (1909). In: *Musik und Ästhetik* 21 [= 82], April 2017, S. 39–50.

Mozart's Film Debut as an Endgame: *La Mort de Mozart* (1909) – The earliest Mozart film, until now usually ascribed to Louis Feuillade, which Étienne Arnaud made in 1909 for Gaumont, deals with what later became a typical subject: Mozart's final, incomplete *Requiem*. The decisive aspect here is that the music for this film, arranged and recorded by Paul Fosse (duration: 12–13 minutes) can be completely reconstructed. Paul Fosse's choice of music gives the story of Mozart's requiem and death, filmed in a conventionally linear fash-

ion, a dramaturgical structure through the music. Pointing beyond the film itself, this indicates that the time of the silent film featured widely varied approaches to musical accompaniment (“adaptations”). They can be researched and constructed using the recordings of music for over 1600 silent films for which Paul Fosse “adapted” “the music at the Gaumont Palace.

Stock, Robert: Musik-filmische Teilhabekonstellationen als Partizipationsversprechen und situiertes Wissen in *The Queen of Silence* (2014) und *And-Ek Ghes...* (2016). In: *Paragrana* 28,1, 2019, S. 153–174.

Der Beitrag geht der Frage nach, wie (illegitime) städtische Räume zu Schauplätzen einer Reflexion von Teilhabe werden können, wenn sich Prozesse des Filmemachens, Tanzens und Musik-Hörens miteinander verschränken. Es wird dafür argumentiert, Partizipation im Kontext dokumentarischer Bewegtbild-Produktionen als prozessual wie auch medial hergestellte Teilhabe zu konzeptualisieren. Die Analyse audiovisueller Teilhabekonstellationen, durch die sonische Körper mit konsti-

tuiert werden, konzentriert sich auf zwei Filme: In *The Queen of Silence* (Agnieszka Zwieflka) und *And-Ek Ghes...* (Philip Scheffner und Colorado Velcu) kommen Musikvideo-Ästhetik und Referenzen auf Bollywood eine entscheidende Rolle zu. Dabei stellt sich die Frage, wie diese Produktionen Repräsentationspolitiken hinsichtlich der Sinti und Roma in Polen und Deutschland durchdenken. Die Resonanzen zwischen Musik, Bewegtbild, tanzenden/hörenden Körpern und urbanen Räumen werden mit Blick auf die Sound Studies und Disability Studies kartiert und die Frage nach den Möglichkeiten einer situierten Wissensproduktion (Haraway) erörtert.

Stokes, Jordan: Rock composition and recomposition in *The Departed's* soundscape. In: *Music and the Moving Image* 6,2, 2013, S. 3–20.

Research on pop music in film has emphasized the transformative effect of the song on the film. Using examples from Martin Scorsese's *The Departed*, I argue that songs, too, are transformed by films, formally altered by a series of transformations I have labeled "Juxtaposition," "Truncation," and "Extension." Zur Filmmusik in *Scott of the Antarctic* (*Scotts letzte Fahrt*, Großbritannien 1948, Charles Frend).

In Ralph Vaughan Williams's music for the film *Scott of the Antarctic* and the "Sinfonia antartica" "developed from it, the superficially exhibited heroism surrounding the expedition team of Robert F. Scott is subtly undermined. The exotically inflected vocalises of the women's voices – literally a siren's song representing the strange and seductive realm of the Antarctic – unveil an erotic obsession behind the ambitions of the South Pole explorers that ultimately leads them towards death. In contrast to this, the beginning of the film as well as the fourth movement of the symphony ("Intermezzo") portray an equally feminized pastoral idyll connected to the English countryside, which is destroyed by Scott's adventurous spirit revealing itself as an irrational and compulsive drive. Stoppe, Sebastian (Hrsg.): *Film in Concert: Film Scores and their Relation to Classical Concert Music*. Glückstadt: Verlag Werner Hülsbusch 2014, 207 S. (AV-Medien.).

This book wants to explore the nature of film music and its relation to classical music. How is film music perceived today? Does film music have its place on its own – uncoupled from its original film – in the concert hall? And how does film music relate to other musical genres in the 19th and 20th century?

Stoppe, Sebastian: John Williams's Film Music in the Concert Halls. In: *John Williams: Music for Film, Television and the Concert Stage*. Ed. by Emilio Audissino. Turnhout: Brepols 2018, S. 95–116 (Contemporary composers. 1.).

Film music has its roots in late-romantic concert music. A number of composers of so-called "serious music" also composed for the film. And some Golden Age film composers came from the concert-music realm and, once they started their association with Hollywood, continued to pen works for the concert

stage too. Film music had to struggle for a long time against the prejudice that saw it as music not to be taken seriously; it was regarded as "neglected art". Nevertheless, film-music concerts have experienced a blossoming in the recent years. There is a large variety, from programmes that only perform film music in concert halls without any additional element to large-scale events in multi-purpose halls where film music is accompanied by film clips or provides the live accompaniment to entire films. This chapter examines the role of John Williams's film scores in this context. Are there any special features of Williams's film music that make it particularly suitable to the concert hall? How does the performance practice of his film music differ in comparison to classical concerts? Are there any pieces that are played more frequently than others, and if so, why?

Review of: Shaw-Miller, Simon: *Eye hEar the Visual in Music*. Farnham: Ashgate, 2013, xvi, 207 S.; Albright, Daniel: *Panaesthetics: On the Unity and Diversity of the Arts*. New Haven/London: Yale University Press 2014, xi, 321 S. (Anthony Hecht Lectures in the Humanities.); *The Routledge Companion to Music and Visual Culture*. Ed. by Tim Shephard & Anne Leonard. New York/London: Routledge, 2014, xviii, 391 S.

[Excerpt:] Celebrating the current explosion of productivity in the field of music and visual culture, Tim Shephard and Anne Leonard, ed-

itors of the impressively wide-ranging *Routledge Companion to Music and Visual Culture*, cite the recent deregulation of methodologies and materials, and the chronological and geographical expansion of interests in the field. But they also underline the challenges presented by deregulation and proliferation: “To what extent do the different parts maintain distinct characteristics even as they converge or hybridise into new forms? How should such subjects be taught, within a disciplinary structure that may not yet be sufficiently flexible to accommodate inter-arts enquiry? And, on a practical level, how many art historians can claim equal mastery in musicology, or vice versa? How can we ensure the production of worthwhile, responsible scholarship that also remains intelligible, accessible, and (above all) useful to researchers in both fields and beyond?”

Sylvanus, Emaeyak Peter: Prefiguring as an indigenous narrative tool in Nigerian cinema. An ethnomusicological reading. In: *Ethnomusicology: Journal of the Society for Ethnomusicology* 63,2, 2019, 2, S. 159–183.

Prefiguring entails the use of music to predict dialogue and scenes in film. It is prevalent in the cinematic productions of both the ethnic-based film industries in Nigeria and mainstream Nollywood. Theoretically, prefiguring is a function of indigenous storytelling practices, the appropriation of which conjures up layers of meaning for the local practice, practitioners, and audiences. Relying on in-depth textual analyses, composers’ accounts, and relevant literature, I argue that prefiguring is a concept of major theoretical importance to the study of music in Nigerian cinema, not least because its existence and efficacy strongly support notions of a localized film music practice. (Vorlage)

Sylvanus, Emaeyak Peter / Eze-Emaeyak, Obi-ocha Purity: The business of film music in mainstream Nollywood: competing without

advantage. In: *Journal of Cultural Economy* 11,2, 2018, S. 141–153.

This article addresses the business of film music in mainstream Nollywood. It does so by focusing on the materiality of the industry as an institution: its social organisation and systems of film music production; markets; networks; and power relations. Specifically, the arguments rely on social organisational theories, and economic concepts such as vertical integration and market competition alongside inferences from interviews with insider-practitioners. Findings reveal that the Nollywood film music industry is characterised by non-institutionalised vertical integration within a perfectly competitive market in which its film music composers are, essentially, competing without advantage.

“Structure of the film based on the music theory.”

In japan. Schrift.

Abstract: This document describes the structure of a movie based on the Generative Theory of Tonal Music (GTTM). Various research of summaries of a movie have been developed, it has not easy to representation a relationship of case and effect between scenes. We propose the method to represent structure of a movie by using Time-Span Tree of GTTM, and we design the rules for analyzing the structure of a movie.

“Method of structuring a film based on the Generative Theory of Tonal Music.”

In japan. Schrift.

Abstract: In this paper, we propose a movie summarization system based on the Generative Theory of Tonal Music (GTTM). In this system, we proposed a rule which reproduction human's cognitive analysis by grouping scenes and get a tree structure (time-span tree) of the entire movie. We propose a

method to summarize the movie by time-span tree of the movie, and verified this system can be created a summary of movie while preserving the important scene to the understanding of the contents.

Tambling, Jeremy: *Opera, Ideology, and Film*. Manchester: Manchester University Press / New York: St. Martin's Press 1987, 223 S.

Tambling, Jeremy (ed.): *A Night in at the Opera: Media Representations of Opera*. London: John Libbey 1994, iii, 310 S. (The Arts Council of England.).

Offering an arresting range of accounts by specialists in music, media, and popular culture on how the popular arts have represented opera, this book raises issues about the sociology of music and its implications for television and video culture. It looks at the relationships between serious and popular music, the desire of some composers to work in the latter while being engaged in more classical composition, and the love-hate relationships between Hollywood and La Scala.

Thiel, Wolfgang: Zwischen „Hochofen-Musik“ und Orchesterklängen. Hanns Eislers Arbeit als Komponist und „Musikreporter“ für Joris Ivens' Film *Pesn o Gerojach/Heldenlied/Die Jugend hat das Wort/Komsomol* von 1932. In: Hanns Eisler: angewandte Musik. München: Ed. Text + Kritik 2012, S. 82–99.

Hanns Eisler's score *Pesne o Gerojach/Song of Heroes* (1932), written for Joris Ivens' documentary film, has been little-noticed up 'til now. It contains four pieces for orchestra of differing origins and “Magnito-Komsomolzen-Song”, a ballade for choir with lyrics by Sergej Tretjakow, was specially composed for the finale of the film. Stylistically, the score is on a par with other film music by Eisler such as *Kuhle Wampe*. Prominent features are the novel sound of a jazz band-like orchestration, the economy of the texture, the striking nature of the melodic and harmonic ideas. His film music implies unsentimental, combative gestures, portraying social attitudes which glorify the supposed enthusiasm of the builders from Magnitogorsk. (Vorlage)

Thiel, Wolfgang: Filmmusik im Geiste Eislers: Andre Asriel und die DEFA. In: *Eisler-Mitteilungen*, 68, 2019, S. 20–22.

Wolfgang Thiel explores Andre Asriel's work as a composer for the East German film company DEFA, which began in 1955 and spanned fourteen feature films and two dozen documentaries. As Asriel himself admitted, a key influence was the book *Composing for the Films* by his teacher Eisler. Without copying Eisler, he adopted a number of his aesthetic devices such as "dramaturgical counterpoint" and the composition of film music in standard forms. Typical of Asriel's film scores are a contrapuntal, quasi-Baroque structure, the use of popular music styles, and bespoke, selective instrumentation that avoids the standard sound of a film orchestra.

Titus, Joan: *The Early Film Music of Dmitry Shostakovich*. New York/Oxford: Oxford University Press 2016, xv, 253 S.

In the late 1920s, Dmitry Shostakovich

emerged as one of the first Soviet film composers. With his first score for the silent film *New Babylon* (1928–29) and the many sound scores that followed, he was situated to observe and participate in the changing politics of the film industry and negotiate the role of the film composer. In *The Early Film Music of Dmitry Shostakovich*, author Joan Titus examines the relationship between musical narration, audience, filmmaker, and composer in six of Shostakovich's early film scores, from 1928 through 1936. Titus engages with the construct of Soviet intelligibility, the filmmaking and scoring processes, and the cultural politics of scoring Soviet film music, asking how listeners hear and see Shostakovich. The discussions of the scores are enriched by the composer's own writing on film music, along with archival materials and recently discovered musical manuscripts that illuminate the collaborative processes of the film teams, studios, and composer. *The Early Film Music of Dmitry Shostakovich* commingles film/media studies, musicology, and Russian studies, and is sure to be of interest to a wide audience including those in music studies, film/media scholars, and Slavicists.

Tobias, James: Isolated Tracks and Media Clouds: Surveying Problems and Positions in Music, Sound, and the Moving Image before and after Digital 'Convergence'. In: *Music, Sound, and the Moving Image* 9,2, 2015 (Special Issue: "Musical Screens: Musical Inventions, Digital Transitions, Cultural Critique". Guest ed.: James Tobias), S. 101–114.

This special volume of *Music, Sound, and the Moving Image* collects seven broadly ranging essays in the interest of putting problems in, and orientations for, specific lines of research in conversation. Beginning with Nicholas Reyland's work on screen scoring as style in Hollywood blockbusters, and ending with Benjamin Robertson's software studies-oriented critique of media composition, the work collected here stresses the contemporary movement as particularly apposite for staking out problematics, driving questions, and ten-

tative answers across these lines of inquiry. On one hand, massive growth has occurred in scholarship across those fields typically represented in MSMI, while new journals and disciplinary approaches continue to appear; both problems and value proliferate in scholarly work where music and sound meet or inform screen cultures. On the other, recent scholarly handbooks surveying these productively noisy conversations on musicality, sound and audition, and audiovisuality provide, if not a common reference framework, a highly configurable guide to navigating historical and contemporary research at those epistemological inflection points where media studies and cultural and technocultural studies move towards or away from one another and where music, sound, and audiovisual studies becomes ever more vital work.

„Filmmusik als Grundlage des kunsttherapeutischen Trainings zur Entwicklung der persönlichen Reflexion im Jugendalter.“

In kyrill. Schrift. – *Abstract*: The article seeks to find and test the psychological and pedagogical methods development mechanisms of personal reflection in adolescence. Such tool

development is the creation of art therapy practice on the basis of cinematic synthesis of the arts. Theoretical basis of maintaining the various reflexive positions in the perception of cinema is the functional role of music in film. The authors examine in detail the formation of the main functions of music in film and the birth of an independent genre – film music. As a result, the theoretical analysis and experimental work for the first time in the literature the authors argue that the special functions of film music, such as illustrative and distancing, may contribute to the harmonious development of mechanisms for personal reflection through the actualization of identification and isolation. Testing the effectiveness of the training was conducted on the basis of the group of 2nd year students of the Moscow State Pedagogical University and showed promising increased use of this technique in the age aspect, and in terms of changes in special orientation (for example, in groups of psycho-correction)

Torras i Segura, Daniel: Los spots musicales. Diferencias con el género cinematográfico musical. / Musika iragarkiak. Musika genero zinematografikoarenak ezberdintasunak. / Musical commercials. Differences with musical cinematographic genre. In: *Zer* 18,35, 2013, S. 215–232.

Musicals are currently used as mechanism of attraction and persuasion. The musical commercials feature iconic attributes and codes related to the musical film genre. But although the main references of the musicals, as well as their uses, are usually kept in commercials, the semiotic interpretation and structure vary considerably with respect to films. These modifications are due to the influence of parameters such as the duration, the purpose, the form of reception, the origin of the script and its structure. A qualitative comparison between musical film and musical commercials is to argue this difference of interpretation.

Torras i Segura, Daniel: La esencia del silencio audiovisual. ‘El silencio’ de Bergman como ejemplo. In: *Comunicación: Revista Internacional de Comunicación Audiovisual, Publicidad*

y *Estudios Culturales* 12, 2014, S. 82–93.

Zu Ingmar Bergmans Spielfilm *Tystnaden* (*Das Schweigen*, Schweden 1963).

Silence is an audiovisual expressive matter, which is always significant. The essence of silence is contrast, which is needed to perceive it; ambiguity, because silence cannot make reference to one particular object or concept; and communicative context-dependence. Audiovisual silence – silence located in an audiovisual product – has three more features: constant meaning, because it is the will of the filmmaker; multiple interaction, because it is modulated by all audiovisual elements; and, finally, present anchored, because of the impossibility of relating to other film time than the ‘here and now’.

Torras i Segura, Daniel: La transformación del género audiovisual musical en la red: Los lipdubs como vestigios del cine musical. In: *Comunicación y Hombre: Revista Interdisciplinar de Ciencias de la Comunicación y Humanidades* 11, 2015, S. 115–128.

This article determines what remains of the musical film as genre in the new musical formats of the 2.0 communication. The citizen public / creator of the new communicative paradigm produces and promotes the lipdubs with a semi-amateur perspective, an ideological or corporative promotion, familiar surroundings, an aesthetic of improvisation, and the anonymous and collective character of their participants. New musical formats represent a transition from the musical film to the network in which the essential attributes of the former are maintained, but where its connotations and some relevant traits change, becoming a ludic presentation of the society itself.

In dän. Sprache. – *Abstract*: Mapping a span of extrinsic and intrinsic relationships between music and visual arts (including film), the article discusses ways of comparative analysis. It takes its starting point in concrete examples and proposes some provisional categories for this kind of aesthetic examination. Important for the comparative analysis is that

it includes the specific sensory substance of the visual and auditory elements and sticks to a similar analytic level for both art forms. On the other hand, identifications of historical and structural convergence can assume an embarrassing concrete form without taking into account that often they should be located at a rather vague and overarching level. Acknowledging the necessity and usefulness of analogies, the article also warns against the obvious pitfalls involved.

Turk, Tisha: Transformation in a New Key: Music in Vids and Vidding. In: *Music, Sound, and the Moving Image* 9,2, 2015 (Special Issue: "Musical Screens: Musical Inventions, Digital Transitions, Cultural Critique". Guest ed.: James Tobias), S. 163–176.

'Vids', a genre of remix that began as slideshows and VHS tapes and is now a widespread digital practice, combine clips from movies or television with carefully chosen music (usually popular songs) to celebrate, interpret, or critique the video source. Vids are defined by music: vidders' use of music helps to distinguish vids and the vidding tradition from other forms of remix video. Yet most fan studies scholarship on vidding has focused on vids' relationships with their visual source texts and paid relatively little attention to music. In contrast, I argue that music plays a key role in both the creative processes of vidders and the rhetorical and emotional effects of vids on their intended audiences. And, in addition to contributing to vids' transformations of their visual source material, music is itself transformed through integration into a vid. This analysis suggests that – at least for their intended audiences – vids do constitute transformative and thus fair use of copyrighted music.

Vernallis, Carol: *Unruly Media: YouTube, Music Video, and the New Digital Cinema*. New York: Oxford University Press 2013, ix, 354 S.

Argues that we are the crest of a new international style in which sonic and visual parameters become heightened and accelerated. This audiovisual turn calls for new forms of attention. Post-classical cinema, with its multi-plot narratives and flashy style, fragments under the influence of audiovisual numbers and music-video-like sync. Music video becomes more than a way of selling songs. YouTube's brief, low-res clips encompass many forms and foreground reiteration, graphic values and affective intensity. These three media are riven by one another: a trajectory from YouTube through music video to the new digital cinema reveals commonalities, especially in the realms of rhythm, texture and form.

Vicente, Victor A.: Strange new worlds? Musical instruments and cultural and temporal coding in Indian and Turkish science-fiction film. In: *Musica humana* 3,1, 2011, S. 41–59.

Sci-fi's extra-planetary scope has ensured it a global audience, inspiring the rise of the genre in many unexpected places. This article explores the emergent worlds of science fiction cinema in India and Turkey, comparing the local uses of music to those of the West and Japan. Specifically, it examines the way indigenous timbres are used in the context of symphonic and digitized sound to code temporal and cultural otherness. Analyzing scenes from "Stargate", the Bollywood romance "Love Story 2050", and the Turkish space comedy G.O.R.A. the essay investigates how musical instruments, orchestration, and timbre are used to re-envision the past, construct the present vis-à-vis other world powers, and not only imagine potential futures, but indeed forge new trajectories in history.

Viejo, Breixo: La libertad de la imaginación: música y sonido en el cine de Luis Buñuel. In: *Bulletin of Spanish Studies: Hispanic Studies and Researches on Spain, Portugal and Latin America* 93,4, 2016, S. 639–656.

Dependiendo de las condiciones socioeconómicas en las que realizó su obra—ya fuera en Francia, España, México o Estados Unidos—Buñuel empleó composiciones originales escritas específicamente para sus películas, reutilizó obras fundamentales de música clásica, o decidió prescindir de todo tipo de acompañamiento musical extradiegético. Este artículo señala que fue precisamente esta decisión de rechazar un uso convencional de la música ilustrativa lo que permitió al maestro español alcanzar un estilo plenamente surrealista en sus últimos largometrajes, desde *Diario de una camarera* (1964) hasta *Ese oscuro objeto del deseo* (1977).

Villa, Sara: Practices and the Dawn of the New American Cinema. In: *The Oxford Handbook of Critical Improvisation Studies*. Ed. by George E. Lewis & Benjamin Piekut. Bd. 2. New York/Oxford: Oxford University Press 2016, S. 322–337 (Oxford Handbooks.).

In 1960, cinema critic Jonas Mekas welcomed the advent of the New American Cinema, praising the wave of independent movies produced in late 1950s for their casual and fragmentary nature. The key feature of these productions, which was particularly remarkable in the case of two major features—*Shadows* by John Cassavetes and *Pull My Daisy* by Alfred Leslie and Robert Frank—was an anti-Hollywood style that relied on improvisatory practices affecting all structural levels: from the acting to the montage, from the photography to the soundtrack. The style of this “spontaneous cinema” was a pastiche of multiple improvisatory practices, borrowed from bebop, beat poetry, and Stanislavsky’s acting techniques, which defied traditional cinematographic narratives. A close analysis of *Shadows* and *Pull My Daisy* reveals the multiple forms of improvisation that shaped these movies’ “spontaneous poetics” and the ways in which they both managed to bring improvisation into film art.

Volmar, Axel: Klanglandschaften der *new frontier*. Auditive Zukunftsvisionen und das Verhältnis zwischen Avantgarde und Kulturindustrie im US-amerikanischen Science-Fiction-Film. In: *Act: Zeitschrift für Musik & Performance* 6, 2015, 20 S.; [[URL](#)].

Der Beitrag thematisiert produktionsästhetische Strategien zur Darstellung auditiver Zukunftsvisionen im US-amerikanischen Science-Fiction-Film. Diese werden speziell anhand narrativer Wiederaufrufe des frontier-Topos behandelt, in denen insbesondere das Weltall zum Imaginationsraum einer letzten bzw. “New Frontier” stilisiert wurde, denn der frontier-Mythos stellt bis heute das maßgebliche Szenario dar, in dem wissenschaftlich-technischer Fortschritt im öffentlichen Diskurs der USA verhandelt wird. Anhand von Filmbeispielen aus den 1950er bis 1980er Jahren wird untersucht, auf welche Weise musikalische und akustische Signaturen zur Markierung unbekannter Zukünfte

entstanden. Dabei wird die These vertreten, dass die Erschließung neuer Klangwelten durch die US-Filmindustrie insbesondere auf Aneignungen ästhetischer Formen und medialer Praktiken aus dem Bereich der musikalischen Avantgarden basierte und die Produktion auditiver Zukunftsvisionen damit der gleichen ideologischen Struktur folgte, die der frontier-Mythos auf der Handlungsebene im Rahmen der fiktiven Eroberungen des Weltraums einnahm.

Wager, Jans B.: *Jazz and Cocktails: Rethinking Race and the Sound of Film Noir*. Austin: University of Texas Press, 2017, x, 163 S.

Explores the use of jazz in film noir, from its early function as a signifier of danger, sexuality, and otherness to the complex role it plays in film scores in which jazz invites the spectator into the narrative while simultaneously transcending the film and reminding viewers of the world outside the movie theater. Jans B. Wager looks at the work of jazz composers such as Miles Davis, Duke Ellington and Billy Strayhorn, Chico Hamilton, and John Lewis as she analyzes films including *Sweet Smell of Success*, *Elevator to the Gallows*, *Anatomy of a Murder*, *Odds Against Tomorrow*, and considers the neonoir *American Hustle*. Wager demonstrates how the evolving role of jazz in film noir reflected cultural changes instigated by black social activism during and after World War II and altered Hollywood’s standard representations of the social world.

Walden, Joshua S.: Lip-sync in *Lipstick*. 1950s popular songs in a television series by Dennis Potter. In: *The Journal of Musicological Research* 27,2, 2008, S. 169–195.

In the 1993 television production *Lipstick on Your Collar*, screenwriter Dennis Potter foregrounds popular 1950s rock-and-roll hit songs, creating what he has called a “home-made musical.” Characters break out in song – but instead of singing, they move their mouths in synchrony with the voices of pop idols. A study of the effects of Potter’s technique, with help from the literatures of opera and film theory and the history of ventriloquism, shows that the songs in *Lipstick on Your Collar* gain fresh meaning in their new context through the medium of lip-syncing, becoming spontaneous expressions of the characters’ psychologies. Walker, Alison Tara: Toward a theory of medieval film music. In: *Medieval Film*. Ed. by Anke Bernau & Bettina Bildhauer. Manchester/New York: Manchester University Press 2009, S. 137– 157.

Walker, Elsie: *Understanding Sound Tracks Through Film Theory*. New York/Oxford: Oxford University Press 2015, ix, 435 S.

[B]reaks new ground by redirecting the arguments of foundational texts within film theory to film sound tracks. Walker includes sustained analyses of particular films according to a range of theoretical approaches: psychoanalysis, feminism, genre studies, post-colonialism, and queer theory. The films come from disparate temporal and industrial contexts: from Classical Hollywood Gothic melodrama (*Rebecca*) to contemporary, critically-acclaimed science fiction (*Gravity*). Along with sound tracks from canonical American films including *The Searchers* and *To Have and Have Not*, Walker analyzes independent Australasian films: examples include *Heavenly Creatures*, a New Zealand film that uses music to empower its queer female protagonists; and *Ten Canoes*, the first Australian feature film with a script entirely in Aboriginal languages. *Understanding Sound Tracks Through Film Theory* thus not only calls new attention to the significance of sound tracks, but also

focuses on the sonic power of characters representing those whose voices have all too often been drowned out. *Understanding Sound Tracks Through Film Theory* is both rigorous and accessible to all students and scholars with a grasp of cinematic and musical structures. Moreover, the book brings together film studies, musicology, history, politics, and culture and therefore resonates across the liberal arts.

Watts, Catrin: Blurred lines. The use of diegetic and nondiegetic sound in *Atonement* (2007). In: *Music and the Moving Image* 11,2, 2018, S. 23–36.

Zu Joe Wrights Spielfilm *Atonement* [Abbitte]. This paper will focus on *Atonement* and how the sound world is so inexplicably linked to our interpretation of events. In particular, I will investigate how the typewriter acts as a pivot between diegetic sound and nondiegetic music. What becomes clear in *Atonement* is that the typewriter sound is indicative of an imagination running wild. It is initially connected to Briony in the opening scene, but it is also used when Robbie types his explicit letter to Cecilia, Briony's older sister. To aid his writing, Robbie puts Puccini's "O Soave Fanciulla" "on the record player, but as he pours his desire onto the page, the sound of the typewriter and the record blur the lines between diegetic and nondiegetic sound, thereby calling into question what Robbie can and cannot hear. This is not the only occurrence of this technique, and just as the typewriter acts to blur the lines between diegetic sound and nondiegetic music, so too does the film blur the lines between reality and fiction.

Wegele, Peter: Duke Ellington, the film composer. In: *The Soundtrack* 6, March 2014, S. 83–94.

In the quantity of Duke Ellington's oeuvre, his film music is only a small aspect. Never-

theless his first appearances on-screen were crucial to get nationwide attention. With the help of his impresario Irving Mills, he was the first African American musician to be featured in 'white' major Hollywood productions. Ellington was a visionary as a musician and as an entrepreneur. He also used his growing popularity to promote an image of African American culture and dignity that was completely different from the racist clichés that were cultivated in minstrel or blackface. Ellington managed to keep his band together even in the late 1940s when most other big bands had to give up. His sensational comeback concert in Newport 1956 catapulted him into new stardom and with this he became interesting again for Hollywood. In 1959 he was assigned by Otto Preminger to score his courtroom drama *Anatomy of a Murder* (1959). With this, he was the first African American to write a non-diegetic film score for a major Hollywood feature film. Some films such as *Black and Tan Fantasy* (Murphy, 1929) or *Anatomy* are discussed in detail.

Wegele, Peter: *Max Steiner: Composing, "Casablanca" and the Film Music of the Golden Age*. Lanham/Boulder/New York: Rowman & Littlefield 2014, x, 259 S.

Wegele unveils the man behind dozens of memorable scores, offering a portrait of the composer from a personal and professional point of view. Beginning with background on the history and techniques of film music, Wegele then examines Steiner's musical innovations, some of which are still used today. This is followed by a thorough analysis of one of Steiner's legendary scores – the music to *Casablanca*. More than eighty transcribed musical examples demonstrate how efficient, musically clever, and tremendously skilled the composer was when he wrote this score. Drawing on quotes, notes from production files, and excerpts from the original script for *Casablanca*, Wegele provides insight not only into the production history of the film, but also into the workings of Hollywood during the Golden Age.

Cinema is the form of entertainment that can be, above all, identified with the twentieth century. It gradually replaced theatre as a popular form of performed storytelling, and replaced opera too as the new “multimedia” art form, soon incorporating music as one of cinema’s privileged means to co-tell stories. Speaking of music, jazz was as sensational a twentieth-century novelty as cinema was. The two soon teamed up, and jazz, with its various incarnations and styles, has accompanied

the moving images and the cinematic narratives throughout the decades. It was inevitable that these two iconic art/entertainment forms, jazz and cinema, should meet, blend, cooperate, and have a reciprocal influence. While the early film music was mostly symphonic and inspired by the late-romantic nineteenth-century idiom, jazz and Afro-American music – in various form and with diverse and changing racial/social connotations – appeared onscreen even before the landmark film *The Jazz Singer* (1927), which officially launched the sound era.

White, Daniel: Middle-earth music: The sonic inhabitation of a fantasy world. In: *Participations* 13,1, 2016, S. 488–511 (online).

This article seeks to provide a deeper understanding of the cultural inhabitation of imaginary worlds by examining the role that music and its consumption play in these processes. Focussing largely on Howard Shore’s music for Peter Jackson’s two film trilogies set in Tolkien’s Middle-earth, the article relies on data found through web ethnography and a researcher-designed questionnaire targeted at fans of the franchise. Soundtrack consumption and listening practices are analysed to identify how and why this film music is listened to, as are the ways in which music enables a further sonic level of the inhabitation of Middle-earth. Placing Shore’s music along-

side other contributions to Tolkien’s world poses questions of authority, authenticity and canon, finding that not every person’s Middle-earth sounds the same. Results show that, for many, the world built by music functions as an imagined or spiritual home to which they are transported and which provides numerous personal and practical benefits.

Wierzbicki, James Eugene: Narrative cinema’s “sounds of silence”. Variations on the POA. In: *Sound Studies* 2,2, 2016, S. 137–150.

Cinema has often depicted situations in which a character encounters silence, but almost never are these depictions actually silent. The complete muting of a soundtrack is a gesture so disruptive of the movie-going norm that filmmakers, wisely, have seldom attempted it; filmmakers seeking to depict a dramatically meaningful absence of sound have often relied extensively on a sonic presence. This essay focuses on three cinematic tropes in which the idea of silence, or “quasi-silence”, is communicated by means of sound. One of these tropes deals with “quasi silence” caused by environmental factors. Another trope, usually associated with fictional characters who experience high trauma, deals with psycho-

logically induced “quasi silence.” The third trope, widely varied in execution yet consistent in affect, represents the point of view – or, rather, the point of audition – of filmic characters whose “quasi silence” has neurological causes. (Vorlage)

Wierzbicki, James Eugene (ed.): *Double Lives: Film Composers in the Concert Hall*. London/New York: Routledge 2019, xii, 254 S.

Collection of fifteen essays dealing with ‘iconic’ film composers who, perhaps to the surprise of many fans of film music, nevertheless maintained lifelong careers as composers for the concert hall. Featured composers include Erich Wolfgang Korngold, Franz Waxman, Miklós Rózsa, Bernard Herrmann, Nino Rota, Leonard Rosenman, and Ennio Morricone. Progressing in chronological order, the chapters offer accounts of the various composers’ concert-hall careers and descriptions of their concert-hall styles. Each chapter compares the composer’s music for films with his or her music for the concert hall, and speculates as to how music in one arena might have affected music in the other. For each composer discussed in the book, complete filmographies and complete works lists are included as appendices.

Inhalt: Erich Wolfgang Korngold: the last prodigy / Brendan G. Carroll – The concert works of Georges Auric, 1945 to 1983 / Colin Roust – Looking for Mr. Hyde: Franz Waxman’s musical activities beyond film / Ingeborg Zechner – The double life of Miklós Rózsa’s Violin concerto and *The Private life of Sherlock Holmes* / Stephen C. Meyer – Bernard Herrmann’s concert music, 1935 to 1975: an overview / Samuel Cottell – Nino Rota: neo-classicist, classical modernist, or pragmatic pluralist? / Carl Alexander Vincent – Jerome Moross: the concert hall and stage works / Mariana Whitmer – Don Banks: Hammer horror and serial composition / Michael Hooper – Modern composer off the screen: Leonard Rosenman’s concert music / Reba A. Wissner – The maestro of multiple voices: the ‘absolute music’ of Ennio Morricone / Felicity Wilcox – ‘I did it for fun’: André Previn, crossover musician / Frédéric Döhl – Wojciech Kilar: ‘I am like a Doctor Jekyll and Mister Hyde’ / Bogumila Mika –

Winters, Ben: *Music, Performance, and the Realities of Film: Shared Concert Experiences in Screen Fiction*. New York/London: Routledge 2014, viii, 260 S. (Routledge Research in Music. 9.).

This book examines the relationship between narrative film and reality, as seen through the lens of on-screen classical concert performance. By investigating these scenes, wherein the performance of music is foregrounded in the narrative, Winters uncovers how concert performance reflexively articulates music’s

importance to the ontology of film. The book asserts that narrative film of a variety of aesthetic approaches and traditions is no mere copy of everyday reality, but constitutes its own filmic reality, and that the music heard in a film's underscore plays an important role in distinguishing film reality from the everyday. As a result, concert scenes are examined as sites for provocative interactions between these two realities, in which real-world musicians appear in fictional narratives, and an audience's suspension of disbelief is problematised. In blurring the musical experiences of onscreen observers and participants, these concert scenes also allegorize music's role in creating a shared subjectivity between film audience and character, and prompt Winters to propose a radically new vision of music's role in narrative cinema wherein musical underscore becomes part of a shared audio-visual space that may be just as accessible to the characters as the music they encounter in scenes of concert performance.

Inhalt: Introduction: Film and Reality – Part I: *The Real versus the Reel:* 1. Real Performers: The Musician as Actor – 2. Reel Performers: Fictional Music and Musicians. – Part II: *Film and Life: The Mirror of Film:* 3. Moments of Desperation and Peril: Hollywood and Concert Performance – 4. Fantasizing, Visualizing, Miming: 'Fictional' Listening? – 5. Hearing Symphonies Cinematically. – Part III: *Film's Musical Identity:* 6. The Concert as Drama: Structuring and Shaping Narrative7 Film Viewed from the Podium: Music and the Ontology of Movies.

Wißmann, Friederike: *Deutsche Musik*. Berlin: Berlin-Verlag 2015, 510 S.

Darin: Filmmusik / 249. – Was ist das Charakteristische an der deutschen Musik? Gibt es sie überhaupt? Welches Verhältnis haben die Deutschen zur Musik, und warum bedeutet sie ihnen so viel? Das umfassende Standardwerk zu Mythos und Wirklichkeit der deutschen Musik. Friederike Wißmann lässt die große Tradition von Bach bis Stockhausen lebendig werden. Volkslied, Schlager und Tanzmusik finden ebenso Berücksichtigung wie Nationalhymnen, Fußballgesänge, deutsche Filmmusik in Hollywood oder Punk, Rock und Techno. Die renommierte Musikwissenschaftlerin legt eine große Mentalitätsge-

schichte der Deutschen und ihrer Musik vor. Sie widmet sich nicht nur Werken und Lebenswegen deutscher Komponisten und Musiker, sondern erzählt die Geschichte vom bürgerlichen Konzert über den Wandel der musikalischen Formen bis zur Bedeutung deutscher Musikvereine, von der Entstehung der Orchester über den Instrumentenbau bis zur Geschichte des Musiktheaters, vom größten Heavy-Metal-Festival Wacken über die TV-Castingshows bis hin zu den Kuriositäten des deutschen Schlagers. Ob himmlisch oder käuflich, ob widerständig oder diktiert, ob gesellig, hymnisch oder komisch – Friederike Wißmann entwirft ein einzigartiges, facettenreiches und kluges Panorama des deutschen Klangs. Wissner, Reba A.: *We Will Control All That You Hear: "The Outer Limits" and the Aural Imagination*. Hillsdale, NY: Pendragon Press, 2016, viii, 241 S. (Music in Media Series. 3.)

From 1963–1965, *The Outer Limits*, an anthology television show co-created by Joseph Stefano and Leslie Stevens, was broadcast on ABC. Through the use of unconventional and newly invented instruments and household objects to produce unique sounds, the show not only looked different from most television of the time, but it sounded different as well. *We Will Control All That You Will Hear: The Outer Limits and the Aural Imagination*, discusses the use of music within the series, offering multiple readings of the ways that music is used. This book focuses not only on the ways that newly composed scores and stock music were utilized in the series, but also how the music enhances and interacts with what we see and hear onscreen.

Inhalt: 1. You Are About To Participate in a Great Adventure / 1 – 2. From Stoney Burke and One Step Beyond to *The Outer Limits*. Cue Reuses / 33 – 3. From a Soft Blur to Crystal Clarity: Orchestration and Sound Design / 59 – 4. The Scores of Dominic Frontiere and Robert Van Eps / 81 – 5. The Scores of Harry Lubin / 153. – Appendix 1. Episode Information / 181. – Appendix 2. Recording Session Information / 203. – Appendix 3. Internal Flowchart for the First Season of *The Outer Limits* / 211.

Wood, Simon: *Scoring The Body: Psychoanalysis, Image Schemata, and the Syntax of the Narrative Film Score*. MA Thesis, Hamilton, Ontario, McMaster University 1999, 148 S.

Through an application of the theories of post-Freudian French psychoanalyst Jacques Lacan and American philosopher Mark Johnson's theory of "image schemata," this thesis will construct a methodology for the analysis of narrative film music. An overview of the relevant theoretical concepts is followed by illustrative musical examples. The views of film music composers, followed by a discussion of the interaction of visual and musical stimuli, will then serve as a foundation for the consideration of the role of a culturally dependent system of musical syntax in the construction of meaning within a film score. Finally, the interaction of these three concepts (psychoanalysis, image schemata and cultural syntax), is demonstrated in an analysis of the musical scores of two films: *Star Trek 11: The Wrath of Khan* (music by James Horner) and *The Piano* (music by Michael Nyman).

Wright, James K. / Rogers, Allyson: *They Shot, He Scored: The Life and Music of Eldon Rathburn*. Montreal/Kingston/London/Chicago: McGill-Queen's University Press 2019, xix, 362 S.

Eldon Davis Rathburn (1916–2008), one of the most multi-dimensional, prolific, and endlessly fascinating composers of the twentieth century, wrote more music than any other Canadian composer of his generation. During a long and productive career that spanned seventy-five years, Rathburn served for thirty

years as a staff composer with the National Film Board of Canada (1947–76), scored the first generation of IMAX films, and created a diverse catalogue of orchestral and chamber works. With the aid of extensive archival and documentary materials, *They Shot, He Scored* chronicles Rathburn's life and works, beginning with his formative years in Saint John, New Brunswick, and his breakthrough in Los Angeles in connection with Arnold Schoenberg and the LA Philharmonic Orchestra. The book follows his work at the NFB, his close encounters with some of the most celebrated international figures in his field, and his collaboration with the team of innovators who launched the IMAX film corporation. James Wright undertakes a close analytical reading of Rathburn's film and concert scores to outline his methods, compositional techniques, influences, and idiosyncratic approach to instrumentation, as well as his proto-postmodern proclivity for borrowing from diverse styles and genres. Authoritative and insightful, *They shot, he scored* illuminates the extraordinary career of an unsung creative force in the film and music industry. (Vorlage)

Inhalt: Introduction; 1. Formative Years: From Saint John to L.A. – 2. Early Years at the NFB: 1945–1952 – 3 The Unit B Years: 1952–1964 – 4. Career Crescendo: From Labyrinth to IMAX – 5. "Name Dropping": Encounters with Schoenberg, Varèse, Ives, Thomson, Sorabji, and Havergal Brian – 6. Covering His Tracks: Rathburn's Train Music – 7. Idiosyncrasies and Fascinatin' Rhythms: Music for Banjo, Jew's Harp, Flexatone, Historical Keyboards, and Calliope – 8. The Concert Music – 9. They Shot, He Scored: Looking Back and Looking Ahead. – Appendix I: Rathburn Filmography – Appendix II: Lists of Works – Appendix III: Rathburn Discography – Notes – Bibliography – Index.

Wright, Julie Lobalzo: *Crossover Stardom: Popular Male Music Stars in American Cinema*. New York/London: Bloomsbury Academic 2018, ix, 205 S.

Focuses on male music stars who have attempted to achieve film stardom. Crossover stardom can describe stars who cross from one medium to another. Although 'crossover' has become a popular term to describe many

modern stars who appear in various mediums, crossover stardom has a long history, going back to the beginning of the cinema. Lobalzo Wright begins with Bing Crosby, a significant Hollywood star in the studio era; moving to Elvis Presley in the 1950s and 1960s, as the studio system collapsed; to Kris Kristofferson in the New Hollywood period of the 1970s; and ending with Will Smith and Justin Timberlake, in the contemporary era, when corporate conglomerates dominate Hollywood. Thus, the study not only explores music stardom (and music genres) in various eras, and masculinity within these periods, it also surveys the history of American cinema from industrial and cultural perspectives, from the 1930s to today.

Inhalt: Introduction – The crooner film star: Bing Crosby – The rock 'n' roll film star: Elvis Presley – The country film star: Kris Kristofferson – The rap film star: Will Smith – The pop film star: Justin Timberlake.

Wulff, Hans J.: Militärmusiken im dramatischen Feld des Spielfilms. In: *Popularisierung und Artifizialisierung in der Militärmusik*. [Dokumentationsband zum gleichnamigen Symposium vom 6. bis 7. September 2011]. Hrsg. v. Michael Schramm. Bonn: Militärmusikdienst der Bundeswehr 2012, S. 1–18.

Militärmusik taucht fast ausschließlich in Filmen auf, die im „Milieu des Militärischen“ spielen oder die in einer erzählten Welt angesiedelt sind, in denen Militärs Machtpositionen innehaben. Wenige Beispiele, in denen der Auftritt von Militärkapellen zur Repräsentation staatlicher Macht gehören, ergänzen das Korpus. Militärmusik ist nicht „frei“, gehört nicht zum allgemeinen Repertoire von Musikern, die auch als Filmmusiken verwendet werden können, sondern sind oft stofflich

gebunden an ihre realen Milieus. Gleichwohl kann gezeigt werden, dass Militärmusiken im Kino in höchst differenzierter Weise in die dramatische Struktur von Filmen eingebunden sind. In den meisten Fällen werden sie schlicht reportiert, weil sie zu den natürlichen, kulturell vorgefundenen Elementen der dargestellten Welt zählen. In einer ganzen Reihe von Fällen aber werden sie mit subjektiven Bedeutungen aufgeladen oder zu einem Argument der Tiefenideologien ihrer Texte, was zugleich Schlaglichter auf tiefere kulturellen Bedeutungen von Militärmusiken wirft. Wulff, Hans J.: Über das Ende der Erzählung hinaus... Filmmusik und die Finalisierung von Texten. In: *Archiv für Musikwissenschaft* 70,1, 2013, S. 1–16.

In conveying the story of a fictional reality in which the viewer is from the outset invited to cognitively and emotionally participate, the successful transmission of narration-based texts is dependent on processes that forge hypothetical constructions and encourage the viewer's moral empathy with the main characters. At the story's conclusion the narration is not merely extended but rather contextually experienced within its dramaturgical and poetic boundaries. The article presents four strategies of musically supported or music-based forms in a narrative film's final scenes in which they remain reflexively related to the text, positioned, as it were, above the story.

Karaoke singing is a cultural phenomenon that became popular in highly developed capitalist societies in the 1970s. It establishes a frame of musical acting in the public sphere of leisure, and produces a collective immediacy and conviviality in live audiences while highlighting the subjective disposition of the singer. Karaokists not only try to imitate their chosen performer; they often generate an obvious aesthetic distance to the recorded song through the use of exaggeration, overacting, and substandard vocals, thereby exploiting the music as a vehicle for their own subjective expression. Analyses of numerous karaoke scenes from films seek to expose the correlation between song, showmanship, personal-

ized projection, and self-representation.

Wulff, Hans J.: Vom Singen, vom Mechanis-
chen und von den Emotionen. Überlegungen
zu Fernand Légers *The Girl with the Prefabri-
cated Heart* aus Hans Richters Omnibusfilm
Dreams That Money Can Buy (1947). In: *Archiv
für Musikwissenschaft* 75,3, 2018, S. 179–192.

Fernand Léger's *The Girl with the Prefabri-
cated Heart* from Hans Richter's episode
movie *Dreams that Money Can't Buy* (1947)
connects the after-war reality to the impor-
tance of the mechanical and the dominant
role of objects in constituting the social world
in the avangarde projects of the 1920s. The
film combines these themes with the disinte-
gration of the category of sovereignty of the
subject and the substitution of the human by
mannequin body. It is based on a popular
dandy song performed by Libby Holman and
Josh White, two music stars of the 1940s,
telling a romantic love story with a fatal end-
ing. The song is told in animated scenes of
mannequin dolls and abstract paintings and
objects from Léger's oeuvre, in the end un-

folding to a collage of discursive differences like to popular vs. the avanguardistic, the clash between time concepts of music and image, heteronomous concepts of femininity, love and the narcissistic, and changing relations between the real and the imaginary, especially in the pretended subjectivity of dreaming.

Yeh, Yueh-yu: Historiography and Sinification: Music in Chinese Cinema of the 1930s. In *Cinema Journal* 41,3, 2002, S. 78–97.

Sinification, in the sense of rendering Chi-

nese, or indigenizing a foreign medium, has been a dominant discourse in Chinese film historiography. This article analyzes film music in Chinese cinema of the 1930s and argues that sinification should not be taken as a natural or inevitable process but instead should be viewed as a conditional, negotiated practice, subject to intertwined industrial and political mediations.

Yeung, Ka Chung Lorraine: An Aesthetic of Horror Film Music. In: *Film and Philosophy* 23, 2019, S. 159–178.

In this paper I develop an aesthetic of horror film music based on the film sound theorist Kevin Donnelly's "direct access thesis". This states that horror film scores have the power to provide "direct accesses" "to the bodies of an audience; they "produce bodily sensations, excite (mainly negative) emotions and insert in the audience "frames of mind and attitudes...much like a direct injection". I first argue that two dominant theories in the field, namely, the culturalist theory of film music and Peter Kivy's cognitivist theory of music and emotion are inadequate. Then I will show that by aligning the direct access thesis with Jenefer Robinson's theory of music and emotion, Mark Johnson and Steve Larson's contention that musical meaning is primarily embodied, we will be able to reveal a deeper meaning of horror film scores than musical convention. I illustrate my proposal with the shark motif in *Jaws* and Dies Irae in *The Shining*.
